Steve -

The intent of our August 11, 1999 correspondence was to suggest the additional wells to be incorporated in the monitoring plan. The sampling protocol would be consistent with Grumman's however we have not received a copy of Grumman's monitoring plan in draft or otherwise. We have not gotten a response on our August 11 submittal either. The submittal must be updated to reflect the fact that BOCES wells MW1 and MW2 have been replaced by wells MW1GF and MW2GF which are at the northwest and southeast corners of Plant 2. Please let me know if you need a copy of the August 11 submittal. Thanks,  
Dean

Subject: Plant 2 monitoring plan'Dean,

Gannett Flaming has yet to submit a groundwater monitoring plan for plant 2 to be incorporated into the Northrop Grumman hydro geologic monitoring plan. Any time frame for this submittal?

Thanks,  
Steve Scharf

Steve or John -

In order to respond to this request, I need a copy of the Grumman plan referenced in items 4 and 6. Otherwise, I will be able to get back to you on this within a week. Thanks, Dean

Dean,

Thanks. I have a copy of the August 11, 1999 Ganett Fleming letter in my plant 2 file. What I need from you is a sampling plan that will be attached to the Northrop Grumman operation, maintenance and monitoring plan that details:

1. the site history and purpose of the plant 2 monitoring effort;
2. A copy of the building deed restrictions;
3. A synopsis of the Steel Los removal actions and the residual contamination left in place;
4. A reference to the QA/QC of the Grumman plan (ie. methods and protocols) and what the Plant 2 monitoring program is looking for;
5. The Wells that will specifically monitor Plant 2;
6. The location of proposed wells that would fill in the gap of the existing monitoring well network.

Also, for your information, the Plant 2 facility has a new site number, 1-30-003C and has been renamed the Grumman-Steel Los Site.

Steve - Parcel W-1 immediately south of the BOCES building is the westernmost part of the CC recharge basin parcel as listed on the delisting petition map. What would be required to separate that parcel to reclassify or delist based on the data submitted? Thanks, Dean

Yes - they were installed last week. We are preparing a letter to you on the matter and attaching boring and well construction logs. It should be completed by tomorrow. I'll follow up with a call. Talk to you then!

Dean,

Have the two monitoring wells been installed?  
thanks,

Steve

>>> "Dean Devoe" <ddevoe@gfnet.com> 03/03/00 03:44PM >>>

Steve - The plan is to install one well at the northwest corner of Plant 2 and one at the southeast corner. I requested the logs from Rich Walka who should be able to send them today or early Monday. I'll call you shortly to discuss. Thanks Dean

Dean,

We need to conference call with Northrop Grumman with respect to the replacement of monitoring wells M1 and M2 by the South Recharge Basins. If you don't have the completion logs, how deep are you going to place these wells? Where are you proposing to locate them?

We also need to discuss the monitoring plan for the plant 2 facility

Thanks,

Steve

Dean,

It is not clear what you are asking for in your . Any delisting or relisting request must be done so formally to Robert Marino. Yuou must also include a survey done by a licensed land surveyor that clearly delineates the parcels in question. Please call Robert Marino at (518)457-0747 to get all the details of what you need to submit in order to aid in concluding this process.

Thanks,

Steve Scharf
