

PROJECT:	Former Fulton MGP – Parcels III and IV (Site No.: 224051)
ADDRESS:	545 Sackett St., Brooklyn, NY
PREPARED BY:	Roux Environmental Engineering and Geology, D.P.C.
DATE:	October 22, 2024
WEATHER:	Temp: 60-78°F, Sunny, RH: 49% Pressure: 30.29 in Hg Wind: SE @ 3 mph
TIME:	07:00 – 16:00

Project TeamGeneral Contractor and Subcontractors:

- Mega Contracting Group, LLC (Mega)
- Creamer Environmental, Inc. (CEI)
- American Dewatering & Grouting (ADG)
- ENTACT, LLC (ENTACT)
- Clo Zironi Mecanica - Foundation Equipment (CZM)

Engineers and Consultants:

- Roux Environmental Engineering and Geology, D.P.C. (Roux)
- GZA GeoEnvironmental Inc. of New York (GZANY)
- WSP USA (WSP)
- Langan Engineering, Environmental, Surveying, landscaping Architecture and Geology D.P.C (Langan)

Remedial Action Work SummaryWork Activities Performed Onsite:

- Excavation, demolition and loadout of material from the Gas Holder 4 excavation area.
- Dewatering operations for Gas Holder 4 excavation area.
- Mobilization and setup for In-situ Stabilization/Solidification (ISS) work.

Contractor Work Performed Onsite:

Creamer Environmental, Inc (CEI) excavated and loaded out 14 triaxle trucks (approximately 280 tons) of non-hazardous MGP impacted material from waste characterization WC-GH4-1 (25-30 and 30-35) for offsite disposal to Clean Earth of Southeast Pennsylvania (CESP). CEI imported 1 truck (24.76 tons) of ¾" stone from Vulcan Hamburg Quarry of New Jersey for installation of a temporarily sump within the northeastern portion of the Gas Holder 4 excavation area. CEI performed excavation and demolition activities within the Gas Holder 4 excavation area, removed timber obstructions and prepped excavated material for future loadout. CEI continued to backfill within the northern portion of the Gas Holder 4 excavation area with previously imported general fill material from Vulcan Wantage Quarry. CEI received a delivery of Lime Kiln Dust super sacks and swapped a roll-off container with construction material for offsite disposal. All soil handling activities were conducted inside the tension fabric structure (TFS) with the associated vapor management system (VMS) in operation throughout the day.

American Dewatering & Grouting (ADG) continued 24-hr operation of the dewatering system for the Gas Holder 4 excavation area and CEI operated the water treatment system (WTS). Since the last reporting period, CEI treated approximately 826,100 gallons of recovered construction wastewater through the WTS and discharged the treated water to the New York City Department of Environmental Protection (NYCDEP) combined sewer system. Routine maintenance to onsite dewatering and water treatment systems was performed. Localized sumping within the excavation area was conducted to ensure a dry work zone.

ENTACT continued to mobilize and set up for the upcoming In-Situ Stabilization/Solidification (ISS) operations. Clo Zironi Mecanica - Foundation Equipment (CZM) mobilized a drill rig CZM EK300LS to the site for upcoming ISS work. Bay Crane mobilized an LTM-1100-4.2 crane to assist ENTACT assemble the mobilized drill rig. Dust and odor control measures (application of Atmos odor suppressing foam, wetting, tarping, limiting vehicle speeds, covering trucks prior leaving the site, etc.) continued to be performed to ensure there were no impacts to the neighborhood. Truck tires were washed to ensure material was not being tracked offsite. Exposed soils were covered with Atmos odor suppressing foam and/or poly sheeting during work operations and at the end of the day.

Air Monitoring:

- No VOC or dust exceedances were observed from the community air monitoring program (CAMP).
- GZANY to provide a summary report of CAMP activities separately.

DAILY STATUS REPORT

PROJECT:	Former Fulton MGP – Parcels III and IV (Site No.: 224051)
ADDRESS:	545 Sackett St., Brooklyn, NY
PREPARED BY:	Roux Environmental Engineering and Geology, D.P.C.
DATE:	October 22, 2024
WEATHER:	Temp: 60-78°F, Sunny, RH: 49% Pressure: 30.29 in Hg Wind: SE @ 3 mph
TIME:	07:00 – 16:00

Remedial Action Work Summary (continued)

Vibration Monitoring:

- No alerts of vibrations exceeding Site's threshold or limiting criteria (1" /second and 2" / second, respectively) were received.
- Vibration monitoring data is included at the end of this Daily Status Report.

Erosion and Sediment Control:

- None.

Sampling Conducted:

- Groundwater samples were collected from sentinel wells SW-01S, SW-01D, SW-02S, SW-02D, SW-03S, SW-03D, SW-05S, SW-07S, SW-07D. These samples were submitted to Pace Laboratories for analysis of the following parameters:
 - TCL VOCs USEPA 8260,
 - TCL SVOCs USEPA 8270,
 - TAL Metals USEPA 6020,
 - Hex Chrom USEPA 7196,
 - Total Cyanide USEPA 7196, and
 - PFAS

Other Items of Note:

- Construction and vacuum truck activities were observed as part of the ongoing combined sewer overflow (CSO) project west of Nevins Street.

Imported Material

Name - Location	Source	During This Reporting Period		Total	
		Loads	Tons	Loads	Tons
Vulcan ASTM #3 (1 ½" Stone)	Vulcan Hamburg Quarry			14	354.03
Vulcan ASTM #57 (3/4" Stone)	Vulcan Hamburg Quarry	1	24.76	8	202.34
Vulcan General Fill	Vulcan Wantage Quarry			1,295	32,260.80

10/22/24	15:11	141,657,700
Water treated and discharged to NYCDEP sewer since last report:		826,100

Anticipated Upcoming Work Activities

- Continue demolition, excavation and loadout in former Gas Holder 4 excavation area.
- Continue dewatering activities from the former Gas Holder 4 excavation area and operation of the water treatment system.
- Continue to backfill within the Gas Holder excavation area with general fill material.
- ENTACT will begin ISS pilot test within the western portion of the site.
