ENVIRONMENT

Date,  
September 11, 2006

Dear Mr. Scharf:

Contact:  
Carlo San Giovanni

In accordance with Section III of Administrative Order on Consent (AOC) Index # W1-0018-04-01, this letter reports the activities for Operable Unit 3 (OU3) performed by Northrop Grumman Systems Corporation (NGC) during the month of August 2006; activities planned for September 2006 are also discussed. This report is the sixth OU3 monthly progress report since the AOC between NGC and the New York State Department of Environmental Conservation (NYSDEC) was signed on June 24, 2005.

Extension:  
631-391-5259

### **OU3 Activities Conducted During August 2006**

- Prepared and submitted the July 2006 Monthly Progress Report.
- Continued coordination and planning for Phase 2 RI, including:
  - Prepared and received NYSDEC approval of Work Plan Addendum No. 4 for the drilling and installation of shallow monitoring wells on NGC Plant 24 Access Road property.
  - Continued preparation of work plan addendum to specify the location of test pits and B-43 Area soil borings and summarize procedures for excavating test pits.
- Completed Phase 2 RI activities, including:
  - Drilled/sampled off-site vertical profile borings (VPBs) [one shallow VPB (VP-100) and one deep (VP-104)]. Based on

Imagine the result

preliminary water quality data from the approximate 400 to 600+ ft bls depth range in VP-104, it was decided to drill and sample groundwater from an additional 385 ft at VP-104, making the final depth of VP-104 equal to 885 ft bls.

- Drilled, installed, and developed two shallow monitoring Wells (BCPMW4-1 and BCPMW4-2) on NGC Plant 24 Access Road property.
- Collected groundwater samples from new Monitoring Wells BCPMW4-1 and BCPMW4-2 for VOC analysis. Checked both monitoring wells for the presence of light, non-aqueous phase liquid (LNAPL) and dense, non-aqueous phase liquid (DNAPL); LNAPL and DNAPL were not detected.
- Disposed of remedial investigation-derived containerized soil cuttings that had been staged on NGC property. Collected additional soil samples from more recently containerized soil cuttings for characterization and disposal purposes.
- Monitored on-site Piezometer PZ-1 for LNAPL and DNAPL on a weekly basis; LNAPL and DNAPL have not been detected.
- RI data review/evaluation, including:
  - Continued to prepare boring logs for completed borings.
  - Continued to review preliminary sample analytical results for completed VPBs and soil borings.
  - Continued evaluation of soil quality and CPT/MIP data toward development of the soil boring program as part of Phases 2A and 2B of the RI, which would include confirmatory soil sampling, and the potential installation of piezometers on-site, as needed.
  - Continued validation of analytical data received from laboratory. Tables 1 to 5 summarizing the validated data from April 2006 through end of June 2006 are attached to this report.
  - Continued review of analytical data to determine if data gaps exist.
  - Continued to coordinate with testing laboratory for receipt of results of bench scale testing of VP-3C groundwater sample.

**OU3 Activities Expected During September 2006**

- Prepare and submit August 2006 Monthly Progress Report.
- Continue Phase 2 RI planning/coordination activities, including:
  - Evaluate need for additional monitoring wells and/or VPBs on- or off-site. Prepare work plan addendum specifying proposed work, as appropriate.
  - Finalize work plan addendum for test pits and B-43 Area soil borings and submit to NYSDEC for review and approval.
- Continue Phase 2 RI activities, including:
  - Complete demobilization of off-site VPB VP-104.
  - Complete drilling/sampling of off-site VPB VP-100.
  - Initiate and continue drilling/sampling of off-site VPBs (i.e., VP-103), and evaluate data to determine need for proposed contingency VPBs.
  - Initiate and complete drilling/sampling of on-site VP-23A and VP-35, assuming areas become accessible by Town of Oyster Bay.
  - Monitor on-site Piezometer PZ-1 for LNAPL and DNAPL on a weekly basis.
  - Initiate the Phase 2A RI test pit program and B-43 Area soil borings, assuming approval of the Work Plan Addendum is received from the NYSDEC.
- Continue RI data review/evaluation, as follows:
  - Continue to evaluate CPT/MIP, groundwater, and soil gas data.
  - Receive and begin review of results of bench scale test on water sampled from VP-3C.
  - Continue to validate and tabulate analytical data received from laboratory.
  - Continue to identify and begin preparation of selected figures of analytical results and interpretations.

# ARCADIS

Mr. Steven Scharf  
NYSDEC  
September 11, 2006

- o Continue to prepare boring logs for completed borings.
- o Continue to review analytical data to determine if data gaps exist.

Please contact us if you have any questions.

Sincerely,

ARCADIS G&M, Inc.

  
Carlo San Giovanni  
Project Manager
