

# NAVY PROJECT UPDATE

## Public Meeting on July 30, 2008 Announced

Contractors working on behalf of the United States Navy, under agreement with the New York State Department of Environmental Conservation (NYSDEC), have started construction on a groundwater remediation (i.e. clean-up) project. The GM-38 Area Groundwater Remediation project includes the extraction (i.e. pumping) of volatile organic compound contaminated groundwater and treatment within a pre-engineered steel building. The majority of the construction will occur in the utility easement that is located east of Broadway Ave., west of the Seaford – Oyster Bay Expressway (Route 135), and between the north and south dead ends of Windhorst and Herman Avenues. Some construction and additional drilling will occur within North Herman Ave. (south of Sophia St.), Broadway Ave., and Arthur Ave. The construction entrance is located on the eastern side of Broadway Avenue between residences at 106 Broadway Ave. and 96 Broadway Ave.

Over the next month construction activities will consist of installing a temporary site security fence around the construction, excavation for and installation of the concrete foundation, and trench excavating to install process piping. Work hours are 8 a.m. to 5 p.m. on weekdays. A Restoration Advisory Board meeting will be held at 7 p.m. on Wednesday, July 30, 2008 at the Bethpage Community Center located at 103 Grumman Road West in Bethpage, NY (see attachment). An update on the GM-38 project as well as other Navy projects will be provided at this meeting. For additional information on this project, please write or call the Navy, the Navy contractor, or the NYSDEC using the contact information below:

**Navy Contact:** Lora Fly, Navy Remedial Project Manager
