### Project Team

#### *General Contractor and Subcontractors:*

- Mega Contracting Group, LLC
- Creamer Environmental, Inc.
- Weber Surveyors

#### *Engineers/Consultants*

- Roux Environmental Engineering and Geology, D.P.C.
- Mueser Rutledge Consulting Engineers, PLLC
- GZA GeoEnvironmental, Inc.

### Remedial Action Work Summary

#### Work Activities Performed Onsite:

- Installation of the tension fabric structure (TFS) for the Phase 1 excavation continued.
- Installation of vapor management system components continued.

#### Contractor Work Performed Onsite:

Creamer Environmental, Inc (CEI), continued with the TFS installation, including the final panel of TFS fabric, thimbles, cables, man doors and vehicle entrances on the east and west sides of the TFS. To seal the TFS, CEI laced the fabric panels on the gable ends and added sections of fabric along the ground as needed. CEI continued with the installation of the Vapor Management System (VMS): air duct piping assembly and control panel set-up continued. CEI completed dewatering pipeline and relocated construction materials for upcoming activities.

Weber surveyors were on site to layout excavation areas and confirm elevation of monitoring and dewatering wells.

Measures to control dust (tarping and limiting vehicle speed) were applied on Site as needed.

#### Air Monitoring:

- No community air monitoring program (CAMP) exceedances were observed during the day.
- GZA GeoEnvironmental, Inc. will provide a summary report for CAMP activities.

#### Erosion and Sediment Control

- Silt fences, catch basin inlet protection, and socks were inspected at the beginning of the day to confirm to be undamaged and operational.

#### Sampling Conducted:

- None.

#### Other Items of Note:

- None.
