RTI Laboratories - Definitions and Acronyms

WO#: 1606585

Date Reported: 8/25/2016
Revision v3

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

To: "Chicoine, Devon" <Devon.Chicoine@aecom.com>
CC: Kathy Griffin <kgriffin@rtilab.com>, "Priess, Kathryn" <Kathryn.Priess@aecom.com>

Hi Devon,

I just noticed a mistake on the COCs from yesterday

COC #061526-05
First line - the trip blank sample ID should be TB-SO-061516-01. (We have 061616 as the date portion on the chain). This was collected on 6/15 not 6/16. The sample on the label may be incorrect as well, I'm not sure.

Thanks
Amanda

RE: Camp Hero

Work Order #: 1606588

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606588

Date Reported: 8/25/2016
Revision v4

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical report revision: 9/16/16: Update LOQ for Benzene for samples 1606588-009C, -010C, -013C, -014C, -015C, -016C, -017C, -018C, -019C, -020C.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Report revision 7/17/2016: Revised analytical Summary log for VOC analysis as well as re-imported the STAR VOC list to separate analytical runs for the SEDD EDD files.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Percent Moisture - ASTM-D2216
Volatile Organic Compounds - 8260C-ME
Volatile Organic Compounds - 8260C-ME STAR
Volatile Organic Compounds - 8260C

Samples 1606588-009A, -010A, -011A, -012A, -013A, -014A, -015A, -016A, -017A, -018A, -019A and -020A were initially analyzed twice for Low-Level Volatile Organic Compounds. Responses for internal standards exceeded method specified criteria. Sample re-analyses were performed using the methanol preserved vials. The results for these samples were reported from the methanol vials with associated elevated reporting limits.

Analytical Comments for Test SW_8260S, Analytical Run No 86986, Batch ID R86986:
Sample VOA11B ICV 062716: Chlorodibromomethane exceed the 20% criteria.
Sample VOA11B CCV 062816: Chloromethane exceeds the 20% criteria.
Sample VOA11B LCS 06281: 1,1,1,2-Tetrachloroethane, chloroethane and styrene exceeds limits.
Sample 1606588-019CMS: 1,1,1,2-Tetrachloroethane, bromodichloromethane, chloroethane, cis-1,3-dichloropropene, styrene and trans-1,3-dichloropropene exceed limits.
Sample 1606588-019CMSD: 1,1,1,2-Tetrachloroethane, bromodichloromethane, chloroethane, cis-1,3-dichloropropene, styrene and trans-1,3-dichloropropene exceed limits.
Sample VOA11B CCVE 062816: Chloroethane exceeds the 50% criteria.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86774, Batch ID R86774:
Sample VOA11B CCV2 061816: CCV results for 2-Butanone, 2-Hexanone, Acetone, Bromoform, and Vinyl Acetate exceeded the 20% criteria.
Sample VOA11B MBLK2 061: Acetone present in Method Blank at a concentration >1/2 LOQ.
Sample VOA11B LCS2 0618: Recoveries for Acetone, Bromoform, Methylene chloride exceeded control limits.
Sample VOA11B LCSD2 061: Recoveries for Acetone, Bromoform and Methylene chloride exceeded control limits.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86807, Batch ID R86807:
Sample VOA11B CCV 062116: CCV results for Acetone, Bromoform, Carbon tetrachloride, Vinyl acetate exceeded the 20% criteria.
Sample VOA11B MBLK 0621: Acetone present in Method Blank at a concentration > 1/2 LOQ.
Sample VOA11B LCS 06211: Recoveries for 2-Butanone, and Acetone exceeded control limits.
Sample VOA11B LCSD 0621: Recovery for Acetone exceeded control limits. RPD results for 2-Butanone, and Acetone exceeded control limits.
Sample VOA11B CCVE 062116: Ending CCV results for Vinyl acetate exceeded the 50% criteria.

RTI Laboratories - Definitions and Acronyms

WO#: 1606588

Date Reported: 8/25/2016
Revision v4

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606593

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606593

Date Reported: 8/29/2016
Revision v2

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical Report revised 8/11/2016: Compound 3,3´-Dichlorobenzidine was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD.

Analytical report revision: 8/26/2016: Sample 1606593-016 was reported for multiple dilutions for SW-8270D SIM. However only two were needed (dilutions 1 and 10). Sample dilution 3 has been removed as well as the duplicate compounds.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A-TL
- Polychlorinated Biphenyls - 8082A
- Semi-Volatile Organic Compounds - 8270D
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM
- Semi-Volatile Organic Compounds - 8270D-SIM-STAR

Sample 1606593-001A has Pyrene and Fluoranthene in the PNA SIM Analysis being reported over-calibration. All PNAs are also being reported in the non-SIM 8270D analysis.

Analytical Comments for 8270D SIM, Sample 1606593-004A, Batch ID 40258 : Sample is being reported over calibration for compounds except Acenaphthylene and Benzo(k)fluoranthene. Sample results to reported in Non-SIM run at a 10 and 100x dilutions.

Analytical Comments for Test SW_8082S, Analytical Run No 87408, Batch ID 40377:
Sample 1606593-002B: Surrogate recovery for DCB (51.2%) exceeded control limits.

Analytical Comments for Test SW_8082S, Analytical Run No 87531, Batch ID 40483:
Sample 1606593-017B: Surrogate recoveries for TCMX (18.1%) and DCB (17.2%) exceeded control limits - similar recoveries on re-analysis.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87145, Batch ID R87145:
Sample ICV S8 070216: ICV results for Bis(2-chloroisopropyl) ether exceed the 20% criteria.
Sample CCV S8 070516: CCV results for 2,4-Dinitrophenol, 4,6-Dinitro-2-methylphenol ,Benzoic acid and 2-Nitroaniline exceed the 20% criteria.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87145, Batch ID R40226:
Sample 1606593-001A: Surrogate recoveries for 2,4,6-Tribromophenil, 2-Fluorobiohenyl and Phenol-d5 were outside the control limits. Initial analysis performed at a 1 dilution factor, however all surrogates failed during initial analysis.
Sample 1606593-006A: Surrogate recovery for 2-Fluorobiphenyl was outside the control limits.
Sample 1606593-007A: Surrogate recovery for 2,4,6-Tribromophenol exceeded QC limits
Sample 1606593-008A: Surrogate recovery for 2,4,6-Tribromophenol exceeded QC limits
Sample 1606593-006A MS/MSD: Several Spike recoveries were outside the control limits. Surrogate recovery for 2,4,6-Tribromophenol was outside the control limits.
Sample 1606593-006A MSD: RPD for 4-Nitrophenol was outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87647, Batch ID R87647:
Sample ICV S8 070216: Bis(2-chloroisopropyl) ether exceeded 20%
Sample CCV S8 070516: 2,4-Dinitrophenol,2 -Nitroaniline, 4,6-Dinitro-2-methylphenol and Benzoic acid exceeded 20%.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID R87747:
Sample ICV S8 070216: Bis(2-chloroisopropyl) ether exceed 20% limit.
Sample CCV S8 070816: 2,4,6-Trichlorophenol, 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2-Nitroaniline,2-Nitrophenol, 3-Nitroaniline, 4-Nitroaniline, 4-Nitrophenol and 4,6-Dinitro-2-methylphenol exceed 20%.
Sample 1606601-008A MS: Spike recovery for 4-Nitroaniline was outside the control limits.
Sample 1606601-008A MSD: Spike recoveries and RPDs were outside the control limits for several compounds. Surrogate recovery for Terphenyl-d14.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID R87828:
Sample ICV S8 080216: 2-chloroisopropyl) ether and 4,6-Dinitro-2-methylphenol exceeded QC limits.
Sample CCV S8 080316: Benzoic acid, Pentachlorophenol and Bis(2-chloroisopropyl) ether exceeded QC limits

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87700, Batch ID 40258:
Sample 1606593-004A: Sample is being reported over calibration for compounds except Acenaphthylene and Benzo(k)fluoranthene. Sample results to reported in Non-SIM run at a 10 and 100x dilutions.
Sample 1606593-004A: Surrogate recovery for Terphenyl-d14 was outside the control limits.
Sample 1606593-010A: Surrogate recovery for Nitrobenzene was outside the control limits.
Sample 1606467-016D MS/MSD: Spike recoveries, surrogate recoveries and RPDs were outside the control limits for several compounds.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87701, Batch ID 40228:
Sample 1606593-001A: Pyrene and Fluoranthene reported over calibration range. Samples analyzed and report under the 8270D, non-SIM analysis.
Sample 1606593-002A: All surrogate recoveries were outside the control limits, diluted out of sample due to high dilution requirements.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID R87786:
Sample CCV SIM S7 080116: Results for 1-Methylnaphthalene exceeded QC LIMIT.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID 40258:
Sample 1606593-016A: Recovery for all surrogates exceeded control limits due to elevated concentrations of target and non-target analyte in the sample.
Sample 1606593-018A: Surrogate recovery for Terphenyl-d14 was outside the control limits.
Sample 1606593-019A: Recovery for all surrogates exceeded control limits due to elevated concentrations of target and non-target analyte in the sample.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87818, Batch ID 40258:
Sample 1606593-017A: Surrogate recovery for Terphenyl-d14 was outside the control limits.
Sample LCS-40258: Spike recovery for 1-Methylnaphthalene was outside the control limits. Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.
Samples 1606601-008A MS/MSD: Spike recoveries and RPDs were outside the control limits for several compounds.

Analytical Comments for Test SW_6010S, Analytical Run No 87541 Batch ID 40445:
Samples 1606652-015F MS/MSD: Spike recoveries for several analytes were outside the control limits. RPD for Calcium was outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606593

Date Reported: 8/29/2016
Revision v2

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606601

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606601

Date Reported: 8/25/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical Report revised 8/12/2016: Compound 3,3´-Dichlorobenzidine was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A
- Polychlorinated Biphenyls - 8082A
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID R87747:
Sample ICV S8 070216: ICV result for Bis(2-chloroisopropyl)ether exceeded control limits.
Sample CCV S8 070816: CCV results for 2,4,6-Trichlorophenol, 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2-Nitroaniline,2-Nitrophenol, 3-Nitroaniline, 4,6-Dinitro-2-methylphenol, 4 Nitroaniline and 4-Nitrophenol exceeded control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID 40244:
Sample 1606601-001A: Surrogate recovery for Terphenyl-d14 exceeded control limits.
Sample 1606601-003A: Surrogate recovery for Terphenyl-d14 exceeded control limits.
Sample 1606601-005A: Surrogate recovery for Terphenyl-d14 exceeded control limits.
Sample 1606601-008A: Surrogate recovery for Terphenyl-d14 was outside control criteria.
Sample 1606601-008AMS: Spike recoveries for 4-Nitroaniline and 3,3-Dichlorobenzidine wer outside control criteria. Result for 2,4-Dinitrophenol was above calibration range.
Sample 1606601-008AMSD: Spike recoveries and RPD percentages for multiple analytes were outside control criteria. Surrogate recovery for Terphenyl-d14 was outside control criteria. Possible spiking error.
Sample LCS-40244: Spike recovery for Benzoic Acid and 3,3-Dichlorobenzidine were outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID R87828:
Sample ICV S8 080216: ICV results for 4,6-Dinitro-2-methylpehnol and Bis(2-chloroisopropyl)ether exceeded control limits.
Sample CCV S8 080316: CCV results for 4,6-Dinitro-2-methylpehnol, Benzoic acid, Bis(2-chloroisopropyl)ether and Pentachlorophenol exceeded control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID 87786:
Sample CCV SIM S7 080116: Results for 1-Methylnaphthalene exceeded QC Limit.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID 40280:
Sample MB-40280: Recoveries for 2-Fluorobiphenyl and Nitrobenzene-d5 were outside control criteria.
Sample LCS-40280: Spike recovery for 1-Methylnaphthalene was outside the control limits. Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.
Sample 1606601-002A: Surrogate recovery for Nitrobenzene-d5 was outside control criteria.
Sample 1606601-003A: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87818, Batch ID 40280:
Sample 1606601-006A: Surrogate recoveries for 2-Fluorobiphenyl and Nitrobenzene-d5 exceeded control limits due to elevated concentrations of target and non-target analytes in the sample.
Sample 1606601-008A: Surrogate recovery for Nitrobenzene-d5 exceeded control limits.
Sample 1606601-008AMS: Spike recoveries for 1-Methylnaphthalene, Fluoranthene, and Indeno(1,2,3-cd)pyrene were outside the control limits. Result for Benzo(b)fluoranthene was above calibration range. Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.
Sample 1606601-008A MSD: Spike recoveries and RPD percentages for several compounds were outside the control limits. Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87158, Batch ID 40326:
Sample 1606601-008CMS: Spike recoveries for several analytes exceeded control limits. Further dilutions were required for parent sample. Suspected matrix interference for Copper.
Sample 1606601-008CMSD: Spike recoveries for several analytes exceeded control limits. Further dilutions were required for parent sample.

Suspected matrix interference for Copper. Suspected matrix interference for Copper.

Analytical Comments for Test SW_6010S, Analytical Run No 87697, Batch ID 40406:
Sample 1606605-003BMS: Spike recoveries for several analytes were outside the control limits. Sample was not associated with work order.
Sample 1606605-003BMSD: Spike recoveries for several analytes were outside the control limits. RPD percentage for Selenium was above the control limit. Sample was not associated with work order.

Analytical Comments for Test SW_6010S, Analytical Run No 87792, Batch ID 40406:
Sample 1606605-003BMS: Recoveries for Chromium and Zinc were outside control limits. Sample was not associated with work order.
Sample 1606605-003BMS: Recovery for Zinc was outside control limits. Sample was not associated with work order.

Analytical Comments for Test SW_6010S, Analytical Run No 87541, Batch ID 40445:
Sample 1606652-015FMS: Spike recoveries for several analytes were outside the control limits. Sample was not associated with work order.
Sample 1606652-015FMSD: Spike recoveries for several analytes were outside the control limits. The RPD percentage for Calcium was above control limit. Sample was not associated with work order.

Analytical Comments for Test SW_8082S, Analytical Run No 87531, Batch ID 40483:
Sample 1606601-005B: Surrogate recovery for Tetrachloro-m-xylene exceeded control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606601

Date Reported: 8/25/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606603

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606603

Date Reported: 8/25/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/OES - 6010C-STAR
- Metals, ICP/MS - 6020A-TL
- Polychlorinated Biphenyls - 8082A
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM
- Semi-Volatile Organic Compounds - 8270D-SIM-STAR

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID R87828:
- Sample ICV S8 080216: Bis(2-chloroisopropyl) ether and 4,6-Dinitro-2-methylphenol exceeded QC limits.
- Sample CCV S8 080316: Benzoic acid, Pentachlorophenol, 4,6-Dinitro-2-methylphenol and Bis(2-chloroisopropyl) ether exceeded QC limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID 40244:
- Sample 1606603-009A-: Surrogate recoveries for 2,4,6-Tribromophenol, 2-Fluoribiphenyl and Terphenyl-d14 were outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID R87747:
- Sample ICV S8 08021: Bis(2-chloroisopropyl) ether exceeded QC limits.
- Sample CCV S8 070816: CCV results for 2,4,6-Trichlorophenol, 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2-Nitroaniline, 2-Nitrophenol, 3-Nitroaniline, 4,6-Dinitro-2-methylphenol, 4-Nitroaniline and 4-Nitrophenol exceeded control criteria, all high.
- Sample CCVE S8 070816: Ending CCV results for Benzoic acid, N-nitrosodipropylamine exceeded the 50% criteria.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID 40244:
- Sample 1606601-008A MS: Spike recoveies for 4-Nitroaniline and 3,3-Dichlorobenzidine were outside the control limits.
- Sample 1606601-008A MSD: Spike recoveries, Surrogates and RPDs for several compounds were outside the control limits.
- Sample LCS-40244: Spike recoveries for Benzoic Acid and 3,3-Dichlorobenzidine were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87837, Batch ID 40280:
- Sample 1606603-002A: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-D5, and Terphenyl-d14 were outside the control limits.
- Sample 1606603-005A: Surrogate recovery for Terphenyl-d14 was outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87766, Batch ID 40280:
- Sample MB-40280: Surrogate recoveries for 2-Fluorobiphenyl and Nitrobenzene-D5 were outside the control limits.
- SampleLCS-40280: Spike recovery for 1-Methylnaphthalene was outside the control limits. Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-D5, and Terphenyl-d14 were outside the control limits.
- Samples 1606601-008A MS/MSD: Several spike, surrogate recoveries and RPDs were outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87852, Batch ID 40481:
- Samples 1606652-014F MS/MSD: Spike recoveries for several analytes were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606603

Date Reported: 8/25/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606604

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606604

Date Reported: 8/25/2016
Revision v2

Client:	AECOM Design and Consulting Services (DCS)
Project:	Camp Hero

Analytical report revision: 9/16/16: Update LOQ for Benzene for samples 1606604-001C, -002C, -003C, -004C, -005C, -006C, and -007C.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A-TL
- Polychlorinated Biphenyls - 8082A
- Volatile Organic Compounds - 8260C-ME
- Volatile Organic Compounds - 8260C
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Samples 1606604-001A through 007A were initially analyzed twice for Low-Level Volatile Organic Compounds. Responses for internal standards exceeded method specified criteria. Sample re-analyses were performed using the methanol preserved vials. The results for these samples were reported from the methanol vials with associated elevated reporting limits.

Analytical Comments for Test SW_8260S, Analytical Run No 86986, Batch ID R86986:
- Sample VOA11B ICV 062716: 1,2-Dibromo-3-Chloroporpane and Chlorodibromomethane exceed the 20% criteria.
- Sample VOA11B CCV 062816: Chloromethane exceeds the 20% criteria.
- Sample VOA11B LCS 06281: 1,1,1,2-Tetrachloroethane, Bromodichloromethane, chloroethane and styrene exceeds limits.
- Sample VOA11B CCVE 062816: Chloroethane exceeds the 50% criteria.
- Sample 1606588-019C MS/MSD: Several spike recoveries were outside the control limits

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86936, Batch ID R86936:
- Sample VOA10 ICV 062316: Acetone and vinyl acetate exceed limits.
- Sample VOA10 MBLK 06231: Methylene Chloride was > 1/2 LOQ. Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample VOA10 LCS 062316: Cis-1,3-dicloropropene, Methylene chloride, and styrene exceed limits.
- Sample VOA10 LCSD 06231: 2-Butanone, Cis-1,3-dichloropropene and trans-1,3-dichloropropene exceed limits. RPD for 2-Butanone was outside the control limits
- Sample 1606604-008A: Surrogate recovery for Toluene-d8 exceeded QC limit.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID R87828:
- Sample ICV S8 080216: Bis-(2-chloroisopropyl) ether and ,4,6-Dinitro-2-methylphenol exceeded QC limits.
- Sample CCV S8 080316: Benzoic acid, Pentachlorophenol and 2-chloroisopropyl) ether exceeded QC limits

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87828, Batch ID 40244:
- Sample 1606604-005D: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5, and Terphenyl-d14 were outside the control limits. Sample extract was a waxy oil and sample was diluted.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID R87747:
- Sample ICV S8 070216: Bis(2-chloroisopropyl) ether exceed 20% limit.
- Sample CCV S8 070816: 2,4,6-Trichlorophenol, 2,4-Dinitrophenol, 2,4-Dinitrotoluene, 2-Nitroaniline,2-Nitrophenol, 3-Nitroaniline,and 4,6-Dinitro-2-methylphenol, 4-Nitroaniline and 4-Nitropehenol exceed 20%

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87747, Batch ID 40244:
- Sample 1606601-008A MS/MSD: Multiple spike recoveries and RPDs were outside the control limits.
- Sample 1606601-008A MSD: Surrogate Terphenyl-d14 was outside the control limits.
- Sample LCS-40244: Spike recovery for Benzoic Acid and 3,3-Dichlorobenzidine were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87786, Batch ID 40280:
- Sample MB-40180: Surrogate recoveries for 2-Fluorbiphenyl and Nitrobenzene-d5 were outside the control limits.
- Sample LCS40280: Spike and surrogate recoveries for 1-Methylnaphthanele, 2-Fluorobiphenyl, Notrobenzene-d5 and Terphenyl-d14 were outside the control limits.
- Sample 1606601-008A MS: Spike and surrogate recoveries for 1-Methylnaphthalene, Fluoranthene and Inden1,2,3-cd)pyrene, 2-fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.
- Sample 1606601-008A MSD: Several spike recoveries and RPDs were outside the control limits. Surrogate recoveries for 2-fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87450, Batch ID 40376:
- Sample 1606606-002B MS: Spike recoveries for Al, Fe, Mn, K, Se and Zn were outside the control limits.
- Sample 1606606-002B MSD: Spike recoveries for Al, Fe, Mg, and Mn were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606604

Date Reported: 8/25/2016
Revision v2

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606605

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

RTI Laboratories - Case Narrative

WO#: 1606605

Date Reported: 8/25/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A-TL
- Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_6010S, Analytical Run No 87697, Batch ID 40406:
- Sample 1606605-003BMS: Recoveries for several analytes exceeded control limits. Suspected matrix interference for Selenium.
- Sample 1606605-003BMSD: Recoveries for several analytes exceeded control limits. RPD results for Selenium exceeded control limits.

Suspected matrix interference for Selenium.

Analytical Comments for Test SW_6010S, Analytical Run No 87792, Batch ID 40406:
- Sample 1606605-003BMS: Recoveries for Chromium and Zinc exceeded control limits.
- Sample 1606605-003BMSD: Recovery for Zinc exceeded control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87450, Batch ID 40376:
- Samples 1606606-002B MS/MSD: Spike recoveries for several analytes were outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87746, Batch ID 40430:
- Samples 1606652-005F MS/MSD: Spike recoveries for several analytes were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87753, Batch ID R87753:
- Sample CCV 072616 S7: 1-methylnaphthalene exceeded QC limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87753, Batch ID 40291:
- Samples 1606652-014D MS/MSD: Spike recoveries, surrogates and several RPDs were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87854, Batch ID 40290:
- Sample 1606605-011A: Surrogate recoveries for Terphenyl-d14, Nitrobenzene-d5 and 2-Fluorobiphenyl were outside the control limits.
- Sample 1606605-0141A: Surrogate recovery for Terphenyl-d14 was slightly below the control limits.
- Sample LCS-40290, Batch ID 40290 : LCS results for 1-Methylnaphthalene exceeded QC limits

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 887974, Batch ID R87974:
- Sample CCV SIM S8 072516: CCV results for Benzo(g,h,i)perylene and 1-Methylnaphthalene exceeded QC limits

RTI Laboratories - Definitions and Acronyms

WO#: 1606605

Date Reported: 8/25/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606606

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606606

Date Reported: 8/8/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
Percent Moisture - ASTM-D2216
Metals, ICP/OES - 6010C
Metals, ICP/MS - 6020A-TL
Semi-Volatile Organic Compounds - 8270D SIM

Analytical Comments for Test SW_6010S, Analytical Run No 87450, Batch ID 40376:
Sample 1606606-002BMS: Recoveries for Aluminum, Iron, Manganese, Potassium, Selenium and Zinc exceeded control limits.
Sample 1606606-002BMSD: Recoveries for Aluminum, Iron, Magnesium, Manganese and Zinc exceeded control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87697, Batch ID 40406:
Samples 1606605-003B MS/MSD: Spike recoveries for multiple analytes were outside the control limits. RPD for Se was outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87792, Batch ID 40406
Sample 1606605-003B MS: Spike recoveries for Chromium and Zinc were outside the control limits.
Sample 1606605-003B MDS: Spike recovery for Zinc were outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87852, Batch ID 40481:
Samples 16066525-014F MS/MSD: Spike recoveries for multiple analytes were outside the control limits. RPD for Se was outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87753, Batch ID R87753:
Sample ID CCV 072616 S7: 1-Methylnaphthalene exceeded criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87753, Batch ID 40291:
Sample ID 1606606-004A: Surrogate recoveries for 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.
Samples 1606652-014D MS/MSD: Spike, surrogate recoveries and RPDs for several compounds were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87837, Batch ID 40291:
Sample ID 1606606-005A: Surrogate recovery for Terphenyl-d14 were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606606

Date Reported: 8/8/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606631

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: **1606631**

Date Reported: **8/6/2016**
Original

Client:	AECOM Design and Consulting Services (DCS)
Project:	Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Metals, ICP/MS - 6020A
- Metals, ICP/MS - 6020A-PB-STAR
- Silver and/or Antimony, ICP/MS - 6020A-SA
- Polychlorinated Biphenyls - 8082A
- Volatile Organic Compounds - 8260C
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Sample 1606631-003B for SW_8270A-SIM analysis required to be performed with 4 different dilutions in order to report all compounds with in a working calibration range. Please note the third dilution (50) and the fourth dilution (200) were analyzed past the recommended hold time.

Analytical Comments for Test SW_6020A, Analytical Run No 87684, Batch ID 40440:
- Sample 1606631-005DMS: Recoveries for Calcium and Aluminum exceeded control limits.
- Sample 1606631-005DMSD: Recoveries for Calcium, Sodium and Aluminum exceeded control limits.

Analytical Comments for Test SW_8082A, Analytical Run No 87065, Batch ID 40264:
- Sample 1606631-004C: Decachlorobiphenyl surrogate exceeded control limit.

Analytical Comments for Test SW_8260A, Analytical Run No 86945, Batch ID R86945:
- Sample VOA11B CCV2 062616: Acetone, Bromoform, chloromethane, Trichlorofluoromethane, 2-hexanone and bromomethane exceed the 20% criteria.
- Sample VOA11B MBLK2 062: Chloromethane detected in method blank in concentrations > 1/2 LOQ. Surrogate exceeded QC limit.
- Sample VOA11B LCS2 0626: LCS results for Bromodichloromethane,Chlorodibromomethane,cis-1,3-Dichloropropene, Chloromethane, and Bromoform exceed the 20% criteria.
- Sample VOA11B LCSD2 062: Spike recoveries for several compounds were outside the control limits.
- Sample 1606631-007A: Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample 1606631-012A: Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample 1606631-013A: Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample VOA11B CCVE 062616: Trichlorofluoromethane and bromomethane exceed the 50% criteria.

Analytical Comments for Test SW_8260A, Analytical Run No 86984, Batch ID R86984:
- Sample VOA10 CCV 062816: 1,2-Dibromo-3-chloropropane exceed the 20% criteria.
- Sample VOA10 LCSD 06281: 1,2-Dibromo-3-chloropropane, Bromoform and Chlorobenzene exceed limits. RPD for 1,2-Dibromo-3-chloropropane and Chloroethane were outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86948, Batch ID 40220:
- Sample LCS-40220: Spike recoveries for 4-Nitrophenol, N-Nitrosodimethylamine and Phenol were outside the control limits.
- Sample LCSD-40220: Spike recoveries for 4-Nitrophenol, Benzoic acid, and N-Nitrosodimethylamine were outside the control limits.
- Sample 1606631-001B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-002B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-003B: Surrogate Phenol-d5, 2-Fluorobiphenyl, Terphenyl-d14 and Nitrobenzene-d5
- Sample 1606631-004B: Surrogate Phenol-d5, Nitrobenzene-d5 Terphenyl-d14 and 2-Fluorobiphenyl exceeded recovery control limit.
- Sample 1606631-005B: Surrogate Phenol-d5, 2-Fluorobiphenyl and Nitrobenzene-d5 exceeded recovery control limit.
- Sample 1606631-009B: Surrogate Phenol-d5 and Terphenyl-d14 exceeded recovery control limit.
- Sample 1606631-010B: Surrogate Phenol-d5, 2-Fluorobiphenyl and Nitrobenzene-d5 exceeded recovery control limit.
- Sample 1606631-011B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-014B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-015B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample MB-40220: Surrogates 2,4,6-Tribromophenol, 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86948, Batch ID R86948:
- Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic Acid exceeded control limit.
- Sample CCV S8 062616: CCV results 2,4-Dinitrophenol, Benzoic acid, N-Nitrosodiphenylamine and Pentachlorophenol
- Sample CCVE S8 062616: Ending CCV results for Benzoic acid exceeded recovery control limit.

Analytical Comments for 8270D, Sample CCVE SIM 062716S7, Batch ID R87615 : Due to the nature of the samples the recovery for Benzo(g,h,I) perylene failed.

Analytical Comments for Test SW_8270A-SIM, Analytical Run No 87461, Batch ID 40213:
- Sample 1606631-005B: Surrogate recoveries for 2-Fluorobiphenyl, and Nitrobenzene-d5 were outside the control limits.
- Sample 1606631-008B: Surrogate recovery for 2-Fluorobiphenyl was outside the control limits.
- Sample 1606631-009B: Surrogate recoveries for 2-Fluorobiphenyl, and Terpheny;l-d14 were outside the control limits.
- Sample 1606631-005B: Surrogate recoveries for 2-Fluorobiphenyl, and Nitrobenzene-d5 were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606631

Date Reported: 8/6/2016
Original

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606631

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606631

Date Reported: 8/25/2016
Revision v1

Client:	AECOM Design and Consulting Services (DCS)
Project:	Camp Hero

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Metals, ICP/MS - 6020A
- Metals, ICP/MS - 6020A-PB-STAR
- Silver and/or Antimony, ICP/MS - 6020A-SA
- Polychlorinated Biphenyls - 8082A
- Volatile Organic Compounds - 8260C
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Sample 1606631-003B for SW_8270A-SIM analysis required to be performed with 4 different dilutions in order to report all compounds with in a working calibration range. Please note the third dilution (50) and the fourth dilution (200) were analyzed past the recommended hold time.

Analytical Comments for Test SW_6020A, Analytical Run No 87684, Batch ID 40440:
- Sample 1606631-005DMS: Recoveries for Calcium and Aluminum exceeded control limits.
- Sample 1606631-005DMSD: Recoveries for Calcium, Sodium and Aluminum exceeded control limits.

Analytical Comments for Test SW_8082A, Analytical Run No 87065, Batch ID 40264:
- Sample 1606631-004C: Decachlorobiphenyl surrogate exceeded control limit.

Analytical Comments for Test SW_8260A, Analytical Run No 86945, Batch ID R86945:
- Sample VOA11B CCV2 062616: Acetone, Bromoform, chloromethane, Trichlorofluoromethane, 2-hexanone and bromomethane exceed the 20% criteria.
- Sample VOA11B MBLK2 062: Chloromethane detected in method blank in concentrations > 1/2 LOQ. Surrogate exceeded QC limit.
- Sample VOA11B LCS2 0626: LCS results for Bromodichloromethane,Chlorodibromomethane,cis-1,3-Dichloropropene, Chloromethane, and Bromoform exceed the 20% criteria.
- Sample VOA11B LCSD2 062: Spike recoveries for several compounds were outside the control limits.
- Sample 1606631-007A: Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample 1606631-012A: Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample 1606631-013A: Surrogate recovery for Toluene-d8 exceeded QC limit.
- Sample VOA11B CCVE 062616: Trichlorofluoromethane and bromomethane exceed the 50% criteria.

Analytical Comments for Test SW_8260A, Analytical Run No 86984, Batch ID R86984:
- Sample VOA10 CCV 062816: 1,2-Dibromo-3-chloropropane exceed the 20% criteria.
- Sample VOA10 LCSD 06281: 1,2-Dibromo-3-chloropropane, Bromoform and Chlorobenzene exceed limits. RPD for 1,2-Dibromo-3-chloropropane and Chloroethane were outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86948, Batch ID 40220:
- Sample LCS-40220: Spike recoveries for 4-Nitrophenol, N-Nitrosodimethylamine and Phenol were outside the control limits.
- Sample LCSD-40220: Spike recoveries for 4-Nitrophenol, Benzoic acid, and N-Nitrosodimethylamine were outside the control limits.
- Sample 1606631-001B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-002B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-003B: Surrogate Phenol-d5, 2-Fluorobiphenyl, Terphenyl-d14 and Nitrobenzene-d5
- Sample 1606631-004B: Surrogate Phenol-d5, Nitrobenzene-d5 Terphenyl-d14 and 2-Fluorobiphenyl exceeded recovery control limit.
- Sample 1606631-005B: Surrogate Phenol-d5, 2-Fluorobiphenyl and Nitrobenzene-d5 exceeded recovery control limit.
- Sample 1606631-009B: Surrogate Phenol-d5 and Terphenyl-d14 exceeded recovery control limit.
- Sample 1606631-010B: Surrogate Phenol-d5, 2-Fluorobiphenyl and Nitrobenzene-d5 exceeded recovery control limit.
- Sample 1606631-011B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-014B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample 1606631-015B: Surrogate Phenol-d5 exceeded recovery control limit.
- Sample MB-40220: Surrogates 2,4,6-Tribromophenol, 2-Fluorobiphenyl, Nitrobenzene-d5 and Terphenyl-d14 were outside the control limits.

Analytical Comments for Test SW_8270A-LL, Analytical Run No 86948, Batch ID R86948:
- Sample ICV S8 050216: ICV results for Bis(2-chloroisopropyl) ether and Benzoic Acid exceeded control limit.
- Sample CCV S8 062616: CCV results 2,4-Dinitrophenol, Benzoic acid, N-Nitrosodiphenylamine and Pentachlorophenol
- Sample CCVE S8 062616: Ending CCV results for Benzoic acid exceeded recovery control limit.

Analytical Comments for 8270D, Sample CCVE SIM 062716S7, Batch ID R87615 : Due to the nature of the samples the recovery for Benzo(g,h,I) perylene failed.

Analytical Comments for Test SW_8270A-SIM, Analytical Run No 87461, Batch ID 40213:
- Sample 1606631-005B: Surrogate recoveries for 2-Fluorobiphenyl, and Nitrobenzene-d5 were outside the control limits.
- Sample 1606631-008B: Surrogate recovery for 2-Fluorobiphenyl was outside the control limits.
- Sample 1606631-009B: Surrogate recoveries for 2-Fluorobiphenyl, and Terpheny;l-d14 were outside the control limits.
- Sample 1606631-005B: Surrogate recoveries for 2-Fluorobiphenyl, and Nitrobenzene-d5 were outside the control limits.

RTI Laboratories - Definitions and Acronyms

WO#: 1606631

Date Reported: 8/25/2016
Revision v1

DEFINITIONS:

DF: Dilution factor; the dilution factor applied to the prepared sample.

DL: Detection Limit; The lowest concentration of analyte that can be detected by the method in the applicable matrix.

DUP: Duplicate; aliquots of a sample taken from the same container under laboratory conditions and processed and analyzed independently, used to calculate Precision (%RPD).

LCS: Laboratory Control Sample; prepared by adding a known amount of target analytes to a specified amount of clean matrix and prepared with the batch of samples, used to calculate Accuracy (%REC).

LCSD: A duplicate LCS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

LOD: Limit of Detection; a laboratory verified concentration that can be detected at three times greater than the noise level. This concentration is equal to or greater than the DL.

LOQ: Limit of Quantitation; The lowest verified limit to which data is quantified without qualifications. Analyte concentrations below the LOQ are reported with a "J" qualifier.

MBLK: Method Blank; a sample of similar matrix that does not contain target analytes or interference that may impact the analytical results and is processed simultaneously with and under the same conditions as samples through all steps of the analytical procedure, used to assess and verify that the analytical process is free of contamination.

Mg/Kg or mg/L: Units of part per million (PPM) – milligram per Kilogram (W/W) or milligram per Liter (W/V).

MS: Matrix Spike; prepared by adding a known amount of target analytes to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available, used to calculate Accuracy (%REC)

MSD: A duplicate MS sample, used to calculate both Accuracy (%REC) and Precision (%RPD)

% REC: Percent Recovery of a known spike (SPK); a measure of accuracy expressed as a percentage of a measured (recovered) concentration compared to the known concentration (SPK) added to the sample. This is compared to the Low Limit and High Limit.

% RPD: Relative Percent Difference; a measure of precision expressed as a percentage of the difference between two duplicates relative to the average concentration. This is compared to the RPD Limit.

Qual: Qualifier that applies to the analyte reported

SPK: Spike; used in the QC section for both SPK Value and SPK Ref Val

Ug/Kg or ug/L: Units of part per billion (PPB) – microgram per Kilogram (W/W) or microgram per Liter (W/V).

QUALIFIERS:

*: Reported value exceeds the maximum allowed concentration by regulation or permit.

B: Analyte detected in the associated Method Blank at a concentration greater than 1/2 the LOQ

G: ICB/CCB result is greater than the MDL

H: Holding time for preparation or analysis has been exceeded

J: Estimated result. Greater uncertainty is associated with this result and data reported is estimated.

M: Manual Integration used to determine area response

P: Second column RPD exceeds 40%

Q: % REC exceeded control limits. When applied to sample analytes - denotes an associated LCS recovery that exceeded control limits.

R: % RPD exceeds control limits

T: MBLK result is greater than 1/2 of the LOQ

U: The analyte concentration is less than the DL. The result is reported as less than the LOD

X: Matrix spike recovery for the noted analyte exceeded control limits. Applied to the MS/MSD parent sample.

Y: Percent Difference/Drift in the associated CCV exceeded acceptance criteria.

Z: Percent Difference/Drift in the associated ICV exceeded acceptance criteria.

RE: Camp Hero

Work Order #: 1606652

Dear Devon Chicoine:

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

This report may only be reproduced in its entirety. Individual pages, reproduced without supporting documentation, do not contain related information and may be misinterpreted by other data reviewers.

Quality control data is within laboratory defined or method specified acceptance limits except if noted.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

Katherine Griffin

Project Manager

RTI Laboratories - Case Narrative

WO#: 1606652

Date Reported: 8/25/2016
Revision v1

Client: AECOM Design and Consulting Services (DCS)

Project: Camp Hero

Analytical Report revised 8/12/2016: Compound 3,3´-Dichlorobenzidine was missing in the SVOC analysis. Also Benzoic Acid was missing in the QC Summary report for the LCS, MS and MSD. Benzoic Acid is properly populated in the QC Summary. Removed two compounds, 1,2,4-Trichlorobenzene and 1,2-Dichlorobenzene from the VOC 8260 list for all samples but 1606652-014C.

Concentrations reported with a J flag in the Qual field are values below the reporting limit (RL) but greater than the established method detection limit (MDL). There is greater uncertainty associated with these results and data should be considered as estimated. These analytes are not routinely reviewed nor narrated below as to their potential for being laboratory artifacts.

Concentrations reported with an E flag in the Qual field are values that exceed the upper quantification range. There is greater uncertainty associated with these results and data should be considered as estimated.

Any comments or problems with the analytical events associated with this report are noted below.

Sample Analysis:
Samples were analyzed at the RTI Laboratories
- Percent Moisture - ASTM-D2216
- Metals, ICP/OES - 6010C
- Metals, ICP/MS - 6020A-TL
- Polychlorinated Biphenyls - 8082A
- Volatile Organic Compounds - 8260C-ME
- Volatile Organic Compounds - 8260C
- Semi-Volatile Organic Compounds - 8270D-MOD
- Semi-Volatile Organic Compounds - 8270D SIM

Volatile Organic Compounds (SW-8260C):
Sample 1606652-014A result was over calibration for the low level volatile organic compounds analyses for Ethylbenzene and m,p-Xylene. Data not reported for Ethylbenzene and total Xylene for the sample in this analysis.

Analytical Comments for Test SW_6010S, Analytical Run No 87541, Batch ID 40445:
Sample 1606652-015FMS: Recoveries for several analytes exceeded control limits.
Sample 1606652-015FMSD: Recoveries for several analytes exceeded control limits. RPD results for Calcium exceeded control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87746, Batch ID 40430:
Sample 1606652-005FMS: Recoveries for Aluminum, Calcium, Iron, Magnesium, Manganese and Potassium exceeded control limits. Suspected matrix interference for Calcium and Magnesium.
Sample 1606652-005FMSD: Recoveries for Aluminum, Calcium, Iron, Magnesium, Manganese and Potassium exceeded control limits. Suspected matrix interference for Calcium and Magnesium.

Analytical Comments for Test SW_6010S, Analytical Run No 87697, Batch ID 40406:
Sample 1606605-003B MS/MSD: Spike recoveries for several analytes were outside the control limits. RPD for Selenium was outside the control limits.
Sample 1606605-003B MS: Spike recoveries for Chromium and Zinc were outside the control limits.
Sample 1606605-003B MSD: Spike recovery for Zinc was outside the control limits.

Analytical Comments for Test SW_6010S, Analytical Run No 87852, Batch ID 40481:
Samples 1606652-014F MS/MSD: Spike recoveries for several analytes were outside the control limits.

Analytical Comments for Test SW_8082S, Analytical Run No 87007, Batch ID 40257:
Sample 1606652-015E: Tetrachloro-m-xylene surrogate exceeded control limit.
Sample 1606652-016E: Decachlorobiphenyl surrogate exceeded control limit.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 86936, Batch ID R86936:
Sample VOA10 ICV 062316: Acetone and vinyl acetate exceed limits.
Sample VOA10 MBLK 06231: Methylene Chloride > ½ LOQ. Surrogate recovery for Toluene-d8 exceeded QC limit.
Sample VOA10 LCS 062316: Cis-1,3-dicloropropene, Methylene Chloride, and Styrene exceed limits.
Sample VOA10 LCSD 06231: 2-Butanone, Cis-1,3-dichloropropene and trans-1,3-dichloropropene exceed limits. RPD for 2-Butanone was outside the control limits.
Sample 1606652-002A: Surrogate recovery for Toluene-d8 exceeded QC limit.

Analytical Comments for Test SW_8260S-LL, Analytical Run No 87053, Batch ID R87053:
Sample VOA11B ICV 062916: 2-Hexanone, chloromethane, Dichlorodifluoromethane and Vinyl acetate exceed limits.
Sample VOA11B MBLK 0629: Compounds 2-Hexanone and Chloromethane were detected > ½ LOQ.
Sample VOA11B LCS 06291: 1,2-Dibromo-3-chloropropane, acetone, chloromethane, 2-butanone and 2-hexanone exceed limits.
Sample VOA11B LCSD 0629: 1,2-Dibromo-3-chloropropane, acetone, methyl acetate, Methylene chloride, 2-butanone and 2-hexanone exceed limits.

Sample 1606652-005AMS: m,p-Xylene, methyl acetate, styrene, vinyl acetate, 2-butanone and 2-hexanone exceed limits.
Sample 1606652-005AMSD: Ethylbenzene, m,p-Xylene, methyl acetate, styrene, vinyl acetate, 2-butanone and 2-hexanone exceed limits. RPD for 1,2-Dibromo-3-chloropropane were outside the control limits.
Sample 1606652-014A: 4-Bromofluorobenzene exceeded QC limits.
Sample 1606652-015AMS: Several compounds exceeded QC limits due sample matrix interferences.
Sample 1606652-015AMSD: Several compounds exceeded QC limits due sample matrix interferences. RPD for several compounds were outside the control limits.
Sample VOA11B CCVE 062916: 2-hexanone exceeds the 50% criteria.

Analytical Comments for Test SW_8260S, Analytical Run No 87059, Batch ID R87059:
Sample 1606652-014C: Surrogate recovery for 4-Bromofluorobenzene was outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87769, Batch ID 40266:
Sample LCS-40266: LCS results for 2,4-Dinitrophenol and Pentachlorophenol exceeded QC limits.
Samples 1606652-005DMS/MSD: 2,4-Dinitrophenol exceeded QC limits. RPD for 2,4-Dinitrphenol was outside the control limits.
Sample 1606652-008D: Surrogate recovery for 2-Fluorobiphenyl was outside the control limits.

Analytical Comments for Test SW_8270S-LL, Analytical Run No 87769, Batch ID R87769:
Sample ICV S8 050216: Benzoic acid exceeded QC limits
Sample CCV S8 063016: CCV results for 2,4-Dinitrophenol, Benzoic acid, Hexachlorobutadiene, N-Nitrosodimethylamine and Pentachlorophenol exceeded QC limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87668, Batch ID R87668:
Sample CCV SIM S8 072316: CCV results for 1-Methylnaphthalene exceed the 20% criteria.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87753, Batch ID 40291:
Sample 1606652-014D: Surrogate recoveries for 2-Fluorbiphenyl, Nitrobenzene-d5, and Terphenyl -d14 were outside the control limits.
Sample 1606652-014D MS/MSD: Spike recoveries, Surrogate recoveries and RPDs for several compounds were outside the control limits.

Analytical Comments for Test SW_8270S-SIM, Analytical Run No 87753, Batch ID R87753:
Sample CCV 072616 S7: CCV results for 1-Methylnaphthalene exceed the 20% criteria.
