Bayer MaterialScience LLC
125 New South Road, Hicksville, New York
Phase 2 Operable Unit 4 Remedial Activities
November 5, 2014 Weekly Construction Coordination Meeting Summary
Weekly Progress Report #9 (October 27, 2014 – October 31, 2014)

This memorandum summarizes items discussed during the November 5, 2014 weekly construction coordination meeting, including work performed during the previous week, in connection with the Phase 2 Operable Unit 4 (OU4) remedial activities at the above-referenced Site. The remedial activities are being implemented by Bayer MaterialScience LLC's (Bayer's) remedial contractor (Posillico) with onsite construction/engineering oversight provided by ARCADIS. The work activities during the reporting period were as observed by Gregory McDermott of ARCADIS.

MEETING ATTENDEES

The following personnel attended the weekly construction coordination meeting:

- Steven Scharf – NYSDEC (call-in)
- Renata Ockerby – NYSDOH (call-in)
- Julia Schneider – Cashin Spinelli & Ferretti, LLC (CSF)(representing the Town of Oyster Bay) (call-in)
- Scott Krall – Bayer
- John Brussel – ARCADIS
- David Kingsley – ARCADIS

- Jamie Combes – ARCADIS (call-in)
- Greg McDermott – ARCADIS
- Michael Perciballi – Posillico
- Lee Kaplan – Posillico
- Chris Hurst – Posillico
- Marc Atamian – Posillico
- Daniel Prisco-Buxbaum – Preferred

HEALTH AND SAFETY MOMENT

- ARCADIS discussed safe work practices for crews that will be working on or adjacent to railroad tracks. In anticipation of sampling and excavation associated with excavation area 17B-3 within part of the Long Island Railroad (LIRR) right-of-way, ARCADIS discussed railroad safety, the importance of demarcation of the work area adjacent to the railroad tracks, and knowledge of the train schedule for safe work implementation.

SAFETY/SAFE WORK PRACTICES

- Posillico indicated that no incidents have occurred this week and that work has proceeded safely.

AIR MONITORING

- Preferred continued community air monitoring in accordance with the project-specific Community Air Monitoring Plan (CAMP) during this monitoring period. No exceedances of air monitoring action levels were recorded during this monitoring period.

ACTION ITEMS OUTSTANDING FROM PREVIOUS MEETING

- Posillico revised the critical path method (CPM) schedule to reflect construction activities to date and proposed activities based on the Gloucester County Landfill's October 28, 2014 approval of the profile for the disposal of non-hazardous waste from the Site. A copy of the updated schedule is provided in Attachment A. This schedule is contingent upon obtaining a sufficient number of trucks to transport waste soil from the Site on a routine basis.
- ARCADIS has prepared the "draft" Remedial Design Addendum (RDA) Modification #1 (for additional soil removal in the southeastern portion of the Site) and will finalize/submit it to the New York State Department of Environmental Conservation (NYSDEC) on or before November 14, 2014. A hand-markup figure showing the polychlorinated biphenyl (PCB) soil analytical results that provide the basis for the additional excavation included under RDA Modification #1 was e-mailed to the NYSDEC and discussed on October 15, 2014.

COMPLETED WORK / WORK-IN-PROGRESS

Work activities performed by Posillico and its subcontractors during this period consisted of the following:

- Collecting samples to characterize an additional 2,000 cubic yards (CY) of general fill (run-of-bank sand/gravel) from the offsite clean fill source (Beth Moses Cemetery located in West Babylon, New York) on October 28, 2014. Posillico collected two sample sets (each set representing 1,000 CY of backfill) with each set including one composite sample for semi-volatile organic compounds (SVOCs), inorganics, PCBs, and pesticides, and two discrete samples for volatile organic compounds (VOCs) in accordance with the sampling requirements in Table 5.4(e)10 of the New York State Department of Environmental Conservation (NYSDEC) document titled, "DER-10 Technical Guidance for Site Investigation and Remediation" (DER-10). ARCADIS observed the sampling activities at the fill source. Posillico submitted the fill samples to York Analytical Laboratories, Inc. for analysis. These new samples and previous samples provide characterization data for up to 10,000 CY of general fill.
- Collecting samples to characterize the first 1,000 CY of topsoil from the proposed topsoil source (Beth Moses Cemetery) on October 28, 2014. Posillico collected two composite samples for SVOCs, inorganics, PCBs, and pesticides, and seven discrete samples for VOCs (representing the first 1,000 cubic yards of material to be imported to the Site) in accordance with the sampling requirements in Table 5.4(e)10 of DER-10. ARCADIS observed the sampling activities at the topsoil source. Posillico submitted the topsoil samples to York Analytical Laboratories, Inc. for analysis.
- Transporting two drums of lead-based paint (LBP) chips offsite on October 27, 2014 for disposal at Cycle Chem located in Elizabeth, New Jersey. This work was performed by Posillico's LBP abatement subcontractor, WRS Environmental Services.
- Completing installation of new chain-link perimeter fence along Commerce Place on October 29, 2014. This work was completed by Posillico's fencing subcontractor, Ponderosa Fencing.
- Continuing mobilization of additional equipment, including a Caterpillar 250 Excavator, a John Deere 850 Dozer, and a Caterpillar 563 Dirt Roller.
- Continuing to perform pre-excavation topographic survey activities.
- Continuing backfill of existing Phase 1 OU4 "A" and "B" Group excavation areas. Approximately 599 CY of backfill were placed in existing open Phase 1 "A" and "B" Group excavation areas, in approximately one-foot loose lifts, and compacted.

- Starting backfill of Phase 2 OU4 “C” Group excavation areas. Approximately 203 CY of backfill were placed in Phase 2 “C” Group excavation areas, in approximately one-foot loose lifts, and compacted.
- Starting installation of the site-wide cap and demarcation layer below the cap. Approximately 1,300 CY of backfill was placed and compacted for the 8-inch cap base.
- Continuing import of clean backfill from the Beth Moses Cemetery. Approximately 2,510 CY of backfill was imported from the Beth Moses Cemetery.
- Continuing in-place compaction testing during backfill of existing Phase 1 OU4 “A” and “B” Group and Phase 2 “C” Group excavation areas. This work was completed by Posillico’s in-place compaction testing subcontractor, MT Group.
- Continuing erosion/sedimentation control measures inspection, maintenance, and documentation.
- Continuing routine air monitoring in accordance with the project-specific Community Air Monitoring Plan (CAMP). The air monitoring was performed by Preferred.

PROPOSED WORK ACTIVITIES

Posillico’s two-week “look ahead” schedule is included as Attachment B and summarized below:

- Mobilizing additional equipment, as needed, for project earthwork.
- Start sizing concrete debris in existing Stockpile #10 (to approximately 6-inches or less per the disposal requirements of the Gloucester County Landfill located in Elizabeth, New Jersey).
- Continue excavation of Phase 2 OU4 non-hazardous waste “C” Group excavation areas and staging of the material within the excavation footprint pending offsite transportation and disposal at Gloucester County Landfill.
- Start loading non-hazardous waste soil piles for offsite transportation and disposal at Gloucester County Landfill.
- Start excavation of Phase 2 OU4 hazardous waste “A”, “B” and “C” Group excavation areas.
- Start loading Toxic Substances Control Act- [TSCA-] regulated PCB waste/New York State hazardous waste soil piles for disposal at the Waste Management (WM) Landfill located in Model City, NY disposal facility based on profile approval received from WM on November 7, 2014.

- Continue collecting samples of the clean general backfill and topsoil from Beth Moses Cemetery in accordance with DER-10, and continue to import the general fill and topsoil from the cemetery.
- Continue backfilling and in-place compaction testing of the existing Phase 1 OU4 excavation areas.
- Continue installation of site-wide demarcation layer and cap.
- Remove the water from the steel underground tank (suspected former tower water system return tank) located in the eastern portion of the property and cut the tank steel to render the tank unusable and facilitate transportation of the steel for offsite recycling.
- Continue erosion and sedimentation control measures inspection, maintenance, and documentation.
- Continue air monitoring in accordance with the CAMP.

OPEN DISCUSSION

- The NYSDEC inquired about the status of offsite transportation and disposal of TSCA-regulated PCB waste/New York State hazardous waste soil at WM Landfill in Model City, NY. ARCADIS and Posillico informed the NYSDEC that WM has been provided all requested laboratory reports to supplement the tabulated data previously provided. As of the meeting, approval from WM had not yet been received for disposal of the waste (approval was subsequently received on November 7, 2014).
- Bayer, Posillico, and ARCADIS provided a status update on efforts to secure offsite access:
 - Posillico indicated that it completed the Request for Entry Permit under Step 2 of LIRR's "Guidelines for Obtaining a LIRR Entry Permit" (Guidelines) on October 21, 2014 for access to the LIRR right-of-way for sampling and excavation associated with Excavation Area 17B3. Posillico completed the Insurance submittal under Step 3 of the Guidelines on November 5, 2014. Posillico is waiting for insurance approval and for a LIRR Project Manager to be assigned to the project to complete Step 4 of the Guidelines and to schedule access to the LIRR right-of-way. Work in the LIRR right-of-way is proposed to be completed in two phases, with the first phase involving delineation/confirmation sampling and the second phase involving excavation.
 - Bayer informed the NYSDEC that the access agreement for 70 Commerce LLC was sent on October 28, 2014. ARCADIS followed up in person with the property owner of 70 Commerce LLC on November 4, 2014, and the property owner indicated the access agreement was signed and forwarded back to Bayer (the signed access agreement was subsequently received by Bayer on November 6, 2014).

- The NYSDEC and Bayer informed the call participants that a final monitoring event for the existing onsite OU5 soil vapor monitoring points is scheduled for the week of November 10, 2014.
- The NYSDOH inquired about the safety incident discussed during the October 29, 2014 weekly construction coordination meeting that had resulted in a Posillico union employee being permanently dismissed from the Site. Posillico indicated that the employee was observed conducting clearing activities using a chainsaw without all required personal protective equipment (PPE) (face shield, gloves, and leg chaps). Posillico had previously warned the employee about non-compliance with PPE requirements, and therefore the repeat violation resulted in termination of his employment.
- ARCADIS notified the call participants that no members of the community have visited the site since the October 24, 2014 visit by a representative from the Hicksville Garden Civic Association (HGCA). Bayer indicated that it sent a follow-up letter addressing questions that were raised by the HGCA.
- ARCADIS and Posillico notified the NYSDEC that offsite disposal of the non-hazardous waste soil to Gloucester County Landfill began on November 3, 2014. Gloucester County Landfill has limited Posillico to 30 truckloads per day for offsite disposal. Posillico will subcontract additional waste haulers, as needed, to reach the 30 truckloads per day allowance.
- ARCADIS and Posillico notified the NYSDEC of the status of the Administration Building demolition permit. Posillico completed all performance bond requirements for the Town of Oyster Bay. The rodent inspection will be performed by the Nassau County Department of Health during the week of November 10, 2014, and the Administration Building demolition will need to be started within the week of November 17, 2014.
- Posillico notified call participants of the Thanksgiving holiday schedule. No project site activities will occur on Thursday, November 27, 2014 or Friday, November 28, 2014. Posillico will be available on an emergency basis on both days.

ACTION ITEMS

- There were no new action items from this meeting.

ATTACHMENTS

- Attachment A: Updated Project Schedule
- Attachment B: Posillico's Two-Week "Look Ahead" Schedule

Weekly Air Monitoring Report

**COMMUNITY AIR MONITORING WEEKLY REPORT
(WEEK ENDING 10/31/14)**

**BAYER MATERIALSCIENCE LLC.
OU4 REMEDIAL ACTION – NYSDEC SITE #130004
125 NEW SOUTH ROAD, HICKSVILLE, NEW YORK**

This report summarizes the results of the community air monitoring performed by Preferred Environmental Services (PES) from October 27, 2014 to October 31, 2014 in connection with the implementation of the OU4 remedial action by Posillico Environmental (Posillico) and its subcontractors, on behalf of Bayer MaterialScience LLC. (Bayer) at the Bayer site in Hicksville, New York (the "site").

A. AIR MONITORING ACTIVITIES

Air monitoring activities were performed in accordance with the Community Air Monitoring Plan (CAMP) included as Appendix D to the New York State Department of Environmental Conservation (NYSDEC) approved Remedial Design (ARCADIS, February 2013) for the above referenced site. Air Monitoring was performed at stations that were labeled with the following IDs:

- UP = Upwind
- DN1 = Downwind 1
- DN2 = Downwind 2
- DN3 = Downwind 3

The daily locations of the air monitoring stations are shown on the site maps included in Attachment 1. CAMP monitoring during intrusive activities commenced on October 29, 2014 and continued through October 31, 2014. No intrusive activities were performed on October 27, 2014 or October 28, 2014. On October 29, 2014 particulates were recorded at approximately 0.075 mg/m³ consistently throughout the day, inclusive of the upwind and downwind monitoring stations. These recorded particulate readings are likely attributed to observed intrusive work activities being performed in the street just upwind of the site by the Hicksville Water District. The following day on October 30, 2014 recorded particulate readings were considerably lower consistent with prior CAMP Monitoring. Please note that periods of missing data on October 30, 2014 for station DN3 and October 31, 2014 for station DN1 were due to a defective battery. The battery was replaced by late morning on October 31, 2014.

B. AIR MONITORING RESULTS

No volatile organic compounds (VOCs) or particulates (PM-10) were measured above the action levels in the CAMP for the above-referenced monitoring period. The action levels are 5 parts per million (PPM) above background for VOCs and .150 milligrams per cubic meter (mg/m³) above background for PM-10. The range of VOCs and PM-10 concentrations measured during this monitoring period (15 minute time-weighted averages) are summarized below.

Monitoring Station	VOC Results (PPM)		PM-10 (mg/m ³)	
	Minimum	Maximum	Minimum	Maximum
UP	0.0	0.1	0.001	0.097
DN1	0.0	0.0	0.002	0.096
DN2	0.0	0.0	0.003	0.105
DN3	0.0	0.1	0.001	0.079

The VOC and PM-10 data collected for the week are plotted on the graphs included in Attachment 2. A separate graph is provided for each monitoring station and each graph presents the full set of 15 minute time-weighted averages (TWA) for VOCs and PM-10 for that station. The raw data files from the individual monitors and meteorological data from the weather station are included in Attachment 3.

Please do not hesitate to contact Daniel Prisco-Buxbaum (PES CAMP Monitor) at 516-987-2472, Gregory McDermott (ARCADIS Onsite Construction Oversight) at 516-993-1995 or Andrew Enigk (ARCADIS Assistant Project Manager) at 315-671-9548 if you have any questions or need additional information regarding this report.
