Alicia:

OK - That makes sense. Revisions to the work plan, incorporating the two rounds of NYSDEC/NYSDOH comments, are underway. I plan to submit the revised work plan to Bayer (Wayne Baldwin) this week for review. I'll make any needed changes based on Wayne's review and will then send the final plan to you and Renata.

Thank you.

-John

John -

Finally heard back from DOH. This is what they said.

1. For initial screening, DOH will accept the use of the 90th percentile values from Appendix C.2 of the NYSDOH Soil Vapor Intrusion Guidance.
2. At this time DOH is okay with the proposed reporting limits found in Table 1 (Revised). At a later time, depending on what is found, they may require lower reporting limits for some constituents.

Will Bayer submit a response letter to DEC's comments letter, or will they simply submit a revised work plan?

Alicia

John -

I got your phone message from Monday and have been waiting for a reply from DOH. Apparently, Renata is out of the office until today. I inquired about the use of the 50th percentile versus the 90th percentile, and if higher reporting limits can be used for indoor and outdoor air as the application here will be for commercial buildings. Will let you know when I get an answer from DOH.

Alicia
