### State Superfund Site Classification Notice

The Inactive Hazardous Waste Disposal Site Program is New York State's superfund program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on a map on the reverse side of this page, has been added to the Registry as a Class 02 site that presents a significant threat to public health and/or the environment for the following reason(s):

- Elevated levels of tetrachloroethene are present beneath the on-site building slab, which may result in exposures to building occupants from soil vapor intrusion.
- Significant levels of Per- and Polyfluoroalkyl Substances (PFAS) exist in groundwater upgradient of public supply wells.

DEC will keep you informed throughout the investigation and cleanup of the site.

**If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact the DEC Project Manager listed below.**
