Bayer MaterialScience LLC
125 New South Road, Hicksville, New York
Phase 2 Operable Unit 4 Remedial Activities
December 22, 2014 Weekly Construction Coordination Meeting Summary
Weekly Progress Report #16 (December 15, 2014 – December 19, 2014)

This memorandum summarizes items discussed during the December 22, 2014 weekly construction coordination meeting, including work performed during the previous week, in connection with the Phase 2 Operable Unit 4 (OU4) remedial activities at the above-referenced Site. The remedial activities are being implemented by Bayer MaterialScience LLC's (Bayer's) remedial contractor (Posillico) with onsite construction/engineering oversight provided by ARCADIS. The work activities during the reporting period were as observed by Gregory McDermott of ACRADIS.

MEETING ATTENDEES

The following personnel attended the weekly construction coordination meeting:

- Steven Scharf – NYSDEC (call-in)
- Julia Schneider – Cashin Spinelli & Ferretti, LLC (CSF)(representing the Town of Oyster Bay) (call-in)
- Scott Krall – Bayer (call-in)
- John Brussel – ARCADIS (call-in)
- Andrew Enigk – ARCADIS (call-in)
- Gregory McDermott – ARCADIS

- Chris Hurst – Posillico
- Daniel Prisco-Buxbaum

HEALTH AND SAFETY MOMENT

- Posillico discussed hand injury prevention. The hand is one of the most complex parts of the body. It enables you to execute simple or complex jobs that cannot be performed by any other part of the body.

SAFETY/SAFE WORK PRACTICES

- Posillico indicated that no incidents have occurred this week and that work has proceeded safely.

AIR MONITORING

- PES continued community air monitoring in accordance with the project-specific Community Air Monitoring Plan (CAMP) during this monitoring period. No exceedances of air monitoring action levels were recorded during this monitoring period.

ACTION ITEMS OUTSTANDING FROM PREVIOUS MEETING

- There are no outstanding action items from previous meetings.

COMPLETED WORK / WORK-IN-PROGRESS

Work activities performed by Posillico and its subcontractors during this period consisted of the following:

- Removing polychlorinated biphenyl- (PCB-) impacted soil from the portion of Excavation Area 17B-3 that extends south from the fence line to the property boundary shared by Bayer and the Long Island Railroad (LIRR), which is approximately 2 feet to the south of the fence. The soil removal was performed by Posillico on December 19, 2014. Posillico excavated soil to a depth of 1 foot below ground surface (bgs) from this 10 foot wide by 2-foot long area. The removal limits were determined based on the results of the pre-excavation delineation/verification soil sampling performed on December 3, 2014 and summarized in a December 10, 2014 letter from ARCADIS to the New York State Department of Environmental Conservation (NYSDEC). The soil removed from this area totaled less than 1 cubic yard (CY) and was stockpiled in the material staging area awaiting offsite disposal as a Toxic Substances Control Act- (TSCA-) regulated PCB waste/New York State (NYS) listed hazardous waste.

- Removing soil from the bottom of Excavation Area 13A-1 that was observed to be discolored/stained. The soil removal was conducted by Posillico on December 19, 2014. Posillico excavated soil from an approximately 100 square foot area within the bottom of the excavation to an additional 3.5 to 4.0 feet below the initial bottom, where the limits of the visually impacted material were reached. The final excavation depth in this area was approximately 15.5 to 16 feet below the surrounding ground surface elevation. Approximately 15 CY of soil was removed from this expanded (deepened) excavation was placed directly in a poly-lined roll-off waste container. Posillico collected a sample (sample "Rolloff-1") to characterize the soil for disposal purposes. The rolloff was later transferred from adjacent to Excavation Area 13A-1 to near the material staging area in the western portion of the site.
- Completing test pits at two sampling locations within the central portion of Excavation Area 7C (sampling locations V-RD-275 and V-RD-278, which are within the central portion of the material staging area footprint) on December 19, 2014. The test pits were excavated through native soil that was exposed following removal of that portion of the staging area liner system, including the underlying cushioning layer of "concrete sand". ARCADIS collected verification soil samples from the 1-2 foot and 2-4 foot depth intervals of each test pit. The soil samples were submitted to Pace Analytical Services located in Melville, New York for laboratory analysis for PCBs.
- Continuing to perform pre-excavation, post-excavation, post-backfill, and soil cover system topographic survey activities.
- Continuing removal of soil from Phase 2 OU4 "C" Group excavation areas with PCB concentrations between 10 parts per million (ppm) and 50 ppm or arsenic at concentrations >16 ppm for offsite disposal as a non-hazardous waste. Approximately 750 CY of soil were removed from Area 24C during this reporting period. Approximately 68% of these areas have been excavated as of the end of this reporting period, and the soil from these areas has been stockpiled onsite.
- Continuing to load and transport non-hazardous waste soil for offsite disposal at the Gloucester County Landfill (GCL) located in Swedesboro, New Jersey. Approximately 3,299 tons of non-hazardous waste soils were transported to GCL for disposal during this reporting period. Approximately 89% of the total estimated volume of non-hazardous waste soil for this project had been transported to GCL for disposal by the end of this reporting period.
- Continuing to load TSCA-regulated PCB waste/NYS listed hazardous waste soil offsite for disposal at the Chemical Waste Management (CWM) Chemical Services LLC landfill located in Model City, New York. Approximately 280 tons of TSCA-regulated PCB waste/NYS hazardous waste soil were transported to CWM for disposal during this reporting period. Approximately 85% of the total estimated volume of TSCA-regulated PCB waste/NYS hazardous waste soil for this project had been transported to CWM for disposal by the end of this reporting period.

- Continuing to backfill Phase 1 OU4 “A” and “B” Group and Phase 2 OU4 “B” and “C” Group excavation areas using approximately 660 CY of imported clean backfill from BMC during this period. The imported clean backfill was placed in approximately one-foot loose lifts and compacted. In-place compaction testing was performed on each lift at a minimum frequency of one sample per 2,500 square feet (SF), as required by the *Remedial Design Addendum* (ARCADIS, August 2014)(RDA), by Posillico’s compaction testing subcontractor, MT Group.
- Continuing installation of the site-wide soil cover system and demarcation layer below the system. Approximately 600 CY of imported clean backfill from BMC were placed and compacted during this reporting period to establish the 8-inch base of the soil cover system. Compaction testing was performed in accordance with the RDA, by MT Group. Approximately 32% of the 8-inch cap base had been completed by the end of this reporting period.
- Continuing erosion/sedimentation control measures inspection, maintenance, and documentation.
- Continuing routine air monitoring in accordance with the project-specific CAMP. The air monitoring was performed by PES.

PROPOSED WORK ACTIVITIES

Posillico’s two-week “look ahead” schedule is included as Attachment A and summarized below:

- Mobilize additional equipment, as needed, for project earthwork.
- Remove additional soil from the non-hazardous Phase 2 OU4 “C” Group excavation areas. Soil from these areas will be staged within the excavation footprints pending offsite transportation to GCL for disposal.
- Continue loading existing non-hazardous waste soil piles for offsite transportation to GCL for disposal.
- Continue loading TSCA-regulated PCB waste/NYS hazardous waste soil piles for offsite disposal at the CWM Model City landfill.
- Continue collecting samples from the BMC in accordance with DER-10, and continue importing clean fill material pending receipt of acceptable sample results.
- Continue backfilling and in-place compaction testing of the existing Phase 1 and Phase 2 OU4 excavation areas.
- Continue installation of site-wide soil cover system.

- Continue erosion and sedimentation control measures inspection, maintenance, and documentation.
- Continue air monitoring in accordance with the CAMP.

OPEN DISCUSSION

- ARCADIS notified the meeting participants that Posillico has continued sweeping the site access road on a daily basis to minimize the potential for offsite tracking of soil. Posillico also continued sweeping along New South Road near the site to remove clean soil tracked from the site. Julia Schneider indicated that CSF informed the local residents about the street sweeping, and she commented that the residents were satisfied with the sweeping/street condition.
- ARCADIS and Posillico informed call participants that the 8-inch base portion of the soil cover system is scheduled to be completed by the end of January 2015.
- ARCADIS informed the NYSDEC that the cement kiln dust (CKD) mixed with the saturated TSCA-regulated PCB waste/NYS hazardous waste soil in the material staging area was successful in solidifying the material. A total of 24 tons of CKD was added, and five or six loads of the solidified soil were transported offsite for disposal at the CWM Model City landfill without issue.
- ARCADIS notified the NYSDEC that a grading plan is currently being prepared by ARCADIS for the southeastern portion of the site. The grading plan will: (1) facilitate backfilling by providing more definitive survey/control points for this area that includes multiple adjoining excavations at varying depths (e.g., a large area with erratic surface elevations); (2) improve surface drainage from the area by providing a gentle slope downward toward the rainwater runoff sumps (Sumps 3 and 4, formerly known as AOCs 28 and 29); and (3) reduce the volume of fill that would otherwise need to be imported to restore the area to surrounding pre-remediation grades, which results in fewer trucks on the local roadways importing fill to the site.

ACTION ITEMS

- There were no new action items from this meeting.

ATTACHMENTS

- Attachment A: Posillico's Two-Week "Look Ahead" Schedule
- Attachment B: Weekly Sign-In Sheet

Weekly Air Monitoring Report

**COMMUNITY AIR MONITORING WEEKLY REPORT
(WEEK ENDING 12/19/14)**

**BAYER MATERIALSCIENCE LLC.
OU4 REMEDIAL ACTION – NYSDEC SITE #130004
125 NEW SOUTH ROAD, HICKSVILLE, NEW YORK**

This report summarizes the results of the community air monitoring performed by Preferred Environmental Services (PES) from December 15, 2014 to December 19, 2014 in connection with the implementation of the OU4 remedial action by Posillico Environmental (Posillico) and its subcontractors, on behalf of Bayer MaterialScience LLC. (Bayer) at the Bayer site in Hicksville, New York (the "site").

A. AIR MONITORING ACTIVITIES

Air monitoring activities were performed in accordance with the Community Air Monitoring Plan (CAMP) included as Appendix D to the New York State Department of Environmental Conservation (NYSDEC) approved Remedial Design (ARCADIS, February 2013) for the above referenced site. Air Monitoring was performed at stations that were labeled with the following IDs:

- UP = Upwind
- DN1 = Downwind 1
- DN2 = Downwind 2
- DN3 = Downwind 3

The daily locations of the air monitoring stations are shown on the site maps included in Attachment 1. CAMP monitoring during intrusive activities commenced on December 15, 2014 and continued through December 19, 2014.

B. AIR MONITORING RESULTS

No volatile organic compounds (VOCs) or particulates (PM-10) were measured above the action levels in the CAMP for the above-referenced monitoring period. The action levels are 5 parts per million (PPM) above background for VOCs and .150 milligrams per cubic meter (mg/m³) above background for PM-10. The range of VOCs and PM-10 concentrations measured during this monitoring period (15 minute time-weighted averages) are summarized below.

Monitoring Station	VOC Results (PPM)		PM-10 (mg/m ³)	
	Minimum	Maximum	Minimum	Maximum
UP	0.0	0.0	0.000	0.080
DN1	0.0	0.1	0.004	0.072
DN2	0.0	0.4	0.000	0.074
DN3	0.0	0.5	0.006	0.080

The VOC and PM-10 data collected for the week are plotted on the graphs included in Attachment 2. A separate graph is provided for each monitoring station and each graph presents the full set of 15 minute time-weighted averages (TWA) for VOCs and PM-10 for that station. The raw data files from the individual monitors and meteorological data from the weather station are included in Attachment 3.

Please do not hesitate to contact Daniel Prisco-Buxbaum (PES CAMP Monitor) at 516-987-2472, Gregory McDermott (ARCADIS Onsite Construction Oversight) at 516-993-1995 or Andrew Enigk (ARCADIS Assistant Project Manager) at 315-671-9548 if you have any questions or need additional information regarding this report.
