The Department has reviewed the request dated December 2, 2025 to import 300-400 cubic yards of soil at the Nassau Metals, OU2 site. Based on the information provided, the request is hereby approved.

The proposed fill material meets the Commercial and groundwater protection soil cleanup objectives (SCOs). Therefore, this material may be placed as the top one-foot cover above the demarcation layer as part of the final site cover.

Testing in accordance with DER-10 and the Remedial Design Work Plan and approval by the Department is required for any additional material imported from this source.

Best,
Marlen
