

SITE INVESTIGATION INFORMATION

1. SITE NAME Elks Plaza		2. SITE NUMBER 130193	3. a. TOWNSHIP Hempstead	b. CITY/VILLAGE Freeport	4. COUNTY Nassau
5. REGION 1	6. Program Type Superfund				
7. LOCATION OF SITE (Attach U.S.G.S. Topographic Map showing site location)					
a. Quadrangle Freeport		b. Site Latitude <u>40° 39' 06"</u> Site Longitude <u>73° 35' 17"</u>			
c. Tax Map Numbers 62-114-131		d. Site Street Address 189 W. Merrick Rd, Freeport, NY 11520			
8. BRIEFLY DESCRIBE THE SITE (Attach site plan showing disposal/sampling locations)					
<p>The site is located in a small retail shopping center located at 157-189 W. Merrick Rd in Freeport, NY in Nassau County. The building consists of a commercially-zoned, one-story structure built in 1985, which covers approximately 32,820 square feet and a basement area of 10,056 square feet used for parking. The property is 2.5039 acres, most of which is paved parking area. The property is bounded by Merrick Road to the north and commercial lots to the south, east, and west. Residential properties lay beyond the commercial lots surrounding the Site. Several tenants occupy the building, currently none generate, use or dispose of hazardous materials. There were formerly two dry-cleaning facilities within the shopping center. M&B Cleaners operated at #171 (located near the eastern end of the southern portion of the building) from 1995 to 2001 and King and Queen Valet operated at #181 (southwestern corner tenant space) operated from 1985 to 2001. The Site consists of the area occupied by the former King and Queen Valet and the land to the west and south on the property's parcel.</p> <p>Phase I and II Environmental Site Assessments were been conducted in 2006 prompted by financial transaction for the property. A Preliminary Site Assessment (PSA) was completed in March 2010.</p> <p>a. Area <u>0.2195</u> acres b. Completed: <input type="checkbox"/> Financial Assessment <input checked="" type="checkbox"/> PSA <input type="checkbox"/> IRM <input type="checkbox"/> RI/FS <input type="checkbox"/> Construction <input type="checkbox"/> O&M <input type="checkbox"/> Other:</p>					
9. HAZARDOUS WASTE DISPOSED (Include EPA Hazardous Waste Numbers)					
Tetrachloroethene (PCE) (F002/U210), Trichloroethene (TCE) (F002/U228), and cis-1,2-dichloroethene (U079) were found in the groundwater immediately south of the building on the property and within the indoor air and sub-slab vapor in the building and in soil vapor west and south of the building. Laundromat liquid wastes discharge to the on-site septic and then to the municipal sewer.					
10. ANALYTICAL DATA AVAILABLE <input checked="" type="checkbox"/> Air <input checked="" type="checkbox"/> Groundwater <input type="checkbox"/> Surface Water <input type="checkbox"/> Sediment <input checked="" type="checkbox"/> Soil <input type="checkbox"/> Waste <input type="checkbox"/> Leachate <input type="checkbox"/> EPTox <input type="checkbox"/> TCLP					
<p>The primary contaminant of concern at the site is tetrachloroethene (PCE) and its degradation products. PCE was detected at 26 ppb in soil directly underneath the former dry cleaning equipment location in unit 181. No detections were found to be above the soil cleanup objective (1.3ppm) in soils during the PSA. Investigations have found PCE (up to 180 ppb) in the shallow onsite groundwater (approximately 14 ft below ground surface) above the NYSDEC groundwater standard (5 ppb) south (in the direction of groundwater flow) of unit 181. Investigations indicate a plume of groundwater contamination with PCE and its degradation products that extends towards the south, to the property border. PCE was found in sub-slab vapor below unit 181 at elevated levels (14,900 ug/m3). PCE was detected in soil vapor to the west and south (73.8 ug/m3 at SV-1, 71.3 ug/m3 at SV-2) of unit 181. This site does not present a significant threat to the environment.</p>					
11. CONCLUSION					
Documented exceedances of the SCGs for PCE, TCE, and DCE in groundwater and sub-slab soil vapor/ indoor air and the relative shallow depth to groundwater, present a significant threat to the public health. The site should be listed as Class 2 and an RI/FS investigation begun.					
<i>If Institutional Controls are Required: describe:</i>			<i>If so, are they documented? Y () N ()</i>

APPENDIX 2-1: SSF SITE CLASSIFICATION WORKSHEET

Site Name: Elks Plaza Site ID No. 130193

City/Town: Hempstead County: Nassau

1. Has remediation been completed in accordance with a ROD including properly addressing institutional controls (ICs)?	<input type="checkbox"/> Yes (go to 7)	<input checked="" type="checkbox"/> No (go to 2)	
2. Has hazardous waste as defined in ECL §27-1301.1 been disposed at the Site?	<input checked="" type="checkbox"/> Yes (go to 3)	<input type="checkbox"/> No (stop)	Unsure (go to 11)
3. Does the Site present a current or reasonably foreseeable significant threat to public health or the environment (complete Significant Threat Determination Worksheet)?	<input checked="" type="checkbox"/> Yes (go to 4)	<input type="checkbox"/> No (go to 6)	<input type="checkbox"/> Unsure (go to 11)
4. Is the significant threat causing or presenting an imminent danger of causing irreversible or irreparable damage to public health or the environment?	<input type="checkbox"/> Yes (Class 1)	<input checked="" type="checkbox"/> No (go to 5)	<input type="checkbox"/> Unsure (stop)
5. Is the Site presenting a significant but not imminent threat to public health or the environment?	<input checked="" type="checkbox"/> Yes (Class 2)	<input type="checkbox"/> No (reevaluate)	
6. Has hazardous waste been disposed but it does not present a significant threat to public health or the environment and the site is suitable for placement on the Registry?	<input type="checkbox"/> Yes (Class 3)	<input type="checkbox"/> No (go to 10)	
7. Is the site properly remediated but still requires continued active site management to maintain/achieve protectiveness?	<input type="checkbox"/> Yes (Class 4)	<input type="checkbox"/> No (go to 8)	<input type="checkbox"/> Unsure (stop)
8. Is the site properly remediated, does not require continued active site management, but is not suitable for delisting or a required IC is not yet in place?	<input type="checkbox"/> Yes (Class 5)	<input type="checkbox"/> No (go to 9)	<input type="checkbox"/> Unsure (stop)
9. Is the site properly remediated, required ICs are in place, the site does not require continued active site management, and is suitable for delisting?	<input type="checkbox"/> Yes (Class: C)	<input type="checkbox"/> No (go to 10)	<input type="checkbox"/> Unsure (stop)
10. Based upon investigation, is the degree of contamination such that the Site does not qualify to be placed on the Registry and that additional remedial work is not anticipated at this time?	<input type="checkbox"/> Yes (Class: N)	<input type="checkbox"/> No (reevaluate)	<input type="checkbox"/> Unsure (stop)
11. Does insufficient information exist to properly classify the site?	<input type="checkbox"/> Yes (Class P)	<input type="checkbox"/> No (reevaluate)	<input type="checkbox"/> Unsure (stop)

Current Classification: P

Proposed Classification: 2

Summary of Main Factors Contributing to this Determination: The primary factors supporting the classification should be entered in the UIS under "Basis for Class Change/ Significant Threat Determination." For Class 2 determinations, clearly identify what hazardous waste has been disposed and the basis for the significant threat determination (see Appendix 2-2). For other classifications, explain what criteria have been met that justify the reclassification.

APPENDIX 2-2: SIGNIFICANT THREAT DETERMINATION WORKSHEET

State Superfund Program
6 NYCRR 375-2.7

Brownfield Cleanup Program
ECL 27-1411.1(c)

Site Name: Elks Plaza Site ID No. 130193

City/Town: Hempstead County: Nassau

1. Has all available and relevant evidence regarding the Site been reviewed and the factors in 375-2.7(a)(3) considered?	<input checked="" type="checkbox"/> Yes (go to 2)	<input type="checkbox"/> No (stop)	<input type="checkbox"/> Unsure (stop)
2. Does Site contamination result in significant adverse impacts (375-2.7(a)(1)) to:			
a. species that are endangered, threatened, or of concern?	<input type="checkbox"/> Yes (go to b)	<input checked="" type="checkbox"/> No (go to b)	<input type="checkbox"/> Unsure (go to b)
b. protected streams, tidal/freshwater wetlands, or significant fish and wildlife habitat?	<input type="checkbox"/> Yes (go to c)	<input checked="" type="checkbox"/> No (go to c)	<input type="checkbox"/> Unsure (go to c)
c. flora or fauna from bioaccumulation or leads to a recommendation to limit consumption?	<input type="checkbox"/> Yes (go to d)	<input checked="" type="checkbox"/> No (go to d)	<input type="checkbox"/> Unsure (go to d)
d. fish, shellfish, crustacea, or wildlife from concentrations that cause adverse/chronic effects?	<input type="checkbox"/> Yes (go to e)	<input checked="" type="checkbox"/> No (go to e)	<input type="checkbox"/> Unsure (go to e)
e. the environment due to a fire, spill, explosion, or reaction that generates toxic gases, vapors, fumes, mists or dusts?	<input type="checkbox"/> Yes (go to f)	<input checked="" type="checkbox"/> No (go to f)	<input type="checkbox"/> Unsure (go to f)
f. areas where individuals or water supplies may be present and NYSDOH has determined there to be a significantly increased risk to public health (including from soil vapor)?	<input checked="" type="checkbox"/> Yes (go to 3)	<input type="checkbox"/> No (go to 3)	<input type="checkbox"/> Unsure (go to 3)
3. Does Site contamination result in significant environmental damage (375-2.7(a)(2))?	<input type="checkbox"/> Yes (go to 4)	<input checked="" type="checkbox"/> No (go to 4)	<input type="checkbox"/> Unsure (stop)
4. If any box in items 2 or 3 have been checked "Yes," the site presents a significant threat to public health or the environment; check here.	Significant threat to: <input checked="" type="checkbox"/> Public Health <input type="checkbox"/> Environment		
5. If no boxes in items 2 or 3 have been checked "Yes," the site does not present a significant threat to public health or the environment; check here.	<input type="checkbox"/> Not a Significant Threat		

Summary of Main Factors Contributing to this Determination: For Class 2 or BCP significant threat determinations, the main factors leading to the positive significant threat determination should be entered into the UIS under "Basis for Class Change/ Significant Threat Determination." Specify the threat(s) and explain what contaminants, pathways, routes, and/or impacts create the threat (e.g., "High levels of PCE contamination in soil (averaging 2700 ppm in the disposal area) has resulted in significant contamination of shallow groundwater in a sole source aquifer (concentrations exceed 1000 ppb in a 2 acre area both on and off-site) creating a significant threat to the environment. Public health exposures due to the potential for groundwater consumption and exposure to contaminated indoor air from vapor intrusion creates a reasonably foreseeable significant threat to public health."

APPENDIX 6-1

UIS CHECKLIST FOR COMPLETING RECLASSIFICATIONS/ISSUING A CoC

SITE NAME: Elks Plaza SITE ID # 130193

Verify/Update Remedial Site Information - Project update guidance for sites descriptions, environmental assessments as well as basis for classification/threat statements may be found at the following internal web address: <http://internal/home/der/comp/update.html>

- Site Description** (on main site page)
- Site Environmental Assessment** (on main site page)
- Site Health Assessment** (on main site page): requested from DOH by the DER PM, entered by SCS
- Site Name, Address, & Size** (on main site page): verify and notify SCS to make adjustments
- Contacts** (on main site page): verify that all affiliation information is accurate, up to date, and complete
- ~~**Easement Identifier** (via Cross Refs link on main site page): enter County Recording Identifier~~
- Agreement/Order Ref. No.** (via Cross Refs link on main site page): W1-1120-08-04
- ~~**BCP Clean Up Track** (on main site page for BCP sites): select track via drop down~~
- ~~**BCP Off-Site Status** (via Extra Details link on main site page) select via drop down~~
- Allowable Use** (on main site page): verify most restrictive use allowed via drop down, entered by SCS
- ~~**Percent Enzone** (via Extra Details link on main site page) verify for BCP sites via drop down~~

IC/EC Module

- Verify that property information is complete and accurate for all parcels (*see also IGP-8, Reference 7*)
- Verify that owner information is complete and accurate for all parcels
- Verify that contact information is complete and accurate (this will be the certifying party)
- Add Control information, as applicable (if none, check "No Controls Needed" box on site property details page)
 - i. ICs - indicate all types used for the site
 - ii. ECs - indicate all types used for the site
 - iii. Dates - enter all applicable dates, especially "Control In Place" date (= date filed with County Clerk)
 - iv. Control Description - provide a summary of restrictions not copy of easement language

UIS Projects (verify start and end dates, status (PLN/ACT) for all projects, especially:

- Remedial Investigation/Design/Action
- ~~Certificate of Completion~~
- ~~Site Management~~
- ~~Periodic Review~~
- ~~Create next OU and projects for BCP off site contamination, if appropriate~~

4. **eDocs** (verify that all applicable documents, or equivalent, are present and properly named in eDocs for the site)

- Agreement/Order/SAC** (e.g., agreement.C231011.2006-01-01.BCA.pdf)
- ~~**Environmental Easement/Deed Restr.** w/County Clerk Certificate (e.g., easement.130058.2006-01-01.pdf)~~
- ~~**Final Engineering Report** (e.g., report.E915182.2006-01-01.FER.pdf)~~
- ~~**Site Management Plan** (e.g., workplan.130058.2006-01-01.SMP.pdf)~~
- ~~**Certificate of Completion/Release Letter** (e.g., coc.C231011.2006-01-01.pdf)~~
- Site Boundaries** - Provide site drawing, tax map, or aerial photograph that clearly indicates the site boundaries and sufficient surrounding features such as waterbodies, roads, and railways needed to locate and define site.

5. **Site Reclassification** (when all of the items listed above are completed as appropriate)

- ~~BCP, VCP, ERP, SRP to be reclassified to "C" by SCS if no off site remediation is required~~
- Supervisory Review Complete checkbox - checked after all updates to enable export to public website
- HW Registry - package prepared per IGP-6 and sent to SCS for processing
