NEW YORK STATE PATENT AND TRADEMARK COMMISSION

NEW YORK, N. Y., July 11, 1952.

Re: NEW YORK STATE PATENT AND TRADEMARK COMMISSION No. N-1234

In re: Application of

for the Patent of the Application

of

NEW YORK STATE PATENT AND TRADEMARK COMMISSION

for approval of the claiming of a
trade mark at its new plant at 270
Buffly Avenue, New York, County
of Nassau, Long Island, N. Y.

Approved July 11, 1952

Witness testified by Howard H. Plant, President
of New York State Patent and Trade Mark Commission, on July 3, 1952, filed on
July 8, 1952. Notice of hearing given by publication in
Sunday of Garden City. Hearing held before Walter C.
Thorne, Charles E. Jones of the Commission, in the
City of New York, on July 21, 1952, at 10 A. M. Applicant
represented by Howard H. Plant, President. No objections
were filed in the application for opposition.

the Commission shall have the authority to protect the health, safety and welfare of the people of the State by enforcing the following conditions:

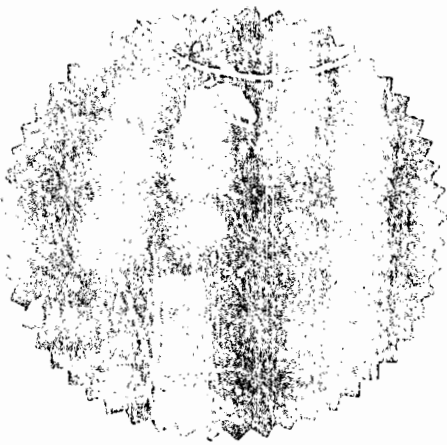

1. The location of the diffusion or approval applicant is authorized to draw water directly from the well or wells for air conditioning or cooling in the above described building, but for no other purpose whatsoever. This water shall be circulated in a completely closed system and all the water must be returned through the proposed diffusion well or wells or some other equivalent satisfactory structure to the same source from which it was drawn.
2. No overflows or connections to sewers or cross-connections to any other source of water supply may be installed or maintained.
3. Detailed plans showing each part of this project must have been submitted to and approved by this Commission before work is started on such part. Plans of a diffuser shall be considered only after the stratification has been reversed by the sinking of the well. The entire project must be fully completed in accordance with approved plans.
4. Applicant must install suitable connections to enable the discharge of the pump to be measured. Such fittings and the locations thereof will be specified by the Commission.
5. No chemical or polluting substance may be discharged in this water or into the diffusion well and the material used in the piping of the cooling system shall be of a nature completely resistant to corrosion which would pollute the water and tend to clog the diffusion well.
6. This entire plant and the apparatus connected therewith must at all reasonable hours be open to inspection and test by duly accredited agents of this Commission and of the local water utility.
7. This decision and approval shall not be held to grant exemption from general restrictions of the use of water for this installation, nor shall any at any time be imposed by public authority.
8. The Commission reserves the right to reconsider this approval on August 1, 1977, or at any later date and, after a public hearing, at that time to continue, amend or rescind this decision in such manner as may be deemed just and equitable.
9. The water supply shall be adequately protected prior to August 1, 1977, and shall be adequately protected thereafter.

In view of the above, the Water Power and Control Commission determines and determines that approval of this application will protect the public health and public welfare in conserving the supply of water of Long Island for domestic consumption.

WHEREFORE, the Water Power and Control Commission does hereby approve the said application, maps and plans as thus modified.

ON WITNESS WHEREOF, the Water Power and Control Commission has caused this determination and approval to be signed and has caused its official seal to be affixed hereto and has filed the same with all maps, plans, reports and other papers relating thereto in its office in the city of Albany this 23rd day of July, 1952.

Appl.

WASS. Co.

NOTARIAL EQUIPMENT CORPORATION

270 DUFFY AVENUE
MICKSVILLE
NASSAU Long Island, N.Y.

P E T I T I O N

To the Honorable Court of the County of Nassau, State of New York:

The Petitioner of the NOTARIAL EQUIPMENT CORPORATION
respectfully sheweth:

That NOTARIAL EQUIPMENT CORP. is a
corporation organized under the laws of the State of New York
and engaged in the manufacture of notary seals. Its principal office
is located at 270 Duffy Avenue, Nassau County, L.I., N.Y.

That Mr. Howard H. Platt, who signs and verified this
petition and is duly qualified and licensed as a notary public in and for the
County of Nassau, State of New York, is the duly
authorized representative and
agent of said corporation
and is duly adopted at
a meeting of the Board of Directors of
said corporation, held

6/10/52

... of the above
... laboratory equipment is manufactured.

...
... North Side of Duffy Avenue,
... will be used for cooling of manu-
facturing equip-
ment of the plant, for the building, and sanitary
purposes to be obtained from municipal water supply.

Paragraph 12 is proposed to read: A well at the point shown
on the accompanying plan. This well is to be 6 inches in diameter,
and is to be about 100 ft. deep. An electrically operated deep well
pumping plant of 100 gallons per minute capacity is to be
installed. Pump capacity is to be 100 gallons per minute with
a daily use of approximately 30,000 gallons. The total
amount of water this well will not exceed 12 millions of
gallons. This is based on an operation period of 12 months
per year.

Paragraph 13 is proposed to read: The water at this plant
is to be used for cooling the machinery, during the
summer months, and therefore is to be used for cooling purposes.
Although it is believed that sufficient water can be obtained from the
municipal supply to meet the needs of the plant, and from which
the desired quantity would be readily be available.

Paragraph 14 is proposed to read: This water in an economical
manner, and the water used at the plant is to be diffused back into the
ground through a specially constructed well to comply with Water
Pollution Control Board regulations.

...that this project can be
completed without injury to other interests, that the proposed
works will be safe and reliable and that the quality of the water
from the proposed well will be suitable for the purposes for which
it is to be employed.

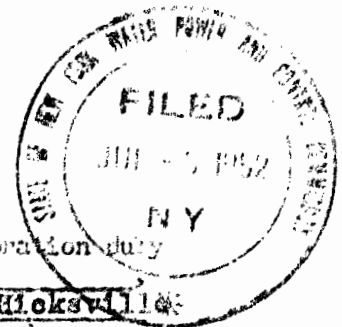

Wherefore, applicant respectfully prays that the Water
Power and Control Commission approve of this well project.

(Semi)

Attest:

At this writing the ... is in progress construction of a
69 gallon per minute well covered by permit #N-3964.

Should this application be approved, well will be de-
signed to meet approval of Water Power and Control Commission.

ENCL. ATTACHED BY AIR MAIL

I, Metalab Equipment Corporation, a corporation duly organized under the laws of the State of New York, having its principal place of business in the city of Hicksville, Long Island, State of New York, does hereby make, constitute and appoint Mr. Harvey Fischer

of Metalab Equipment Corp. its true and lawful attorney, for it, and in its name, place and stead to appear before the WATER POWER AND CONTROL COMMISSION at a hearing or hearings to be fixed by said Commission on an application made pursuant to Section 921-a of the Conservation Law for approval of the installation of a well (or wells) at (state location of proposed well or wells), giving and granting unto its said attorney full power and authority to do and perform all and every act and thing whatsoever, requisite, necessary and proper to be done in the premises, as fully, to all intents and purposes, as it might or could do, hereby ratifying and confirming all that its said attorney shall lawfully do, or cause to be done, by virtue hereof.

In Witness Whereof,
has caused its corporate name to be subscribed hereto by its president, and its corporate seal to be affixed, attested by its secretary, this 3rd day of July, 1952

Long Island Well Application No. W-1292
Metalab Equipment Corporation

Howard M. Biant, President
Metalab Equipment Corporation
270 Duffy Avenue
Hicksville, L.I., New York

Dear Sir:

We are sending you herewith formal approval of wells and permit to operate the same, issued by the Water Power and Control Commission on March 3, 1953.

An inspection of your well installation on February 5, 1953 by an engineer of this Commission revealed that the water used to wash the paint spray booths is being discharged into a pit located about 30 feet east of the supply well. This water is contaminated; the extent of which at the present is not known. Also, discharging the water so close to the supply well presents a possible source of contamination of chemicals contained in this water which could not be removed by filtration during percolation and be drawn into the supply well.

It is recommended that you make an investigation of the situation to determine, if any, preventative measures may be taken.

Very truly yours,

WATER POWER AND CONTROL COMMISSION

Re: Discharge of Industrial Wastes.

Dear Sirs:

On March 26, 1953 a sample of the industrial discharge was taken at your plant in Hicksville. The chemical analysis indicates large quantities of lead present in solution or dissolved insolvents.

We request that a check be retained to determine the best method of treatment. It will be necessary to keep us informed of the progress of this work to eliminate the lead from the point discharge.

We request that action be taken on this program by May 10, 1953.

WELL DRILLER'S PRELIMINARY REPORT MADE 6/26/53 FINAL REPORT 12/19/52

REMARKS Inspected by Engineer Saccareola. All conditions for

the well installation have been complied with. It was also

noted that public supply water used for washing down 3 paint

spray booths is being discharged into a pit about 3' deep which

is located approximately 30' east of the supply well. It is

possible that in the future this contaminated water may be

drawn into the supply well.

RECOMMENDATIONS Approve with H-4094D and issue operating permit.

110. VI - 1232

STATE OF NEW YORK - WATER POWER AND CONTROL COMMISSION

(UNDERWRITING)

WHEREAS,

Metalab Equipment Corporation, Inc., under the provisions of Article VI of the Conservation Law, applied to the Water Power and Control Commission of the State of New York, for approval of installation of industrial wells in the County of Nassau and State of New York.

WHEREAS, an undertaking is required to be given under Section 523 of the Conservation Law to cover the expenses of the hearing and determination by said Commission on said application and the amount of said undertaking has been fixed by said Commission in the sum of

NOW, THEREFORE, the said Metalab Equipment Corporation as principal, and Howard M. Plant, President thereof, as surety, are held and firmly bound unto The People of the State of New York, in the penal sum of ONE HUNDRED DOLLARS lawful money of the United States of America, to be paid to the said People of the State of New York, their or its attorney, or assigns for which payment well and truly to be made we bind ourselves, our heirs, executors, administrators, successors and assigns jointly and severally firmly by these presents.

Now the condition of this obligation is such that if the said Metalab Equipment Corp. shall honestly and faithfully pay or demand by said Commission all expenses of the hearing and determination on said application, as provided by law, then this obligation shall be void and of no effect, otherwise to remain in full force and virtue.

IN WITNESS WHEREOF, the said principal and

surety have hereunto set their hand and

seal this 3rd day of July, 1952

Metalab Equipment Corp.
Howard M. Plant

(Seal)
