

# CAMP MONITORING REPORT

545 Sackett Street

12/04/23 through 12/10/23

This Weekly Air Monitoring Report summarizes perimeter air monitoring data collected during the referenced period in accordance with the Community Air Monitoring Plan (CAMP) which was included as part of the NYSDEC approved Remedial Action Work Plan for the Former Fulton Manufactured Gas Plant (MGP) Site – Parcel III and Portion of Parcel IV. Continuous monitoring for total volatile organic compounds (TVOCs) and airborne particulate dust (PM<sub>10</sub>) concentrations is being conducted at five air monitoring stations (AMS-1 through AMS-5) around the perimeter of the Site. The program includes compound-specific monitoring for benzene and tri-chloroethylene (TCE) if TVOC concentrations are detected above the alert level at the air monitoring station.

## Work Performed

- Performed community air monitoring.
- CEI relocated the temporary fabric structure.
- CEI imported general fill.
- CEI completed setting up the water treatment enclosure.

## Air Monitoring Summary

There were no TVOC or PM<sub>10</sub> concentrations above the CAMP-established action levels, or observations of dust or odors associated with the Site during the monitoring period.
