### Project Team

#### *General Contractor and Subcontractors:*

- Mega Contracting Group, LLC
- Creamer Environmental, Inc. (CEI)

#### *Engineers and Consultants:*

- Roux Environmental Engineering and Geology, D.P.C.
- GZA GeoEnvironmental Inc. (GZA)

### Remedial Action Work Summary

#### Work Activities Performed Onsite:

- Load out of concrete from Parcel III and Parcel IV for disposal to Waste Management Fairless facility.
- Site preparation and setup for support of excavation installation.

#### Contractor Work Performed Onsite:

Creamer Environmental, Inc (CEI) loaded out and sent concrete to Waste Management Fairless facility for disposal. Approximately 44 tons of concrete from Parcel III and Parcel IV, previously stockpiled was removed from the site.

CEI demobilized the slide rail box that was used for obstruction removal between Gas Holder 3 and 4 and relocated carbon units associated with the vapor management system (VMS). CEI continued rearranging construction material and equipment stored on Lot 49 (553 Sackett St) in preparation for upcoming support of excavation installation activities and a scrap metal roll off container was delivered to the site.

CEI conducted dust and odor control measurements (wetting, tarping, limiting vehicle speeds, etc.) during the workday to ensure there were no impacts to the neighborhood. No work was performed inside the Tension Fabric Structure (TFS) and the VMS was not operated today.

#### Air Monitoring:

- No community air monitoring program (CAMP) exceedances were observed during the day.
- GZA will provide a summary report of CAMP activities.

#### Erosion and Sediment Control

- Erosion and sediments controls were inspected to confirm all elements are operational and functional.

#### Sampling Conducted:

- None

#### Other Items of Note:

- Mobilization of equipment and ongoing drilling activities was observed as part of the ongoing CSO project west of Nevins Street.
- Utility work is ongoing along Nevins Street.
