RE: 123 Post Avenue, NYSDEC Site No. 130088 - Monthly O&M Summary

Dear Ms. Lozewski:

This document represents the monthly operation & maintenance (O&M) summary for the soil vapor extraction (SVE) system currently operating at the above referenced site. The report summarizes the maintenance and monitoring activities conducted in August 2026.

Routine Operation & Maintenance

Routine O&M activities were conducted on 8/11/26. O&M activities include the collection of operating data such as system vacuum/pressures and air flow rates. During the routine site visits, mechanical components are checked and serviced accordingly. Concentrations of volatile organic compounds (VOCs) in the system's airstream are monitored at key locations using a photo-ionization detector (PID). Prior to use, the PID is calibrated using a 100 ppm isobutylene standard and ambient air. System effluent air samples are collected on a quarterly basis.

O&M Summary

8/11/26 – EAR was onsite to perform routine O&M. The system was operating upon arrival to and departure from the site. No condensate was observed in the moisture separator tank. The site data information sheet for 8/11/26 is provided in Appendix A.

8/26/26 – EAR responded to a system alarm received 8/26/26 at 06:20. The system was found off upon arrival to the site. System was restarted without any issues, monitored for approximately 30 minutes, and operating upon departure from the site. Technician was unable to find any cause for the shutdown. Cause of shutdown may have been due to a momentary area power outage.

Total system uptime for August 2026 is >199%.

System monitoring data for the time period covered in this report is summarized in Table 1.

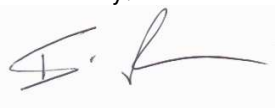

System Air Sampling

A LaBella Company

System air sampling was last conducted on 7/9/26. System air samples are collected on a quarterly basis. As such, system air samples will be collected next during the October 2026 O&M visit.

Should you have any questions regarding the activities or data detailed in this report, please feel free to contact me at 631.241.8741.

Sincerely,

Ian Hofmann
