RE: National Heatset Printing Site
Operation & Maintenance and Monitoring Report (July – September 2024)
Soil Vapor Extraction System
1 Adams Boulevard, Town of Babylon, New York
New York State Department of Environmental Conservation Site No. 152140
EA Project No. 1602518

Dear Mr. Long:

This letter report provides an overview of the ongoing operation of the site soil vapor extraction (SVE) system at the National Heatset Printing Site in the Town of Babylon, New York (**Figure 1**). EA Engineering, P.C. and its affiliate EA Science and Technology (EA) initially assumed management of the onsite SVE system under New York State Department of Environmental Conservation (NYSDEC) Work Assignment Number (No.) D004441-29 in 2007. EA performed site management for the site from 2007 to February 2020 under multiple contracts; Environmental Assessments and Remediation performed site management from March to December 2020. EA is currently performing site management under NYSDEC Work Assignment No. D009806-18, which was approved on 18 November 2020. EA's assignment includes quarterly visits for the SVE system, quarterly system air sampling, and every fifth quarter groundwater sampling. The activities are being conducted under the NYSDEC State Superfund Standby Contract. Remedial system details are presented in the NYSDEC-approved Site Management Plan,¹ which includes the Operation & Maintenance (O&M) Manual for each system

The Site Visit and SVE System Maintenance Log table shows dates during the reporting period (July–September 2024), that an O&M or site visit was performed.

¹ EA. 2022. *National Heatset Printing Co. State Superfund Site, Suffolk County, Town of Babylon, New York. Site Management Plan – Revision 1. Draft*. February.

Site Visit and SVE System Maintenance Log

Date	Purpose	Personnel
12 September 2024	Quarterly visit. Conducted O&M on SVE System. Collected quarterly vapor samples from the SVE system.	EA
24 September 2024	D&D onsite to troubleshoot electrical panel of SVE blower.	EA and D&D
28 October 2024	D&D onsite to repair electrical panel of SVE blower and perform annual blower preventative maintenance	EA and D&D

Quarterly vapor samples were collected from the SVE System on 12 September 2024.

1. SOIL VAPOR EXTRACTION SYSTEM OPERATION

1.1 SOIL VAPOR EXTRACTION

The SVE system was in operation for a total of 94 hours out of an available 2861 hours (three percent of the total available) from 17 May 2024 through 12 September 2024. The SVE System was off upon arrival on 12 September 2024. The power was restored using a thermal overload relay and the system functioned during air sampling. The thermal overload relay was manually held to take all system readings. Quarterly O&M was performed on the SVE system on 12 September 2024, but the system shut off after air samples were collected. Troubleshooting was performed by D&D Electric on 24 September 2024, the SVE system remained down for the remainder of the quarter. Repairs will be scheduled during the 4th Quarter. A summary of the operational time associated with the SVE system is presented in **Table 1**. The location of the SVE system and associated monitoring wells are presented in **Figure 2**.

2. SOIL VAPOR EXTRACTION SYSTEM PERFORMANCE MONITORING

2.1 SOIL VAPOR EXTRACTION SYSTEM

Operational data for this period is based on the system measurements and vapor sample data collected during the 12 September 2024 quarterly visit. EA operated the SVE system with all five legs. The SVE blower flow rate during the 12 September 2024 site visit was 232 cubic feet per minute. Vapor points at 1 Adams Boulevard were monitored during the 12 September 2024 quarterly O&M visit. Vapor point monitoring data is included on the system data sheets, provided in **Attachment A**. A complete set of operational data collected is presented in **Table 2**.

3. RESULTS

3.1 SOIL VAPOR EXTRACTION SYSTEM

The SVE System air samples were collected on 12 September 2024 as part of the quarterly monitoring event. EA personnel collected 4-hour composite air samples from the system influent

EA Engineering, P.C. and Its Affiliate
EA Science and Technology

Mr. Payson Long
NYSDEC
26 March 2025
Page 3

and effluent using Summa® canisters and submitted the samples to ALS Environmental for analysis for volatile organic compounds via U.S. Environmental Protection Agency Method TO-15. Based on the effluent sampling results, a negligible amount of tetrachloroethene (PCE), trichloroethene (TCE), and dichloroethane (DCE) has been discharged during the year 2024 toward the permitted annual discharge limits of 270 pounds (lb), 120 lb, and 5,510 lb, respectively. A summary of the field monitoring results, laboratory air discharge analytical results, and estimated mass recovery are presented in **Table 2**; the laboratory data reports are presented in **Attachment B**.

4. CONCLUSIONS AND RECOMMENDATIONS

Based on the data collected from the SVE system during this reporting period, EA recommends returning the SVE system to operation following electric panel repair. EA also recommends scheduling blower annual preventative maintenance during the 4th Quarter 2024. When operating, PCE concentrations in the effluent continue to be equal to, or higher, than influent concentrations, indicating that the granular activated carbon is saturated and has reached its absorption capacity. Contaminant mass recovery has decreased to the point where emissions without treatment are within the permissible limits (6 New York Code of Rules and Regulations Part 212-2.2 Table 2). EA recommends removal of the spent carbon without replacement at this time.

Both onsite density-driven convection (DDC) Systems and the offsite DDC System have been shut down and remain off, as recommended in the Corrective Measures Work Plan² prepared by EA and approved by NYSDEC. Remedial Site Optimization investigation activities are being conducted as detailed in the work plan prepared by EA.

Please do not hesitate to contact me at 315-565-6557 with any questions you might have regarding this report.

Sincerely,

EA SCIENCE AND TECHNOLOGY

Megan Miller, EIT
Project Manager

LABORATORY REPORT

October 9, 2024

Megan Miller
EA Engineering, Science, and Technology
6731 Collamer Road, Suite 2
East Syracuse, NY 13057

RE: Heatset / 1602518

Dear Megan:

Enclosed are the results of the samples submitted to our laboratory on September 23, 2024. For your reference, these analyses have been assigned our service request number P2403918.

All analyses were performed according to our laboratory's NELAP and DoD-ELAP-approved quality assurance program. The test results meet requirements of the current NELAP and DoD-ELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP and DoD-ELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. Results are intended to be considered in their entirety and apply only to the samples analyzed and reported herein.

If you have any questions, please call me at (805) 526-7161.

ALS | Environmental

By Sarah Mock at 4:45 pm, Oct 09, 2024

Sarah Mock
Project Manager

Client: EA Engineering, Science, and Technology
Project: Heatset / 1602518Service Request No: P2403918
New York Lab ID: 11221

CASE NARRATIVE

The samples were received intact under chain of custody on September 23, 2024 and were stored in accordance with the analytical method requirements. Please refer to the sample acceptance check form for additional information. The results reported herein are applicable only to the condition of the samples at the time of sample receipt.

Volatile Organic Compound Analysis

The samples were analyzed for volatile organic compounds in accordance with EPA Method TO-15 from the Compendium of Methods for the Determination of Toxic Organic Compounds in Ambient Air, Second Edition (EPA/625/R-96/010b), January, 1999. This procedure is described in laboratory SOP VOA-TO15. The analytical system was comprised of a gas chromatograph/mass spectrometer (GC/MS) interfaced to a whole-air preconcentrator. This method is included on the laboratory's NELAP and DoD-ELAP scope of accreditation. Any analytes flagged with an X are not included on the NELAP or DoD-ELAP accreditation.

The containers were cleaned, prior to sampling, down to the method reporting limit (MRL) reported for this project. For projects requiring DoD QSM 5.4 compliance canisters were cleaned to <1/2 the MRL. Please note, projects which require reporting below the MRL could have results between the MRL and method detection limit (MDL) that are biased high.

The results of analyses are given in the attached laboratory report. All results are intended to be considered in their entirety, and ALS Environmental (ALS) is not responsible for utilization of less than the complete report.

Use of ALS Environmental (ALS)'s Name. Client shall not use ALS's name or trademark in any marketing or reporting materials, press releases or in any other manner ("Materials") whatsoever and shall not attribute to ALS any test result, tolerance or specification derived from ALS's data ("Attribution") without ALS's prior written consent, which may be withheld by ALS for any reason in its sole discretion. To request ALS's consent, Client shall provide copies of the proposed Materials or Attribution and describe in writing Client's proposed use of such Materials or Attribution. If ALS has not provided written approval of the Materials or Attribution within ten (10) days of receipt from Client, Client's request to use ALS's name or trademark in any Materials or Attribution shall be deemed denied. ALS may, in its discretion, reasonably charge Client for its time in reviewing Materials or Attribution requests. Client acknowledges and agrees that the unauthorized use of ALS's name or trademark may cause ALS to incur irreparable harm for which the recovery of money damages will be inadequate. Accordingly, Client acknowledges and agrees that a violation shall justify preliminary injunctive relief. For questions contact the laboratory.

Analyses were performed according to our laboratory's NELAP and DoD-ELAP approved quality assurance program. A complete listing of specific NELAP and DoD-ELAP certified analytes can be found in the certifications section at www.alsglobal.com, or at the accreditation body's website.

Each of the certifications listed above have an explicit Scope of Accreditation that applies to specific matrices/methods/analytes; therefore, please contact the laboratory for information corresponding to a particular certification.

Sample Acceptance Check Form**

Client: EA Engineering, Science, and Technology

Work order: P2403918

Project: Heatset

Sample(s) received on: 9/23/24

Date opened: 9/23/24

by: ADAVID

Note: This form is used for all samples received by ALS. The use of this form for custody seals is strictly meant to indicate presence/absence and not as an indication of compliance or nonconformity. Thermal preservation and pH will only be evaluated either at the request of the client and/or as required by the method/SOP.

		<u>Yes</u>	<u>No</u>	<u>N/A</u>
1	Were sample containers properly marked with client sample ID?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2	Did sample containers arrive in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3	Were chain-of-custody papers used and filled out?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4	Did sample container labels and/or tags agree with custody papers?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5	Was sample volume received adequate for analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6	Are samples within specified holding times?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7	Was proper temperature (thermal preservation) of cooler at receipt adhered to?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
8	Were custody seals on outside of cooler/Box/Container? Location of seal(s)? _____ Sealing Lid?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	Were signature and date included?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	Were seals intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
9	Do containers have appropriate preservation , according to method/SOP or Client specified information?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	Is there a client indication that the submitted samples are pH preserved?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	Were VOA vials checked for presence/absence of air bubbles?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	Does the client/method/SOP require that the analyst check the sample pH and <u>if necessary</u> alter it?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
10	Tubes: Are the tubes capped and intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
11	Badges: Are the badges properly capped and intact? Are dual bed badges separated and individually capped and intact?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
12	Lab Notification: Analyst and PM were alerted of Short HT or RUSH samples?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
13	Client Notification: Client has been notified regarding HT exceedances and/or other CoC discrepancies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Explain any discrepancies: (include lab sample ID numbers):

Data Path : I:\MS26\Data\2024_10\03\
 Data File : 10032401.D
 Acq On : 03 Oct 2024 18:58
 Operator : PH
 Sample : CCV R26100324_5ng
 Misc : S37-08132405/S37-09102401
 ALS Vial : 16 Sample Multiplier: 1

Quant Time: Oct 04 10:52:29 2024
 Quant Method : I:\MS26\Methods\R26092324.M
 Quant Title : EPA TO-15 per SOP VOA-TO15 (CASS TO-15/GC-MS)
 QLast Update : Tue Sep 24 11:22:57 2024
 Response via : Initial Calibration

Min. RRF : 0.000 Min. Rel. Area : 50% Max. R.T. Dev 0.33min
