FACT SHEET

August 2008

Former Trans Technology Corporation
Site Number 1-30-101
Glen Head, New York

Groundwater Investigation Planned for Trans Technology Corporation Site OU-2

* * *

Dear Interested Citizen:

This fact sheet is to inform you about the groundwater investigation planned for the Trans Technology Corporation site at One Robert Lane, Glen Head, New York.

If you have any questions or would like additional information, please contact the staff identified below:

Investigation:

Ms. Tara Diaz
NYSDEC
625 Broadway
Albany, NY 12233-7015
Phone: (518) 402-9621
1-800-225-5337

Health-Related Concerns:

Ms. Jacquelyn Nealon
NYSDOH
Flanigan Square, 547
River St.
Troy, NY 12180-2216
Phone: (518) 402-7880
1-800-458-1158 ext.27880
For additional information on human health and exposure issues, please visit the New York State Department of Health's website at:
<http://www.health.state.ny.us/environmental/about/exposure.htm>

Breeze-Eastern Corporation (formerly Trans Technology Corporation) and their environmental consultant, AMEC Geomatrix, under the direction of the New York State Department of Environmental Conservation (NYSDEC), and the New York State Department of Health (NYSDOH), previously conducted a remedial investigation and feasibility study for the Site which culminated in a Record of Decision (ROD) specifying the remedial actions necessary to address soil contamination at the site (defined as Operable Unit 1 or OU-1*). The OU-1 remediation work is scheduled to occur in the fall of 2008. The remedial investigation also determined that additional sampling data is necessary to delineate the nature and extent of groundwater impacts (designated OU-2), particularly at depths greater than 150 feet and with respect to the potential for off-site impacts.

OU-2 Groundwater Investigation: The OU-2 groundwater investigation will be completed in two phases. Phase 1 will consist of on-site groundwater sampling activities. Phase 2 will consist of off-site groundwater sampling, the specifics of which will be determined based on the on-site results. The Phase I activities will include sampling from existing wells and "groundwater profiling" along the west perimeter of the site. Groundwater profiling is an advanced investigation method whereby boreholes will be drilled to depths greater than 200 feet for collection of groundwater samples to be analyzed in an on-site mobile laboratory. Two groundwater profile holes will be drilled. The results of the Phase I activities will be used to determine the locations of one or more groundwater monitoring wells to be located off the property, most likely west or northwest of the Site. The Groundwater OU-2 Investigation Work Plan is available for public review at the document repositories listed below. The Phase 1 field work is scheduled to start on August 18, 2008.

Document Repositories:

NYSDEC, Region 1

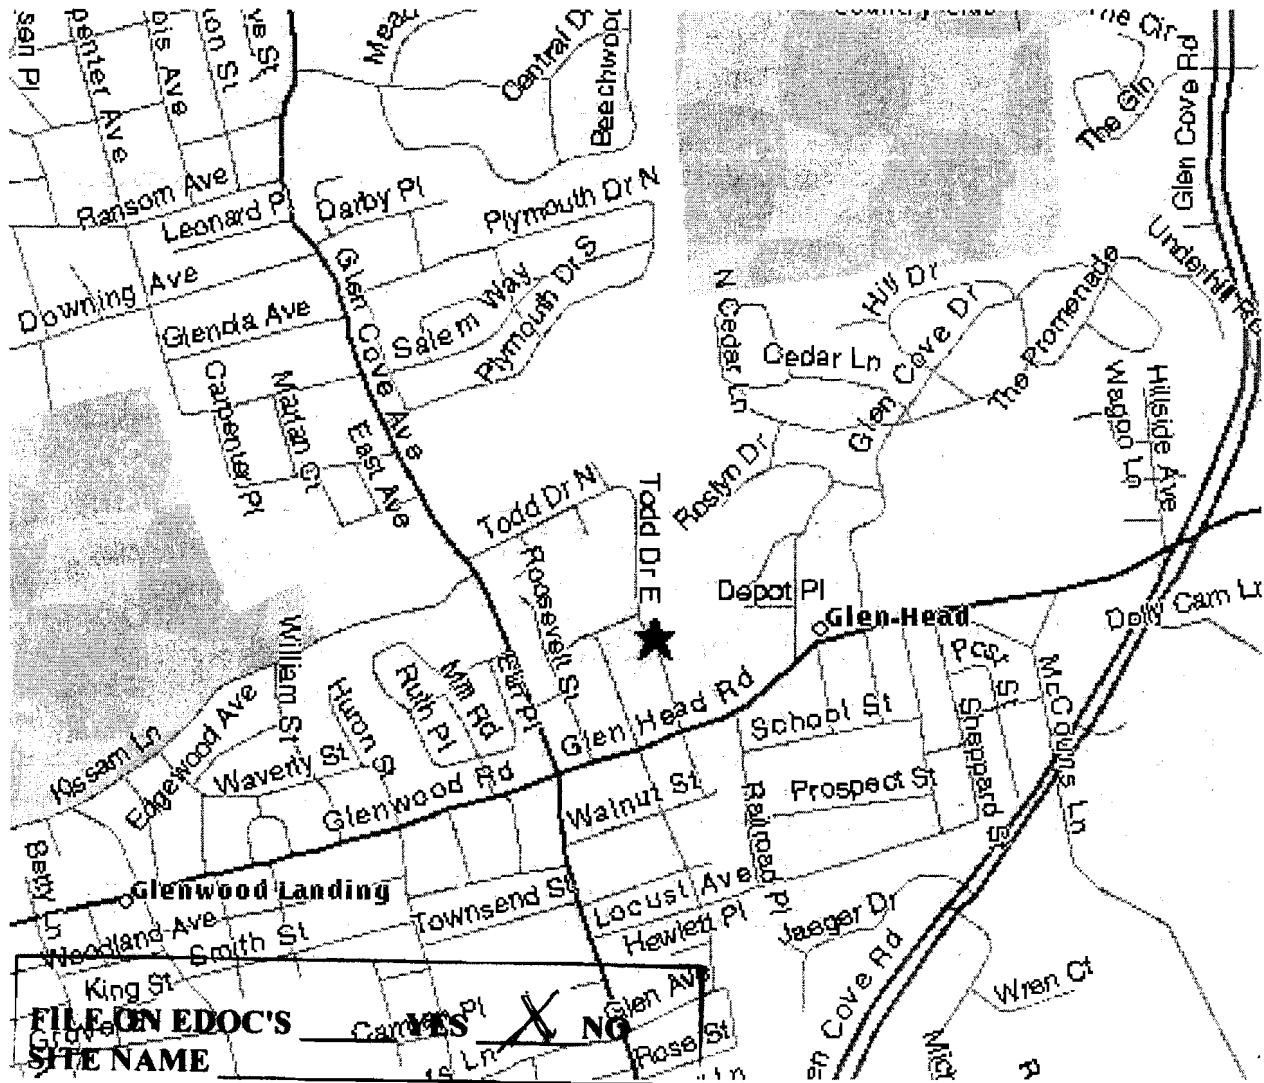

By Appointment
Attn: Mr. Bill Fonda
SUNY - Bldg. 40
Stony Brook, New York 11790-2356
M-F 8:30 AM - 4:30 PM
Phone: (631) 444-0350

Glen Cove Public Library

114 Glen Cove Avenue
Glen Cove, New York 11542-2885
M-Th 9 AM - 9 PM
Fri 9 AM - 5 PM
Sat 9 AM - 1 PM
Phone: (516) 676-2130

*An operable unit represents a portion of the site remedy that, for technical or administrative reasons, can be addressed separately to eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination.
