Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

Insight Report
Quantitation/Integration

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

J:\LCMS08\Data\240315_1633_Curve\240315_1633_Curve.damlp .

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

Insight Report
Quantitation/Integration

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

Flag ID key: IRr: Ion Ratio (Relative)

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

SN - Software-calculated S/N ratio outside criteria due to non-target peaks or drift in noise calculation window. Analyst review of noise levels (excluding non-target peaks) in chromatogram indicates S/N ratio meets criteria.

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

Ref 1 Set Ratio assigned from calibration mid-point; Ref 2 Set Ratio assigned from opening calibration verification.
IRr - Ion ratio outside either set of criteria. Exceedances for reported detections to be "I" flagged in the analytical report.

SN - Software-calculated S/N ratio outside criteria due to non-target peaks or drift in noise calculation window. Analyst review of noise levels (excluding non-target peaks) in chromatogram indicates S/N ratio meets criteria.

January 21, 2025 Service Request No:R2500213

Mr. Jeff Danzinger
Day Environmental, Inc.
1563 Lyell Avenue
Rochester, NY 14606

Laboratory Results for: Lighthouse Pointe Inland Site

Dear Mr.Danzinger,

Enclosed are the results of the sample(s) submitted to our laboratory January 08, 2025
For your reference, these analyses have been assigned our service request number **R2500213.**

All testing was performed according to our laboratory's quality assurance program and met the requirements of the TNI standards except as noted in the case narrative report. Any testing not included in the lab's accreditation is identified on a Non-Certified Analytes report. All results are intended to be considered in their entirety. ALS Environmental is not responsible for use of less than the complete report. Results apply only to the individual samples submitted to the lab for analysis, as listed in the report. The measurement uncertainty of the results included in this report is within that expected when using the prescribed method(s), and represented by Laboratory Control Sample control limits. Any events, such as QC failures or Holding Time exceedances, which may add to the uncertainty are explained in the report narrative or are flagged with qualifiers. The flags are explained in the Report Qualifiers and Definitions page of this report.

Please contact me if you have any questions. My extension is 7476. You may also contact me via email at Chris.Leavy@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Christopher Leavy
Project Manager

Client: Day Environmental, Inc.
Project: Lighthouse Pointe Inland Site
Sample Matrix: Soil

Service Request: R2500213
Date Received: 01/08/2025

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Ten soil samples were received for analysis at ALS Environmental on 01/08/2025. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

Semivoa GC:

No significant anomalies were noted with this analysis.

Metals:

When analyzed without dilution, the concentration of one or more elements in one or more samples exceeded the associated single element interference check concentration. As per section 9.9.1 of EPA 6010D, affected samples were diluted to reduce the solution concentration of the high concentration element below the interference check concentration, whether or not the high concentration element was an analyte of interest. The dilution has increased the reporting limits accordingly.

Approved by _____ Date 01/21/2025

SAMPLE DETECTION SUMMARY

This form includes only detections above the reporting levels. For a full listing of sample results, continue to the Sample Results section of this Report.

REPORT QUALIFIERS AND DEFINITIONS

U	Analyte was analyzed for but not detected. The sample quantitation limit has been corrected for dilution and for percent moisture, unless otherwise noted in the case narrative.
J	Estimated value due to either being a Tentatively Identified Compound (TIC) or that the concentration is between the MRL and the MDL. Concentrations are not verified within the linear range of the calibration. For DoD: concentration >40% difference between two GC columns (pesticides/Arclors).
B	Analyte was also detected in the associated method blank at a concentration that may have contributed to the sample result.
E	Inorganics- Concentration is estimated due to the serial dilution was outside control limits.
E	Organics- Concentration has exceeded the calibration range for that specific analysis.
D	Concentration is a result of a dilution, typically a secondary analysis of the sample due to exceeding the calibration range or that a surrogate has been diluted out of the sample and cannot be assessed.
*	Indicates that a quality control parameter has exceeded laboratory limits. Under the "Notes" column of the Form I, this qualifier denotes analysis was performed out of Holding Time.
H	Analysis was performed out of hold time for tests that have an "immediate" hold time criteria.
#	Spike was diluted out.
+	Correlation coefficient for MSA is <0.995.
N	Inorganics- Matrix spike recovery was outside laboratory limits.
N	Organics- Presumptive evidence of a compound (reported as a TIC) based on the MS library search.
S	Concentration has been determined using Method of Standard Additions (MSA).
W	Post-Digestion Spike recovery is outside control limits and the sample absorbance is <50% of the spike absorbance.
P	Concentration >40% difference between the two GC columns.
C	Confirmed by GC/MS
Q	DoD reports: indicates a pesticide/Aroclor is not confirmed (≥100% Difference between two GC columns).
X	See Case Narrative for discussion.
MRL LOQ	Method Reporting Limit. Also known as: Limit of Quantitation (LOQ) The lowest concentration at which the method analyte may be reliably quantified under the method conditions.
MDL	Method Detection Limit. A statistical value derived from a study designed to provide the lowest concentration that will be detected 99% of the time. Values between the MDL and MRL are estimated (see J qualifier).
LOD	Limit of Detection. A value at or above the MDL which has been verified to be detectable.
ND	Non-Detect. Analyte was not detected at the concentration listed. Same as U qualifier.

300.0 Anions/ 350.1/ 353.2/ SM 2320B/ SM 5210B/ 9056A Anions	DI extraction
For analytical methods not listed, the preparation method is the same as the analytical method reference.	

ORGANIC

Preparation Methods for Organic methods are listed in the header of the Results pages.

Regarding "Bulk/5035A":
For soil/solid samples submitted in soil jars for Volatiles analysis, the prep method is listed as "Bulk/5035A". The lab follows the closed-system EPA 5035A protocols once the sample is transferred to a sealed vial, but collection in bulk in soil jars does not follow the collection protocols listed in EPA 5035A. In accordance with the NYSDOH technical notice of October 2012, all results or reporting limits <200 ug/kg are to be considered estimated due to potential low bias.

Results flagged with an asterisk (*) indicate values outside control criteria.

Results flagged with a pound (#) indicate the control criteria is not applicable.

Percent recoveries and relative percent differences (RPD) are determined by the software using values in the calculation which have not been rounded.

Matrix Spike and Matrix Spike Duplicate Data is presented for information purposes only. The matrix may or may not be relevant to samples reported in this report. The laboratory evaluates system performance based on the LCS and LCSD control limits.

APPENDIX E

Waste Transport and Disposal Documentation

September 11, 2025

Mr. Jeffrey A. Danzinger, P.G.
Associate Principal
Day Environmental, Inc
1563 Lyell Avenue
Rochester, NY 14606

Dear Mr. Danzinger:

Open top roll off dumpsters were used for transport and disposal of the soil located at 40 Marina Drive, Shumway Marine. A total of ten 20 cubic yard roll off dumpsters with poly liners were located on site for material storage during the project. All ten dumpsters were removed between February 26, 2025 – March 12, 2025.

Upon jobsite arrival drivers removed any excess debris caught on ledge surfaces surrounding the dumpster before loading onto their trucks. Additionally, the loads were tarped and secured to ensure no debris would blow off the load while in transport. All transport guidelines under the NYS DOT regulations are followed.

We appreciate the opportunity to serve you on this project. Please reach out to me directly if you have any further questions at 585-259-9090 or david.boon@casella.com.

Sincerely,

David M. Boon
Senior Business Development Manager
