Senior Remediation Manager  
Safety-Kleen Systems, Inc.  
2858 U.S. Route 322  
Logan Township, NJ 08085

RE: Safety-Kleen Amityville

Dear Mr. Fleming:

The New York State Department of Environmental Conservation (the "Department") has reviewed Safety-Kleen's "Q3 2017 Groundwater Monitoring Program Report". The report provides the results of the September 2017 groundwater sampling event.

Upon review, the Department has the following comments:

- The Department is encouraged by the continued decreasing trend of Mineral Spirits concentrations in site groundwater wells.
- The presence of Mineral Spirits Range Organics (MSRO) in Quality Assurance (QA) samples associated with samples from wells VE-1R, GT-1 & GT-6 resulted in the proper qualifier of "B" to the results. While these monitoring points have historically detected the presence of MSRO, the results should be viewed with caution.

If you have any questions on this matter, please contact me at (518) 402-9813.

Sincerely,

Kent D. Johnson  
Senior Engineering Geologist  
Division of Materials Management
