Project Team

General Contractor and Subcontractors:

- Mega Contracting Group, LLC
- Creamer Environmental, Inc. (CEI)

Engineers and Consultants:

- Roux Environmental Engineering and Geology, D.P.C.
- GZA GeoEnvironmental. Inc.

Remedial Action Work Summary

Work Activities Performed Onsite:

• Pre-trench and obstruction removal for steel sheeting installation between Gas Holder 3 and 4 continued.

Contractor Work Performed Onsite:

Creamer Environmental, Inc (CEI) continued with the removal of obstructions inside the installed slide rail box along the north side of waste characterization grid WC-9 (between Gas Holders 3 and 4). Excavated soil was placed back in the slide rail box area and removed obstructions were stockpiled and covered with plastic liner for future disposal.

CEI conducted dust and odor control measurements (wetting, tarping, limiting vehicle speeds, foaming, etc.) to ensure there were no impacts to the neighborhood. No work was conducted inside the tension fabric structure (TFS) and the vapor managements system (VMS) was not operated.

Air Monitoring:

- No community air monitoring program (CAMP) exceedances were observed during the day.
- GZA GeoEnvironmental Inc. will provide a summary report of CAMP activities.

Erosion and Sediment Control

Erosion and sediments controls were inspected to confirm all elements are operational and functional.

Sampling Conducted:

None.

Other Items of Note:

- Utility work unrelated to this project continued offsite along Nevins and Degraw Streets.
- Mobilization of equipment is ongoing for CSO project west of Nevins Street.
