

(Fact Sheet Begins Next)

## Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

## Investigation to Begin at State Superfund Site

The NYS Department of Environmental Conservation (NYSDEC) will soon begin a groundwater investigation south of Old Bethpage Road Old Bethpage, Nassau County, NY. Please see the map for the site location. Documents related to the cleanup of this site can be found at the location(s) identified to the left under "Where to Find Information."

**Investigation Work Plan:** The investigation work plan, called a "Remedial Investigation Work Plan," was developed under New York's State Superfund Program. The site is listed as a Class "4" site in the State Registry of Inactive Hazardous Waste Sites (list of State Superfund sites). Class 4 means that the site previously represented a significant threat to public health or the environment; action was taken and it was then determined that the remedial goals for the site had been met. NYSDEC believes that additional groundwater information is needed south of Old Bethpage Road however, and will oversee this additional investigation work.

**Highlights of the Site Investigation:** The investigation will define the nature and extent of contamination in groundwater.

Ongoing monitoring programs in the area have determined that chlorinated solvent contamination exists in the area. The extent of the groundwater contamination is unknown.

Key components of the investigation work include:

- Installing and sampling vertical profile borings to identify the extent of groundwater contamination;
- Installing and sampling groundwater wells to monitor impacts from areas of concern.

**Next Steps:** The information collected during the investigation will be summarized in a report. The NYSDEC will then assess the findings to determine the appropriate next steps (e.g., further investigation or supplemental remedial program).

**Site Description:** The Claremont Polychemical Corp site is located in a commercial and industrial area of the Town of Oyster Bay, County of Nassau. The groundwater treatment plant and former facility structure (razed) are located on the east side of Winding Road approximately 0.33 miles south of Bethpage Sweet Hollow Road. Adjoining the site property to

the west and north are commercial properties including a trucking company and a commercial distributor. Open space, owned by SUNY Farmingdale, lies to the east of the site and the Bethpage State Park lies to the south. The Old Bethpage Solid Waste Transfer Facility is located on the west side of Winding Road approximately 0.15 miles to the west and the Nassau County Fire Training Center is located approximately 0.35 miles to the south west.

# STATE SUPERFUND PROGRAM

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the Site ID, 130015) at:

<http://www.dec.ny.gov/cfm/external/index.cfm?pageid=3>

**State Superfund Program Overview:** New York's State Superfund Program (SSF) identifies and characterizes suspected inactive hazardous waste disposal sites. Sites that pose a significant threat to public health and/or the environment go through a process of investigation, evaluation, cleanup and monitoring.

NYSDEC attempts to identify parties responsible for site contamination and require cleanup before committing State funds.

For more information about the SSF, visit:

<http://www.dec.ny.gov/chemical/8439.html>

*We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.*

## Receive Site Fact Sheets by Email

Have site information such as this fact sheet sent right to your email inbox. NYSDEC invites you to sign up with one or more contaminated sites county email listservs at:

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

It's quick, it's free, and it will help keep you better informed. As a listserv member, you will periodically receive site-related information/ announcements for all contaminated sites in the county(ies) you select.

Note: Please disregard if you already have signed up and received this fact sheet electronically.
