RTI Laboratories - Definitions and Acronyms

WO#: 1606422

Date Reported: 8/26/2016
Revision v5

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606425

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606425

Date Reported: 8/29/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical Report revised 8/11/2016: Compound 3,3´-Dichlorobenzidine was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_6010S, Analytical Run No 87363, Batch ID 40217:
Sample 1606425-005BMS: Recoveries for several analytes exceeded control limits. Suspected matrix interference for Selenium.
Sample 1606425-005BMSD: Recoveries for several analytes exceeded control limits. RPD results for Manganese exceeded control limits. Suspected matrix interference for Selenium.

Analytical Comments for Test SW_6010S, Analytical Run No 87363, Batch ID 40217:
Samples 1606506-006C MS/MSD: Spike recoveries for multiple analytes were outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86814, Batch ID 40191:
Sample 1606425-001A: Surrogates recovery for Terphenyl-d14 exceeded control limit.
Sample 1606425-005A MS/MSD: Spike recoveries for 3,3´-Dichlorobenzidine and Benzoic Acid were outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86814, Batch ID R86814:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062016: CCV results for 2,4-Dinitrophenol, 4,6-Dinitro-2-methylphenol, Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine, and Pentachlorophenol exceeded control limit.
Sample CCVE S8 062016: Ending CCV results for Benzoic acid exceeded control limit.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86838, Batch ID 40191:
Sample 1606425-010A: Surrogates recovery for Terphenyl-d14
Sample 1606425-016A: Low surrogate recoveries were observed due sample matrix. Re-analysis confirms the 1st analysis.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86838, Batch ID R86838:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062116: CCV results for 2,4-Dinitrophenol, Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine, and Pentachlorophenol exceeded control limit.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86878, Batch ID 40191:
Sample 1606425-016A: Multiple failure of surrogates.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86878, Batch ID R86878:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062216: CCV results for 4-Nitrophenol, Benzoic acid, Bis(2-chloroethoxy)methane, Bis(2-chloroethyl) ether, N-Nitrosodimethylamine, and Bis(2-chloroethyl) ether exceeded control limit.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87637, Batch ID 40193:
Sample LCS-40193: LCS results for Benz(a)anthracene, Fluorene Phenanthrene and Pyrene exceeded QC limits.
Sample 1606425-015A: Surrogate for Nitrobenzene-d5 was outside the control limits.
Sample 1606425-015A MS: Spike recoveries for 1-Methylnaphthalene, 2-Methylnaphthalene were outside the control limits. Surrogate Nitrobenzene-d5 was outside the control limits.
Sample 1606425-015A MSD: Spike recovery for Phenanthrene was outside the control limits. RPD for 1-Methylnaphthalene, 2-Methylnaphthalene were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87679, Batch ID 40193:
Sample 1606425-015A: Sample required multiple dilutions. One of the dilutions was performed three hours past the recommended hold time.

RTI Laboratories - Definitions and Acronyms

WO#: 1606425

Date Reported: 8/29/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606430

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606430

Date Reported: 8/29/2016
Revision v2

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical report revision: 9/16/16: Update LOQ for Benzene for samples 1606430-001A,-002A, -003A, -004A,-005A, -006A, -007A, -008A, -010A, -011A, -012A, -014A, -016A, and -018A.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Percent Moisture - ASTM-D2216
Volatile Organic Compounds - 8260C-STAR
Volatile Organic Compounds - 8260C-STAR
Semi-Volatile Organic Compounds - 8270D-SIM-STAR

Analytical Comments for Test SW_8260S, Analytical Run No 86770, Batch ID R86770:
Sample VOA11B ICV 061616: ICV results for naphthalene exceed the 20% control criteria.
Sample VOA11B LCS2 061716: Recovery for 1,2,4-Trimethylbenzene was outside the control limits.
Sample 1606430-009C MS: Spike recoveries for 1,2,4-Trimethylbenzene, Naphthalene and p-Isopropyl toluene were outside the control limits.
Sample 1606437-004B MS: Spike recoveries for 1,2,4-Trimethylbenzene, p-Isopropyl toluene and vinyl acetate were outside the control limits.
Sample 1606437-004B MS: Spike recoveries for 1,2,4-Trimethylbenzene, Naphthalene, p-Isopropyl toluene and vinyl acetate were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87308, Batch ID 40198:
Sample 1606430-009DMS: Spike recoveries for Fluoranthene and Pyrene exceeded control limits.
Sample 1606430-016D: Surrogate recovery for 2-Fluorobiphenyl was outside control criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No87637, Batch ID 40193:
Sample LCS-40193: Recoveries for Benz(a)anthracene, Fluorene, Phenanthrene and Pyrene were outside the control limits.
Sample 1606425-005A MS: Spike recovery for Naphthalene was outside the control limits. Surrogate Nitrobenzene-d5 was outside the control limits.
Sample 1606425-005A MSD: Spike recovery for Phenanthrene was outside the control limits

Analytical Comments for Test SW_8270S-SIM, Analytical Run No87679, Batch ID 40198:
Sample 1606430-018D: Sample was analyzed twice, once with no dilution, the other at 10x for Phenanthrene. Analyte was detected in both analyses over the high end of calibration range (1,000 µg/L) of liquid extract. Original data with no dilution, estimated detection of Phenanthrene at 9,750 µg/L liquid extract. 10x dilution was choosen based on the original result. Final detected concentration is 1,009 µg/L of liquid extract, prior to moisture correction for sediment analysis.

RTI Laboratories - Definitions and Acronyms

WO#: 1606430

Date Reported: 8/29/2016
Revision v2

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606431

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606431

Date Reported: 7/11/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C-STAR

RTI Laboratories - Definitions and Acronyms

WO#: 1606431

Date Reported: 7/11/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606465

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606465

Date Reported: 8/26/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Volatile Organic Compounds - 8260C
Semi-Volatile Organic Compounds - 8270D-MOD
Semi-Volatile Organic Compounds - 8270D SIM

Samples 1606465-002B, -003B, -004B, and -005B were analyzed for SW-8270 SIM. However several analytes after multiple dilution runs were still over calibration. The PNA compounds were also reported in the SW_8270 analysis as requested.

Analytical Comments for Test SW_8260A, Analytical Run No 86938, Batch ID R86938:
Sample VOA11B CCV 062616: CCV results for 1,2-Dibromo-3-chloropropane, Acetone, Bromoform, and 2-Hexanone exceeded 20% control criteria.
Sample VOA11B LCS 06261: Recoveries for Bromoform, Chlorodibromomethane, cis-1,3-dichloropropene exceeded control limits.
Sample VOA11B LCSD 0626: Recoveries for 2-Hexanone, Bromoform, Chlorodibromomethane, cis-1,3-dichloropropene, Ethylbenzene, Styrene, and Xylene (total) exceeded control limits.
Sample VOA11B MBLK 0626: Surrogate recovery for Toluene-d8 exceeded control limits.
Sample 1606465-001A: Surrogate recovery for Toluene-d8 exceeded control limits.
Sample 1606465-003A: Surrogate recovery for 4-Bromofluorobenzene exceeded control limits.
Sample 1606465-004A: Surrogate recovery for Toluene-d8 exceeded control limits.
Sample 1606465-006A: Surrogate recovery for Toluene-d8 exceeded control limits.
Sample 1606465-007A: Surrogate recovery for Toluene-d8 exceeded control limits.
Sample VOA11B CCVE 062616: Ending CCV result for Trichlorofluoromethane exceeded control limits.

Analytical Comments for Test SW_8260A, Analytical Run No 86965, Batch ID R86965:
Sample VOA10 CCV 062716: 1,2-Dibromo-3-chloropropane and Chlorodibromomethane exceed the 20% control criteria.
Sample VOA10 LCSD 06271: RPD percentage for 1,2,4-Trichlorobenzene was above the control limit.
Sample 1606465-002A: Surrogate recovery for 4-Bromofluorobenzene exceeded control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86836, Batch ID 86836:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limits.
Sample CCV S8 062116: CCV results for 2,4-Dinitrophenol, Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine and Pentachlorophenol exceeded control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86836, Batch ID 40190:
Sample LCS-40190: Recoveries for N-Nitrosodimethylamine, 4-Nitrophenol, Benzoic Acid and Phenol exceeded control limits. Surrogate recovery for Phenol-d5 exceeded control limits.
Sample LCSD-40190: Recoveries for N-Nitrosodimethylamine and 4-Nitrophenol. Surrogate recovery for Phenol-d5 exceeded control limits. RPD percentage for Benzoic Acid was above the control limit.
Sample MB-40190: Surrogate recovery for Phenol-d5 was outside the control limits.
Sample 1606465-002B: Surrogate recoveries for Phenol-d5, Nitrobenzene-d5, 2-Fluorobiphenyl and Terphenyl-d14 exceeded control limits. Evaluated as matrix interference.
Sample 1606465-003B: Surrogates recovery for Phenol-d5, Nitrobenzene-d5, 2-Fluorobiphenyl and Terphenyl-d14 exceeded control limits. Evaluated as matrix interference.
Sample 1606465-004B: Surrogates recovery for Phenol-d5 exceeded control limits.
Sample 1606465-005B: Surrogates recovery for Phenol-d5 exceeded control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86873, Batch ID 40190:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limits.
Sample CCV S8 062216: CCV results for 4-Nitrophenol, Benzoic acid, Bis(2-chloroethoxy)methane, Bis(2-chloroethyl) ether, N-Nitrosodimethylamine and Bis(2-chloroisopropyl)ether exceeded control limits.
Sample 1606465-007B: Emulsion formed, low surrogates recovery. Surrogates recovery for Phenol-d5, Terphenyl-d14, Nitrobenzene-d5 and 2-Fluorobiphenyl exceeded control limits.

Analytical Comments for Test SW_8270A-SIM, Analytical Run No 87471, Batch ID 40179:
Sample 1606422-002BMS: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits. Sample was not associated with work order.
Sample 1606422-002BMSD: RPD percentage for Benzo(b)fluoranthene was above the control limit. Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits. Sample was not associated with work order.

Sample 1606422-008BMS: Spike recovery for Benz(a)anthracene was outside the control limits. Sample was not associated with work order.
Sample 1606422-008BMSD: RPD percentage for Benzo(k)fluoranthene was outside the control limits. Sample was not associated with work order.
Sample 1606465-002: Surrogate recoveries for 2-Fluorobiphenyl and Nitrobenzene-d5 were outside control criteria.
Sample 1606465-003: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside control criteria.
Sample 1606465-004: Surrogate recoveries for 2-Fluorobiphenyl and Terphenyl-d14 were outside control criteria.
Sample 1606465-007: Surrogate recovery for 2-Fluorobiphenyl was outside control criteria.

Analytical Comments for Test SW_8270A-SIM, Analytical Run No 87589, Batch ID 40179:
Sample 1606465-002B (200 Diln): 2-Methynaphthalene over calibration
Sample 1606465-003B (500 Diln): 1-Methynaphthalene and 2-Methynaphthalene over calibration
Sample 1606465-004B (500 Diln): 1-Methynaphthalene and 2-Methynaphthalene over calibration
Sample 1606465-005B (100 Diln): 2-Methynaphthalene over calibration

Analytical Comments for Test SW_8270A-SIM, Analytical Run No 87701, Batch ID 40179:
Sample LCS-40179: Recovery for 2-Methylnaphthalene was outside control criteria. Surrogate recovery for 2-Fluorobiphenyl was outside control criteria

RTI Laboratories - Definitions and Acronyms

WO#: 1606465

Date Reported: 8/26/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606467

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606467

Date Reported: 9/6/2016
Revision v6

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical report revised 9/16/16: The LOQ reporting limit for Benzene was updated for samples 1606467-001A, -002A, -003A, -005A, -010A, -019A and -020A.

Analytical Report revised 9/6/2016: Surrogate recoveries were corrected for SIM PNA analysis for samples 1606467-002, -010, -018, -019 and -020. Sample reporting limits adjusted for sample 16064670-019 and -020 once re-imported and calculated.
Analytical Report revised 8/11/2016: Compound 3,3´-Dichlorobenzidine was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD. Dibenzo(a,h)anthracene was reported in the 8270D non SIM run and has been removed. removed two compounds from VOCs analysis for samples 1606467-010A, 016A-020A that were not required.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/OES - 6010C-STAR
- Metals, ICP/MS - 6020A
- Polychlorinated Biphenyls - 8082A
- Volatile Organic Compounds - 8260C-ME STAR
- Volatile Organic Compounds - 8260C-STAR
- Volatile Organic Compounds - 8260C
- Volatile Organic Compounds - 8260C-STAR
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM
- Semi-Volatile Organic Compounds - 8270D-SIM-STAR

Sample 1606467-004A and -006A were initially analyzed twice for Low-Level Volatile Organic Compounds. Responses for internal standards exceeded method specified criteria. Samples re-analyses were performed using the methanol preserved vials. The results for these samples were reported from the methanol vials with associated elevated reporting limits.

Analytical Comments for Test SW_8082S, Analytical Run No 87279, Batch ID 40321:
- Sample 1606467-009A: Surrogate DCB exceeded control limits.
- Sample 1606467-017E: Surrogate DCB exceeded control limits.

Analytical Comments for Test SW_8082S, Analytical Run No 87531, Batch ID 40483:
- Sample 1606467-007A: Surrogate recoveries for TCMX (16.3%) and DCB (17.2%) exceeded control limits - similar recoveries on re-analysis.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86738, Batch ID R86738:
- Sample VOA11B CCV 061616: CCV results for Acetone, Bromoform, Methylene chloride and Vinyl acetate exceeded the 20% criteria.
- Sample VOA11B MBLK 0616: Acetone and Methylene chloride present in method blank at a concentration > 1/2 LOQ.
- Sample VOA11B LCS 06161: Recoveries for 2-Butanone, Acetone, Bromoform, Methylene chloride, Chlorodibromomethane exceeded control limits.
- Sample VOA11B LCSD 0616: Recoveries for Acetone, Bromoform, and Chlorodibromomethane exceeded control limits.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86751, Batch ID R86751:
- Sample VOA11B CCV 061716: CCV results for Acetone, Bromoform, and Vinyl acetate exceeded the 20% criteria.
- Sample VOA11B MBLK 0617: Acetone and Methylene chloride present in Method Blank at a concentration > 1/2 LOQ.
- Sample VOA11B LCS 06171: Recoveries for Acetone, Bromoform, and Methylene chloride exceeded control limits.
- Sample VOA11B LCSD 0617: Recoveries for Acetone, Bromoform, Methylene chloride, Chlorodibromomethane exceeded control limits.

Analytical Comments for Test SW_8260S, Analytical Run No 87292, Batch ID R87292:
- Sample VOA11B ICV 061616: ICV results for Naphthalene exceeded the 20% criteria.
- Sample VOA11B LCS5 0617: Spike recovery for 1,2,4-Trimethylbenzene was outside the control limits.
- Sample 166467-004C MS: Spike recoveries for 1,2,4-Trimethylbenzene and p-Isoproplytoluene were outside the control limits.
- Sample 166467-004C MSD: Spike recoveries for 1,2,4-Trimethylbenzene, Naphthalene, and p-Isoproplytoluene were outside the control limits.

Analytical Comments for Test SW_8260S, Analytical Run No 87293, Batch ID R87293:
- Sample VOA11B ICV 061616: ICV results for Naphthalene exceeded the 20% criteria.

Sample 1606522-007AMS5: Spike recoveries for Naphthalene was outside the control limits.
Sample 1606522-007AMSD5: RPD for Naphthalene was outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86974, Batch ID 40223:
Sample 1606467-010D: Surrogate Terphenyl-d14, and 2-Fluorobiphenyl, exceeded recovery control limit. Sample reanalyzed with similar results.
Sample 1606467-016D: Surrogate Terphenyl-d14 exceeded recovery control limit.
Sample LCS-40223: Spike recovery for 3,3´-Dichlorobenzidine was outside the control limits.
Sample 1606467-010D MS/MSD: Spike recovery for 3,3´-Dichlorobenzidine was outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86974, Batch ID R86974:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062516: 4-Nitrophenol,Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine
Sample CCVE S8 062516: Ending CCV results for Benzoic acid exceeded recovery control limit.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87809, Batch ID 40198:
Sample 1606430-009D MS: Spike recoveries for Fluoranthene and Pyrene were outside the control limits.
Sample 1606467-003D: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.
Sample 1606467-004D: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.
Sample 1606467-005D: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.
Sample 1606467-006D: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87809, Batch ID 40214:
Sample 1606467-010D: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87809, Batch ID R87809:
Sample CCV SIM 071416S7: CCV results for Benz(a)anthracene, Benzo(b)fluoranthene and Benzo(k)fluoranthene exceed the 20% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87666, Batch ID R87666:
Sample CCV SIM 070816S7: CCV results for Benz(a)anthracene exceed the 20% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87666, Batch ID 40214:
Sample 1606506-006A MS: Spike recoveries for Benz(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene and Pyrene were outside the control limits.
Sample 1606506-006A MSD: Spike recoveries for Benz(a)anthracene, Benzo(k)fluoranthene, Fluoranthene and Pyrene were outside the control limits.

Analytical Comments for Test SW_8082S, Analytical Run No 87700, Batch ID 40321:
1606467-007A SW_8082S: Sample ID 1606467-007A: Surrogate DCB & TCMX exceed control limits; sample ran 2x same results; sent back for re-extraction.

RTI Laboratories - Definitions and Acronyms

WO#: 1606467

Date Reported: 9/6/2016
Revision v6

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606506

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606506

Date Reported: 8/25/2016
Revision v3

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical Report revised 9/9/2016: Sample ID 1606506-001 updated to reflect 034-SS01-01.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A
- Polychlorinated Biphenyls - 8082A
- Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87666, Batch ID R87666:
Sample CCV SIM 070816S7: CCV results for Benz(a)anthracene exceed the 20% criteria.
Sample CCVE SIM 070816S7, Batch ID R87666 : Ending CCV results for several analytes exceeded control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87666, Batch ID 40214:
Samples 1606506-006A MS: Spike recoveries for Benz(a)anthracene, Benzo(b)fluoroanthene, Benzo(k)fluoranthene and Pyrene were outside the control limits.
Samples 1606506-006A MSD: Spike recoveries for Benz(a)anthracene, Benzo(k)fluoranthene, Fluoranthene, Phenanthrene and Pyrene were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID R87786:
Sample CCV SIM S7 080116: Results for 1-Methylnaphthalene exceeded QC LIMIT.
Sample CCVE SIM 080116 S7, Batch ID R87786 : Ending CCV results for Benzo(g,h,i)perylene and Indeno(1,2,3-cd)pyrene exceeded the 50% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87818, Batch ID 40214:
Samples 1606506-003A and -004A: Samples required additional dilutions that were performed one day past the recommended hold time.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 877018, Batch ID 87701:
Sample CCVE S7 072816 SIM, Batch ID R87701 : Ending CCV results for Benzo(g,h,i)perylene and Dibenz(a,h)anthracene exceeded the 50% criteria.

Analytical Comments for Test SW_6010S Analytical Run No 87406, Batch ID 40282:
Samples 1606506-006C MS/MSD: Spike recoveries for several analytes were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606506

Date Reported: 8/25/2016
Revision v3

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606512

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606512

Date Reported: 8/25/2016
Revision v2

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical Report revised 8/12/2016: Compound 3,3´-Dichlorobenzidine was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/OES - 6010C-STAR
- Metals, ICP/MS - 6020A-TL
- Polychlorinated Biphenyls - 8082A
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_8082S, Analytical Run No 87353, Batch ID 40331:
- Sample 1606512-003B: Surrogate recoveries for TCMX (16.4%) and DCB (16.6%) exceeded control limits.
- Sample 1606512-005B: Surrogate recovery for DCB (54%) exceeded control limits.
- Sample 1606512-006B: Surrogate recoveries for TCMX (24.4%) and DCB (28.6%) exceeded control limits.
- Sample 1606512-008A: Surrogate recoveries for TCMX (18.5%) and DCB (20.6%) exceeded control limits.
- Sample 1606512-009A: Surrogate recoveries for TCMX (29.5%) and DCB (31.3%) exceeded control limits.
- Sample 1606512-011A: Surrogate recoveries for TCMX (42.5%) and DCB (45.4%) exceeded control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86961, Batch ID R86961:
- Sample ICV S8 050216: ICV results for Bis (2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
- Sample CCV S8 062616: CCV results 2,4-Dinitrophenol, Benzoic acid, N-Nitrosodiphenylamine and Pentachlorophenol exceeded control limit.
- Sample CCVE S8 062616: Ending CCV results for Benzoic acid, Hexachlorocyclopentadiene exceeded recovery control limit.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86961, Batch ID 40223:
Sample 1606512-003A: Surrogate recoveries for Nitrobenzene-d5, Phenol-d5, Terphenyl-d14, 2-Fluorobiphenyl, 2-Fluorophenol and 2,4,6-Tribromophenol were outside the control limits. Sample extract was a waxy nature, dilution performed.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86974, Batch ID R86974:
- Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
- Sample CCV S8 062516: 4-Nitrophenol, Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine
- Sample CCVE S8 062516: Ending CCV results for Benzoic acid exceeded recovery control limit.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86974, Batch ID 40223:
Sample 1606512-005A: Surrogate recoveries for Nitrobenzene-d5, Phenol-d5, 2-Fluorobiphenyl, 2-Fluorophenol and 2,4,6-Tribromophenol were outside the control limits. Sample extract was a waxy nature, dilution performed.
Sample 1606512-006A: Surrogate recoveries for Terphenyl-d14 and 2-Fluorobiphenyl were outside the control limits. Sample extract was a waxy nature, dilution performed.
Sample 1606512-007A: Surrogate recoveries for Nitrobenzene-d5, Phenol-d5, Terphenyl-d14, 2-Fluorobiphenyl, and 2-Fluorophenol were outside the control limits. Sample extract was a waxy nature, dilution performed.
Sample LCS-40223: Spike recovery for 3,3´-Dichlorobenzidine was outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87666, Batch ID R87666:
Sample CCV SIM 070816S7: CCV results for Benz(a)anthracene exceed the 20% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87666, Batch ID 40214:
Sample 1606512-002A: Surrogate recovery for Terphenyl-d14 was outside the control limits.
Sample 1606512-003A: Surrogate recovery for Terphenyl-d14 was outside the control limits.
Sample 1606506-006A MS: Spike recoveries for Benz(a)Anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene and Pyrene were outside the control limits.
Sample 1606506-006A MSD: Spike recoveries for Benz(a)anthracene, Benzo(k)fluoranthene, Fluoranthene, Phenanthrene and Pyrene were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87809, Batch ID 40214:
Sample 1606512-006A: Surrogate recovery for 2-Fluorobiphenyl was outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87809, Batch ID 40214:
Sample 1606512-005A: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.
Sample 1606512-006A: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.
Sample 1606512-007A: Recovery for Internal Standards exceeded control limits due to elevated concentrations of target and non-target analytes in the sample. Sample was re-analyzed and results were similar.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87809, Batch ID R87809:
Sample CCV SIM 071416S7: CCV results for Benz(a)anthracene, Benzo(b)fluoranthene and Benzo(k)fluoranthene exceed the 20% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87836, Batch ID 40228:
Sample 1606512-012A: Initial analysis performed with in hold time. Sample required an additional dilution for 5 analytes; this dilution was performed past the recommended hold time.

Analytical Comments for Test SW_6010S, Analytical Run No 87406, Batch ID 40282:
Sample 1606506-006C MS/MSD: Spike recoveries for several analytes were outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87158, Batch ID 40326:
Sample 1606601-008C MS/MSD: Spike recoveries for several analytes were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87669, Batch ID 87669:
Sample CCVE SIM S7 072116: Ending CCV results for Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Dibenz(a,h)anthracene and Indeno(1,2,3-cd)pyrene exceeded the 50% criteria.

RTI Laboratories - Definitions and Acronyms

WO#: 1606512

Date Reported: 8/25/2016
Revision v2

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606524

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

RTI Laboratories - Case Narrative

WO#: 1606524

Date Reported: 8/29/2016
Revision v2

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical report revised 9/7/2016: Reference to MB-40244 and LCS-40244 was removed from QC report.

Analytical Report revised 8/11/2016: Compound 3,3´-Dichlorobenzidine and Di-N-Butyl Phthalate was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A
- Polychlorinated Biphenyls - 8082A
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM
- Semi-Volatile Organic Compounds - 8270D-SIM-STAR
- Explosives - 8330B

Analytical Comments for Test SW_8270S-LL, Analytical Run No 86974, Batch ID R86974:
Sample ICV S8 050216: ICV results for Benzoic acid and Bis(2-chloroisopropyl) ether exceeded control limits.
Sample CCV S8 062516: CCV results for 4-Nitrophenol, Benzoic acid, Bis(2-chloroisopropyl) ether and N-Nitrosodimethylamine exceeded control limits.
Sample CCVE S8 062516: Ending CCV result for Benzoic acid exceeded recovery control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87145, Batch ID 40226:
No samples from work order 1606524 were reported in this analytical run.
Sample LCS-40226: Recovery for Dibenzo(a,h)pyrene was outside control criteria.
Sample 1606593-006AMS: Multiple recovery failures detected for sample. Sample is not associated with work order.
Sample 1606593-006AMSD: Multiple recovery failures detected for sample. The RPD percentage for 4-Nitrophenol was above control criteria. Sample is not associated with work order.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID R87747:
Sample ICV S8 070216: ICV result for Bis(2-chloroisopropyl) ether exceeded control limits, high.
Sample CCV S8 070816: CCV results for 2,4,6-Trichlorophenol, 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2-Nitroaniline, 2-Nitrophenol, 3-Nitroaniline, 4,6-Dinitro-2-methylphenol, 4-Nitroaniline and 4-Nitrophenol exceeded control criteria, all high.
Sample CCVE S8 070816: Ending CCV results for Benzoic acid and N-nitrosodipropylamine exceeded recovery control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID R87828:
Sample ICV S8 080216: ICV results for 4,6-Dinitro-2-methylphenol, Bis (2-chloroisopropyl)ether, Dibenzo(a,h)pyrene exceeded control limits.
Sample CCV S8 080316: CCV results for 4,6-Dinitro-2-methylphenol, Benzoic acid, Bis (2-chloroisopropyl)ether, Dibenzo(a,h)pyrene and Pentachlorophenol exceeded control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID 40226:
Sample 1606524-008: Re-analysis reported due to failure of internal standards in original analysis.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87669, Batch ID 87669:
Sample CCVE SIM S7 072116: Ending CCV results for Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Dibenz(a,h)anthracene and Indeno (1,2,3-cd)pyrene exceeded the 50% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87669, Batch ID 40228:
Sample 1606524-017A: Surrogate Nitrobenzene-d5 was outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID 87786:
Sample CCV SIM S7 080116 : Results for 1-Methylnaphthalene exceeded QC LIMIT.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID 40228:
Sample 1606524-003A: Surrogate recovery for Terphenyl-d14 was outside control criteria.
Sample 1606524-008A: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were diluted out of sample. Sample was originally analyzed at a lower dilution, (3x), were surrogates had passed. However, all analyses were detected above calibration range and not reported. Surrogates were reported with 200x dilution results.

Analytical Comments for Test SW_8330S, Analytical Run No 87217, Batch ID 40255:
Sample Grinding LCS: Elevated recoveries for most compounds. All associated samples were non detect for all analytes.
Sample Grinding LCS 5X: Elevated recoveries for most compounds. All associated samples were non detect for all analytes.
Sample 1606524-006AMS: Recovery for 2,6-Dinitrotoluene exceeded control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87158, Batch ID 40326:
Sample 1606601-008CMS: Recoveries for multiple analytes failed control criteria. Sample is not associated with work order.
Sample 1606601-008CMSD: Recoveries for multiple analytes failed control criteria. Sample is not associated with work order.

Analytical Comments for Test SW_6010S, Analytical Run No 87450, Batch ID 40376:
Sample 1606606-002BMS: Recoveries for multiple analytes were outside control criteria. Sample is not associated with work order.
Sample 1606606-002BMSD: Recoveries for Aluminum, Iron, Magnesium, Manganese and Zinc were outside control criteria. Sample is not associated with work order.

RTI Laboratories - Definitions and Acronyms

WO#: 1606524

Date Reported: 8/29/2016
Revision v2

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606525

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606525

Date Reported: 8/25/2016
Revision v4

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical report revision: 9/16/16: Update LOQ for Benzene for samples 1606525-012A, -013A, -014A, -015A, and -016A.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Percent Moisture - ASTM-D2216
Volatile Organic Compounds - 8260C-ME
Volatile Organic Compounds - 8260C
Volatile Organic Compounds - 8260C-STAR

Analytical report revised 7/15/2016: Original report contained two extra compounds for VOC analysis that was not required in project EQAP.

Samples 1606525-004A, -005A, -006A, -007A, -008A and -009A were initially analyzed twice for Low-Level Volatile Organic Compounds. Responses for internal standards exceeded method specified criteria. Sample re-analyses were performed using the methanol preserved vials. The results for these samples were reported from the methanol vials with associated elevated reporting limits.

Analytical Comments for Test SW_8260S, Analytical Run No 86786, Batch ID R86786:
Sample VOA11B ICV 061616: ICV results for 1,2,3-Trichlorobenzene, 2-Methylnaphthalene, Chloroethane, Hexachlorobutadiene and Naphthalene exceeded the 20% criteria.
Sample VOA11B CCV 062016: CCV results for 2,2-Dichloropropane, 2-Methylnaphthalene, Carbon tetrachloride and Chloroethane exceeded the 20% criteria.
Sample VOA11B LCS 06201: Recoveries for 1,2,3-Trichlorobenzene, 2-Methylnaphthalene, Bromoform and Hexachlorobutadiene exceeded the control limits.
Sample VOA11B CCVE 062016: Ending CCV results for 2-Methylnaphthalene, Chloroethane and Hexachloroethane exceeded the 50% criteria.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86751, Batch ID R86751:
Sample VOA11B CCV 061716: CCV results for Acetone, Bromoform, Vinyl acetate exceeded the 20% criteria.
Sample VOA11B MBLK 0617: Acetone and Methylene chloride present in Method Blank at a concentration > 1/2 LOQ.
Sample VOA11B LCS 06171: Recoveries for Acetone, Bromoform and Methylene chloride exceeded control limits.
Sample VOA11B LCSD 0617: Recoveries for Acetone, Bromoform, Methylene chloride and Chlorodibromomethane exceeded control limits.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86773, Batch ID R86773:
Sample VOA11B CCV 061816: CCV results for 1,2-Dibromo-3-chloropropane, Acetone, Bromoform and Chlorodibromomethane exceeded the 20% criteria.
Sample VOA11B MBLK 0618: Acetone and Methylene Chloride were present in Method Blank at a concentration > 1/2 LOQ.
Sample VOA11B LCS 06181: Recoveries for 1,2-Dibromo-3-chloropropane, Acetone, Bromoform and Chlorodibromomethane exceeded control limits.
Sample VOA11B LCSD 0618: Recoveries for 2-Butanone, Acetone, Bromoform, Methylene chloride, Chlorodibromomethane, and cis-1,3-Dichloropropene exceeded control limits. RPD results for 2-Butanone and Acetone exceeded control limits.
Sample VOA11B CCVE 061816: Ending CCV results for Acetone exceeded the 50% criteria.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86807, Batch ID R86807:
Sample VOA11B CCV 062116: CCV results for Acetone, Bromoform, Carbon tetrachloride, Vinyl acetate exceeded the 20% criteria.
Sample VOA11B MBLK 0621: Acetone present in Method Blank at a concentration > 1/2 LOQ.
Sample VOA11B LCS 06211: Recoveries for 2-Butanone and Acetone exceeded control limits.
Sample VOA11B LCSD 0621: Recoveries for Acetone exceeded control limits. RPD results for 2-Butanone and Acetone exceeded control limits.
Sample VOA11B CCVE 062116: Ending CCV results for Vinyl acetate exceeded the 50% criteria.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 87289, Batch ID R87289:
Sample VOA11B LCSD 0618: Recovery for Naphthalene was outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606525

Date Reported: 8/25/2016
Revision v4

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606529

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606529

Date Reported: 8/26/2016
Revision v1

Client:	AECOM Design and Consulting Services (DCS)
Project:	Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Volatile Organic Compounds - 8260C
Semi-Volatile Organic Compounds - 8270D-MOD
Semi-Volatile Organic Compounds - 8270D SIM

Prep Batch (SW_3510BNA) / 40262:
Sample 1606529-005B: Re-Prep Method hold time was exceeded by 5.859 day(s). emulsion formed. centrifuge used.6/28/2016

Analytical Comments for Test SW_8260A, Analytical Run No 86938, Batch ID R86938:
Sample VOA11B CCV 062616: CCV results for1,2-Dibromo-3-chloropropane, acetone, Bromoform, and 2-hexanone exceed limits.
Sample VOA11B LCS 06261: Bromoform, Chlorodibromomethane, and cis-1,3-dichloropropene exceeded QC limits.
Sample VOA11B LCSD 0626: Bromoform, Chlorodibromomethane, cis-1,3-dichloropropene, ethyl benzene, styrene, 2-hexanone, and total Xylene exceeded QC limits.
Sample 1606529-002A: Surrogate recovery for Toluene-d8 exceeded QC limit.
Sample VOA11B CCVE 062616: CCV results for Trichlorofluoromethane, bromomethane and 4-isopropyltoluene exceed limits.

Analytical Comments for Test SW_8260A, Analytical Run No 86945, Batch ID R86945:
Sample VOA11B CCV2 062616: Acetone, Bromoform, chloromethane, Trichlorofluoromethane, and 2-hexanone exceed the 20% criteria.
Sample VOA11B MBLK2 062: Surrogate recovery for Toluene-d8 exceeded QC limit. Chloromethane > 1/2 LOQ.
Sample VOA11B LCS2 0626: LCS results for Bromodichloromethane,Chlorodibromomethane,cis-1,3-Dichloropropene, Styrene, total Xylene, Bromoform ,and Trichlorofluoromethane exceed the 20% criteria.
Sample VOA11B LCSD2 062: Spike recoveries for several analytes were outside the control limits.
Sample 1606529-003A: Surrogate recovery for Toluene-d8 exceeded QC limit.
Sample 1606529-005A: Surrogate recovery for Toluene-d8 exceeded QC limit.
Sample VOA11B CCVE 062616: Trichlorofluoromethane and bromomethane exceed the 50% criteria.

Analytical Comments for Test SW_8260A, Analytical Run No 86965, Batch ID R86965:
Sample VOA10 CCV 062716: 1,2-Dibromo-3-chloropropane and Chlorodibromomethane exceed the 20% criteria.
Sample VOA10 LCSD 06271: RPD for 1,2,4-Trichlorobenzene was outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86836, Batch ID 40190:
Sample LCS-40190: N-Nitrosodimethylamine, 4-Nitrophenol, Benzoic Acid, Phenol and Phenol-d5 exceeded control limit.
Sample LCSD-40190: Phenol-d5, N-Nitrosodimethylamine, and 4-Nitrophenol exceeded control limit. RPD for Benzoic Acid was outside the control limits.
Sample MB-40190: Surrogate recovery for Phenol-d5 was outside the control limits.
Sample 1606529-002B: Surrogate Phenol-d5 was outside the control limits.
Sample 1606529-003B: Surrogate Phenol-d5 was outside the control limits.
Sample 1606529-005B: Surrogates recovery for Phenol-d5, Nitrobenzene-d5, and 2-Fluorobiphenyl exceeded control limit.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86836, Batch ID R86836:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062116: CCV results for 2,4-Dinitrophenol, Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine, and Pentachlorophenol exceeded control limit.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86873, Batch ID 40190:
Sample 1606529-005B: Multiple failure in surrogates. Sample re-extracted and reanalyzed on Run ID 87381. Both Analytical Runs reported per client request.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86873, Batch ID R86873:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062216: CCV results for 4-Nitrophenol,Benzoic acid, Bis(2-chloroethoxy)methane, Bis(2-chloroethyl) ether, N-Nitrosodimethylamine, and Bis(2-chloroethyl) ether exceeded control limit.
Sample CCVE S8 062216: CCVE results for Hexachlorocyclopentadiene exceeded control limit.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 87381, Batch ID 40262:
Sample LCS-40262: Benzoic Acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine, Phenol exceeded the control limit.
Sample 1606422-008B MS: Spike recoveries for 4-Nitrophenol, Hexachlorobenzene, N-Nitrosodimethylamine, Phenol and Phenol-d5 were outside the control limits.
Sample 1606422-008B MSD: Spike recoveries for 4-Bromophenyl phenyl ether, 4-Nitrophenol, Benzoic Acid, Hexachlorobenzene, N-Nitrosodimethylamine, and Phenol were outside the control limits. RPD for 1,3-Dichlorobenzene, 1,4-Dichlorobenzene and N-Nitrosodimethylamine were outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 87381, Batch ID R87381:
Sample ICV S7 031416: Bis(2-chloroisopropyl) ether exceeded the 20% criteria.
Sample CCV S7 063016: Benzoic acid, Bis(2-chloroisopropyl) ether exceeded the 20% criteria.
Sample CCVE S7 063016: Pentachlorophenol, Benzoic acid exceeded the 50% criteria.

Analytical Comments for Test SW_8270A-SIM, Analytical Run ID 87461, Batch ID 40213:
Sample 1606529-003B: Surrogates 2-Fluorobiphenyl and Nitrobenzene-d5 were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606529

Date Reported: 8/26/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606580

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Metals, ICP/MS - 6020A-PB-STAR
- Polychlorinated Biphenyls - 8082A
- Volatile Organic Compounds - 8260C
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_8082A, Analytical Run No 87065, Batch ID 40264:
Sample 1606580-007A: Decachlorobiphenyl surrogate exceeded control limit.

Analytical Comments for Test SW_8260A, Analytical Run No 86945, Batch ID R86945:
Sample VOA11B CCV2 062616: Acetone, Bromoform, chloromethane, Trichlorofluoromethane, 2-hexanone and exceed the 20% criteria.
Sample VOA11B MBLK2 062: Surrogate recovery for Toluene-d8 exceeded QC limit. Chloromethane concentration > 1/2 LOQ.
Sample VOA11B LCS2 0626: LCS results for Bromodichloromethane, Bromoform, Chlorodibromomethane, Chloromethane, cis-1,3-Dichloropropene exceed the 20% criteria.
Sample VOA11B LCSD2 062: Spike recoveries for several analytes were outside the control limits.
Sample 1606580-002A: Surrogate recovery for Toluene-d8 exceeded QC limit.
Sample VOA11B CCVE 062616: Trichlorofluoromethane and Bromomethane exceed the 50% criteria.

Analytical Comments for Test SW_8260A, Analytical Run No 86965, Batch ID R86965:
Sample VOA10 CCV 062716: 1,2-Dibromo-3-chloropropane and Chlorodibromomethane exceed the 20% criteria.
Sample VOA10 LCSD 06271: RPD for 1,2,4-Trichlorobenzene was outside the control limits.

Analytical Comments for Test SW_8260A, Analytical Run No 86984, Batch ID R86984:
Sample VOA10 CCV 062816: 1,2,4-Trichlorobenzene, 1,2-Dibromo-3-chloropropane and naphthalene exceed the 20% criteria.
Sample VOA10 LCSD 06281: 1,2-Dibromo-3-chloropropane, 1,2-dichlorobenzene, Bromoform and Chlorobenzene exceed limits. RPD for 1,2,4-Trichlorobenzene, 1,2-Dibromo-3-chloropropane, and Chloroethane were outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86836, Batch ID 40190:
Sample MB-40190: Surrogate Phenol-d5 was outside the control limit
Sample LCS-40190: N-Nitrosodimethylamine, 4-Nitrophenol, Benzoic Acid, Phenol and Phenol-d5 exceeded control limit.
Sample LCSD-40190: N-Nitrosodimethylamine, 4-Nitrophenol and Phenol-d5 exceeded control limit. RPD for Benzoic Acid was outside the control limits.
Sample 1606580-001B: Surrogates recovery for Phenol-d5, and Nitrobenzene-d5 exceeded control limit.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86836, Batch ID R86836:
Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic acid exceeded control limit.
Sample CCV S8 062116: CCV results for 2,4-Dinitrophenol, Benzoic acid, Bis(2-chloroisopropyl) ether, N-Nitrosodimethylamine, and Pentachlorophenol exceeded control limit.
Sample CCVE S8 062116: Ending CCV results for Benzoic acid exceeded the 50% criteria.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86948, Batch ID 40220:
Sample LCS-40220: 4-Nitrophenol, N-Nitrosodimethylamine and Phenol were outside the control limits.
Sample LCSD-40220: 4-Nitrophenol, Benzoic acid, and N-Nitrosodimethylamine were outside the control limits.
Sample MB-40220: Surrogates 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.
Sample 1606580-003B: Surrogate Phenol-d5, and 2-Fluorobiphenyl exceeded recovery control limit.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86948, Batch ID R86948:
Sample ICV S8 050216: ICV results for Benzoic Acid and Bis(2-chloroisopropyl) ether exceeded control limit.
Sample CCV S8 062616: CCV results 2,4-Dinitrophenol, Benzoic acid, N-Nitrosodiphenylamine and Pentachlorophenol
Sample CCVE S8 062616: Ending CCV results for Benzoic acid, Hexachlorocyclopentadiene exceeded recovery control limit.

Analytical Comments for Test SW_8260A, Analytical Run No 86945, Batch ID R86945:
1606580-002A SW_8260A: Sample ID 1606580-002A: Surrogate failure observed.

Analytical Comments for Test SW_8270A-SIM, Analytical Run No 87461, Batch ID R40213:
Sample 1606580-001B: Surrogates 2-Fluorobiphenyl and Nitrobenzene-d5 were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606580

Date Reported: 8/26/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606585

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

RTI Laboratories - Case Narrative

WO#: 1606585

Date Reported: 8/25/2016
Revision v3

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical report revision: 9/16/16: Update LOQ for Benzene for samples 1606585-002A, 003A, -005A, -011C, -012C, -013C, -014C, -015C, -016C, -017C, and -018C.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Percent Moisture - ASTM-D2216
Volatile Organic Compounds - 8260C-ME
Volatile Organic Compounds - 8260C-ME STAR
Volatile Organic Compounds - 8260C
Volatile Organic Compounds - 8260C-STAR

Volatile Organic Compounds (SW-8260):
Acetone result was over calibration for the low level volatile organic compounds analyses for Sample IDs 1606585-018A Data not reported for Acetone for this sample in this analysis.
Samples 1606585-004A, -006A, -007A, -008A, -009A, -011A, -012A, 013A, -014A, -015A, -016A, and -017A were initially analyzed twice for Low-Level Volatile Organic Compounds. Responses for internal standards exceeded method specified criteria. Sample re-analyses were performed using the methanol preserved vials. The results for these samples were reported from the methanol vials with associated elevated reporting limits.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86773, Batch ID R86773:
Sample VOA11B CCV 061816: CCV results for 1,2-Dibromo-3-chloropropane, Acetone, Bromoform and Chlorodibromomethane exceeded the 20% criteria.
Sample VOA11B MBLK 0618: Acetone and Methylene Chloride present in Method Blank at a concentration > 1/2 LOQ.
Sample VOA11B LCS 06181: Recoveries for 1,2-Dibromo-3-chloropropane, Acetone, Bromoform, Chlorodibromomethane exceeded control limits.
Sample VOA11B LCSD 0618: Recoveries for 2-Butanone, Acetone, Bromoform, Methylene chloride, Chlorodibromomethane, and cis-1,3-Dichloropropene exceeded control limits. RPD results for 2-Butanone, and Acetone exceeded control limits.
Sample VOA11B CCVE 061816: Ending CCV results for Acetone exceeded the 50% criteria.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86774, Batch ID R86774:
Sample VOA11B CCV2 061816: CCV results for 2-Butanone, 2-Hexanone, Acetone, Bromoform, Vinyl Acetate exceeded the 20% criteria.
Sample VOA11B MBLK2 061: Acetone present in Method Blank at a concentration >1/2 LOQ.
Sample VOA11B LCS2 0618: Recoveries for Acetone, Bromoform, Methylene chloride exceeded control limits.
Sample VOA11B LCSD2 061: Recoveries for Acetone, Bromoform and Methylene chloride exceeded control limits.
Sample 1606585-018A: Sample analyzed second time due to internal standard excedence in original run.
Sample 1606585-018AMS: Recoveries for several analytes exceeded control limits.
Sample 1606585-018AMSD: Recoveries and RPD results for several analytes exceeded control limits.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 87291, Batch ID R87291:
Sample VOA11B CCV 062116: CCV results for Acetone, Bromoform, Carbon tetrachloride, Vinyl acetate exceeded the 20% criteria.
Sample VOA11B MBLK 0621: Acetone present in Method Blank at a concentration > 1/2 LOQ.
Sample VOA11B LCS 06211: Recoveries for 2-Butanone, Acetone, Methyl acetate exceeded control limits.
Sample VOA11B LCSD 0621: Recoveries for Acetone exceeded control limits. RPD results for 2-Butanone, Acetone and Methyl acetate exceeded control limits.
Sample VOA11B CCVE 062116: Ending CCV results for Vinyl acetate exceeded the 50% criteria.

Analytical Comments for Test SW_8260, Analytical Run No 87014, Batch ID R87014:
Sample VOA11B ICV 062716: ICV results for 1,2-Dibromo-3-chloropropane and Chlorodibromomethane exceeded the 20% criteria.
Sample VOA11B CCV2 062816: CCV results for Chloroethane exceeded the 20% criteria.
Sample VOA11B LCS2 0628: Spike recoveries for 1,1,1,2-Tetrachloroethane, Bromodichloromethane, Chloroethane and Styrene were outside the control limits.
Sample 1606585-018C MS: Recoveries for several analytes exceeded control limits.
Sample 1606585-018C MSD: Recoveries and RPD results for several analytes exceeded control limits.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 87289, Batch ID R87289:
Sample VOA11B LCSD 0618: Recovery for Naphthalene exceeded control limits.
