Albany, NY 12233-7015

RE: Site No. 152029 - Spectrum Finishing, 50 Dale Street, West Babylon, 11704 – February 2016 Groundwater Sampling Event

Mr. Thomas:

This letter summarizes the recent activities conducted by Environmental Assessment & Remediations (EAR) at the above referenced site. A summary of actions, findings and supporting graphics are provided in this document. Site activities were conducted in February 2016 in response to amendment directives provided in the New York State Department of Environmental Conservation (NYSDEC) Standby Contractor Authorization Form (Callout ID: 122036). The callout required that a site inspection be performed and groundwater samples be collected from the twenty-one (21) site monitoring wells. A site location map has been included as Figure 1.

Site Inspection

A site inspection was conducted on February 4, 2016. EAR performed an inspection, as requested, to evaluate monitoring well locations, accessibility and note, if any, depth discrepancies. Based upon visual observations, there is the existing concrete pad at 50 Dale Street with no indication of recent excavation on the property or restricted areas. Weather conditions and plow activities have not resulted in any subsurface soil disturbance. Notification of sampling activities was provided to other businesses in the vicinity with monitoring wells on their property.

As requested, well casings and manhole conditions were inspected; with no major issues of concern observed.

Groundwater Water Monitoring Tasks

Between February 4-10, 2016, EAR collected groundwater samples from nineteen (19) monitoring wells (MW-1S, MW-1D1, MW-2S, MW-2D, MW-4S, MW-4D, MW-5D1, MW-6S, MW-6D1, MW-7S, MW-7D1, MW-9S, MW-11S, MW-12S, MW-12D1, MW-14S, MW-14D1, MW-16S, & MW-16D1). Total well depths were consistent with prior well gauging events and no significant discrepancies in depths were reported. MW-3S and MW-3D manhole cluster could not be located; as such no field screening or samples were collected. Monitoring well locations are illustrated in Figure 2.

Prior to sample collection, depth-to-water and total well depths were gauged and recorded. Groundwater samples were collected utilizing an inertia pump and HDPE tubing. A new length of HDPE tubing was utilized at each well. Each monitoring well was purged of at least one standing well volume prior to screening for pH, temperature, and conductivity. A multi-parameter probe with flow through cell was utilized to determine stabilization. Dissolved oxygen concentrations, and Oxidation Reduction Potential (ORP) were recorded as well. Groundwater sampling sheets have been included in Appendix A.

Samples collected for lab analysis were placed into the appropriate sample containers provided by the laboratory and immediately placed in a cooler with ice to maintain a temperature of 4 degrees Celsius. A total of 19 water samples were submitted to a NYSDEC standby contracted laboratory (Test America, Inc.) for analysis of TCL VOCs via EPA Method 8260C and TAL Metals via EPA Methods 6010C/7470A. All samples were submitted for standard 30-day turn around with Category A deliverables requested. As part of QA/QC, a blind duplicate was submitted for TCL VOCs analysis via EPA Method 8260C.

Monitor well gauging and field screening results are provided in Table 1. Analytical results are summarized for TCL VOCs in Table 2 and for TAL Metals in Table 3. The results are compared to the TOGS 1.1.1 Class GA water quality standards and guidance values¹. A site location map with posted values for cadmium, total chromium, iron, tetrachloroethene and trichloroethylene are provided in the Figures 3 through 7.

The EDD files have been submitted to NYENVDATA. Lab reports are included as Appendix B. Quality assurance/quality control (QA/QC) sample summary tables are provided as Appendix C.

¹ NYSDEC Division of Water Technical & Operational Guidance Series 1.1.1 – Ambient Water Quality Standards and Guidance Values, Class GA (groundwater)

Summary of Analytical Results

Analysis of the groundwater samples collected, indicate the presence of six (6) VOC analytes. None of the VOC analytes detected were reported in concentrations exceeding their respective TOGS 1.1.1 Class GA water quality standards or guidance value limits. Analytical results for mercury concentrations were reported as being below the lower reporting limit (LRL). Of the TAL Metals analytes detected, most notably, cadmium, total chromium and nickel were reported in concentrations exceeding their respective water quality standards/guidance values. Maximum reported concentrations for metals contaminants are summarized below:

Parameter	Maximum Observed Concentration	Sampling Location
Cadmium	134 (ug/L)	MW-12S
Chromium (total)	82.5 (ug/L)	MW-12D1
Nickel	107 (ug/L)	MW-12S

Should you have any questions regarding the activities or data detailed in this report, please feel free to contact me at 631.447.6400.ext.159.

Regards,

Pat Benedetto
Project Manager

CASE NARRATIVE

Client: New York State D.E.C.

Project: DEC West Babylon, NY, Spectrum, 152029

Report Number: 460-108747-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 2/8/2016 6:00 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.2° C.

Receipt Exceptions

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): MW-14D1 (460-108747-2). Sample ID is MW-14D1, but MW-14D on containers. There were no Metal containers received for sample#5 field ID MW-12X.

Thanks,
Luisa

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANICS

Samples MW-14S (460-108747-1), MW-14D1 (460-108747-2), MW-12S (460-108747-3), MW-12D1 (460-108747-4) and MW-12X (460-108747-5) were analyzed for Volatile organics in accordance with EPA SW-846 Methods 8260C. The samples were analyzed on 02/15/2016.

No difficulties were encountered during the Volatile organics analysis.

All quality control parameters were within the acceptance limits.

METALS

Samples MW-14S (460-108747-1), MW-14D1 (460-108747-2), MW-12S (460-108747-3) and MW-12D1 (460-108747-4) were analyzed for Metals in accordance with EPA SW-846 Methods 6010C. The samples were prepared on 02/16/2016 and analyzed on 02/22/2016.

No difficulties were encountered during the Metals analysis.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples MW-14S (460-108747-1), MW-14D1 (460-108747-2), MW-12S (460-108747-3) and MW-12D1 (460-108747-4) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A. The samples were prepared and analyzed on 02/17/2016.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

Creator: Rivera, Kenneth

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	Not present
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	2.2°C, IR #6
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	False	See NCM
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	No analysis requiring residual chlorine check assigned.

ANALYTICAL REPORT

Job Number: 460-108837-1

Job Description: DEC West Babylon, NY, Spectrum, 152029

For:
New York State D.E.C.
625 Broadway
12th Floor
Albany, NY 12233-7017

Attention: Mr. Lawrence M Thomas

Approved for release.
Shalini Williams
Project Management Assistant II
2/25/2016 8:20 AM

Designee for
Melissa Haas, Project Manager I
777 New Durham Road, Edison, NJ, 08817
(203)944-1310
melissa.haas@testamericainc.com
02/25/2016

The test results in this report meet all NELAP requirements unless specified within the case narrative. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. All questions regarding this report should be directed to the TestAmerica Edison Project Manager.

TestAmerica Edison Certifications and Approvals: Connecticut: CTDOH #PH-0200, New Jersey: NJDEP (NELAP) #12028, New York: NYDOH (NELAP) #11452, NYDOH (ELAP) #11452, Pennsylvania: PADEP (NELAP) 68-00522 and Rhode Island: RIDOH LAO00132

CASE NARRATIVE

Client: New York State D.E.C.

Project: DEC West Babylon, NY, Spectrum, 152029

Report Number: 460-108837-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 2/10/2016 3:00 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 1.7° C and 2.7° C.

Receipt Exceptions

As per client's email dated 2/11/2016- Changed lab ID MW-16D to MW-16D1and MW-6D-MW-6D1

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANICS

Samples MW-11 S (460-108837-1), Field Blank (460-108862-1), MW-6 D1 (460-108837-2), MW-5D1 (460-108862-2), MW-6 S (460-108837-3), MW-4D (460-108862-3), MW-16 D1 (460-108837-4), MW-4S (460-108862-4), MW-16 S (460-108837-5), MW-2S (460-108862-5), MW-2D (460-108862-6), MW-4X (460-108862-7) and Trip Blank (460-108862-8) were analyzed for Volatile organics in accordance with EPA SW-846 Methods 8260C. The samples were analyzed on 02/20/2016, 02/22/2016 and 02/23/2016.

The continuing calibration verification (CCV) analyzed in batch 460-351381 was outside the method criteria for the following analyte: Vinyl chloride. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

No other difficulties were encountered during the Volatile organics analysis.

All quality control parameters were within the acceptance limits.

METALS

Samples MW-11 S (460-108837-1), MW-6 D1 (460-108837-2), MW-5D1 (460-108862-2), MW-6 S (460-108837-3), MW-4D (460-108862-3), MW-16 D1 (460-108837-4), MW-4S (460-108862-4), MW-16 S (460-108837-5), MW-2S (460-108862-5) and MW-2D (460-108862-6) were analyzed for Metals in accordance with EPA SW-846 Methods 6010C. The samples were prepared on 02/13/2016 and 02/16/2016 and analyzed on 02/19/2016 and 02/22/2016.

No difficulties were encountered during the Metals analysis.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples MW-11 S (460-108837-1), MW-6 D1 (460-108837-2), MW-5D1 (460-108862-2), MW-6 S (460-108837-3), MW-4D (460-108862-3), MW-16 D1 (460-108837-4), MW-4S (460-108862-4), MW-16 S (460-108837-5), MW-2S (460-108862-5) and MW-2D (460-108862-6) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A. The samples were prepared and analyzed on 02/16/2016 and 02/17/2016.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: New York State D.E.C.

Job Number: 460-108837-1

Lab Section	Qualifier	Description
GC/MS VOA	U	Analyzed for but not detected.
	J	Indicates an estimated value.
Metals	U	Indicates analyzed for but not detected.
	J	Sample result is greater than the MDL but below the CRDL

melissa.haas@testamericainc.com
02/24/2016

The test results in this report meet all NELAP requirements unless specified within the case narrative. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. All questions regarding this report should be directed to the TestAmerica Edison Project Manager.

TestAmerica Edison Certifications and Approvals: Connecticut: CTDOH #PH-0200, New Jersey: NJDEP (NELAP) #12028, New York: NYDOH (NELAP) #11452, NYDOH (ELAP) #11452, Pennsylvania: PADEP (NELAP) 68-00522 and Rhode Island: RIDOH LAO00132

CASE NARRATIVE

Client: New York State D.E.C.

Project: DEC West Babylon, 50

Report Number: 460-108900-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 2/11/2016 5:20 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.0° C.

Receipt Exceptions

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed. Received Metal containers no listed on COC At client request add Metal analysis to login.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

VOLATILE ORGANICS

Samples MW-1 S (460-108900-1), MW-1 D1 (460-108900-2), MW-9 S (460-108900-3), MW-7 D1 (460-108900-4) and MW-7 S (460-108900-5) were analyzed for Volatile organics in accordance with EPA SW-846 Methods 8260C. The samples were analyzed on 02/22/2016.

No difficulties were encountered during the Volatile organics analysis.

All quality control parameters were within the acceptance limits.

METALS

Samples MW-1 S (460-108900-1), MW-1 D1 (460-108900-2), MW-9 S (460-108900-3), MW-7 D1 (460-108900-4) and MW-7 S (460-108900-5) were analyzed for Metals in accordance with EPA SW-846 Methods 6010C. The samples were prepared on 02/13/2016 and analyzed on 02/19/2016.

No difficulties were encountered during the Metals analysis.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples MW-1 S (460-108900-1), MW-1 D1 (460-108900-2), MW-9 S (460-108900-3), MW-7 D1 (460-108900-4) and MW-7 S (460-108900-5) were analyzed for total mercury in accordance with EPA SW-846 Methods 7470A. The samples were prepared and analyzed on 02/17/2016.

No difficulties were encountered during the Hg analysis.

All quality control parameters were within the acceptance limits.

If pH adjustments are required record the information below:

Sample Not(s), adjusted: _____

Preservative Name/Conc.: _____ Volume of Preservative used (ml): _____

Lot # of Preservative(s): _____ Expiration Date: _____

The appropriate Project Manager and Department Manager should be notified about the samples which were pH adjusted.
** Samples for Metal analysis which are out of compliance must be acidified at least 24 hours prior to analysis.*

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	Not present
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	2.0° C IR #6
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	False	Requested analyses are not listed on COC
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	N/A	
Samples do not require splitting or compositing.	N/A	
Residual Chlorine Checked.	N/A	No analysis requiring residual chlorine check assigned.
