

**Notification Form <sup>(1)</sup>**

Operable Unit 3 Soil Gas IRM System  
Northrop Grumman Systems Corporation  
Bethpage, New York Facility

Incident Date/Time:	Friday, October 14, 2010 17:37		
Prepared By/Affiliation:	Alba Bega / ARCADIS of New York, Inc.		
Alarm Condition:	BL-300 Motor Fault		
Operating Blower(s)	BL-300	Blower Runtime(s):	20881 <sup>(2)</sup>
Description of Problem (based on present knowledge):	The OU-3 Soil Gas IRM shut down on Thursday, 10/14/10 at approximately 17:37. The shutdown was assumed to be caused by a power anomaly. ARCADIS personnel noted that the Groundwater IRM had also shut down at approximately the same time, leading to the conclusion that the shut down was power-related. ARCADIS personnel physically inspected the system on Monday, 10/18/10, cleared the motor fault alarm and restarted the system at approximately 17:47. The system operated as designed after being restarted.		
Current Status:	The system is operating as designed.		
Actions Taken:	The motor fault alarm was cleared and the system was restarted on Monday, 10/18/10. The system has been operating as designed since being restarted.		
Actions Planned:	None.
