Dear Steve:

In accordance with Section III of Administrative Order on Consent (AOC) Index # W1-0018-04-01, this letter reports the activities for Operable Unit 3 (OU3) performed by Northrop Grumman Systems Corporation (Northrop Grumman) during the month of March 2008; activities planned for April 2008 are also discussed. This report is the 24th OU3 monthly progress report since the AOC between Northrop Grumman and the New York State Department of Environmental Conservation (NYSDEC) was signed on June 24, 2005.

OU3 Activities Conducted During March 2008

Validated data from the RI and the Soil Gas Interim Remedial Measure (IRM) are provided in Tables 1 and 2, respectively. The site plan showing well and vertical profile boring (VPBs) locations is provided as Figure 1. Activities performed this period include:

- Prepared and submitted the February 2008 AOC Monthly Progress Report.
- Conducted planning, implementation, and data review/evaluation for the OU3 RI/FS as follows:
    - Continued preparation of Site Area Focused Feasibility Study Report (FFS Report).

- Conducted planning, implementation, and data review/evaluation for on-site IRMs as follows:
    - Completed 28-day startup testing program for the Soil Gas IRM.
    - Commenced Soil Gas IRM routine operation, maintenance, and monitoring (OM&M).
    - Continued preparation of Soil Gas IRM as-built drawings.
    - Completed Basis of Design (formerly termed the 50-75 percent design) letter preparation for Groundwater IRM and submitted report to NYSDEC.
    - Began preparation of Final design/construction document for Groundwater IRM.
    - Initiated drilling and development of Groundwater IRM aquifer test pumping/observation wells. Prepared for Groundwater IRM aquifer test.
- Conducted RI/FS field activities including the following:
    - Completed mud rotary (MR) drilling rig mobilization to VP-116. Began and completed drilling and hydropunch groundwater sampling of VP-116. Initiated installation of Monitoring Well MW116-5.
    - Completed MR drilling rig mobilization to VP-113. Began drilling and hydropunch groundwater sampling of VP-113.

OU3 Activities Expected During April 2008

- Prepare and submit March 2008 Monthly Progress Report.
- Conduct planning, implementation, and data review/evaluation for the OU3 RI/FS as follows:
    - Continue preparation of Site Area FFS Report.
    - Continue drilling and hydropunch sampling of off-site VPB VP-113.
    - Complete Monitoring Well MW116-5 installation; demobilize MR drilling rig from location. Mobilize development rig and crew and perform development and complete installation of Monitoring Well MW116-5.
    - Mobilize and commence drilling and hydropunch sampling of off-site VPB VP-115.
- Conduct planning, implementation, and data review/evaluation for on-site IRMs as follows:

- Continue routine OM&M of the Soil Gas IRM.
- Continue preparation of Soil Gas IRM as-built drawings.
- Continue preparation of Final design/construction document for Groundwater IRM.
- Conduct aquifer test as part of design of Groundwater IRM.

Feel free to call us if you have any questions.
