

CONSTRUCTION NOTICE

September 28, 2020

Please be advised that the Department of the Navy (Navy), in conjunction with the New York State Department of Environmental Conservation (NYSDEC), will be conducting environmental remedial action activities within the Long Island Railroad (LIRR) utility corridor between Hicksville Road and Stewart Avenue starting in October 2020. An underground pipeline will be installed within the LIRR utility corridor to transport contaminated groundwater from a new groundwater recovery well located near Hicksville Road. The pipeline route will be from the new well to Navy's GM-38 Groundwater Treatment Plant located to the east of Broadway Road underneath the power lines. The Navy is undertaking this construction as part of the ongoing remediation of the Navy-Northrop Grumman plume in this area.

Additional information on the Navy's cleanup program is available at <http://go.usa.gov/DyXF>.

The work will involve the excavation of a trench and placement of a double-walled pipe. The pipe will be buried and monitored remotely for leak detection. The pipeline alignment was developed within the LIRR utility corridor to minimize disruption to surrounding neighborhoods during construction.

The Navy and its contractors are taking all reasonable steps to minimize disruption to you and your neighbors during remedial action activities. Heavy equipment will only be operated between the hours of 8:00 AM and 5:00 PM, Monday through Friday, to limit noise disturbance. If it is necessary to visit the work site during other hours or weekends, activities will be kept to a minimum. Construction activities along the LIRR utility corridor are expected to be completed in December 2020.

Considering the safety of the workers, vehicle traffic will be prohibited through the LIRR utility corridor for the duration of construction.

Onsite prime contractor for the Navy will APTIM Federal Services and their subcontractors. Inquiries may be directed to Mr. James Kinley, the Navy's onsite construction manager, or other contacts as listed below.

We appreciate your cooperation and patience as we complete this important project. If you require additional information, please contact:
