Subject:  
June 2007 Monthly Progress Report,  
Northrop Grumman Systems Corporation,  
Operable Unit 3,  
NYSDEC Site ID # 1-30-003A,  
Bethpage, New York.

Date:  
July 10, 2007

Contact:  
David Stern

Dear Steve:

Phone:  
631-391-5284

In accordance with Section III of Administrative Order on Consent (AOC) Index # W1-0018-04-01, this letter reports the activities for Operable Unit 3 (OU3) performed by Northrop Grumman Systems Corporation (Northrop Grumman) during the month of June 2007; activities planned for July 2007 are also discussed. This report is the 15<sup>th</sup> OU3 monthly progress report since the AOC between Northrop Grumman and the New York State Department of Environmental Conservation (NYSDEC) was signed on June 24, 2005. Table 1 provides validated analytical results from groundwater samples that were analyzed for perchlorate. Figures 1 and 2 show completed on- and off-site sample locations, respectively.

### OU3 Activities Conducted During June 2007

- Prepared and submitted the May 2007 AOC Monthly Progress Report.
- Supported NYSDEC public meeting held June 27, 2007.
- Continued coordination and planning for Phase 3 Remedial Investigation (RI), including:
  - Planning in support of potential implementation of contingency off-site VPBs.

Imagine the result

- Continued coordination and planning for OU3 Interim Remedial Measures (IRMs), including:
  - Continued data analysis/reduction from Soil Gas IRM PCTs.
  - Continued development of 75 percent design for Soil Gas IRM.
  - Continued bid process preparation for Soil Gas IRM.
  - Continued development of scope and quantitative analysis in support of Groundwater IRM.
- Conducted Phase 3 RI and IRM field activities, including:
  - Completed soil gas point drilling and sampling west of Park, per the May 2007 work plan.
  - Continued monthly groundwater/perched water monitoring in piezometers and selected wells.
  - Continued drilling and groundwater sampling of off-site VPBs, per the April 2007 submittal per the Phase 3 RI Work Plan.
  - Initiated and completed western area PCT.
  - Continued drilling, installation, and development of off-site monitoring wells, per the Phase 3 RI Work Plan, as provided to NYSDEC in February 2007.
- Continued RI and IRM data review/evaluation, including:
  - Continued preparation of on-site RI Report.
  - Continued review and validation of analytical results for samples collected.
  - Continued analysis and evaluation (via EVS software and other) of data toward development of a revised conceptual site model (CSM).
  - Continued to review RI data and determine the location of data gaps.
  - Continued groundwater and soil treatability testing toward evaluation of remedial technologies for the Groundwater IRM.
  - Continued data analysis and reduction for Soil Gas IRM PCTs.

- Continued to implement Triad Approach™ to RI decision-making through the continued update of draft tables and figures with latest data.

**OU3 Activities Expected During July 2007**

- Prepare and submit June 2007 Monthly Progress Report.
- Continue coordination and planning for Phase 3 Remedial Investigation (RI), including:
  - Planning in support of potential implementation of contingency off-site VPBs.
- Continue Phase 3 RI and IRM field activities, including:
  - Conduct measurement of water levels and groundwater sampling of existing on-site monitoring wells and piezometers as part of on-site RI comprehensive sampling event.
  - Continue drilling and groundwater sampling of off-site VPBs, per the April 2007 submittal per the Phase 3 RI Work Plan.
- RI data review/evaluation, as follows:
  - Continue preparation of on-site RI Report.
  - Continue evaluation of data toward possible revisions to the CSM, assessment of data gaps, and support of planning for IRMs.
  - Continue to validate and tabulate analytical data received from laboratory.
  - Continue to implement Triad Approach™ to RI decision-making through the continued update of draft tables and figures with latest data.
- Conduct planning, implementation, and data review/evaluation for on-site IRMs as follows:
  - Continue data analysis/reduction from Soil Gas IRM PCTs.
  - Complete and submit 75 percent design for Soil Gas IRM.
  - Continue bid process preparation for Soil Gas IRM.
  - Continue groundwater and soil treatability testing toward evaluation of remedial technologies for the Groundwater IRM.

ARCADIS

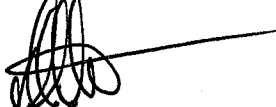

Mr. Steve Scharf  
NYSDEC  
July 10, 2007

- o Continued development of scope and quantitative analysis in support of Groundwater IRM.

Feel free to call us if you have any questions.

Sincerely,

ARCADIS of New York, Inc.

David E. Stern  
Senior Scientist/Hydrogeologist

Michael F. Wolfert  
Project Director
