

## DRILLING NOTICE

### East Service Road, North of the intersection with Jaqueline Road, Massapequa, NY February 28, 2022

Please be advised that the U.S. Navy, in conjunction with the New York State Department of Environmental Conservation, will be conducting drilling activities in your area, on the western side of East Service Road, north of its intersection with Jacqueline Road. This work is being conducted to test groundwater at a depth of approximately 270 feet below ground surface (bgs). Volatile organic compounds (VOCs), including the solvents trichloroethylene (TCE) and perchloroethylene (PCE), have been detected deep beneath the ground surface in groundwater in the general area as a result of historic operations at the Grumman plant to the north. The drilling is part of an on-going investigation to better understand where the groundwater contamination is located, how it is moving and to develop cleanup options. ***Additional information on the Navy's environmental cleanup program and the groundwater investigation is available at <https://go.usa.gov/DyXF>***

The work will involve installation of one groundwater monitoring well drilled to a depth of approximately 270 feet bgs. The monitoring well will require approximately 4 weeks to install. Access to the monitoring well during the drilling operation will be secured with fencing surrounding the drilling equipment. Any soil and groundwater removed from the boring/monitoring well will be properly containerized in either drums, tanker truck, and/or covered roll offs. These materials will be tested, removed, and disposed of properly on a regular basis. Groundwater samples will be collected from the well and submitted to a certified laboratory to test for the presence of VOCs.

***Because of the depth of the drilling work, the drill rig and support vehicles will be present at this specific location for approximately 4 weeks to complete the well installation. Once the work is completed, the area will be returned to its current condition.***

Work hours will be Monday through Friday, from 7:30 AM to 4:30 PM (no machinery will operate before 8:00 AM). However, periodically during drilling operations, extended work hours and weekend activities may be required. If it is necessary to visit the site during other hours or on the weekends, activities will be kept to a minimum. Drilling activities will start on or around the week of March 14<sup>th</sup>, 2022.

Onsite contractors for the Navy will be Delta Drilling, who will be conducting the drilling operations, and Tetra Tech, who will provide oversight. Inquiries may be directed to Mr. Vincent Varricchio, the Onsite Field Manager, or other contacts as listed below.
