Long Island Well Application No. W-1221

In the Matter of the Application

- OF -

THE COCA-COLA BOTTLING CO. OF N. Y., INC.

For Approval of the Drilling of a
new well at the bottling plant
at Oyster Bay, Long Island
County, New York.

DOCS 108

Approved on April 15, 1952

Revised on April 22, 1952

Decision on May 10, 1952

PROJECT SUMMARY

This is an application made under the provisions of Section 521-a of the Conservation Law for approval of a well to be put down in Nassau county.

Position verified by Edward Lewis, Vice President of The Coca-Cola Bottling Company of New York, Inc., on April 14, 1952 and filed in the office of the Water Power and Control Commission on the same day. Due notice of the hearing was given by publication in Vestal of Garden City and the hearing was held before Arthur H. Johnson, Associate Engineer of the Commission, in the applicant's office at Cantiague and Brush Hollow Roads, in the town of Oyster Bay, on April 25, 1952 at 11 o'clock in the forenoon. Applicant was represented by Walter H. Cory, Architect-Engineer, by power of attorney. No objections were filed and no one appeared in opposition. Henry E. Frankenthal, Engineer in the Department of Public Works, Nassau County, was present as an observer.

PROJECT

Applicant proposes to sink a well with an 8-inch diameter casing and screen to a total depth of about 125 feet, and to equip it with an electrically operated deep well turbine pump having a rated capacity of 250 gallons a minute. All water after use is to be returned to the ground. Rate of pumpage is not to exceed 250 gallons in any one minute nor 35 million gallons in a year.

FINDINGS OF FACT

1. The Coca-Cola Bottling Company of New York, Inc., is a foreign corporation engaged in the bottling of beverages and is presently constructing an industrial building on the easterly side of Brush Hollow Road and south of Cantiague Road, in the town of Oyster Bay, Nassau county.

2. Applicant proposes to sink a well 132 feet east of Brush Hollow Road and 210 feet south of Cantiague Road. It is to be of standard type with 8-inch casing and screen, about 125 feet deep and equipped with an electrically operated deep well turbine pump of 250 gallons a minute capacity.

3. About 160 gallons per minute of the water will be used for cooling in connection with the refrigeration plant; 80 gallons per minute will be required for washing bottles and similar incidental work.

4. Applicant states that it requires from 78,000 to 240,000 gallons of water daily or about 35 million gallons annually, all of which will be metered.

5. All water used for sanitary and drinking purposes will be purchased from the Toricho Water District.

6. Water used for cooling purposes will be returned to the ground in an uncontaminated condition through a recharge basin. Water used for washing will be returned to the ground through a septic tank and leaching field.

7. There are no known wells on the property.

8. The proposed depth of 11 feet will probably place the well screen in the Glacial tillifer. In this locality withdrawals from this formation are extensive and fluctuations in ground water levels are usually the result of differences in precipitation.

9. The closest public water supply well to this site (N-152) is owned by the Village of Old Westbury and is located about a mile to the west.

10. It appears that to approve the above application will prevent added draft on the water supply resources of Toricho Water District and will have no perceptible effect on the ground water levels of Long Island.

CONDEMNATION

The Commission finds it to be necessary to protect the interests of the applicant and of the people of the State to impose the following conditions:

- A. By authority of this decision and approval applicant is authorized to use water pumped from this well for cooling and washing purposes in the above-described building, but for all other purposes what-

however. This water must be returned, through the recharge basin, leaching field or some other equivalent satisfactory structure, to the same aquifer from which it was pumped.

- D. No cross-connections to any other source of water supply may be installed or maintained.
- E. Detailed plans showing each part of this project must have been submitted to and approved by this Commission before work is started on such part. Plans of a recharge basin or other structure will be considered only after the stratification has been revealed by the sinking of the well. The entire project must be fully completed in accordance with approved plans.
- F. Applicant must install suitable connections to enable the discharge of the pump to be measured. Such fittings and the locations thereof will be specified by the Commission.
- G. This entire plant and the apparatus connected therewith must at all reasonable hours be open to inspection and test by duly accredited agents of this Commission and of the local water authorities.
- H. This decision and approval shall not be held to grant exemption from general restrictions of the use of water for this particular purpose which may at any time be imposed by competent authority.
- I. Applicant shall install, maintain and operate a satisfactory meter or other device to measure and record the amount of water pumped from this well and shall preserve such records. Such measuring device shall be open to all reasonable hours to inspection or test by duly accredited

representatives of this Commission or of the local water authorities. Records of the pumpage shall be made available for inspection or transcription. Applicant shall report the amount of pumpage monthly to this Commission.

- H. The total amount of water which applicant may pump from this well shall not exceed 250 gallons in any one minute nor 35 million gallons in a year.
- I. The Commission reserves the right to reconsider this approval on June 1, 1957, or at any later date and, after due notice and hearing, at that time to continue, rescind or modify this decision in such manner as may be found to be just and equitable.
- J. These works shall be completely constructed prior to June 1, 1955, or within such extended time as may have been applied for and granted by the Commission.

STATUTORY DETERMINATION

In view of the above, the Water Power and Control Commission determines and decides that approval of this application as above modified will protect the public health and public welfare in conserving the supply of water on Long Island for domestic consumption.

- 5 -

DETERMINATION

WHEREFORE, the Water Power and Control Commission does hereby approve the said application, maps and plans of The Coca-Cola Bottling Co. of N. Y., Inc., as thus modified.

IN WITNESS WHEREOF, the Water Power and Control Commission has caused this determination and approval to be signed and has caused its official seal to be affixed hereto and has filed the same with all maps, plans, reports and other papers relating thereto in its office in the city of Albany, on 6th day of May, 1952.

The Coca-Cola Bottling Company

NEW YORK, N.Y.

100 EAST 34TH STREET, NEW YORK 17, NEW YORK

NEW YORK, N.Y.
DEPARTMENT OF CONSERVATION
Water Power and Control Commission

April 14, 1952

To the Honorable
of

The Application of The Coca-Cola Bottling Co. of N.Y., Inc.)
for approval of the siting of a new well at its proposed) Petition
plant at Cantigue Rd., Brush Hollow Rd., Jericho, Town.)
of Oyster Bay, L. I., N.Y.)

To the Water Power and Control Commission of the State of New York:

The petition of The Coca-Cola Bottling Company of New York, N.Y., Inc.
respectfully shows:

The Coca-Cola Bottling Co. of N.Y., Inc. is a corporation formed under the laws of the State of Delaware, engaged in the bottling and distribution of Coca-Cola. The principal office of this corporation is at 425 East 34th St., Borough of Manhattan, New York City.

Mr. Edward P. Lewis, who signs and verifies this petition is the duly elected and qualified and acting Vice President of said corporation and he signs this petition and undertaking on behalf of said corporation by virtue of authority vested in him by resolution duly adopted at a meeting of the Board of Directors of the said corporation, held on April 22, 1952.

Applicant owns the property and is constructing a beverage bottling and distribution plant at the above address and requires well water as hereinafter indicated for the industrial offices and their operations. The property is owned by the applicant and is located on the south side of Cantigue Rd. at Brush Hollow Rd. Jericho Water District serves this area, but the water mains supplying the area are exceptionally low and travel through an extensive farming area before reaching town side, so that the water available for the applicant's operations is deficient in pressure and quantity during periods of large demands by the intervening farmer requirements. It is proposed, however, to use this water supply from the Jericho Water District for the industrial bottling plant and for sanitary facilities. In addition to the above, however, a minimum of 100 g.p.m. will be required per minute for the industrial use of the bottling operation and will further require 100 g.p.m. for cooling in connection with the refrigeration plant. In addition, water is required for washing of bottles and similar incidental work. The total quantity of well water required is 200 g.p.m. The location, size and probable yield of this well are indicated on the attached plan. It is proposed to operate the well in connection with the well and supply the unit with pressure during the winter season and or during the summer season. It is anticipated that the average flow of the well will be 200 g.p.m. and the total use will be not more than 200 g.p.m.

the water is to be used in a safe and proper and no amount is to be lost. The water is to be diffused back into the ground and a diffuser which will be located outside of the building as far as possible from the actual plumbing in order to get away from the supply well. This plan is to be constructed in accordance with the most modern design principles and in conformity with the County Health Dept. requirements. The applicant believes that this project can be carried out without any other interests, that the project will be safe, efficient, and that the quality of the water from the original well will be preserved for the purpose for which it is to be employed.

Very truly,
yours,

Edward P. Lewis, Vice President

UNDERTAKING

The Coca-Cola Bottling Company of N.Y., Inc.

WHEREAS, The Coca-Cola Bottling Co. of N.Y., Inc. of 425 E. 34th St., New York 16, N.Y., has, under the provisions of Article XI of the Conservation Law, applied to the Water Power and Control Commission of the State of New York, for approval of installation of an industrial well in the County of Nassau and State of New York.

Whereas, an undertaking is required to be given under Section 523 of the Conservation Law to cover the expenses of the hearing and determination by said Commission on said application and the amount of said undertaking has been fixed by said Commission in the sum of One Hundred Dollars (\$100.00),

Now, therefore, the said The Coca-Cola Bottling Co. of N.Y., Inc. as principal, and James T. Murray, President thereof, as surety, are held and firmly bound unto The People of the State of New York, in the penal sum of One Hundred Dollars (\$100.00) lawful money of the United States of America, to be paid to the said People of the State of New York, their or its attorney, or assigns for which payment well and truly to be made we bind ourselves, our heirs, executors, administrators, successors and assigns jointly and severally firmly by these presents.

Now the condition of this obligation is such that if the said The Coca-Cola Bottling Co. of N.Y., Inc. shall honestly and faithfully pay on demand by said Commission all expenses of the hearing and determination on said application, as provided by law, then this obligation shall be void and of no effect, otherwise to remain in full force and virtue.

IN WITNESS WHEREOF, the said principal and surety have herunto set their hands and seals this 10th day of April, 1952.

Hugo Spadaro, Office Manager
The Coca-Cola Bottling Co. of N.Y., Inc.
Brush Hollow Road,
Westbury, New York

Dear Sir:

This is to acknowledge receipt of your letter of August 6, 1957 and to inform you that this office is not responsible for maintenance of the meter in your well system. Any maintenance required for the meter is the responsibility of the owner.

If, in your opinion, the meter is not recording properly, it is suggested that you contact a meter repair establishment and have them investigate the situation.

In the event that the meter is removed for repairs and the operation of the well is continued, it will be necessary for you to submit an estimated figure of the amount of water consumed at monthly intervals until the meter has been re-installed.

Very truly yours,
