

SUMMARY OF SYSTEM OPERATIONS
(April 1, 2007 through April 30, 2007)

<i>Reporting period:</i>	30 days
<i>Volume of contaminated ground water treated:</i>	11,057,210 gallons
<i>Volume of contaminated groundwater treated since 12/17/02:</i>	596,963,433 gallons
<i>Mass of Volatile Organics (VOCS) removed from groundwater:</i>	0.8 pounds
<i>Cumulative mass of VOCs removed from groundwater since 12/17/02:</i>	202.4 pounds
<i>No. hours of operation during reporting period:</i>	483 hours (67 %)*
<i>No. of operating recovery wells:</i>	8 out of 9 recovery wells (RW-1 was shut down on July 13, 2005)

*Downtime includes maintenance periods.

COMMUNITY INVOLVEMENT

EPA will continue to send out this type of update to let the community know how the site cleanup is progressing. A copy of this update and other site-related documents are available at the John Jermain Library for the public's review. If you have any questions about this update or the site in general, please contact:

-DRAFT-

PROJECT STATUS MEMORANDUM

NO. 04-07

TO: Pamela Tames, USEPA

FROM: Mark M. Goldberg, P.E.
Tunde H. Komubes-Sandor

DATE: June 26, 2007

PROJECT: Rowe Industries Superfund Site
Ground-Water Recovery and Treatment System
April 2007 Status Report
Sag Harbor, New York

LBG Engineering Services, P.C. (LBG) commenced operation of the ground-water remediation system at the above-referenced site on December 17, 2002. This status report presents a summary of system performance, operation and maintenance, and monitoring activities for the site from April 1, 2007 through April 30, 2007. The report includes a summary of system performance parameters, system operation parameters, analytical results for ground water, system effluent samples, and air quality results.

SUMMARY OF SYSTEM PERFORMANCE AND OPERATION

(April 1, 2007 through April 30, 2007)

1. Hours of operation during the reporting period: 483 hours (67%)
2. Alarm conditions during the reporting period: See Table 1
3. Was the SPDES VOC discharge permit criteria achieved: yes, (Table 2)
4. Total volume of water pumped during the reporting period: 11,057,210 gal.
5. Was the system effluent flow below the SPDES limit of 1,023,000 gpd: yes, (Graph 1)
6. Mass of VOCs recovered during the reporting period: 0.8 pounds
7. Cumulative mass of VOCs recovered since startup on 12/17/02: 202.4 pounds
(calculations can be provided upon request)
8. Effluent VOC vapor concentration for the reporting period: 0.09 mg/m³ (Table 3)
9. Was the effluent VOC vapor emission rate below 0.022 lbs/hr.: yes (0.00086 lbs/hr)
(calculations can be provided upon request)

GROUND-WATER RECOVERY SYSTEM STATUS SUMMARY

The following table summarizes select recovery well parameters for the reporting period. Table 4 presents a summary of the quality results for water samples collected from recovery wells. Graph 2 presents PCE concentrations for each recovery well. For wells with water quality that meets or is approaching remedial criteria, Graph 3 presents PCE concentrations at an expanded scale in order to compare them to the PCE aquifer restoration concentration of 5 ug/L. Laboratory analytical reports are included as Appendix I.

Well	Volume pumped (gal)	Average Flow (gpm)	Lowest Measured Flow (gpm)*	Total VOC Concentration ($\mu\text{g}/\text{L}$)	VOC Recovery (lbs)
RW-2	841,392	27	13	27.7	0.19
RW-3	333,596	8	10	0	0
RW-4	738,466	24	10	10	0.06
RW-5	1,472,448	50	50	0	0
RW-6	404,759	15	15	36.3	0.12
RW-7	3,386,020	70	69	34.0	0.96
RW-8**	1,625,064	55	41	2.2	0.03
RW-9**	2,202,808	77	16	0	0

*Lowest measured flows are based on the lowest average 24-hour pumping rates for each well recorded to date.

** The RW-8 and RW-9 flow meters were not functioning properly for part of the month so the total volume pumped was calculated using the flow totalizer when it was working and using the product of the average flow and the hours of operation when the flow totalizer was malfunctioning.

Based on the results of the updated ground-water model for the site, the plume is not migrating beyond the influence of the FSP&T system if the recovery well pumps operate at or above the "Lowest Measured Flows". The average monthly pumping rates for all recovery wells except RW-3 are at or above the "Lowest Measured Flows". Recovery well RW-3 had an average monthly flow below its "Lowest Measured Flow"; however, recent ground-water modeling suggests that the plume does not migrate beyond the influence of the FSP&T system when RW-3 is not operating. The updated ground-water model is discussed in the 2006 Annual Report for the site.

The effluent pH of the treated water from the FSP&T system is within the acceptable State Pollutant Discharge Elimination System (SPDES) criteria for the site as shown in Table 2.

BAG FILTER STATUS

The following table presents an operational summary of the bag filter usage and configuration for the reporting period.

Dates	Bank 1	Bank 2	Bank 3
April 1 to 30	7 of 8 housings used with 400 micron bag filters	7 of 8 housings used with 400 micron bag filters	Not active

No modifications were made to the filter bank configuration or operation during this reporting period.

OTHER O&M ACTIVITIES AND FUTURE O&M ACTIVITIES

Other O&M activities conducted in April 2007 include:

- On April 3, 2007, the RW-8 flow meter assembly was replaced and the target flow rate of RW-8 was increased from 50 gpm to 55 gpm.
- On April 18, 2007, the malfunctioning flow totalizer for RW-9 was reset. During weekly O&M procedures, unusual noises were heard from the TP1B transfer pump. They will be investigated. The pump was lubricated, which resulted in reduction of the noise.
- On April 24, 2007, the RW-4 flow meter was not recording a flow rate. Troubleshooting efforts indicated that the flow meter may be clogged, so RW-4 was turned off until the flow meter can be checked for obstructions.
- On April 26, 2007, malfunctioning flow totalizers for RW-6 and RW-8 were reset. Additionally, exposed discharge piping was covered with sand. RW-4 was turned on and the RW-4 flow meter was registering a flow so it is believed that the problem corrected itself. Below-grade pipe cleaning is scheduled following the completion of well rehabilitation work.

Future O&M activities scheduled for the summer of 2007 include:

- Troubleshoot the air stripper blower flow meter;
- Troubleshoot the on-site combined flow meter;
- Troubleshoot transfer pump TP1B;
- Clean the RW-4 flow meter during next scheduled well rehabilitation;
- Evaluate the need for a vapor-phase carbon change;
- Conduct recovery well rehabilitation and below grade/building pipe cleaning following well rehabilitation activities.

MAINTENANCE LOG
(April 1, 2007 through April 30, 2007)

Date	Time	System Changes/Modifications	Personnel
4/3/2007	9:36 AM	Reset communication failure alarm and RW-8 pump failure alarm that occurred on 3/30/07 at 2:00 AM, restarted the system.	RD
		Replaced the flow meter assembly in RW-8, and adjusted target flow rate from 50 to 55 gpm.	RD
	1:29 PM	Bag Filter 2 High Pressure Warning, system remains on.	
4/10/2007		Changed multi-bag filter bags (400 mm) in banks 1 and 2 seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed.	RD
	8:18 AM	Reset bag filter 2 high pressure warning. Bank 2 bag filter pressure readings returned to normal after bag filter change.	RD
4/16/2007	3:06 AM	Booster Blower Failure Alarm, system shutdown	
4/18/2007		Reset booster blower failure alarm, restarted system.	RD
		Changed multi-bag filter bags (400 mm) in banks 1 and 2 seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed.	RD
	8:30 AM	Reset the malfunctioning RW-9 flow totalizer.	RD
4/19/2007	7:26 AM	Communication failure alarm; system shutdown.	
4/24/2007	10:40 AM	Rebooted computer, reset communication failure alarm and restarted system.	MG
		RW-4 flow meter not registering a flow rate, initial troubleshooting suggest an obstruction on RW-4 flow meter; RW-4 remains off.	MG
4/26/2007		Changed multi-bag filter bags (400 mm) in banks 1 and 2 seven of eight housings used. Banks 1 and 2 left open. Bank 3 closed.	EF/RD
	10:03 AM	Reset the malfunctioning RW-8 flow totalizer.	EF/RD
	10:04 AM	Reset the malfunctioning RW-6 flow totalizer.	EF/RD
		Inspected and covered exposed discharge pipe leading to recharge basins with sand.	EF/RD
		Troubleshoot malfunctioning onsite combined flow meter by replacing circuit board and reed switch, however it is still not working properly. Further troubleshooting is required.	EF/RD
		RW-4 was turned on and the RW-4 flow meter was registering a flow. It is believed that t	EF/RD
4/28/2007	2:30 PM	Bag Filter 2 High Pressure Warning, system remains on. Bag filter units will be cleaned during the next building pipe cleaning which is scheduled following well rehabilitation activities.

1,2-DCE: 1,2-Dichloroethene

MTBE: Methyl tert-butyl ether

Notes:

- Based on the new SPDES criteria from an NYSDEC letter dated on May 11, 2006, the new allowable pH range for the Rowe Site is between 5.0 and 8.5. The pH was measured with a new calibrated electronic pH meter. Influent pH values from recovery wells typically range between 5 and 6.
- "Effluent" samples were collected from sample port labeled NP2-10 unless otherwise noted.
- The pH was not measured at this time.

PCE - Tetrachloroethane
TCE - Trichloroethylene
TCA - 1,1,1-Trichloroethane
CE - Chloroethane

DCE - 1,1-Dichloroethene
DCA - 1,1-Dichloroethane
cis-DCE - cis-1,2-Dichloroethene
CT - Carbon Tetrachloride

CF - Chloroform
MC - Methylene Chloride
cis-DCE - cis-1,2-Dichloroethene
CT - Carbon Tetrachloride

BM - Bromomethane
CB - Chlorobenzene
EB - Ethylbenzene
CD - Carbon Disulfide
VC - Vinyl Chloride

ND: Not detected

PCE: Tetrachloroethylene

1,1-DCE: 1,1-Dichloroethene

<#: Less than method detection limit

TCE: Trichloroethene

1,2-DCE: 1,2-Dichloroethene

ug/L: Micrograms per liter

TCA: 1,1,1-Trichloroethane

MTBE: Methyl Tertiary Butyl Ether

-: Not analyzed

1,1-DCA: 1,1-Dichloroethane

NM: Not Measured

NE indicates that the ARAR goal was not established for this compound by the EPA

*Concentrations with an asterisk following them are due to laboratory

contamination.

, RW-3 is currently non operational weighting for the reprogramming of the drive for the new 4 amp pump

, RW-9 was being rehabilitated during this sampling event, thus no water sample was collected

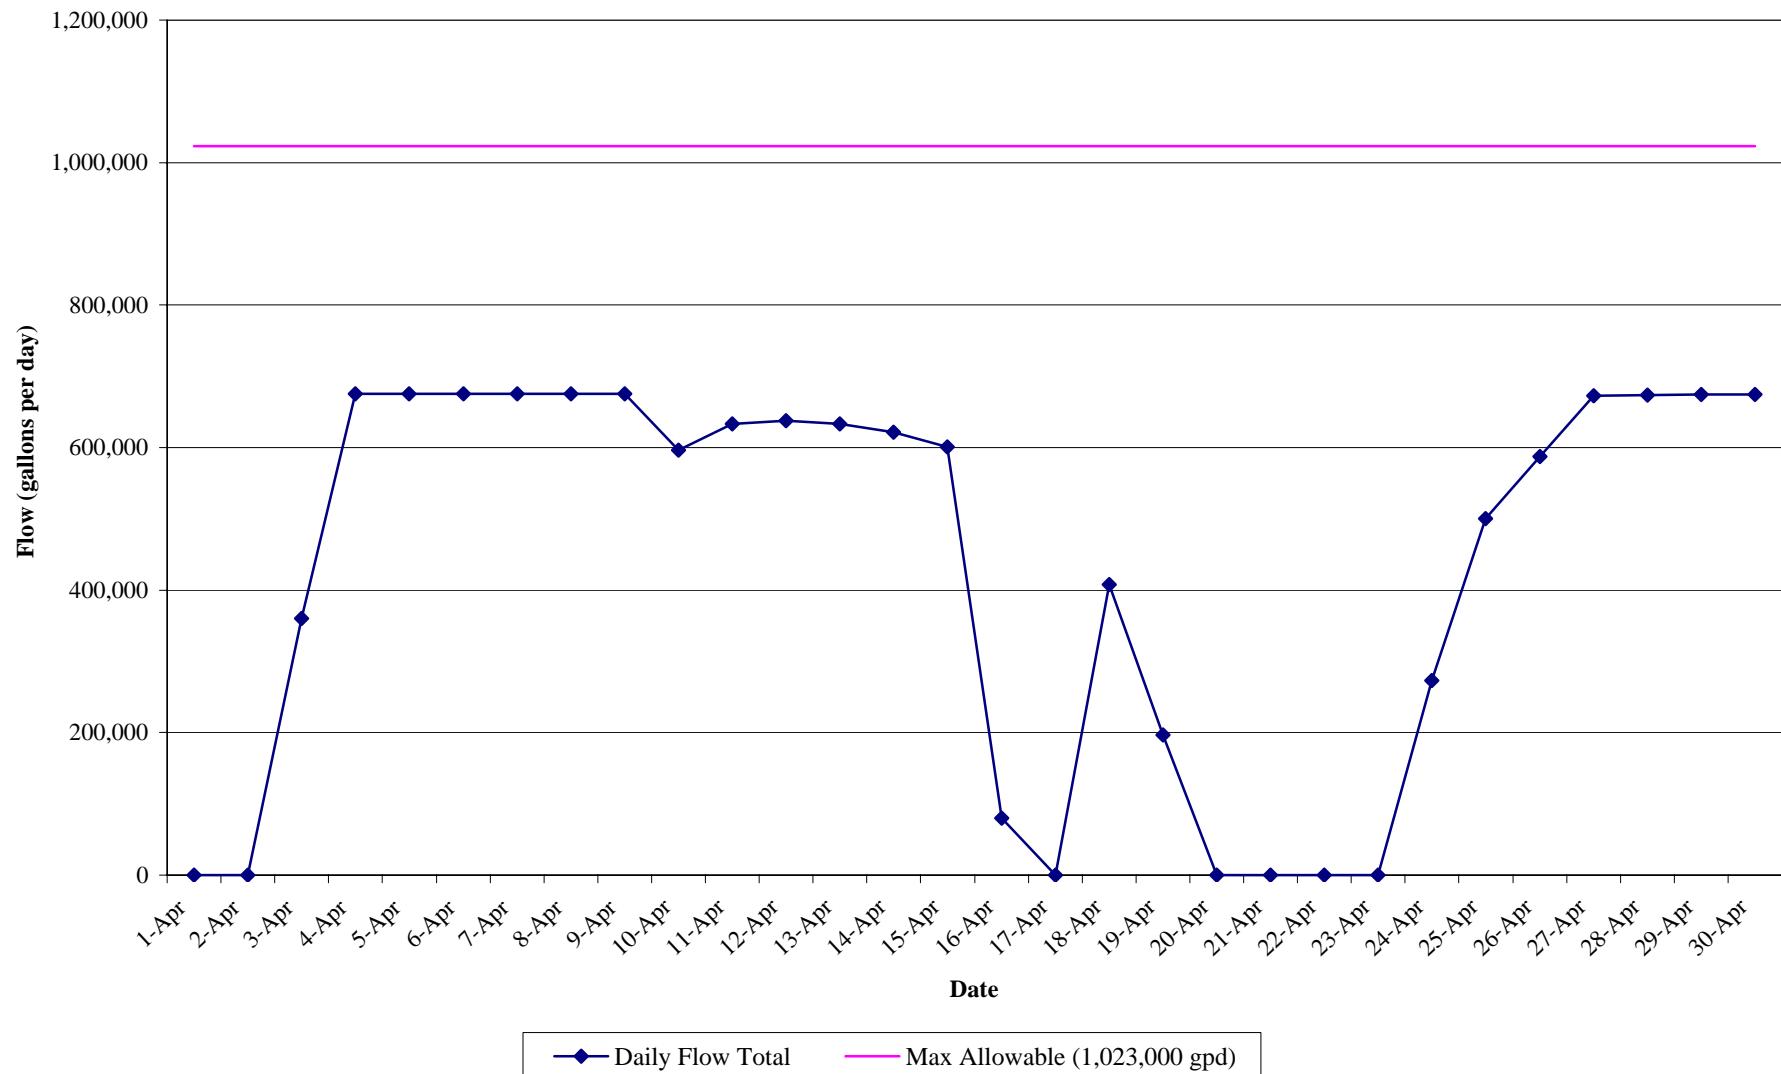

ARAR's are chemical specific aquifer restoration goals for ground water at the Former Rowe Industries Superfund Site

Bold values indicate an exceedance of the ARAR standard established for the site

RE: Rowe Industries

Order No.: 0704043

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 4/5/2007 for the analyses presented in the following report.

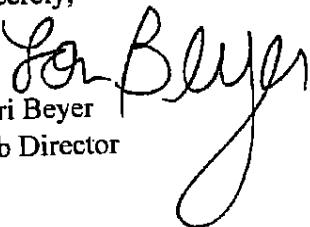

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of The method allowable holding time

RE: Rowe Industries

Order No.: 0704109

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 4/12/2007 for the analyses presented in the following report.

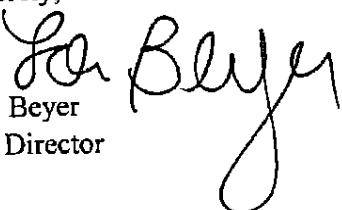

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of The method allowable holding time

CASE NARRATIVE

Samples were analyzed using the methods outlined in the following references:

Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, SW846, 3rd Edition via Method 8260.

All method blanks, laboratory spikes, and/or matrix spikes met quality assurance objectives.

Both sample vials for WQ041007:805 NP2-7 were received broken at the laboratory. Analysis for VOA could not be conducted.

RE: Rowe Industries

Order No.: 0704170

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 3 sample(s) on 4/20/2007 for the analyses presented in the following report.

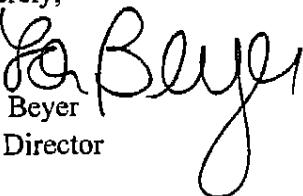

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

American Analytical Laboratories, LLC.

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of The method allowable holding time

RE: Rowe Industries

Dear Mark Goldberg:

Order No.: 0704244

American Analytical Laboratories, LLC. received 3 sample(s) on 4/27/2007 for the analyses presented in the following report.

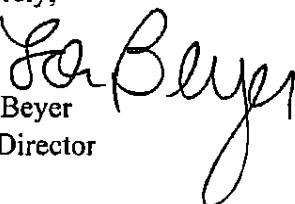

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

American Analytical Laboratories, LLC.

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of The method allowable holding time

RE: Rowe Industries

Order No.: 0704169

Dear Mark Goldberg:

American Analytical Laboratories, LLC. received 8 sample(s) on 4/20/2007 for the analyses presented in the following report.

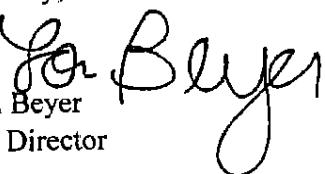

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

American Analytical Laboratories, LLC.

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of The method allowable holding time

ANALYTICAL METHODS SUMMARY

H7D050106

<u>PARAMETER</u>	<u>ANALYTICAL METHOD</u>
Volatile Organics by TO15	EPA-2 TO-15

References:

EPA-2 "Compendium of Methods for the Determination of Toxic Organic Compounds in Ambient Air", EPA-625/R-96/010b, January 1999.

SAMPLE SUMMARY

H7D050106

<u>WO #</u>	<u>SAMPLE#</u>	<u>CLIENT SAMPLE ID</u>	<u>SAMPLED DATE</u>	<u>SAMP TIME</u>
JTDNW	001	AQ040307:800NP4-1	04/03/07	08:00
JTDN0	002	AQ040307:802NP4-2	04/03/07	08:02
JTDN1	003	AQ040307:804NP4-3	04/03/07	08:04

NOTE (S) :

- The analytical results of the samples listed above are presented on the following pages.
- All calculations are performed before rounding to avoid round-off errors in calculated results.
- Results noted as "ND" were not detected at or above the stated limit.
- This report must not be reproduced, except in full, without the written approval of the laboratory.
- Results for the following parameters are never reported on a dry weight basis: color, corrosivity, density, flashpoint, ignitability, layers, odor, paint filter test, pH, porosity pressure, reactivity, redox potential, specific gravity, spot tests, solids, solubility, temperature, viscosity, and weight.

PROJECT NARRATIVE

H7D050106

The results reported herein are applicable to the samples submitted for analysis only.

This report shall not be reproduced except in full, without the written approval of the laboratory.

The original chain of custody documentation is included with this report.

Sample Receipt

The chain of custody documentation did not list a date/time of collection for the samples..

Quality Control and Data Interpretation

Unless otherwise noted, all holding times and QC criteria were met and the test results shown in this report meet all applicable NELAC requirements.

The EPA method requires that all target analytes in the continuing calibration verification standard be within 30% difference from the initial calibration. The laboratory standard operating procedure allows up to four analytes in the calibration verification to be $\leq 40\%$ difference from the initial calibration. The calibration verification analyzed on 04/05/07 exhibited a %difference of $>30\%$ but $\leq 40\%$ for chloromethane. Also the same daily standard exhibited a %difference of $>40\%$ for vinyl chloride. However since the percent difference was high and this analyte was not detected in any of the associated samples, the data is not affected.

The samples were received on 04/05/07 in Tedlar bags and analyzed within 72 hours of sampling.

STL Knoxville maintains the following certifications, approvals and accreditations: Arkansas DEQ Cert. #05-043-0, California DHS ELAP Cert. #2423, Colorado DPHE, Connecticut DPH Cert. #PH-0223, Florida DOH Cert. #E87177, Georgia DNR Cert. #906, Hawaii DOH, Illinois EPA Cert. #000687, Indiana DOH Cert. #C-TN-02, Iowa DNR Cert. #375, Kansas DHE Cert. #E-10349, Kentucky DEP Lab ID #90101, Louisiana DEQ Cert. #03079, Louisiana DOHH Cert. #LA030024, Maryland DHMH Cert. #277, Massachusetts DEP Cert. #M-TN009, Michigan DEQ Lab ID #9933, New Jersey DEP Cert. #TN001, New York DOH Lab #10781, North Carolina DPH Lab ID #21705, North Carolina DEHNR Cert. #64, Ohio EPA VAP Cert. #CL0059, Oklahoma DEQ ID #9415, Pennsylvania DEP Cert. #68-00576, South Carolina DHEC Lab ID #84001001, Tennessee DOH Lab ID #02014, Utah DOH Cert. # QUAN3, Virginia DGS Lab ID #00165, Washington DOE Lab #C120, West Virginia DEP Cert. #345, Wisconsin DNR Lab ID #998044300, Naval Facilities Engineering Service Center and USDA Soil Permit #S-46424. This list of approvals is subject to change and does not imply that laboratory certification is available for all parameters reported in this environmental sample data report.

Client Sample ID: AQ040307:800NP4-1

GC/MS Volatiles

Lot-Sample # H7D050106 - 001

Work Order # JTDNW1AA

Matrix.....: AIR

Qualifiers

- B Method blank contamination. The associated method blank contains the target analyte at a reportable level.
J Estimated result. Result is less than RL.

The 'Result' in ug/m³ is calculated using the following equation: Amount Found(before rounding)*(Molecular Weight/24.45)

The 'Reporting Limit' in ug/m³ is calculated using the following equation: (Reporting
Limit(before rounding) * Dilution Factor) * (Molecular Weight/24.45)

STL KNOXVILLE SAMPLE RECEIPT/CONDITION UPON RECEIPT ANOMALY CHECKLIST

Client: Lβ1z

Project: FC WE

Lot Number: H7D050M

Review Items	Yes	No	NA	If No, what was the problem?	Comments/Actions Taken
1. Do sample container labels match COC? (IDs, Dates, Times)				<input type="checkbox"/> 1a Do not match COC <input type="checkbox"/> 1b Incomplete information <input type="checkbox"/> 1c Marking smeared <input type="checkbox"/> 1d Label torn <input type="checkbox"/> 1e No label <input type="checkbox"/> 1f COC not received <input type="checkbox"/> 1g Other:	15a The date and time of collection is not listed on COC for all samples.
2. Is the cooler temperature within limits? (> freezing temp. of water to 6 °C; NC, 1668, 1613B: 0-4°C; VOST: 10°C; MA: 2-6 °C)				<input checked="" type="checkbox"/> 2a Temp Blank = _____ <input type="checkbox"/> 2b Cooler Temp = _____	
3. Were samples received with correct chemical preservative (excluding Encore)?				<input checked="" type="checkbox"/> 3a Sample preservative = _____	
4. Were custody seals present/intact on cooler and/or containers?				<input type="checkbox"/> 4a Not present <input type="checkbox"/> 4b Not intact <input type="checkbox"/> 4c Other:	
5. Were all of the samples listed on the COC received?				<input type="checkbox"/> 5a Samples received-not on COC <input type="checkbox"/> 5b Samples not received-on COC	
6. Were all of the sample containers received intact?				<input type="checkbox"/> 6a Leaking <input type="checkbox"/> 6b Broken	
7. Were VOA samples received without headspace?				<input checked="" type="checkbox"/> 7a Headspace (VOA only)	
8. Were samples received in appropriate containers?				<input type="checkbox"/> 8a Improper container	
9. Did you check for residual chlorine, if necessary?				<input checked="" type="checkbox"/> 9a Could not be determined due to matrix interference	
10. Were samples received within holding time?				<input type="checkbox"/> 10a Holding time expired	
11. For rad samples, was sample activity info. provided?				<input checked="" type="checkbox"/> 11a Complete information	
12. For SOG water samples (1613B, 1668A, 8290, LR PAHs), do samples have visible solids present?				<input checked="" type="checkbox"/> If yes & appears to be >1%, was SOG notified?	
13. Are the shipping containers intact?				<input checked="" type="checkbox"/> 13a Leaking <input type="checkbox"/> 13b Other:	
14. Was COC relinquished? (Signed/Dated/Timed)				<input checked="" type="checkbox"/> 14a Not relinquished	
15. Are tests/parameters listed for each sample?				<input type="checkbox"/> 15a Incomplete information <input type="checkbox"/> 15b Incomplete information	
16. Is the matrix of the samples noted?				<input type="checkbox"/> 16a Incomplete information <input type="checkbox"/> 16b Incomplete information	
17. Is the date/time of sample collection noted?				<input checked="" type="checkbox"/> 17a Incomplete information <input type="checkbox"/> 17b Incomplete information	
18. Is the client and project name/# identified?				<input checked="" type="checkbox"/> 18a Incomplete information <input type="checkbox"/> 18b Incomplete information	
19. Was the sampler identified on the COC?
