REB - 1 2005

January 31, 2005

Mr. Jeffery Trad  
Project Manager  
New York State Department of Environmental Conservation  
Division of Environmental Remediation, Construction Services  
625 Broadway, 12<sup>th</sup> floor  
Albany, NY 12233-7013

RE: November 2004 Status Report  
Ground-Water Remedial Action  
Rowe Industries Superfund Site  
Sag Harbor, New York

Dear Mr. Trad:

The enclosed letter report details the operation status of the full-scale ground-water pump and treat system at the above referenced site. LBG has enclosed an additional copy of the report to be forwarded to the Chief of the Operation Maintenance and Support Section.

Should you or the Operation Maintenance and Support Section have any questions, please feel free to contact myself, Paul Jobmann, or Al Kovalik at (203) 452-3100.

Very truly yours,

LEGGETTE, BRASHEARS & GRAHAM, INC.

*Mark M. Goldberg*  
Mark M. Goldberg, P.E.  
Senior Environmental Engineer

**-DRAFT-**

**PROJECT STATUS MEMORANDUM**

**NO. 11-04**

**TO:** Pamela Tarnes, USEPA

**FROM:** Mark M. Goldberg, P.E.  
Alfred N. Kovalik, P.E.

**DATE:** January 31, 2005

**PROJECT:** Rowe Industries Superfund Site  
Ground-Water Recovery and Treatment System  
November 2004 Status Report  
Sag Harbor, New York

LBG Engineering Services, P.C. (LBG) commenced operation of the ground-water remediation system at the above-referenced site on December 17, 2002. This status report presents a summary of system performance, operation and maintenance, and monitoring activities for the site from November 1, 2004 through November 30, 2004. The report includes a summary of system performance parameters, system operation parameters, analytical results for ground-water, system effluent samples, and air quality results.

**SUMMARY OF SYSTEM PERFORMANCE AND OPERATION**  
*(November 1, 2004 through November 30, 2004)*

1. Hours of operation during the reporting period: 582 hours (81%)
2. Alarm conditions during the reporting period: See Table 1
3. Was the SPDES VOC discharge permit criteria achieved: yes, (Table 2)
4. Total volume of water pumped during the reporting period: 8,127,720 gal.
5. Was the system effluent flow below the SPDES limit of 1,023,000 gpd: yes, (Graph 1)
6. Mass of VOCs recovered during the reporting period: 1.9 pounds
7. Cumulative mass of VOCs recovered since startup on 12/17/02:  
(calculations can be provided upon request) 149.1 pounds
8. Effluent VOC vapor concentration for the reporting period: 0.110 mg/m<sup>3</sup> (Table 3)
9. Was the effluent VOC vapor emission rate below 0.022 lbs/hr.:  
(calculations can be provided upon request) yes (0.00101 lbs/hr.)

## GROUND-WATER RECOVERY SYSTEM STATUS SUMMARY

The following table summarizes select recovery well parameters for the reporting period. Table 4 presents a summary of the quality results for water samples collected from recovery wells. Graph 2 presents PCE concentrations for each recovery well. For wells with water quality that meets or is approaching remedial criteria, Graph 3 presents PCE concentrations at an expanded scale in order to compare them to the PCE aquifer restoration concentration of 5 ug/L. Laboratory analytical reports are included as Appendix I.

Well	Volume Pumped <sup>*</sup> (gal)	Average Flow (gpm)	Minimum Design Flow Required for Plume Capture (gpm)	Total VOC Concentration ( $\mu\text{g/L}$ )	VOC Recovery (lbs)
RW-1	226,126	16.0	26	3.9	0.01
RW-2	452,253	27.0	26	11.0	0.04
RW-3	226,126	18.7	23	10.6	0.02
RW-4*	1,396,880	40.0	13	145.2	1.69
RW-5	2,030,615	55.0	42	23.6	0.40
RW-6	1,015,351	29.9	28	101	0.86
RW-7	2,023,720	69.9	54	36	0.61
RW-8	1,631,321	50.0	46	12.8	0.17
RW-9	1,014,932	31.0	68	9.1	0.08

\*Estimated volume and flow due to sensor power supply malfunction. RW-4 control modification is scheduled for December 7-9.

Recovery wells RW-1, RW-3 and RW-9 had average flows below the minimum design flow required to capture the plume. Below grade pipe cleaning and vault pipe cleaning have been completed on several occasions and the flow has not returned to historical rates in these recovery wells. To increase the flow in RW-1 and RW-3, LBG has investigated the viability of increasing the motor and pump sizes. Larger motors would require new drives and filters. Based on the low concentrations of contaminants being extracted from these wells, the incremental benefit (i.e. mass removed) is minimal and, therefore, is not being pursued further. Impacted groundwater not captured by the on-site recovery wells will be captured by downgradient off-site recovery wells. Flow below the minimum design flow at RW-9 is believed to be caused by iron build-up in a section of pipe between RW-9 and a clean-out port located between RW-8 and RW-9. An attempt was made to construct a mechanical device to help the water jet negotiate the pipe bends, however, the initial tests to direct the water jet were not successful. LBG will install a new clean-out port between RW-8 and RW-9 (near the intersection of Brick Kiln Road and Noyac Road). The clean-out port will be angled in the upstream direction (towards RW-9) to allow the high-pressure water jets to access and clean this section of the piping. LBG also investigated the viability of "pigging" this section of the discharge pipe; an action that will only be considered further if the new clean-out port does not restore flow in RW-9 to historic rates (90 to 100 gpm).

The effluent pH values are below the State Pollutant Discharge Elimination System (SPDES) Applicable or Relevant and Appropriate Requirements (ARARs) of 6.5 on a routine basis. pH readings of water samples from the recovery wells are observed to be in the range of approximately 5.8 to 6.5, which is the background pH for the groundwater in this area.

### BAG FILTER STATUS

The following table presents an operational summary of the bag filter usage and configuration for the reporting period.

Dates	Bank 1	Bank 2	Bank 3
Nov. 1 to Nov. 3	7 of 8 housings used with 200 micron bag filters	7 of 8 housings used with 200 micron bag filters	Not active
Nov. 3 to Nov. 9	7 of 8 housings used with 200 micron bag filters	7 of 8 housings used with 400 micron bag filters	Not active
Nov. 9 to Nov 30	7 of 8 housings used with 400 micron bag filters	7 of 8 housings used with 400 micron bag filters	Not active

No modifications were made to the filter bank configuration or operation during this reporting period.

### OTHER O&M MODIFICATIONS AND FUTURE O&M ACTIVITIES

- On November 15, 2004, injection of the EHC™ product began in the former drum storage area (FDSA). RW-1, RW-2 and RW-3 were shut off to allow water levels to rise in the FDSA, which allowed the EHC™ product to impact more of the subsurface. In addition, these recovery wells were shut off to minimize groundwater flow out of the FDSA. On November 22, 2004, the injection process was completed. A letter report summarizing the events of the injection activities will be provided under separate cover.
- On November 20, 2004, the repaired and recalibrated air stripper blower (ASB) air flow meter was installed. The new readings show the air flow to be approximately 2,000 to 2,100 cfm. The booster blower (BB) air flow meter was removed from the system and sent to the manufacturer for recalibration.
- On November 20, 2004, malfunctioning wellhead pressure sensors at RW-1 and RW-8 were replaced with new sensors.
- On November 20, 2004, a blown fuse was replaced at the RW-9 control panel.
- On November 23, 2004, recharge basin rehabilitation was completed for both basins.

Future O&M activities scheduled for the fall of 2004 and the winter of 2005 include:

- Decommission select monitor wells (MW), soil vapor extraction (SVE) wells, sparge points (SP) and vapor monitoring points (VP) in the FDSA in December;
- Re-calibrate the booster blower air flow meter;
- Move the RW-4 control panel to an above-grade position; and,
- Install a new clean-out port between RW-8 and RW-9.

**MAINTENANCE LOG**  
(November 1, 2004 through November 30, 2004)

Date	Time	System Changes/Modifications	Personnel
11/3/2004		Changed multi-bag filter bags 200 um in bank 1 and 400 um in bank 2; seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed.	MG
11/9/2004		Changed multi-bag filter bags (400 um) in banks 1 and 2 seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed..	MG
11/11/2004	6:54 PM	Communication Failure Alarm.	
		Injection of EHC product in the FDSA began.	TS, MG, ETL, Adventus
11/15/2004	3:25 PM	Reset the communication failure alarm and restarted the system. RW-1, RW-2 and RW-3 will remain off during injection activities to minimize groundwater flow away from the injection area.	MG
		Updated static depth to water levels in recovery wells.	MG
11/17/2004	8:19 PM	ASB Low Pressure Alarm	
11/18/2004	11:12 AM	Replaced broken ASB belt; reset the alarm and restarted the system	MG
11/19/2004	12:12 PM	Turned off recovery well pumps for recharge basin cleaning.	PJ
	4:00 PM	Switched discharge flow from primary basin to secondary basin.	MG
		Replaced wellhead pressure sensors for RW-1 and RW-8.	PJ
		Blown fuses were observed in the RW-1 and RW-9 control panels.	
		Changed multi-bag filter bags (400 um) in banks 1 and 2 seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed.	PJ
11/20/2004	12:20 PM	Replaced fuse in RW-9 and restarted the system (offsite wells only).	PJ
11/22/2004		Injection activities in the FDSA are completed	TS, ETL, Adventus
11/23/2004	8:19 AM	Turned recovery wells off for routine O&M.	TS
		Basin rehabilitation was completed for both discharge basins.	ETL, TS
		Changed multi-bag filter bags (400 um) in banks 1 and 2 seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed.	TS
	2:45 PM	Restarted the system (offsite wells only).	TS

PCE - Tetrachloroethane  
TCE - Trichloroethene  
TCA - 1,1,1-Trichloroethane

DCE - 1,1-Dichloroethene  
DCA - 1,1-Dichloroethane  
cis-DCE - cis-1,2-Dichloroethene  
CT - Carbon Tetrachloride

CF - Chloroform  
MC - Methylene Chloride  
CM - Chloromethane  
CD - Carbon Disulfide

BM - Bromomethane  
CB - Chlorobenzene  
EB - Ethylbenzene  
VC - Vinyl Chloride

RE: Rowe Industries

Order No.: 0411071

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 11/5/2004 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at [lbeyer@american-analytical.com](mailto:lbeyer@american-analytical.com).

Sincerely,

  
Lori Beyer  
Lab Director

**DATA REPORTING QUALIFIERS**

For reporting results, the following "Results Qualifiers" are used:

<b>Value</b>	If the result is greater than or equal to the detection limit, report the value
<b>U</b>	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
<b>J</b>	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
<b>B</b>	Indicates the analyte was found in the blank as well as the sample report "10B".
<b>E</b>	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
<b>D</b>	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
<b>P</b>	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
<b>N</b>	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
<b>H</b>	Indicates sample was received and/or analyzed outside of The method allowable holding time

RE: Rowe

Order No.: 0411112

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 11/11/2004 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at [lbeyer@american-analytical.com](mailto:lbeyer@american-analytical.com).

Sincerely,

Lori Beyer  
Lab Director

**DATA REPORTING QUALIFIERS**

For reporting results, the following "Results Qualifiers" are used:

<b>Value</b>	If the result is greater than or equal to the detection limit, report the value
<b>U</b>	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
<b>J</b>	Indicates an estimated value. The flag is used: <ol style="list-style-type: none"><li>(1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.)</li><li>(2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.</li></ol>
<b>B</b>	Indicates the analyte was found in the blank as well as the sample report "10B".
<b>E</b>	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
<b>D</b>	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
<b>P</b>	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
<b>N</b>	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
<b>H</b>	Indicates sample was received and/or analyzed outside of The method allowable holding time

RE: Rowe Industries

Order No.: 0411133

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 11/17/2004 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at [lbeyer@american-analytical.com](mailto:lbeyer@american-analytical.com).

Sincerely,

Lori Beyer  
Lab Director

**DATA REPORTING QUALIFIERS**

For reporting results, the following "Results Qualifiers" are used:

- |              |   |
|--------------|---|
| <b>Value</b> | If the result is greater than or equal to the detection limit, report the value   |
| <b>U</b>     | Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.  |
| <b>J</b>     | Indicates an estimated value. The flag is used:<br>(1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.)<br>(2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others. |
| <b>B</b>     | Indicates the analyte was found in the blank as well as the sample report "10B".  |
| <b>E</b>     | Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.   |
| <b>D</b>     | This flag identifies all compounds identified in an analysis at a secondary dilution factor.  |
| <b>P</b>     | This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".   |
| <b>N</b>     | This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.  |
| <b>H</b>     | Indicates sample was received and/or analyzed outside of The method allowable holding time  |

RE: Rowe

Order No.: 0411231

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 11/30/2004 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at [lbeyer@american-analytical.com](mailto:lbeyer@american-analytical.com).

Sincerely,

Lori Beyer  
Lab Director

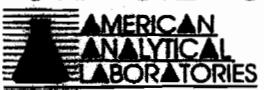

American Analytical Laboratories, LLC.

**DATA REPORTING QUALIFIERS**

For reporting results, the following "Results Qualifiers" are used:

<b>Value</b>	If the result is greater than or equal to the detection limit, report the value
<b>U</b>	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
<b>J</b>	Indicates an estimated value. The flag is used: <ol style="list-style-type: none"><li>(1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.)</li><li>(2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.</li></ol>
<b>B</b>	Indicates the analyte was found in the blank as well as the sample report "10B".
<b>E</b>	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
<b>D</b>	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
<b>P</b>	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
<b>N</b>	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
<b>H</b>	Indicates sample was received and/or analyzed outside of The method allowable holding time

RE: Rowe Industries

Order No.: 0411072

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 9 sample(s) on 11/5/2004 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at [lbeyer@american-analytical.com](mailto:lbeyer@american-analytical.com).

Sincerely,

Lori Beyer  
Lab Director

**DATA REPORTING QUALIFIERS**

For reporting results, the following "Results Qualifiers" are used:

<b>Value</b>	If the result is greater than or equal to the detection limit, report the value
<b>U</b>	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
<b>J</b>	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
<b>B</b>	Indicates the analyte was found in the blank as well as the sample report "10B".
<b>E</b>	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
<b>D</b>	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
<b>P</b>	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
<b>N</b>	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
<b>H</b>	Indicates sample was received and/or analyzed outside of The method allowable holding time

# ANALYTICAL REPORT

JOB NUMBER: 207990

Prepared For:

LEGGETTE, BRASHEARS & GRAHAM  
126 Monroe Turnpike  
Trumbull, CT 06611

Project: ROWE INDUSTRIES

Attention: Mark Goldberg

Date: 11/19/2004

W-DG

Signature

Name: William D. Goodman

Title: Project Manager

E-Mail: wgoodman@stl-inc.com

11/19/2004

Date

STL Connecticut  
128 Long Hill Cross Road  
Shelton, CT 06484

This Report Contains (123) Pages

**STL Report : 207990**  
**LEGGETTE, BRASHEARS, & GRAHAM**

**Case Narrative**

**Sample Receipt** – All samples were received in good condition.

**Volatile Organics** – Air volatile organics were determined by purge and trap GC/MS using guidance provided in Method TO-17.

**Sample Calculation:**

Sample ID- AQ110304:945NP4-1

Compound-Bromomethane

$$\frac{(1201464)(25)}{(1258686)(.313)} = 76.24 = 76 \text{ ng}$$

$$\frac{(76\text{NG})(.08206)(298)}{(.5\text{L})(95)(1.0\text{ATM})} = 39.12 = 39.1 \text{ nL/L.}$$

Sample AQ110304:945NP4-1 was analyzed at a sample volume of .5L for high targets. The target compound, tetrachloroethene, was still above the calibration curve despite the lower sample volume. This compound was flagged with an "A".

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in the case narrative.

## SAMPLE INFORMATION

## QUALITY ASSURANCE METHODS

### REFERENCES AND NOTES

Report Date: 11/19/2004

#### REPORT COMMENTS

- 1) All pages of this report are integral parts of the analytical data. Therefore, this report should be reproduced only in its entirety.
- 2) Soil, sediment and sludge sample results are reported on a "dry weight" basis except when analyzed for landfill disposal or incineration parameters. All other solid matrix samples are reported on an "as received" basis unless noted differently.
- 3) Reporting limits are adjusted for sample size used, dilutions and moisture content if applicable.
- 4) The test results for the noted analytical method(s) meet the requirements of NELAC. Lab Cert. ID# 10604
- 5) According to 40CFR Part 136.3, pH, Chlorine Residual and Dissolved Oxygen analyses are to be performed immediately after aqueous sample collection. When these parameters are not indicated as field (e.g. pH Field) they were not analyzed immediately, but as soon as possible on laboratory receipt.

#### Glossary of flags, qualifiers and abbreviation

##### Inorganic Qualifiers (Q-Column)

- U Analyte was not detected at or above the reporting limit.
- < Not detected at or above the reporting limit.
- J Result is less than the RL, but greater than or equal to the method detection limit.
- B Result is less than the CRDL/RL, but greater than or equal to the IDL/MDL.
- S Result was determined by the Method of Standard Additions.

##### Inorganic Flags (Flag Column)

- ICV,CCV,ICB,CCB,ISA,ISB,CRI,CRA,MRL: Instrument related QC exceed th upper or lower control limits.
- \* LCS, LCD, MD: Batch QC exceeds the upper or lower control limits.
- + MSA correlation coefficient is less than 0.995.
- 4 MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
- E SD: Serial dilution exceeds the control limits.
- H MB, EB: Batch QC is greater than reporting limit or had a negative instrument reading lower than the absolute value of the reporting limit.
- N MS, MSD: Spike recovery exceeds the upper or lower control limits.
- W PS: Post-digestion spike was outside 85-115% control limits.

##### Organic Qualifiers (Q - Column)

- U Analyte was not detected at or above the reporting limit.
- ND Compound not detected.
- J Result is an estimated value below the reporting limit or a tentatively identified compound (TIC).
- Q Result was qualitatively confirmed, but not quantified.
- C Pesticide identification was confirmed by GC/MS.
- Y The chromatographic response resembles a typical fuel pattern.
- Z The chromatographic response does not resemble a typical fuel pattern.
- E Result exceeded calibration range, secondary dilution required.

##### Organic Flags (Flags Column)

- MB,EB, MLE: Batch QC is greater than reporting limit.
- \* LCS, LCD, CCV, MS, MSD, Surrogate, RS:Batch QC exceeds the upper or lower control limits.
- A Concentration exceeds the instrument calibration range or below the reporting limit.
- B Compound was found in the blank.
- D Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution will be flagged with a D.
- H Alternate peak selection upon analytical review
- I Indicates the presence of an interference, recovery is not calculated.
- M Manually integrated compound.
- P The lower of the two values is reported when the % difference between the results of two GC columns is greater than 25%.

## QUALITY ASSURANCE METHODS

### REFERENCES AND NOTES

Report Date: 11/19/2004

#### Abbreviations

Batch	Designation given to identify a specific extraction, digestion, preparation set, or analysis set
CAP	Capillary Column
CCB	Continuing Calibration Blank
CCV	Continuing Calibration Verification
CF	Confirmation Analysis
CRA	Low Level Standard Check - GFAA; Mercury
CRI	Low Level Standard Check - ICP
Dil Fac	Dilution Factor
DL	Secondary dilution and analysis
DLFac	Detection Limit Factor
DSH	Distilled Standard - High Level
DSL	Distilled Standard - Low Level
DSM	Distilled Standard - Medium Level
EB	Extraction Blank
ICB	Initial Calibration Blank
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ISA	Interference Check Sample A
ISB	Interference Check Sample B
Job No.	The first six digits of the sample ID which refers to a specific client, project and sample group
Lab ID	An 8 number unique laboratory identification
LCD	Laboratory Control Standard Duplicate
LCS	Laboratory Control Standard with reagent grade water or a matrix free from the analyte of interest
MB	Method Blank or (PB) Preparation Blank
MD	Method Duplicate
MDL	Method Detection Limit
MLE	Medium Level Extraction Blank
MRL	Method Reporting Limit Standard
MSA	Method of Standard Additions
MS	Matrix Spike
MSD	Matrix Spike Duplicate
ND	Not Detected
PACK	Packed Column
PREPF	Preparation factor used by the Laboratory's Information Management System (LIMS)
PS	Post Spike
PSD	Post Spike Duplicate
RA	Re-analysis
RE	Re-extraction and analysis
RL	Reporting Limit
RPD	Relative Percent Difference of duplicate (unrounded) analyses
RRF	Relative Response Factor
RS	Reference Standard
RT	Retention Time
RTW	Retention Time Window
SampleID	A 9 digit number unique for each sample, the first six digits are referred as the job number
SCB	Seeded Control Blank
SD	Serial Dilution
UCB	Unseeded Control Blank

One or a combination of these data qualifiers and abbreviations may appear in the analytical report.

**STL-Connecticut**  
**Certification Summary (as of October 2004)**

The laboratory identification numbers for the STL-Connecticut laboratory are provided in the following table. Many states certify laboratories for specific parameters or tests within a category (i.e. method 325.2 for wastewater). The information in the following table indicates the lab is certified in a general category of testing such as drinking water or wastewater analysis. The laboratory should be contacted directly if parameter-specific certification information is required.

Certification Summary (as of October 2004)				
State	Department	Certified Category	Expiration Date	Laboratory ID
Connecticut	Department of Health Services	Drinking Water, Wastewater	12/31/04	PH-0497
Maine	Department of Health and Environmental Services	Drinking Water, Wastewater/Solid, Hazardous Waste	04/18/06	CT023
Massachusetts	Department of Environmental Protection	Potable/Non-Potable Water	06/30/05	CT023
New Hampshire	Department of Environmental Services	Drinking Water, Wastewater	08/29/05	2528
New Jersey	Department of Environmental Protection	Drinking Water, Wastewater	06/30/05	46410
New York	Department of Health	CLP, Drinking Water, Wastewater, Solid/ Hazardous Waste NELAC	04/01/05	10602
Rhode Island	Department of Health	Chemistry...Non- Potable Water and Wastewater	12/30/04	A43
Utah	Department of Health	RCRA	05/31/05	2032614458
