**Agenda - NYSDEC and Northrop Grumman Call  
January 8, 2014  
1:00-3:00**

**Purpose: To determine what changes are needed in the OU3 Pre-design Work Plans, based on NYSDEC’s comments dated 12/13/13.**

Expected Attendees: Steve Scharf (NYSDEC), Ed Hannon and Kent Smith (NG), Mike Wolfert, Carlo San Giovanni (ARCADIS), and Joel Balmat (EMAGIN)

**Opening Remarks**

*I. Groundwater IRM Work Plan*

- VPB locations and depths (Comments I.1 and .2)
- Radium and 1,4 Dioxane sampling (Comment I.6)

*II. VOC Source Area Work Plan*

- Less than 10 ppm VOCs as source (Comment II.2)
- Cover material (Comment II.3)
- Sampling northeast of ball field (Comment II.4)
- Radium sampling (Comment II.8)

*III. PCB Work Plan*

- Sampling to support alternative remedies (Comment III.2)
- Cover material (Comment III.3)
- Sampling in area reportedly containing chromium sludge (Comment III.5)
- Radium sampling (Comment III.12)
- Confirmation sampling (Comment III.13)

*IV. Hot Spot Work Plan*

- Design performance standard (90% of mass . . .) (Comment IV.3)
- TICs, Freon, 1,4-dioxane, and radium sampling (Comments IV.4 and .5)
- Schedule (Comment IV.10)

**Action Items**

**Closing Comments and Path Forward**
