### State Superfund Site Classification Notice

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on a map on the reverse side of this page, has been added to the Registry as a Class 2 site that presents a significant threat to public health and/or the environment for the following reason(s):

Fire-fighting foam containing per- and polyfluoroalkyl substances (PFAS) was used and stored on the East Hampton Airport during crash response and training. PFAS's including perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA), have been detected in on-site soil and groundwater and off-site private drinking water wells. The concentrations of PFOS/PFOA in the drinking water supply wells exceed the United States Environmental Protection Agency's (USEPA's) drinking health advisory for PFOS/PFOA, 70 parts per trillion. Actions have been taken to mitigate the presence of PFAS in supplies, however, additional actions are needed to define the nature and extent of contamination in groundwater and other environmental media. DEC will keep you informed throughout the investigation and cleanup of the site.

**If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.**
