East Garden City, New York
Site No. 130120
Order on Consent Index No. A2-0552-0606**

Dear Mr. Garland:

This letter provides a summary to the New York State Department of Environmental Conservation (NYSDEC) of GEI Consultants Engineering, Geology, Architecture & Landscape Architecture's (GEI's) oversight of the excavation and associated backfilling work completed by Bond Civil Utility Construction, Inc. (Bond) on behalf of National Grid.

The excavation work was conducted to identify underground assets prior to implementation of planned future construction efforts for the GM-02 project within the Site Management Plan area at the East Garden City Former Stewart Avenue Holder Station Site (the Site). The Notice of Intrusive Activity for this work was submitted to the NYSDEC on March 12, 2026, and the excavation and underground asset identification work was completed on March 21, 2026.

Bond excavated the test pits as part of the GM-02 project on the northeast side of the Site (Figure 1). Bond utilized a vacuum truck to excavate 6 test trenches as part of this effort, with each measuring approximately 6 feet in length, approximately 2 feet in width, and approximately 6 feet in depth. National Grid's Site Investigation and Remediation (SIR) consultant, GEI, was on-site during intrusive activities to perform Site Management Plan (SMP) oversight, including soil screening, intrusive activity documentation and Community Air Monitoring Plan (CAMP) monitoring.

The soil generated from the intrusive work was field screened using a photoionization detector (PID) and inspected for visual and olfactory impacts. No impacts were noted. The soil was temporarily stockpiled on plastic and was used for backfill upon completion of the excavations. Upon completion of backfilling activities, the excavation areas were restored in-kind.

No exceedances of particulate matter or volatile organic compounds were noted during the excavation activities. CAMP air monitoring data can be provided upon request.

If you have any questions, feel free to contact me at (516) 220-4363 or by email at michael.quinlan@nationalgrid.com.
