The %Rs of SVOC 2,4-dinitrophenol and benzaldehyde were below the lower QC limit in the LCS. The non-detected results for these compounds in the associated product sample listed on Table 1 were qualified 'UJ'.

Documentation supporting the qualification of data (i.e., VOC - Form 3) is presented in Attachment B.

Field Duplicate Samples

The USEPA Region II validation guidelines do not require qualification of VOC/SVOC/Pesticide/PCB/Herbicide analytical results based upon field duplicate precision.

The relative percent difference (%RPD) between the iron (Fe) results in groundwater sample DEC-048 and the field duplicate performed on this sample exceeded the QC limit of 20%. The results for the Fe in the samples listed on Table 1 have been qualified 'J'.

Laboratory Blanks

Naphthalene was detected in the laboratory blank associated with soil sample SG-79 (7-8). Since this sample had a concentration of naphthalene that was less than five times the associated blank level, the naphthalene result was qualified 'U' at the quantitation limit (QL).

Naphthalene was detected in the laboratory blank associated with product sample DEC-048. Since this sample had a concentration of naphthalene that was less than five times the associated blank level, the naphthalene result was qualified 'U' at the QL.

Documentation supporting the qualification of data (i.e., VOC - Forms 1 and 4) is presented in Attachment B.

Surrogates

The %R of surrogate dibromofluoromethane in sample DEC-064 was below the lower QC limit. All compounds being reported from the undiluted analysis have been qualified 'J' or 'UJ'.

Documentation supporting the qualification of data (i.e., VOC - Form 2) is presented in Attachment B.

6.0 SAMPLE RESULTS AND REPORTING

All quantitation/detection limits were reported in accordance with method requirements and were adjusted for sample volume and dilution factors.

The %D between the dual column analysis for pesticide endrin exceeded 201% in soil sample DEC-030D (3.5-4.5). The result for endrin in this sample was qualified 'R'. The %Ds of alpha-chlordane and gamma-chlordane were >25%, the results for these pesticides were qualified 'J'.

The %D between the dual column analysis for pesticides gamma-BHC (Lindane) and heptachlor exceeded 201% in soil sample DEC-066S (1-2). The results for these pesticides in this sample were qualified 'R'.

The %D between the dual column analysis for pesticide gamma-BHC (Lindane) was >25% in groundwater sample DEC-031. The results for this pesticide was qualified 'J'.

Air samples SG-19, SG-20, SG-21, SG-78, SG-79, and SG-80 had results for 2,2,4-trimethylpentane, cyclohexane, and/or ethanol that were over the calibration curve. The laboratory performed dilutions for other compounds of interest which resulted in the compounds listed above becoming non-detect. The results from the initial analysis have been reported and the compounds qualified 'J' due to the calibration exceedence. The air samples and the specific compounds affected have been listed on Table 1.

Groundwater sample DEC-011 was initially analyzed on 6/30/11 and was detected for trichloroethene (TCE) and tetrachloroethene (PCE). However this analysis occurred immediately following a sample that exceeded the calibration curve for TCE and PCE. The lab re-analyzed sample DEC-011 outside of the holding time to confirm the presence of TCE and PCE. The presence of TCE and PCE was confirmed by the re-analysis. The results from the initial analysis have been reported, and the TCE and PCE results have been qualified as estimated 'J' because of the possibility of carryover from the previous sample.

7.0 SUMMARY

All sample analyses were found to be compliant with the method criteria, except where previously noted. Those results qualified 'J' or 'UJ' are considered conditionally usable. Those results qualified 'R' are unusable. All other sample results are usable as reported. URS does not recommend the recollection of any samples at this time.

DEFINITIONS OF USEPA REGION II DATA QUALIFIERS

- U – The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
- J – The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.
- UJ – The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
- R – The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
- B – The analyte was detected in the sample at a concentration greater than the instrument detection limit, but less than the quantitation limit.
- D – The positive value is the result of an analysis at a secondary dilution factor.

TABLE 1
SUMMARY OF DATA QUALIFICATIONS
FORMER KLINK COSMOS SITE

VOC	All soil samples.	RRF < 0.05 for acetone, 2-butanone, and 1,4-dioxane.	Qualify non-detected results 'R' and detected results 'J'.
VOC	Soil sample DEC-029D (75-76).	CCAL %D > 20% for naphthalene.	Qualify non-detected results 'UJ'.
VOC	Soil samples DEC-045D (80-81) and DEC-064D (29-29.5).	CCAL %D > 20% for 2-hexanone and n-butylbenzene.	Qualify non-detected results 'UJ'.
VOC	Soil samples DEC-065D (9-10) and DEC-065D (14-15).	CCAL %D > 20% for 1,2-dibromo-3-chloropropane and naphthalene.	Qualify non-detected results 'UJ'.
VOC	Soil sample DEC-065D (34-35).	LCS %R > QC limit for naphthalene.	Qualify detected result 'J'.
VOC	Soil sample SG-79 (7-8).	Naphthalene detected in the laboratory blank.	Qualify results 'U' at the QL.
VOC	All groundwater samples.	RRF < 0.05 for acetone, 2-butanone, and 1,4-dioxane.	Qualify non-detected results 'R' and detected results 'J'.
VOC	Groundwater samples DEC-006DD, DUP-062011 (DEC-006DD), and DEC-030D.	ICAL %RSD for 1,1-dichloroethene >15%.	Qualify detected results 'J'.
VOC	Groundwater sample DEC-046.	ICAL %RSD for naphthalene >15%.	Qualify detected results 'J'.
VOC	Groundwater samples DEC-008, DEC-013, DEC-014R, DEC-022D, DEC-029, and DEC-042.	ICAL %RSD for cis-1,2-dichloroethene >15%.	Qualify detected results 'J'.
VOC	Groundwater samples DEC-004, DEC-027, DEC-029D, DEC-039, DEC-048, DUP-062411 (DEC-39), and DUP2-062411 (DEC-048).	CCAL %D > 20% for chloromethane and vinyl chloride.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-022D, DEC-044, DEC-044D, DEC-066, and DEC-066D.	CCAL %D > 20% sec-butylbenzene and methylcyclohexane.	Qualify non-detected results 'UJ'.

VOC	Groundwater samples DEC-013D, DEC-032, and DEC-042.	CCAL %D > 20% cis-1,2-dichloroethene, benzene, 1,2-dichloropropane, cyclohexane, and methycyclohexane.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-008, DUP-062311 (DEC-013), and DEC-014R.	CCAL %D > 20% cis-1,2-dichloroethene, benzene, 2-chlorotoluene, sec-butylbenzene, cyclohexane, and methycyclohexane.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-009, DEC-014D, DEC-029, DEC-013, and TB (6/23/11.).	CCAL %D > 20% for chloromethane, trichlorofluoromethane, idomethane, vinyl acetate, carbon tetrachloride, 4-methyl-2-pentanone, 2-hexanone, hexachlorobutadiene, and cyclohexane.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-006, DEC-006DD, DUP-062011 (DEC-006DD), DEC-030, DEC-030D, DEC-064, DEC-031, and DEC-031D.	CCAL %D > 20% for dichlorodifluoromethane, trichlorofluoromethane, 4-methyl-3-pentanone, 2-hexanone, 1,2-dibromo-3-chloropropane, and naphthalene.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-045, DEC-045D, DEC-064D, and Trip Blank (6/21/11).	CCAL %D > 20% for dichlorofluoromethane 1,2,3-trichlorobenzene, and naphthalene.	Qualify detected results 'J' and non-detected results 'UJ'.
VOC	Groundwater samples DEC-007, DEC-007D, DEC-010, DEC-011, DEC-028, DEC-033, DEC-046, DEC-047, DEC-065, and DEC-065D.	CCAL %D > 20% for dichlorodifluoromethane, 1,2-dibromo-3-chloropropane, hexachlorobutadiene, 1,2,3-trichlorobenzene, and naphthalene.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-043 and DEC-043D.	CCAL %D > 20% for 1,2,3-trichlorobenzene, 1,2,4-trichlorobenzene, and hexachlorobutene.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-012, DUP-062211 (DEC-065), DEC-015, and DEC-015D.	CCAL %D > 20% benzene, sec-butylbenzene, cyclohexane, and methycyclohexane.	Qualify non-detected results 'UJ'.
VOC	Groundwater sample DEC-064 (undiluted analysis).	Surrogate dibromofluoromethane %R > QC limit.	Qualify detected results 'J' and non-detected results 'UJ'.
VOC	Groundwater samples DEC-009, DEC-013, DEC-014D, DEC-029, and TB (6/23/11).	LCS %R cyclohexane < QC limit.	Qualify non-detected results 'UJ'.
VOC	Groundwater sample DEC-011.	Possible carryover for TCE/PCE from previous sample.	Qualify TCE/PCE results 'J'.

VOC	Product sample DEC-048.	RRF < 0.05 for acetone, 2-butanone, and 1,4-dioxane.	Qualify non-detected results 'R'.
VOC	Product sample DEC-048.	CCAL %D > 20% for 2-hexanone.	Qualify non-detected results 'UJ'.
VOC	Air samples AA-061411, SG-19, SG-20, SG-21, SG-46, DUP2-061411 (SG-46), SG-48, SG-49, SG-55, SG-60, DUP-061411 (SG-60), SG-62, SG-78, SG-79, SG-80, SG-81, and SG-82.	CCAL %D > 20% for 1,2,4-trichlorobenzene.	Qualify non-detected results 'UJ'.
VOC	Air samples AA-061511, SG-18, SG-43, SG-47, SG-56, SG-59, SG-61, SG-63, DUP2-061511 (SG-63), SG-85, SG-86, and SG-87.	CCAL %D > 20% for 1,2,4-trichlorobenzene and hexachloro-1,3-butadiene.	Qualify non-detected results 'UJ'.
VOC	Air sample SG-79.	Cyclohexane > calibration curve.	Qualify detected results 'J'.
VOC	Air sample SG-20, SG-78, and SG-80.	Ethanol > calibration curve.	Qualify detected results 'J'.
VOC	Air sample SG-19.	Cyclohexane and ethanol > calibration curve.	Qualify detected results 'J'.
VOC	Air sample SG-21.	2,2,4-Trimethylpentane > calibration curve.	Qualify detected results 'J'.
SVOC	Soil sample DEC-030D (3.5-4.5).	ICAL %RSD for naphthalene > 15%.	Qualify detected results 'J'.
TCLP SVOC	Soil sample DEC-066S (1-2).	ICAL %RSD for pyridine > 15%.	Qualify detected results 'J'.
TCLP SVOC	Soil samples DEC-044D (4-5) and DEC-066S (1-2).	CCAL %D > 20% for hexachlorobutadiene and pyridine.	Qualify detected results 'J' and non-detected results 'UJ'.
SVOC	Soil samples DEC-065D (9-10), DEC-065D (14-15), and DEC-066D (24-25).	CCAL %D > 20% for 2,4-dinitrophenol, nitrobenzene, and 2-methylnaphthalene.	Qualify non-detected results 'UJ'.
SVOC	Soil samples DEC-029D (75-76) and DEC-030D (3.5-4.5).	CCAL %D > 20% for atrazine, 4-chloroaniline, and 4-nitrophenol.	Qualify non-detected results 'UJ'.
SVOC	Groundwater sample DEC-031 and DEC-031D.	CCAL %D > 20% for 2,4-dinitrophenol.	Qualify non-detected results 'UJ'.
SVOC	Groundwater samples DEC-031 and DEC-031D.	LCS %R 2-methylphenol and caprolactam < QC limit.	Qualify non-detected results 'UJ'.

SVOC	Product sample DEC-048.	LCS %R 2,4-dinitrophenol and benzaldehyde < QC limit.	Qualify non-detected results 'UJ'.
SVOC	Product sample DEC-048.	CCAL %D > 20% for 2,2'-oxybis(1-chloropropane), n-nitroso-di-n-propylamine, di-n-octylphthalate, bis(2-ethylhexyl)phthalate, di-n-octylphthalate, and atrazine.	Qualify detected results 'J' and non-detected results 'UJ'.

VOC	Groundwater samples DEC-006, DEC-006DD, DUP-062011 (DEC-006DD), DEC-030, DEC-030D, DEC-064, DEC-031, and DEC-031D.	CCAL %D > 20% for dichlorodifluoromethane, trichlorfluoromethane, 4-methyl-3-pentanone, 2-hexanone, 1,2-dibromo-3-chloropropane, and naphthalene.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-045, DEC-045D, DEC-064D, and Trip Blank (6/21/11).	CCAL %D > 20% for dichlorofluoromethane 1,2,3-trichlorobenzene, and naphthalene.	Qualify detected results 'J' and non-detected results 'UJ'.
VOC	Groundwater samples DEC-007, DEC-007D, DEC-010, DEC-011, DEC-028, DEC-033, DEC-046, DEC-047, DEC-065, and DEC-065D.	CCAL %D > 20% for dichlorodifluoromethane, 1,2-dibromo-3-chloropropane, hexachlorobutadiene, 1,2,3-trichlorbenzene, and naphthalene.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-043 and DEC-043D.	CCAL %D > 20% for 1,2,3-trichlorbenzene, 1,2,4-trichlorobenzene, and hexachlorobutiene.	Qualify non-detected results 'UJ'.
VOC	Groundwater samples DEC-012, DUP-062211 (DEC-065), DEC-015, and DEC-015D.	CCAL %D > 20% benzene, sec-butylbezene, cyclohexane, and methylcyclohexane.	Qualify non-detected results 'UJ'.
VOC	Groundwater sample DEC-064 (undiluted analysis).	Surrogate dibromofluoromethane %R > QC limit.	Qualify detected results 'J' and non-detected results 'UJ'.
VOC	Groundwater samples DEC-009, DEC-013, DEC-014D, DEC-029, and TB (6/23/11).	LCS %R cyclohexane < QC limit.	Qualify non-detected results 'UJ'.
VOC	Groundwater sample DEC-011.	Possible carryover for TCE/PCE from previous sample.	Qualify TCE/PCE results 'J'.

VOC	Product sample DEC-048.	RRF < 0.05 for acetone, 2-butanone, and 1,4-dioxane.	Qualify non-detected results 'R'.
VOC	Product sample DEC-048.	CCAL %D > 20% for 2-hexanone.	Qualify non-detected results 'UJ'.
VOC	Air samples AA-061411, SG-19, SG-20, SG-21, SG-46, DUP2-061411 (SG-46), SG-48, SG-49, SG-55, SG-60, DUP-061411 (SG-60), SG-62, SG-78, SG-79, SG-80, SG-81, and SG-82.	CCAL %D > 20% for 1,2,4-trichlorobenzene.	Qualify non-detected results 'UJ'.
VOC	Air samples AA-061511, SG-18, SG-43, SG-47, SG-56, SG-59, SG-61, SG-63, DUP2-061511 (SG-63), SG-85, SG-86, and SG-87.	CCAL %D > 20% for 1,2,4-trichlorobenzene and hexachloro-1,3-butadiene.	Qualify non-detected results 'UJ'.
VOC	Air sample SG-79.	Cyclohexane > calibration curve.	Qualify detected results 'J'.
VOC	Air sample SG-20, SG-78, and SG-80.	Ethanol > calibration curve.	Qualify detected results 'J'.
VOC	Air sample SG-19.	Cyclohexane and ethanol > calibration curve.	Qualify detected results 'J'.
VOC	Air sample SG-21.	2,2,4-Trimethylpentane > calibration curve.	Qualify detected results 'J'.
SVOC	Soil sample DEC-030D (3.5-4.5).	ICAL %RSD for naphthalene > 15%.	Qualify detected results 'J'.
TCLP SVOC	Soil sample DEC-066S (1-2).	ICAL %RSD for pyridine > 15%.	Qualify detected results 'J'.
TCLP SVOC	Soil samples DEC-044D (4-5) and DEC-066S (1-2).	CCAL %D > 20% for hexachlorobutadiene and pyridine.	Qualify detected results 'J' and non-detected results 'UJ'.
SVOC	Soil samples DEC-065D (9-10), DEC-065D (14-15), and DEC-066D (24-25).	CCAL %D > 20% for 2,4-dinitrophenol, nitrobenzene, and 2-methylnaphthalene.	Qualify non-detected results 'UJ'.
SVOC	Soil samples DEC-029D (75-76) and DEC-030D (3.5-4.5).	CCAL %D > 20% for atrazine, 4-chloroaniline, and 4-nitrophenol.	Qualify non-detected results 'UJ'.
SVOC	Groundwater sample DEC-031 and DEC-031D.	CCAL %D > 20% for 2,4-dinitrophenol.	Qualify non-detected results 'UJ'.
SVOC	Groundwater samples DEC-031 and DEC-031D.	LCS %R 2-methylphenol and caprolactam < QC limit.	Qualify non-detected results 'UJ'.

SVOC	Product sample DEC-048.	LCS %R 2,4-dinitrophenol and benzaldehyde < QC limit.	Qualify non-detected results 'UJ'.
SVOC	Product sample DEC-048.	CCAL %D > 20% for 2,2'-oxybis(1-chloropropane), n-nitroso-di-n-propylamine, butylbenzyl phthalate, bis(2-ethylhexyl)phthalate, di-n-octylphthalate, and atrazine.	Qualify detected results 'J' and non-detected results 'UJ'.
Pesticides	Soil sample DEC-030D (3.5-4.5).	The %D between columns for endrin > 201%.	Qualify non-detected results 'R'.
Pesticides	Soil sample DEC-030D (3.4-4.5).	The %Ds between columns for alpha-chlordane and gamma-chlordane >25%.	Qualify non-detected results 'UJ'.
TCLP Pesticides	Soil sample DEC-066S (1-2).	The %Ds between columns for gamma-BHC (Lindane) and heptachlor >201%.	Qualify non-detected results 'R'.
Herbicides	Soil samples DEC-065D (9-10), DEC-065D (14-15), and DEC-066D (24-25).	CCAL %D >25% for MCPA and MCPB.	Qualify non-detected results 'UJ'.
Metals	Groundwater sample DEC-048 and DUP2-062411.	%RPD between sample and field duplicate exceeded QC limit for Fe.	Qualify detected results 'J'.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0791

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10

Instrument Type: GCMS-VOA

Description: HP7890A

Manufacturer: Agilent

Model: 7890A / 5975C

GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Data Flag/Qualifiers:

- U** Not Detected. This compound was analyzed-for but not detected. For most analyses the reporting limit (lowest standard concentration) is the value listed. For Department of Defense programs, this is the Limit of Detection (LOD).
- J** This flag indicates an estimated value due to either
- the compound was detected below the reporting limit, or
 - estimated concentration for Tentatively Identified Compound
- B** This flag indicates the compound was also detected in the associated Method Blank. The B flag has an alternative meaning for Inorganics analyses reported using CLP ILM-type metals forms, indicating a "trace" concentration below the reporting limit and equal to or above the detection limit.
- D** For Organics analysis, this flag indicates the compound concentration was obtained from a secondary dilution analysis
- E** This flag indicates the compound concentration exceeded the Calibration Range. The E flag has an alternative meaning for Inorganics analyses reported using CLP metals forms, indicating an estimated concentration due to the presence of interferences, as determined by the serial dilution analysis.
- P** This flag is used for pesticides/PCB/herbicide compound when there is a greater than 40% difference for detected concentration between the two GC columns used for primary and confirmation analyses. This difference typically indicates an interference, causing one value to be unusually high. The **lower** of the two values is generally reported on the Form 1, and both values reported on the Form 10.
- A** Used to flag semivolatile organic Tentatively Identified Compound library search results for compounds identified as aldol condensation byproducts.
- N** Used to flag results for volatile and semivolatile Organics analysis Tentatively Identified Compounds where an analyte has passed the identification criteria, and is considered to be positively identified. For Inorganics analysis the N flag indicates the matrix spike recovery falls outside of the control limit.
- *** For Inorganics analysis the * flag indicates Relative Percent Difference for duplicate analyses is outside of the control limit.

HANIBAL TECHNOLOGY

Sample ID Suffixes

- DL** Diluted analysis. The sample was diluted and reanalyzed. The DL may be followed by a digit if more than one diluted reanalysis is provided. The DL suffix is not attached to an analysis initially performed at dilution, only to reanalyses performed at dilution
- RE** Reanalysis. Appended to the client sample ID to indicate a reextraction and reanalysis or a reanalysis of the original sample extract.
- RA** Reanalysis. Appended to the laboratory sample ID indicates a reanalysis of the original sample extract.
- RX** Reextraction. Appended to the laboratory sample ID indicates a reextraction of the sample.
- MS** Matrix Spike.
- MSD** Matrix Spike Duplicate
- DUP** Duplicate analysis
- SD** Serial Dilution
- PS** Post-digestion or Post-distillation spike. For metals or inorganic analyses

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0791

SW846 8270D, SVOA by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8270D

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW3550

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: S3
Instrument Type: GCMS-SEMI
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

LCSD-59149, recovery is above criteria for Nitrobenzene-d5 at 100% with criteria of (35-100).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-59149 in batch 59149, recovery is above criteria for 2,4-Dimethylphenol at 109% with criteria of (30-105) and Atrazine at 181% with criteria of (50-150).

LCSD-59149 in batch 59149, recovery is above criteria for 2,4-Dimethylphenol at 114% with criteria of (30-105) and Atrazine at 182% with criteria of (50-150).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

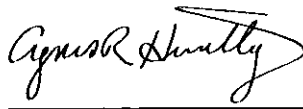

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0791

SW846 8081B, Organochlorine Pesticides by GC-ECD

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8081B

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW3550

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: E5

Instrument Type: GC-ECD

Description: HP6890

Manufacturer: Hewlett-Packard

Model: 6890

GC Column used: 30 m X 0.53 mm ID [0.50 um thickness] CLPPest capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Dilutions:

No sample in this SDG required analysis at dilution.

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1

when D% between the two columns is greater than 40%.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

HANIBAL TECHNOLOGY

Data Flag/Qualifiers:

- U** Not Detected. This compound was analyzed-for but not detected. For most analyses the reporting limit (lowest standard concentration) is the value listed. For Department of Defense programs, this is the Limit of Detection (LOD).
- J** This flag indicates an estimated value due to either
- the compound was detected below the reporting limit, or
 - estimated concentration for Tentatively Identified Compound
- B** This flag indicates the compound was also detected in the associated Method Blank. The B flag has an alternative meaning for Inorganics analyses reported using CLP ILM-type metals forms, indicating a "trace" concentration below the reporting limit and equal to or above the detection limit.
- D** For Organics analysis, this flag indicates the compound concentration was obtained from a secondary dilution analysis
- E** This flag indicates the compound concentration exceeded the Calibration Range. The E flag has an alternative meaning for Inorganics analyses reported using CLP metals forms, indicating an estimated concentration due to the presence of interferences, as determined by the serial dilution analysis.
- P** This flag is used for pesticides/PCB/herbicide compound when there is a greater than 40% difference for detected concentration between the two GC columns used for primary and confirmation analyses. This difference typically indicates an interference, causing one value to be unusually high. The **lower** of the two values is generally reported on the Form 1, and both values reported on the Form 10.
- A** Used to flag semivolatile organic Tentatively Identified Compound library search results for compounds identified as aldol condensation byproducts.
- N** Used to flag results for volatile and semivolatile Organics analysis Tentatively Identified Compounds where an analyte has passed the identification criteria, and is considered to be positively identified. For Inorganics analysis the N flag indicates the matrix spike recovery falls outside of the control limit.
- *** For Inorganics analysis the * flag indicates Relative Percent Difference for duplicate analyses is outside of the control limit.

SPECTRUM ANALYTICAL, INC.

Featuring

HANIBAL TECHNOLOGY

Sample ID Suffixes

- DL** Diluted analysis. The sample was diluted and reanalyzed. The DL may be followed by a digit if more than one diluted reanalysis is provided. The DL suffix is not attached to an analysis initially performed at dilution, only to reanalyses performed at dilution
- RE** Reanalysis. Appended to the client sample ID to indicate a reextraction and reanalysis or a reanalysis of the original sample extract.
- RA** Reanalysis. Appended to the laboratory sample ID indicates a reanalysis of the original sample extract.
- RX** Reextraction. Appended to the laboratory sample ID indicates a reextraction of the sample.
- MS** Matrix Spike.
- MSD** Matrix Spike Duplicate
- DUP** Duplicate analysis
- SD** Serial Dilution
- PS** Post-digestion or Post-distillation spike. For metals or inorganic analyses

No sample in this SDG required analysis at dilution.

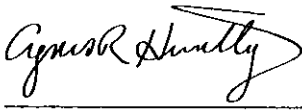

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1

when D% between the two columns is greater than 40%.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0791

SW846 6010C, SW846 7471B, SW846 9012B

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 6010C, SW846 7471B, SW846 9012B

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code:
SW3050A
Soil Samples were prepared following procedures in laboratory test code:
SW7471B
Soil Samples were prepared following procedures in laboratory test code:

SW9012B

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: FIMS2
Instrument Type: CVAA
Description: FIMS
Manufacturer: Perkin-Elmer
Model: FIMS100

Instrument Code: LACHAT1
Instrument Type: WC
Description: Flow Injection Analyzer
Manufacturer: Zellweger Analytics
Model: Quik-Chem 8000

Instrument Code: OPTIMA3
Instrument Type: ICP
Description: Optima ICP-OES
Manufacturer: Perkin-Elmer
Model: 4300 DV

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for laboratory control samples were within the QC limits.

2. Matrix spike (MS):

Matrix spike was performed on sample: DEC-030D (3.5-4.5')
(K0791-11AMS) for Cyanide.

Percent recovery was within the QC limits.

D. Post Digestion Spike (PDS):

A post-digestion spike was not performed on any sample in this SDG.

E. Duplicate sample:

Duplicate analysis was performed on sample: DEC-030D (3.5-4.5')
(K0791-11ADUP) Cyanide.

Relative percent difference was within the QC limits.

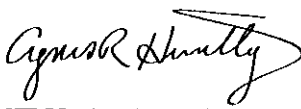

F. Serial Dilution (SD):

A serial dilution was not performed on any sample in this SDG.

G. Samples:

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Samples were analyzed following procedures in laboratory test code:
SW846 7196A

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code:
SW846 7196A

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: SPEC2

Instrument Type: SP

Description: Spectronic 20 Genesys

Manufacturer: Spectronic Instruments

Model: 4004-000

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recovery for lab control sample was within the QC limits.

2. Matrix Spike (MS):

Matrix spike was performed on samples: DEC-029D (75-76') (K0791-12AMS) and DEC-029D (75-76') (K0791-12AMSI).

Percent recovery was within the QC limits.

D. Duplicate sample:

Duplicate analysis was performed on samples: DEC-029D (75-76') (K0791-12AMS) and DEC-029D (75-76') (K0791-12AMSI).

Percent RPD was within the QC limits.

E. Dilutions:

The following samples were analyzed at dilution:

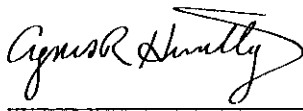

DEC-029D (75-76') (K0791-12AMSI), dilution factor: 20

DEC-029D (75-76') (K0791-12APDS), dilution factor: 2

F. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Subcontracted Analysis

The following analysis was performed by subcontractor laboratory:

Herbicides:

Samples were analyzed for the herbicides by Method SW846 8151. This analysis was performed at Mitkem's parent company laboratory, Spectrum Analytical of Agawam, Massachusetts. The entire Spectrum report, including any notes on these analyses is enclosed. The entire Spectrum report, including any narrative notes on these analyses is enclosed. Please note that the Spectrum report is paginated separately from the rest of the data package.

SDG28361
SB28361, SB28614 General Narrative

Spectrum Analytical, Inc. submits the enclosed data for the site characterization of subcontracted samples. Samples submitted for analysis by Mitkem Laboratories. This deliverable contains data for two soil samples submitted on May 9th and 11th, 2011.

In addition to USEPA SW846 method analytical guidelines, the analysis was performed according to criteria dictated by National Environmental Laboratory Accreditation Conference (NELAC) and within the guidelines established by the New York State Department of Environmental Conservation Technical and Administrative Guidance Memorandum (TAGM) requirements.

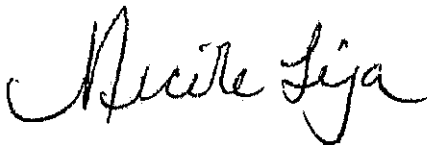

The following observations and/or deviations are observed for the following analyses:

1. Overall Observations:

All of the attached submittals are original other than logbook pages and copies of quality assurance data, which may be shared by other cases. For these, the originals are archived within the laboratory. Standard Operating Procedures follow the corresponding methods without modification.

The pages in this report have been numbered consecutively, starting with the general narrative and ending with the page labeled as "Last Page of data Report".

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this electronic data package, has been authorized by the laboratory director as verified by the following signature.

CASE NARRATIVE

Spectrum Analytical, Inc. Lab Reference No. SB28361, SB28614

Client: Mitkem Laboratories

Project: See Chain of Custody / K0791

SDG #: 28361

I. RECEIPT

No exceptions were encountered unless a Sample Receipt Exception or a communication form is included in the addendum with this package.

II. HOLDING TIMES

All samples were prepared and analyzed within the method-specific holding time.

III. METHODS

Analyses were performed according to SW846 8151A.

IV. PREPARATION

Soil/Sediment samples were prepared according to SW846 3550B/C.

V. INSTRUMENTATION

The following equipment was used to analyze SW846 8151A:

HPS19 details: Agilent 7890 series dual column ECD GC with RTX-CLPesticide2 Column (30m, 0.53mmID, 0.42um df) & RTX-CLPesticides Column (30m, 0.53mmID, 0.5um df)

VI. ANALYSIS

A. Calibration:

All quality control samples were within the acceptance criteria with the following exceptions:

In sample S104214-CCV3:

Analyte percent difference is outside individual acceptance criteria (15), but within overall method allowances.

Dalapon (36.2%)

This affected the following samples:

1108883-BLK1, 1108883-BS1, 1108883-BSD1, 1108883-DUP1

B. Blanks:

All blanks were within the acceptance criteria.

C. Surrogates:

All method criteria were met.

D. Spikes:

1. Laboratory Control Samples (LCS):

All method criteria were met.

2. Matrix Spike / Matrix Spike Duplicate Samples (MS/MSD):

No matrix spike or matrix spike duplicates were analyzed.

E. Duplicates:

A duplicate was analyzed.

In batch 1108883 from source sample DEC-030D(3.5-4.5') (SB28361-01).

In batch 1109381 from source sample DEC-029D (75-76') (SB28614-01).

All method criteria were met.

F. Internal Standards:

Internal standards were within the acceptance criteria.

G. Samples:

All method criteria were met.

Laboratory Workorder / SDG #: K0910

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

Instrument Code: V5
Instrument Type: GCMS-VOA
Description: HP6890 / HP6890
Manufacturer: Hewlett-Packard
Model: 6890 / 6890
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-59410 in batch 59410, recovery is above criteria for Naphthalene at 170% with criteria of (40-125).

LCSD-59410 in batch 59410, is above criteria for Naphthalene at 143% with criteria of (40-125).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

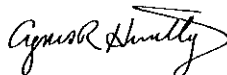

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0910

SW846 8270D, SVOA by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8270D

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW3550

V. INSTRUMENTATION

The following instrumentation was used
Instrument Code: S3
Instrument Type: GCMS-SEMI
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-59526 in batch 59526, recovery is above criteria for 2-Methylnaphthalene at 108% with criteria of (45-105).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Signed:

A handwritten signature in cursive script, appearing to read "Agnes R. Huntley".

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Dilutions:

No sample in this SDG required analysis at dilution.

F. Samples:

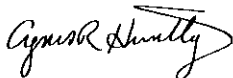

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1

when D% between the two columns is greater than 40%.

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0910

SW846 8082A, PCB by GC-ECD

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8082A

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW3550

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: E2

Instrument Type: GC-ECD

Description: HP5890 II +

Manufacturer: Hewlett-Packard

Model: 5890

GC Column used: 30 m X 0.53 mm ID [0.50 um thickness] CLPPest capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control sample were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Dilutions:

No sample in this SDG required analysis at dilution.

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1 when D% between the two columns is greater than 40%.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recovery for lab control sample was within the QC limits.

2. Matrix Spike (MS):

Matrix spike was performed on samples: DEC-065D(14-15') (K0910-04AMS) and DEC-065D(14-15') (K0910-04AMSI).

Percent recovery was within the QC limits.

D. Duplicate sample:

Duplicate analysis was performed on sample: DEC-065D(14-15') (K0910-04ADUP).

Percent RPD was within the QC limits.

E. Dilutions:

The following samples were analyzed at dilution:

DEC-065D(14-15') (K0910-04AMSI), dilution factor: 20 for Chromium, Hexavalent

DEC-065D(14-15') (K0910-04APDS), dilution factor: 2 for Chromium,

Hexavalent

F. Samples:

No other unusual occurrences were noted during sample analysis.

SDG26615
SB26615, SB26754, SB26803 General Narrative

Spectrum Analytical, Inc. submits the enclosed data for the site characterization of subcontracted samples. Samples submitted for analysis by Mitkem Laboratories. This deliverable contains data for two soil samples submitted on May 24th and 27th, 2011.

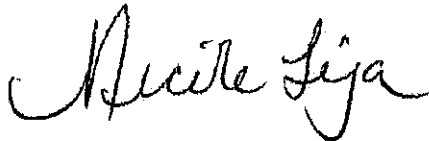

In addition to USEPA SW846 method analytical guidelines, the analysis was performed according to criteria dictated by National Environmental Laboratory Accreditation Conference (NELAC) and within the guidelines established by the New York State Department of Environmental Conservation Technical and Administrative Guidance Memorandum (TAGM) requirements.

1. Overall Observations:

All of the attached submittals are original other than logbook pages and copies of quality assurance data, which may be shared by other cases. For these, the originals are archived within the laboratory. Standard Operating Procedures follow the corresponding methods without modification.

The pages in this report have been numbered consecutively, starting with the general narrative and ending with the page labeled as "Last Page of data Report".

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this electronic data package, has been authorized by the laboratory director as verified by the following signature.

CASE NARRATIVE

Spectrum Analytical, Inc. Lab Reference No. SB29135, SB29247

Client: Mitkem Laboratories

Project: See Chain of Custody / K0910

SDG #: 29135

I. RECEIPT

No exceptions were encountered unless a Sample Receipt Exception or a communication form is included in the addendum with this package.

II. HOLDING TIMES

All samples were prepared and analyzed within the method-specific holding time.

III. METHODS

Analyses were performed according to SW846 8151A.

IV. PREPARATION

Soil/Sediment samples were prepared according to SW846 3545A.

V. INSTRUMENTATION

The following equipment was used to analyze SW846 8151A:

HPS19 details: Agilent 7890 series dual column ECD GC with RTX-CLPesticide2 Column (30m, 0.53mmID, 0.42um df) & RTX-CLPesticides Column (30m, 0.53mmID, 0.5um df)

VI. ANALYSIS

A. Calibration:

All quality control samples were within the acceptance criteria with the following exceptions:

In sample S104910-CCV2:

Analyte percent difference is outside individual acceptance criteria (15), but within overall method allowances.

MCPA (43.3%)

MCPB (37.6%)

This affected the following samples:

1110394-BLK1, 1110394-BS2, 1110394-BSD2, DEC-065D (14-15'), DEC-065D (9-10')

In sample S104910-CCV4:

Analyte percent difference is outside individual acceptance criteria (15), but within overall method allowances.

MCPA (52.6%)

MCPB (52.5%)

This affected the following samples:

1110394-BLK1, 1110394-BS2, 1110394-BSD2, DEC-065D (14-15'), DEC-065D (9-10')

B. Blanks:

All blanks were within the acceptance criteria.

C. Surrogates:

All method criteria were met.

D. Spikes:

1. Laboratory Control Samples (LCS):

All method criteria were met.

2. Matrix Spike / Matrix Spike Duplicate Samples (MS/MSD):

No matrix spike or matrix spike duplicates were analyzed.

E. Duplicates:

No client requested duplicate. However, the method criteria may have been fulfilled with non-SDG source samples.

F. Internal Standards:

Internal standards were within the acceptance criteria with the following exceptions:

1-Bromo-2-Nitrobenzene [2C] in batch 1110394, samples DEC-065D (14-15') (SB29247-02), DEC-065D (9-10') (SB29247-01): Internal standard out due to matrix interference

G. Samples:

All method criteria were met with the following exceptions:

1-Bromo-2-Nitrobenzene [2C] in batch 1110394, samples DEC-065D (14-15') (SB29247-02), DEC-065D (9-10') (SB29247-01): Internal standard out due to matrix interference

MCPA in batch 1110394, samples DEC-065D (14-15') (SB29247-02), DEC-065D (9-10') (SB29247-01): MCPA failed high in related CCV. However, there was no reportable concentration in the sample.

MCPB in batch 1110394, samples DEC-065D (14-15') (SB29247-02), DEC-065D (9-10') (SB29247-01): MCPB failed high in related CCV. However, there was no reportable concentration in the sample.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0842

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

Instrument Code: V5
Instrument Type: GCMS-VOA
Description: HP6890 / HP6890
Manufacturer: Hewlett-Packard
Model: 6890 / 6890
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-59410 in batch 59410, recovery is above criteria for Naphthalene at 170% with criteria of (40-125).

LCSD-59410 in batch 59410, recovery is above criteria for Naphthalene at 143% with criteria of (40-125).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0807

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1
Instrument Type: GCMS-VOA
Description: HP5890 II / HP5972
Manufacturer: Hewlett-Packard
Model: 5890 / 5972
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following sample was re-analyzed at dilution:

DEC-066S (1-2') (K0807-01BDL-TCLP) : Dilution Factor: 2

G. Samples:

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Date: 06/07/11

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0807

SW846 8270D, SVOA by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8270D

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: S3

Instrument Type: GCMS-SEMI

Description: HP6890 / HP5973

Manufacturer: Hewlett-Packard

Model: 6890 / 5973

GC Column used: 30 m X 0.25 mm ID [0.25 μ m thickness] Rxi-5sil MS capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

DEC-066S (1-2') (K0807-01ADL-TCLP) Surrogate outside of QC limit due to dilution, recovery is above criteria for 2-Fluorobiphenyl at 115% with criteria of (50-110).

DEC-066S (1-2') (K0807-01A-TCLP), recovery is above criteria for Nitrobenzene-d5 at 119% with criteria of (40-110).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-59213 in batch 59213, recovery is above criteria for Hexachlorobutadiene at 105% with criteria of (25-105).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

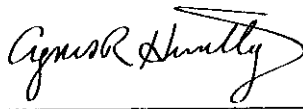

The following sample was re-analyzed at dilution:

DEC-066S (1-2') (K0807-01ADL-TCLP) : Dilution Factor: 50

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Mitkem Laboratories, a Division of Spectrum Analytical, Inc.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K0807

SW846 8081B, Organochlorine Pesticides by GC-ECD

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8081B

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: E5

Instrument Type: GC-ECD

Description: HP6890

Manufacturer: Hewlett-Packard

Model: 6890

GC Column used: 30 m X 0.53 mm ID [0.50 um thickness] CLPPest capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Dilutions:

No sample in this SDG required analysis at dilution.

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1

when D% between the two columns is greater than 40%.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Manufacturer: Spectronic Instruments
Model: 4004-000

Instrument Code: WC01
Instrument Type: Probe
Description: pH Meter
Manufacturer: Thermo Electron Corporation
Model: Orion 520A+

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recovery for lab control samples for Reactive Cyanide and Reactive Sulfide were within the QC limits.

The lab control sample for reactive cyanide typically results in a percent recovery of approximately 10%. This indicates the

analysis is only measuring the correct type of cyanide. The LCS is performed with a "total" cyanide spike, only a small portion of which is "reactive". Recovery of significantly greater than this level in the analysis of the LCS indicates the test is over estimating the concentration of reactive cyanide.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

D. Duplicate sample:

Duplicate analysis was performed on sample DEC-044D (4-5') for Flashpoint and pH.

Percent RPD was within the QC limits for both analyses.

E. Dilutions:

No sample required analysis at dilution.

F. Samples:

For Flashpoint analysis, the result of "No Flash" indicates that no flash was observed, or that non-ignitable vapors from the sample extinguished the test flame at the temperature indicated. Where non-flammable vapors from the sample extinguished the test flame below 140 degrees, the sample temperature was elevated to at least 140 degrees, and re-exposed to the test flame.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Mitkem, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K1102

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times with the following exceptions:

DEC-011 (K1102-18ARE) exceed by 1 Day

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1
Instrument Type: GCMS-VOA
Description: HP5890 II / HP5972
Manufacturer: Hewlett-Packard
Model: 5890 / 5972
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

Instrument Code: V6
Instrument Type: GCMS-VOA
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per analysis.

DEC-064 (K1102-04A), recovery is below criteria for Dibromofluoromethane at 84% with criteria of (85-115).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-60151 in batch 60151, recovery is above criteria for Iodomethane at 133% with criteria of (72-121).

LCSD-60151 in batch 60151, recovery is above criteria for 1,1,1-Trichloroethane at 130% with criteria of (65-130), 1,1,2-Trichloro-1,2,2-trifluoroethane at 136% with criteria of (70-130), Iodomethane at 153% with criteria of (72-121) and Trichlorofluoromethane at 155% with criteria of (60-145).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-046 (K1102-12AMS) and DEC-046 (K1102-12AMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-046 (K1102-12AMS), recovery is below criteria for 1,2,4-Trichlorobenzene at 64% with criteria of (65-135), 1,4-Dioxane at 60% with criteria of (70-130) and Naphthalene at 44% with criteria of (55-140).

DEC-046 (K1102-12AMSD), recovery is below criteria for 1,2-Dibromoethane at 80% with criteria of (80-120) and 1,4-Dioxane at 68% with criteria of (70-130).

Replicate RPDs were within the QC limits.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following samples were re-analyzed at dilution:

DEC-030 (K1102-02ADL) : Dilution Factor: 25
DEC-064 (K1102-04ADL) : Dilution Factor: 4
DEC-006DD (K1102-05ADL) : Dilution Factor: 5
DEC-006D (K1102-06ADL) : Dilution Factor: 50
DUP-062011 (K1102-07ADL) : Dilution Factor: 5
DEC-031 (K1102-09ADL) : Dilution Factor: 50
DEC-007 (K1102-17ADL) : Dilution Factor: 10
DEC-007D (K1102-19ADL) : Dilution Factor: 4
DEC-028 (K1102-20ADL) : Dilution Factor: 20
DEC-065D (K1102-21ADL) : Dilution Factor: 10
DEC-012 (K1102-23ADL) : Dilution Factor: 4
DEC-015D (K1102-27ADL) : Dilution Factor: 8

G. Samples:

Sample DEC-011 has Tetrachloroethene detected at 13 ug/L. It was analyzed after DEC-007 which has Tetrachloroethene detected above the calibration range. DEC-011 was re-analyzed out of hold time to confirm the Tetrachloroethene detection was not carry over. Re-analysis result has Tetrachloroethene detected at 5.1 ug/L. Both results reported in the data package.

Sample DEC-012 was analyzed undiluted and also at a 4x dilution for Tetrachloroethene. The dilution analysis showed some low level contamination which were not detected in the initial analysis. These compounds were all below the reporting limits and should not affect the Tetrachloroethene result.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K1102

SW846 8270D, SVOA by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8270D

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used
Instrument Code: S3
Instrument Type: GCMS-SEMI
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

DEC-031D (K1102-08D), recovery is above criteria for 2,4,6-Tribromophenol at 138% with criteria of (40-125).

DEC-031 (K1102-09D), recovery is above criteria for 2,4,6-Tribromophenol at 137% with criteria of (40-125).

LCSD-60047, recovery is above criteria for 2,4,6-Tribromophenol at 144% with criteria of (40-125).

MB-60047, recovery is above criteria for 2,4,6-Tribromophenol at 135% with criteria of (40-125).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-60047 in batch 59922, recovery is below criteria for 2-Methylphenol at 38% with criteria of (40-110), and Caprolactam at 13% with criteria of (50-150).

LCSD-60047 in batch 59922, recovery is below criteria for Caprolactam at 15% with criteria of (50-150). Percent Recovery is above criteria for Pentachlorophenol at 121% with criteria of (40-115).

For LCS/LCSD-60047, 2,4-Dinitrophenol exceeded the RPD QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

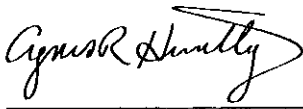

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K1102

SW846 8081B, Organochlorine Pesticides by GC-ECD

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8081B

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: E5

Instrument Type: GC-ECD

Description: HP6890

Manufacturer: Hewlett-Packard

Model: 6890

GC Column used: 30 m X 0.53 mm ID [0.50 um thickness] CLPPest capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control sample were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Dilutions:

No sample in this SDG required analysis at dilution.

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1 when D% between the two columns is greater than 40%.

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

Instrument Code: V6
Instrument Type: GCMS-VOA
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

DEC-009 (K1110-10A), recovery is above criteria for Dibromofluoromethane at 115% with criteria of (85-115).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific

compound.

LCS-60019 in batch 60019, recovery is above criteria for Iodomethane at 125% with criteria of (72-121).

LCS-60151 in batch 60151, recovery is above criteria for Iodomethane at 133% with criteria of (72-121).

LCS-60176 in batch 60176, recovery is above criteria for Iodomethane at 126% with criteria of (72-121), recovery is below criteria for Cyclohexane at 66% with criteria of (70-130).

LCSD-60102 in batch 60102, recovery is above criteria for 1,2,4-Trichlorobenzene at 138% with criteria of (65-135) and Iodomethane at 139% with criteria of (72-121).

LCSD-60151 in batch 60151, recovery is above criteria for 1,1,1-Trichloroethane at 130% with criteria of (65-130), 1,1,2-Trichloro-1,2,2-trifluoroethane at 136% with criteria of (70-130), Iodomethane at 153% with criteria of (72-121) and Trichlorofluoromethane at 155% with criteria of (60-145).

LCSD-60176 in batch 60176, recovery is above criteria for Iodomethane at 127% with criteria of (72-121), recovery is below criteria for Cyclohexane at 68% with criteria of (70-130).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-048 (K1110-19AMS) and DEC-048 (K1110-19AMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-048 (K1110-19AMS), recovery is above criteria for 1,4-Dioxane at 131% with criteria of (70-130).

DEC-048 (K1110-19AMSD), recovery is above criteria for 1,4-Dioxane at 132% with criteria of (70-130).

Replicate RPDs were within the QC limits.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following samples were re-analyzed at dilution:

DEC-022D (K1110-01ADL) : Dilution Factor: 16
DEC-044D (K1110-05ADL) : Dilution Factor: 5
DEC-044 (K1110-06ADL) : Dilution Factor: 20
DEC-008 (K1110-09ADL) : Dilution Factor: 25
DUP-062311 (K1110-11ADL) : Dilution Factor: 2
DEC-014R (K1110-12ADL) : Dilution Factor: 500
DEC-029 (K1110-14ADL) : Dilution Factor: 100
DEC-039 (K1110-17ADL) : Dilution Factor: 2
DEC-027 (K1110-18ADL) : Dilution Factor: 10
DUP-062411 (K1110-20ADL) : Dilution Factor: 2
DEC-013 (K1110-22ADL) : Dilution Factor: 40

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K1110

SW846 8270D, SVOA by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8270D

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: S3
Instrument Type: GCMS-SEMI
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-60141 in batch 60141, recovery is above criteria for 2,4-Dinitrophenol at 167% with criteria of (15-140), 2,4-Dinitrotoluene at 128% with criteria of (50-120), 2,6-Dinitrotoluene at 117% with criteria of (50-115), 2-Nitrophenol at 116% with criteria of (40-115) and 4,6-Dinitro-2-methylphenol at 142% with criteria of (40-130).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-048 (K1110-19DMS) and DEC-048 (K1110-19DMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-048 (K1110-19DMS), recovery is below criteria for 2,4-Dimethylphenol at 9% with criteria of (30-110) and Caprolactam at 20% with criteria of (50-150).

DEC-048 (K1110-19DMSD), recovery is above criteria for 4,6-Dinitro-2-methylphenol at 137% with criteria of (40-130), recovery is below criteria for and Caprolactam at 20% with criteria of (50-150).

Replicate RPDs were within the QC limits with the exception of 2,4-Dimethylphenol.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

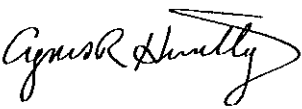

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Laboratory Workorder / SDG #: K1110

SW846 8081B, Organochlorine Pesticides by GC-ECD

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8081B

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: E4

Instrument Type: GC-ECD

Description: HP6890

Manufacturer: Hewlett-Packard

Model: 6890

GC Column used: 30 m X 0.53 mm ID [0.50 um thickness] CLPPest capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control sample were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-048 (K1110-19DMS) and DEC-048 (K1110-19DMSD).

Percent recoveries were within the QC limits.

Replicate RPDs were within the QC limits.

E. Dilutions:

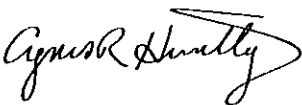

No sample in this SDG required analysis at dilution.

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1 when D% between the two columns is greater than 40%.

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

SW846 8082A

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: E2

Instrument Type: GC-ECD

Description: HP5890 II +

Manufacturer: Hewlett-Packard

Model: 5890

GC Column used: 30 m X 0.53 mm ID [0.50 um thickness] CLPPest capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control sample were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-048 (K1110-19DMS) and DEC-048 (K1110-19DMSD).

Percent recoveries were within the QC limits.

Replicate RPDs were within the QC limits.

E. Dilutions:

No sample in this SDG required analysis at dilution.

F. Samples:

The lower concentration between the primary and confirmatory GC column concentrations is reported due to the presence of interferences unless otherwise indicated on Form 10. Both values are reported on Form 10. P flags are assigned to compounds on Form 1 when D% between the two columns is greater than 40%.

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: K1110

SW846 6010C, SW846 7470A, SW846 9012B

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 6010C, SW846 7470A, SW846 9012B

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW9012B

Aqueous Samples were prepared following procedures in laboratory test code: SW3005

Aqueous Samples were prepared following procedures in laboratory test

code: SW7470A

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: FIMS1
Instrument Type: CVAA
Description: FIMS
Manufacturer: Perkin-Elmer
Model: FIMS

Instrument Code: LACHAT1
Instrument Type: WC
Description: Flow Injection Analyzer
Manufacturer: Zellweger Analytics
Model: Quik-Chem 8000

Instrument Code: OPTIMA3
Instrument Type: ICP
Description: Optima ICP-OES
Manufacturer: Perkin-Elmer
Model: 4300 DV

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for laboratory control samples were within the QC limits.

2. Matrix spike (MS):

Matrix spikes were performed on samples: DEC-048 (K1110-19BMS) and DEC-048 (K1110-19CMS).

Percent recoveries were within the QC limits.

D. Post Digestion Spike (PDS):

A post-digestion spike was not performed on any sample in this SDG.

E. Duplicate sample:

Duplicate analysis was performed on samples: DEC-048 (K1110-19BDUP) and DEC-048 (K1110-19CDUP).

Relative percent differences were within the QC limits.

F. Serial Dilution (SD):

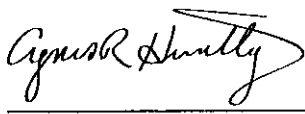

Serial Dilution analysis was performed on sample: DEC-048 (K1110-19BSD).

Percent differences were within the QC limits.

G. Samples:

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Project: Klink Cosmo Meeker, LNAPL Sample

Laboratory Workorder / SDG #: K1120

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control sample were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following sample was analyzed at dilution:

DEC-048 (K1120-01A) : Dilution Factor: 500

G. Samples:

No unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: S3

Instrument Type: GCMS-SEMI

Description: HP6890 / HP5973

Manufacturer: Hewlett-Packard

Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

DEC-048 (K1120-01A), recovery is above criteria for 2,4,6-Tribromophenol at 135% with criteria of (35-125), 2-Fluorophenol at 108% with criteria of (35-105), Nitrobenzene-d5 at 538% with criteria of (35-100) and Phenol-d5 at 115% with criteria of (40-100).

LCS-60224, recovery is above criteria for 2,4,6-Tribromophenol at 131% with criteria of (35-125), 2-Fluorophenol at 110% with criteria of (35-105) and Phenol-d5 at 105% with criteria of (40-100).

LCSD-60224, recovery is above criteria for 2,4,6-Tribromophenol at 132% with criteria of (35-125), 2-Fluorophenol at 118% with criteria of (35-105) and Phenol-d5 at 109% with criteria of (40-100).

Please note that for samples of oil matrix, both the field samples and their associated method blank and LCS/LCSD were diluted to 10 mL. These dilutions resulted in increased imprecision in determining the surrogate recovery.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-60224 in batch 60224, recovery is below criteria for 2,4-Dinitrophenol at 0% with criteria of (15-130) and Benzaldehyde at 0% with criteria of (10-118).

LCSD-60224 in batch 60224, recovery is below criteria for 2,4-Dinitrophenol at 0% with criteria of (15-130) and Benzaldehyde at 0% with criteria of (10-118).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following sample was analyzed at dilution:

DEC-048 (K1120-01A) : Dilution Factor: 5

G. Samples:

Approximately 1gram of the oil sample was taken, spiked with surrogate and diluted to 10mL in methylene chloride. An aliquot of the resultant sample extract was transferred to the instrument lab for analysis.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as

verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker, LNAPL Sample

Laboratory Workorder / SDG #: K1120

SW846 8015D, Fuel Identification by GC-FID

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code: SW846 8015D Nonhalogenated Organics Using GC/FID. Fuel identification was performed by comparison of the GC-FID sample chromatogram to a series of fuel standards. No final concentration result is applicable.

IV. PREPARATION

Samples were prepared following procedures in laboratory test code: SW846 3580A, Waste Dilution.

V. INSTRUMENTATION

The following instrumentation was used:

Instrument Code: F1

Instrument Type: GC-FID
Description: HP6890
Manufacturer: Hewlett-Packard
Model: 6890

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

N/A

D. Spikes:

1. Laboratory Control Spikes (LCS/LCSD):

Percent recoveries for lab control samples were within the QC limits.

E. Dilutions:

The following sample was analyzed at dilution:

DEC-048 (K1120-01A): Dilution Factor: 20

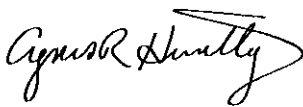

F. Samples:

Spectrum RI's analysis method is designed to separate and identify common hydrocarbon fuels and other petroleum-related products. Samples are analyzed using capillary gas chromatography with flame ionization detection. Results are compared to a library of standards of known petroleum products obtained from commercial analytical standard sources. The following petroleum products are included in the library of standards: Fuel oils #1, #2/diesel, #3, #4, #5, #6, kerosene, mineral spirits, turpentine, paint thinner, jet fuels JP-4, JP-5, gasoline, aviation gasoline, lubricating oil, motor oil, hydraulic oil, transmission oil, coal tar, creosote.

Copies of raw sample chromatograms for each sample and for standards of known hydrocarbon products follow this page. These samples and standards have been analyzed under similar conditions. The internal standard peak, chlorooctadecane, has been identified on each chromatogram. The retention time of this peak is used to match chromatograms analyzed at different times, or on different instruments.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Project: Klink Cosmo Meeker, LNAPL Sample

Laboratory Workorder / SDG #: K1120

Subcontracted Analysis

The following analysis was performed by subcontractor laboratory:

Modified Gravity:

Modified Gravity by ASTM method 2170F was performed by Mt. Tom Generating Co. LLC Analytical Laboratory. The entire Mt. Tom report, including any notes on these analyses is enclosed following the Total Petroleum Hydrocarbon section of the Spectrum RI report.

AIR: CHAIN-OF-CUSTODY / Analytical Request Document

The Chain-of-Custody is a LEGAL DOCUMENT. All relevant fields must be completed accurately.

1.0 INTRODUCTION

This Data Usability Summary Report (DUSR) has been prepared following the guidelines provided in New York State Department of Environmental Conservation (NYSDEC) Division of Environmental Remediation *DER-10 Technical Guidance for Site Investigation and Remediation, Appendix 2B-Guidance for Data Deliverables and the Development of Data Usability and Summary Reports, May 2010*. Analytical data for 16 soil samples plus 1 matrix spike/ matrix spike duplicate (MS/MSD) pair, and 1 solid investigative derived waste (IDW) sample collected by URS personnel on February 28 to March 8, 2012 from the Former Klink Cosmo Cleaners site, work assignment C007540-4 are discussed in this DUSR.

2.0 ANALYTICAL METHODOLOGIES

All soil and IDW samples were sent to Spectrum Analytical, Inc. (formerly Miktem Corporation) located in Warwick, RI for analysis, and were analyzed for the following parameters.

Matrix	Parameter	Method No.
Soil	Target Compound List (TCL) Volatile Organic Compounds (VOCs) plus tentatively identified compounds (TICs)	SW8260C
Solid IDW	Toxicity Characteristic Leaching Procedure (TCLP) VOCs	SW1311/8260C
	TCLP Semivolatile Organic Compounds (SVOCs)	SW1311/8270D
	TCLP Metals	SW1311/6010C/7470A
	Corrosivity (as pH)	SW9045C
	Ignitability	SW1010
	Reactive Cyanide and Sulfide	SW-846, Sec. 7.3

A limited data validation was performed following the guidelines in the following USEPA Region II documents:

- *Validating Volatile Organic Compounds by Gas Chromatography/Mass Spectrometry SW-846 Method 8260B*, SOP HW-24, Rev. 2, August 2008;
- *Validating Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry SW-846 Method 8270D*, SOP HW-22, Rev. 4, August 2008; and

- *Validation of Metals for the Contract Laboratory Program (CLP) Based on SOW ILM05.3, SOP HW-2, Rev. 13, September 2006.*

The limited validation included: a review of completeness of all required deliverables; holding times; a review of quality control (QC) results (blanks, instrument tunings, calibration standards, duplicate analyses, and laboratory control sample (LCS) recoveries to determine if the data are within the protocol-required limits and specifications; a determination that all samples were analyzed using established and agreed upon analytical protocols; an evaluation of the raw data to confirm the results provided in the data summary sheets; and a review of laboratory data qualifiers.

Qualifications applied to the data include 'J' (estimated concentration), 'UJ' (estimated quantitation limit), 'U' (non-detect), and 'R' (rejected /data unusable). Definitions of USEPA Region II data qualifiers are presented at the end of this text. A summary of data qualifications is provided on Table 1. The validated analytical results are presented on Tables 2 and 3. Copies of the validated laboratory results (i.e., Form 1's) are presented in Attachment A. Documentation supporting the qualification of data is presented in Attachment B. Only analytical deviations affecting data usability are discussed in this report.

3.0 DATA DELIVERABLE COMPLETENESS

Full deliverable data packages were provided by the laboratory, which included all reporting forms and raw data necessary to fully evaluate and verify the reported analytical results.

4.0 PRESERVATION/SAMPLE RECEIPT/HOLDING TIMES

All samples were received by the laboratory intact, properly preserved, and under proper chain-of-custody (COC). All samples were analyzed within the required holding times.

5.0 NON-CONFORMANCES

Instrument Calibration

The VOC relative response factors (RRF) for acetone, 2-butanone, and 1,4-dioxane in the initial calibration (ICAL) and/or the continuing calibration (CCAL) standards associated with the soil samples were below the lower QC limit (0.05). The non-detected results for these compounds in all associated soil samples listed on Table 1 have been qualified 'R'.

The VOC RRF for 2-butanone in the ICAL and/ or the CCAL standards associated with the solid IDW sample was below the lower QC limit (0.05). The non-detected result for this compound in the solid IDW sample listed on Table 1 has been qualified 'R'.

The percent difference (%D) between the ICAL average RRF and the RRF in one or more of the CCAL standards associated with the soil samples exceeded the QC limit of 20% for one or more of the following VOCs: 1,1,1-trichloroethane, 1,2,3-trichlorobenzene, 1,1-dichloropropene, 1,2-dibromo-3-chloropropane, bromochloromethane, bromoform, carbon tetrachloride, chloroethane, cyclohexane, iodomethane, methyl acetate, methylcyclohexane, naphthalene, n-butylbenzene, and/or trichlorofluoromethane. The non-detect results for these compounds in the associated soil samples listed on Table 1 were qualified 'UJ'.

The %D between the ICAL average RRF and the RRF in the CCAL standard associated with the solid IDW sample exceeded the QC limit of 20% for SVOC pyridine. The non-detect result for this compound in the solid IDW sample listed on Table 1 was qualified 'UJ'.

Documentation supporting the qualification of data (i.e., Forms 6 and 7) is presented in Attachment B.

Matrix Spikes

The MS/MSD of soil sample DEC-088D (37-38') exhibited low percent recoveries (%Rs) for the following VOCs: 4-isopropyltoluene, cyclohexane, and methylcyclohexane. The non-detect results for these compounds in this sample were qualified 'UJ', as listed on Table 1.

Laboratory Control Samples (LCS)

The reactive cyanide %Rs in the LCS/LCSD were 0%. The laboratory indicated that they spike the LCSs with "total" cyanide, where only a small portion of which represents "reactive" cyanide. Furthermore, it is common for labs to experience very low %Rs for reactive cyanide. Therefore, the non-detect reactive cyanide result for the solid IDW sample was qualified 'UJ', as listed on Table 1.

Documentation supporting the qualification of data (i.e., QC Summary) is presented in Attachment B.

Laboratory Blanks

Methylene chloride and naphthalene was detected below the quantitation limit (QL) in one or more laboratory method blanks associated with soil samples. Soil sample results with methylene chloride or naphthalene concentrations less than the QL were qualified 'U' at the QL, as listed on Table 1.

Chromium was detected in the laboratory preparation blank associated with the solid IDW sample. Since this sample had a concentration of chromium less than ten times the associated blank level, the result was qualified 'U' at the reported value.

Documentation supporting the qualification of data (i.e., Forms 1, 3, and 4) is presented in Attachment B.

6.0 SAMPLE RESULTS AND REPORTING

All quantitation/detection limits were reported in accordance with method requirements and were adjusted for sample volume, moisture content, and dilution factors. Results below the quantitation limits were qualified 'J', 'B' (metals), by the laboratory.

7.0 SUMMARY

All sample analyses were found to be compliant with the method criteria, except where previously noted. Those results qualified 'J' or 'UJ' are considered conditionally usable, while results qualified 'U' are considered non-detect. Results qualified 'R' are considered unusable. All other sample results are usable as reported. URS does not recommend the recollection of any samples at this time.

DEFINITIONS OF USEPA REGION II DATA QUALIFIERS

- U – The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
- J – The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.
- UJ – The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
- R – The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
- B – The analyte was detected in the sample at a concentration greater than the instrument detection limit, but less than the quantitation limit.
- D – The positive value is the result of an analysis at a secondary dilution factor.

TABLE 1
SUMMARY OF DATA QUALIFICATIONS
FORMER KLINK COSMO CLEANERS SITE

Fraction	Samples	Reason	Action
VOC	All soil samples.	RRF < 0.05 for acetone, 2-butanone, and 1,4-dioxane.	Qualify non-detect results 'R'.
VOC	IDW-SOIL	RRF < 0.05 for 2-butanone.	Qualify non-detect result 'R'.
VOC	Soil sample DEC-088D (37-38').	CCAL %D > 20% for n-butylbenzene and naphthalene.	Qualify non-detect results 'UJ'.
VOC	Soil samples SG-61R (5.0-5.5') and SG-112 (4.5-5.0').	CCAL %D > 20% for 1,2,3-trichlorobenzene, bromoform, and chloroethane.	Qualify non-detect results 'UJ'.
VOC	Soil samples DEC-089D (34-35'), SG-113 (7.5-8.0'), SG-114 (7.5-8.0'), SG-115 (6.5-7.0'), SG-116 (4.0-4.5'), SG-117 (3.0-3.5'), SG-118 (6.5-7.0'), and SG-119 (3.5-4.0').	CCAL %D > 20% for 1,1,1-trichloroethane, 1,1-dichloropropene, bromochloromethane, carbon tetrachloride, cyclohexane, methyl acetate, methylcyclohexane, and trichlorofluoromethane.	Qualify non-detected results 'UJ'.
VOC	Soil samples DEC-090D (30-31'), SG-120 (2.0-2.5'), SG-121 (2.0-2.5'), and SG-122 (2.0-2.5').	CCAL %D > 20% for iodomethane.	Qualify non-detect results 'UJ'.
VOC	Soil sample DEC-091D (30-31')	CCAL %D > 20% for 1,2-dibromo-3-chloropropane and naphthalene.	Qualify non-detect results 'UJ'.
VOC	Soil samples DEC-088D (37-38').	MS/MSD %R > QC limit for 4-isopropyltoluene, cyclohexane, and methylcyclohexane.	Qualify non-detect results 'UJ'.
VOC	Soil samples SG-61R (5.0-5.5'), SG-112 (4.5-5.0'), SG-117 (3.0-3.5'), and SG-122 (2.0-2.5').	Naphthalene detected in the laboratory method blank.	Qualify results 'U' at the QL.
VOC	Soil sample DEC-091D (30-31').	Methylene chloride detected in the laboratory method blank.	Qualify result 'U' at the QL.
TCLP SVOC	IDW-SOIL.	CCAL %D > 20% for pyridine.	Qualify non-detect result 'UJ'.
Reactive Cyanide	IDW-SOIL	LCS/LCSD %Rs for reactive cyanide 0%.	Qualify non-detect result 'UJ'.

*Criteria- 6 NYCRR Part 375.6, Remedial Program Soil Cleanup Objectives, Effective 12/14/06. Unrestricted Use, plus CP-51 Table 1 10/21/10.

Flags assigned during chemistry validation are shown.

 Concentration Exceeds Criteria

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

J - The reported concentration is an estimated value.

R - The data is rejected.

SUPPORT DOCUMENTATION

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0414

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1
Instrument Type: GCMS-VOA
Description: HP5890 II / HP5972
Manufacturer: Hewlett-Packard
Model: 5890 / 5972

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-64905 in batch 64905, Percent Recovery is outside QC Limits, recovery is below criteria for 1,4-Dioxane at 69% with criteria of (70-130).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-088D 37-38 (L0414-01BMS) and DEC-088D 37-38 (L0414-01BMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-088D 37-38 (L0414-01BMS) Percent Recovery is outside QC Limits, recovery is below criteria for 4-Isopropyltoluene at 72% with

criteria of (75-135), Cyclohexane at 66% with criteria of (70-130), Iodomethane at 67% with criteria of (70-126), m,p-Xylene at 79% with criteria of (80-125), Methylcyclohexane at 68% with criteria of (70-130) and Xylene (Total) at 79% with criteria of (83-125).

DEC-088D 37-38 (L0414-01BMSD) Percent Recovery is outside QC Limits, recovery is above criteria for 1,4-Dioxane at 148% with criteria of (70-130), recovery is below criteria for 1,1,2-Trichloro-1,2,2-trifluoroethane at 57% with criteria of (70-130), 1,1-Dichloroethane at 68% with criteria of (75-125), 1,1-Dichloropropene at 66% with criteria of (70-135), 4-Chlorotoluene at 70% with criteria of (75-125), 4-Isopropyltoluene at 66% with criteria of (75-135), Benzene at 70% with criteria of (75-125), Chlorobenzene at 72% with criteria of (75-125), Cyclohexane at 59% with criteria of (70-130), Ethylbenzene at 70% with criteria of (75-125), Isopropylbenzene at 68% with criteria of (75-130), m,p-Xylene at 70% with criteria of (80-125), Methylcyclohexane at 61% with criteria of (70-130), n-Butylbenzene at 62% with criteria of (65-140), o-Xylene at 74% with criteria of (75-125), Styrene at 72% with criteria of (75-125), Vinyl chloride at 56% with criteria of (60-125) and Xylene (Total) at 72% with criteria of (83-125).

Replicate RPDs were within the advisory QC limits.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

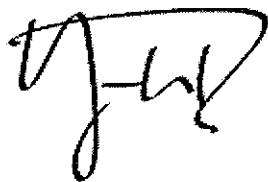

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. W.' or similar, written above the 'Signed:' line.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0437

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1

Instrument Type: GCMS-VOA

Description: HP5890 II / HP5972

Manufacturer: Hewlett-Packard

Model: 5890 / 5972

GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

SG-116 4.0-4.5 (L0437-04A), recovery is below criteria for Toluene-d8 at 85% with criteria of (85-115).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCSD-65002 in batch 65002, Percent Recovery is outside QC Limits, recovery is above criteria for 1,4-Dioxane at 148% with criteria of (70-130).

LCSD-65027 in batch 65027, Percent Recovery is outside QC Limits, recovery is above criteria for 1,4-Dioxane at 136% with

criteria of (70-130).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

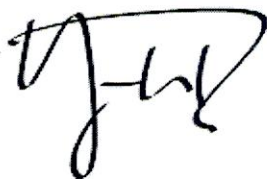

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. P.', is written over a horizontal line.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0438

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V6
Instrument Type: GCMS-VOA
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

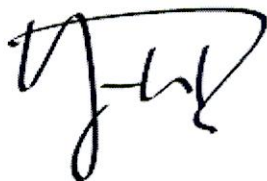

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. P.' or similar, written in a cursive style.

Signed: _____

Date: 3/22/2012

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8270D

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3510

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: S3
Instrument Type: GCMS-SEMI
Description: HP6890 / HP5973
Manufacturer: Hewlett-Packard
Model: 6890 / 5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits with the following exceptions. Please note that the acceptance criteria allow one surrogate recovery outside of the QC limits per fraction.

(LCSD-65024), recovery is above criteria for 2,4,6-Tribromophenol at 130% with criteria of (40-125).

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCSD-65024 in batch 65024, Percent Recovery is outside QC Limits, recovery is above criteria for Hexachloroethane at 98% with criteria of (30-95).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. P.' or similar, written over a horizontal line.

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 6010C, SW846 7470A

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW3005A
Aqueous Samples were prepared following procedures in laboratory test code: SW7470A

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: FIMS2
Instrument Type: CVAA
Description: FIMS
Manufacturer: Perkin-Elmer
Model: FIMS100

Instrument Code: OPTIMA3
Instrument Type: ICP
Description: Optima ICP-OES
Manufacturer: Perkin-Elmer
Model: 4300 DV

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for laboratory control samples were within the QC limits.

2. Matrix spike (MS):

A matrix spike was not performed on any sample in this SDG.

D. Post Digestion Spike (PDS):

A post-digestion spike was not performed on any sample in this SDG.

E. Duplicate sample:

A duplicate analysis was not performed on any sample in this SDG.

F. Serial Dilution (SD):

A serial dilution was not performed on any sample in this SDG.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

Model: 4004-000

Instrument Code: WC01
Instrument Type: Probe
Description: pH Meter
Manufacturer: Thermo Electron Corporation
Model: Orion 520A+

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

The lab control sample for reactive cyanide typically results in a

percent recovery of approximately 10%. This indicates the analysis is only measuring the correct type of cyanide. The LCS is performed with a "total" cyanide spike, only a small portion of which is "reactive". Recovery of significantly greater than this level in the analysis of the LCS indicates the test is over estimating the concentration of reactive cyanide.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

D. Duplicate sample:

No client-requested laboratory duplicate analyses were included in this SDG.

E. Dilutions:

No sample required dilution in this SDG.

F. Samples:

For Flashpoint analysis, the result of "No Flash" indicates that no flash was observed, or that non-ignitable vapors from the sample extinguished the test flame at the temperature indicated. Where non-flammable vapors from the sample extinguished the test flame below 140 degrees, the sample temperature was elevated to at least 140 degrees, and re-exposed to the test flame.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0460

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1
Instrument Type: GCMS-VOA
Description: HP5890 II / HP5972
Manufacturer: Hewlett-Packard
Model: 5890 / 5972

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCSD-65037 in batch 65037, Percent Recovery is outside QC Limits, recovery is below criteria for Iodomethane at 70% with criteria of (70-126).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

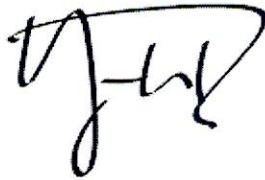

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. P.', written over a horizontal line.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0486

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Soil Samples were prepared following procedures in laboratory test code: SW5035

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V5
Instrument Type: GCMS-VOA
Description: HP6890 / HP6890
Manufacturer: Hewlett-Packard
Model: 6890 / 6890

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-65144 in batch 65144, Percent Recovery is outside QC Limits, recovery is above criteria for Acetone at 160% with criteria of (20-160).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

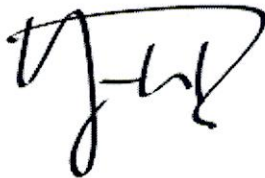

F. Dilutions:

No sample in this SDG required analysis at dilution.

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. P.', written over a horizontal line.

1.0 INTRODUCTION

This Data Usability Summary Report (DUSR) has been prepared following the guidelines provided in New York State Department of Environmental Conservation (NYSDEC) Division of Environmental Remediation *DER-10 Technical Guidance for Site Investigation and Remediation, Appendix 2B-Guidance for Data Deliverables and the Development of Data Usability and Summary Reports*, May 2010. Analytical data for 38 soil gas samples, 4 soil gas field duplicates, and 3 ambient air samples collected by URS personnel on March 5-7, 2012 from the Former Klink Cosmo Cleaners site, work assignment C007540-4 are discussed in this DUSR.

2.0 ANALYTICAL METHODOLOGIES

All samples were sent to Pace Analytical Services, Inc. (Minneapolis, Mn) for analysis. The air samples were analyzed for volatile organic compounds (VOCS) by United States Environmental Protection Agency (USEPA) Compendium of Methods for the Determination of Toxic Compounds in Ambient Air Method TO-15.

A limited data validation was performed following the guidelines in the following USEPA Region II document:

- *Validating Volatile Organic Analysis of Ambient Air in Canister by Method TO-15, SOP HW-31, Rev. 4, August 2006.*

The limited validation included: a review of completeness of all required deliverables; holding times; a review of quality control (QC) results (blanks, instrument tunings, calibration standards, duplicate analyses, and laboratory control sample (LCS) recoveries to determine if the data are within the protocol-required limits and specifications; a determination that all samples were analyzed using established and agreed upon analytical protocols; an evaluation of the raw data to confirm the results provided in the data summary sheets; and a review of laboratory data qualifiers.

Qualifications applied to the data include 'J' (estimated concentration), 'UJ' (estimated quantitation limit), and 'R' (rejected/data unusable). Definitions of USEPA Region II data qualifiers are presented at the end of this text. A summary of data qualifications is provided on Table 1. The validated analytical results are presented on Table 2. Copies of the validated laboratory results (i.e., Form 1's) are presented in Attachment A. Documentation supporting the qualification of data is presented in

Attachment B. Only analytical deviations affecting data usability are discussed in this report.

3.0 DATA DELIVERABLE COMPLETENESS

Full deliverable data packages [i.e., NYSDEC ASP, Category B (or equivalent)] were provided by the laboratory, which included all reporting forms and raw data necessary to fully evaluate and verify the reported analytical results.

4.0 PRESERVATION/SAMPLE RECEIPT/HOLDING TIMES

All samples were received by the laboratory intact and under proper chain-of-custody (COC). All samples were analyzed within the required holding times.

5.0 NON-CONFORMANCES

Instrument Calibration

The relative response factor (RRF) for chloroethane in the continuing calibration (CCAL) standard associated with some of the samples was below the lower QC limit (0.05). The non-detected results for chloroethane in the associated samples listed on Table 1 have been qualified 'R'.

The percent difference (%D) between the initial calibration curve (ICAL) average RRF and the RRF in one or more of the CCAL standards associated with the samples exceeded the QC limit of 30% for 1,2,4-trichlorobenzene and/or 1,2-dichlorotetrafluoroethane. The non-detect results for these compounds in the associated samples listed on Table 1 were qualified 'UJ'.

6.0 SAMPLE RESULTS AND REPORTING

All quantitation detection limits were reported in accordance with method requirements and were adjusted for sample volume and dilution factors. Results reported from a secondary dilution were qualified 'D'. Results below the quantitation limits were qualified 'J' by the laboratory.

Field duplicates were collected at locations SG-082, SG-120, SS-019, and SS-049. In general the sample and field duplicate results were similar, with the relative percent differences (%RPDs) between the two results being less than 50%. The USEPA Region II validation guidelines do not require qualification of VOC analytical results based upon field duplicate precision.

Soil gas samples SG-044, SG-062, SG-080, SG-085, and SG-122 exhibited concentrations of ethanol and/or methylene chloride over the linear range of calibration. Since ethanol and methylene chloride are not considered compounds of concern at this site, no further dilution was performed by the laboratory. The ethanol and/or methylene chloride results in these samples were qualified 'J' due to the calibration exceedance.

Soil gas samples SG-049, FD-03072012-1 (SG-049), SG-116, SG-117, and SG-119 exhibited linear range of calibration exceedances for tetrachloroethene (PCE). The concentration of PCE was still over the linear range of calibration in the secondary dilutions. The results have been reported from the secondary dilution and were qualified 'J' due to the calibration exceedance.

7.0 SUMMARY

All sample analyses were found to be compliant with the method criteria, except where previously noted. Those results qualified 'J' or 'UJ' are considered conditionally usable. Those results qualified 'R' are unusable. All other sample results are usable as reported. URS does not recommend the recollection of any samples at this time.

DEFINITIONS OF USEPA REGION II DATA QUALIFIERS

- U – The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
- J – The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.
- UJ – The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
- R – The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
- B – The analyte was detected in the sample at a concentration greater than the instrument detection limit, but less than the quantitation limit.
- D – The positive value is the result of an analysis at a secondary dilution factor.

1.0 INTRODUCTION

This Data Usability Summary Report (DUSR) has been prepared following the guidelines provided in New York State Department of Environmental Conservation (NYSDEC) Division of Environmental Remediation *DER-10 Technical Guidance for Site Investigation and Remediation, Appendix 2B-Guidance for Data Deliverables and the Development of Data Usability and Summary Reports*, May 2010. Analytical data for 59 groundwater samples, 6 field duplicates, 3 matrix spike/matrix spike duplicate (MS/MSD) pairs, and 7 trip blanks collected by URS personnel from March 26 to April 20, 2012 from the Former Klink Cosmo Cleaners site as part of Phase II of the Remedial Investigation are discussed in this DUSR.

2.0 ANALYTICAL METHODOLOGIES

All samples were sent to Spectrum Analytical, Inc. located in Warwick, RI for analysis, and were analyzed for the following parameters.

Matrix	Parameter	Method No.
Groundwater	Target Compound List (TCL) Volatile Organic Compounds (VOCs) plus tentatively identified compounds (TICs)	SW8260C
	Alkalinity	Standard Method 2320B
	Chloride	EPA 300.0
	Nitrate-Nitrite	EPA 353.2
	Phosphorous	Standard Method 4500-P B.5-E
	Sulfate	EPA 300.0
	Sulfide	Standard Method 4500-S D
	Total Kjeldahl Nitrogen	Standard Method 4500-N B C

A limited data validation was performed following the guidelines in the following USEPA Region II documents:

- *Validating Volatile Organic Compounds by Gas Chromatography/Mass Spectrometry SW-846 Method 8260B*, SOP HW-24, Rev. 2, August 2008; and
- *Validation of Metals for the Contract Laboratory Program (CLP) Based on SOW ILM05.3*, SOP HW-2, Rev. 13, September 2006.

The limited validation included: a review of completeness of all required deliverables; holding

times; a review of quality control (QC) results [blanks, instrument tunings, calibration standards, duplicate analyses, and MS/laboratory control sample (LCS) recoveries] to determine if the data are within the protocol-required limits and specifications; a determination that all samples were analyzed using established and agreed upon analytical protocols; an evaluation of the raw data to confirm the results provided in the data summary sheets; and a review of laboratory data qualifiers.

Qualifications applied to the data include 'J' (estimated concentration), 'UJ' (estimated quantitation limit), 'U' (not detected), and 'R' (rejected/data unusable). Definitions of USEPA Region II data qualifiers are presented at the end of this text. A summary of data qualifications is provided on Table 1. The validated analytical results are presented on Tables 2 and 3. Copies of the validated laboratory results (i.e., Form 1's) are presented in Attachment A. Documentation supporting the qualification of data is presented in Attachment B. Only analytical deviations affecting data usability are discussed in this report.

3.0 DATA DELIVERABLE COMPLETENESS

Full deliverable data packages [i.e., NYSDEC Analytical Services Protocol (ASP) Category B (or equivalent)] were provided by the laboratory, which included all reporting forms and raw data necessary to fully evaluate and verify the reported analytical results.

4.0 PRESERVATION/SAMPLE RECEIPT/HOLDING TIMES

All samples were received by the laboratory intact, properly preserved, and under proper chain-of-custody (COC) except as follows:

- Samples DEC-046 and DEC-046D were listed on two separate COCs.
- Samples DEC-015D and FD-03272012-2 were not listed on the COC. The laboratory logged in the samples per URS's instructions.
- The volatile vials for sample DEC-031 collected on April 1, 2012 were broken after receipt by the laboratory. The sample was re-collected for VOCs only on April 20, 2012.

All samples were analyzed within the required holding times.

5.0 NON-CONFORMANCES

Instrument Calibration

The VOC relative response factors (RRF) for acetone, 2-butanone, and 1,4-dioxane in the initial calibration (ICAL) and/or the continuing calibration (CCAL) standards associated with all samples were below the QC limit (0.05). The non-detected results for these compounds in all associated groundwater samples listed on Table 1 have been qualified 'R'.

The VOC percent relative standard deviation (%RSD) between the RRFs for tetrachloroethene in the ICAL standards exceeded the QC limit (20%). The detected results for this compound in the associated samples listed on Table 1 have been qualified 'J'. Results qualified 'U' (non-detect) due to blank contamination are still considered detections for ICAL outliers and are therefore qualified 'UJ'.

The percent difference (%D) between the ICAL average RRF and the RRF in one or more of the CCAL standards associated with the groundwater samples exceeded the QC limit of 20% for one or more of the following VOCs: 1,1,2,2-tetrachloroethane, 1,2,3-trichlorobenzene, 1,2,3-trichloropropane, 1,2-dibromo-3-chloropropane, 1,2-dichlorobenzene, 1,3-dichlorobenzene, 1,4-dichlorobenzene, bromoform, bromobenzene, bromomethane, chloromethane, dibromochloromethane, dichlorodifluoromethane, hexachlorobutadiene, methyl acetate, naphthalene, and tetrachloroethene. The detected results were qualified 'J' and the non-detect results were qualified 'UJ' for these compounds in the associated groundwater and field QC samples listed on Table 1.

Documentation supporting the qualification of data (i.e., Forms 6 and 7) is presented in Attachment B.

Matrix Spikes

The VOC MS/MSD of groundwater sample DEC-030D exhibited low percent recovery (%R) for chlorobenzene. The non-detect results for chlorobenzene in sample DEC-030D was qualified 'UJ'.

The MS/MSD of groundwater sample DEC-031TC exhibited low % R for the following VOCs: 1,3,5-trimethylbenzene, 1,3-dichlorobenzene, 1,4-dichlorobenzene, 2-chlorotoluene,

4-chlorotoluene, bromobenzene, chlorobenzene, iodomethane and xylene. The non-detect results for these compounds in sample DEC-031TC were qualified 'UJ'.

Documentation supporting the qualification of data (i.e., Form 3) is presented in Attachment B.

Laboratory Blanks

Tetrachloroethene was detected below the quantitation limit (QL) in one or more laboratory method blanks associated with groundwater samples. Sample results with tetrachloroethene concentrations less than the QL or less than 5 times the associated method blank concentration were qualified 'U' at the QL, as listed on Table 1. For results greater than 5 times the associated method blank concentration, the laboratory applied 'B' qualifier was crossed out.

Documentation supporting the qualification of data (i.e., Forms 1 and 4) is presented in Attachment B.

6.0 SAMPLE RESULTS AND REPORTING

All quantitation/detection limits were reported in accordance with method requirements and were adjusted for sample volume and dilution factors. Results below the quantitation limits were qualified 'J' by the laboratory.

The relative percent difference between the parent sample and field duplicate results were greater than 20% for the samples and parameters listed in Table 1. The detected results for these alkalinity or nitrate/nitrite were qualified 'J', as listed in Table 1.

7.0 SUMMARY

All sample analyses were found to be compliant with the method criteria, except where previously noted. Those results qualified 'J' or 'UJ' are considered conditionally usable. Those results qualified 'U' are considered non-detect. Those results qualified 'R' are unusable. All other sample results are usable as reported. URS does not recommend the recollection of any samples at this time.

DEFINITIONS OF USEPA REGION II DATA QUALIFIERS

- U – The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
- J – The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.
- UJ – The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
- R – The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
- B – The analyte was detected in the sample at a concentration greater than the instrument detection limit, but less than the quantitation limit.
- D – The positive value is the result of an analysis at a secondary dilution factor.

 Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

 Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

 Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

 Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

*Criteria- NYSDEC TOGS (1.1.1), Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations. June 1998, including April 2000 and June 2004 Addenda, Class GA.

Flags assigned during chemistry validation are shown.

 Concentration Exceeds Criteria

- = No standard, criteria or guidance value.

J - The reported concentration is an estimated value. D - Result reported from a secondary dilution analysis. R - The data is rejected.

U - Not detected above the reported quantitation limit. UJ - Not detected. The reported quantitation limit is an estimated value.

Made By: GEK 07/03/2012 Checked By: PRF 07/10/2012

SUPPORT DOCUMENTATION

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0590

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1
Instrument Type: GCMS-VOA
Description: HP5890 II / HP5972
Manufacturer: Hewlett-Packard
Model: 5890 / 5972
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-65333 in batch 65333, Percent Recovery is outside QC Limits, recovery is above criteria for Bromoform at 149% with criteria of (70-130).

LCS-65365 in batch 65365, Percent Recovery is outside QC Limits, recovery is above criteria for Bromoform at 149% with criteria of (70-130).

LCSD-65333 in batch 65333, Percent Recovery is outside QC Limits, recovery is above criteria for Bromoform at 151% with criteria of (70-130).

LCSD-65365 in batch 65365, Percent Recovery is outside QC Limits, recovery is above criteria for Bromoform at 146% with criteria of (70-130).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-030D (L0590-04AMS) and DEC-030D (L0590-04AMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-030D (L0590-04AMS) Percent Recovery is outside QC Limits, recovery is below criteria for 1,3-Dichlorobenzene at 75% with criteria of (75-125).

DEC-030D (L0590-04AMSD) Percent Recovery is outside QC Limits, recovery is below criteria for Chlorobenzene at 79% with criteria of (80-120).

Replicate RPDs were within the advisory QC limits.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following samples were analyzed at dilution:

DEC-006D (L0590-06A) : Dilution Factor: 20
DEC-06DD (L0590-09A) : Dilution Factor: 4
DEC-089D (L0590-11A) : Dilution Factor: 10
DEC-088D (L0590-13A) : Dilution Factor: 2
20120327-FD-1 (L0590-16ADL) : Dilution Factor: 20
DEC-022D (L0590-18ADL) : Dilution Factor: 20
DEC-030 (L0590-20ADL) : Dilution Factor: 20

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. L.', written over a horizontal line.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0590

**EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-**

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM 4500D S-

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: IC1

Instrument Type: IC

Description: DX-500

Manufacturer: Dionex

Model: DX-500

GC Column used: 0.25 m X 4 mm ID [um thickness] AS14A-7 capillary column.

Instrument Code: MANUAL

Instrument Type: WC

Instrument Code: SPEC2

Instrument Type: SP

Description: Spectronic 20 Genesys

Manufacturer: Spectronic Instruments

Model: 4004-000

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-030D (L0590-04DMS) and DEC-030D (L0590-04DMSD) for Chloride and Sulfate.

Percent recoveries were within the QC limits with the following exceptions:

DEC-030D (L0590-04DMS), recovery is below criteria for Chloride at 60% with criteria of (80-120).

DEC-030D (L0590-04DMSD), recovery is below criteria for Chloride at 49% with criteria of (80-120).

Percent RPDs were within the QC limits.

Matrix spike was performed on sample: DEC-030D (L0590-04BMS) for Sulfide, DEC-030D (L0590-04CMS) for Phosphorus and TKN and DEC-030D (L0590-04DMS) for Alkalinity.

Spike recovery was within the QC limits for all analyses.

D. Duplicate sample:

Duplicate analysis was performed on sample: DEC-030D (L0590-04BDUP) for Sulfide, DEC-030D (L0590-04CDUP) for Phosphorus and TKN and DEC-030D (L0590-04DDUP) for Alkalinity.

Percent RPD was within the QC limits for all analyses.

E. Dilutions:

The following samples were analyzed at dilution:

DEC-032 (L0590-01D), dilution factor: 5 for Chloride
DEC-066 (L0590-02D), dilution factor: 5 for Chloride
DEC-066D (L0590-03D), dilution factor: 5 for Chloride and Sulfate
DEC-030D (L0590-04C), dilution factor: 2 for Phosphorus (As P)
DEC-030D (L0590-04CDUP), dilution factor: 2 for Phosphorus (As P)
DEC-030D (L0590-04CMS), dilution factor: 2 for Phosphorus (As P)
DEC-030D (L0590-04D), dilution factor: 5 for Chloride and Sulfate
DEC-030D (L0590-04DMS), dilution factor: 5 for Chloride and Sulfate
DEC-030D (L0590-04DMSD), dilution factor: 5 for Chloride and Sulfate
DEC-006D (L0590-06C), dilution factor: 2 for Phosphorus (As P)
DEC-006D (L0590-06D), dilution factor: 5 for Chloride
DEC-046D (L0590-07C), dilution factor: 2 for Phosphorus (As P)
DEC-046D (L0590-07D), dilution factor: 5 for Chloride and Sulfate
DEC-046 (L0590-08C), dilution factor: 2 for Phosphorus (As P)
DEC-046 (L0590-08D), dilution factor: 5 for Chloride
DEC-06DD (L0590-09C), dilution factor: 2 for Phosphorus (As P)
DEC-06DD (L0590-09D), dilution factor: 5 for Chloride and Sulfate

DEC-089D (L0590-11D), dilution factor: 5 for Chloride and Sulfate
DEC-088 (L0590-12C), dilution factor: 2 for Phosphorus (As P)
DEC-088 (L0590-12D), dilution factor: 5 for Chloride
DEC-088D (L0590-13C), dilution factor: 2 for Phosphorus (As P)
DEC-088D (L0590-13D), dilution factor: 5 for Chloride
DEC-091 (L0590-15C), dilution factor: 2 for Phosphorus (As P)
DEC-091 (L0590-15D), dilution factor: 5 for Chloride
20120327-FD-1 (L0590-16C), dilution factor: 2 for Phosphorus (As P)
20120327-FD-1 (L0590-16D), dilution factor: 5 for Chloride
DEC-039 (L0590-17C), dilution factor: 2 for Phosphorus (As P)
DEC-039 (L0590-17D), dilution factor: 5 for Chloride
DEC-022D (L0590-18C), dilution factor: 2 for Phosphorus (As P)
DEC-022D (L0590-18D), dilution factor: 5 for Chloride
DEC-009 (L0590-19C), dilution factor: 2 for Phosphorus (As P)
DEC-009 (L0590-19D), dilution factor: 5 for Chloride
DEC-030 (L0590-20C), dilution factor: 2 for Phosphorus (As P)
DEC-030 (L0590-20D), dilution factor: 5 for Chloride

F. Samples:

The Nitrate/Nitrite analyses were performed by Spectrum Analytical, Inc., featuring Hanibal Technology of Agawam, MA. The Spectrum Analytical Agawam report has been submitted following the Spectrum RI data report.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

SDG #: 46397

I. RECEIPT

No exceptions were encountered unless a Sample Receipt Exception or a communication form is included in the addendum with this package.

II. HOLDING TIMES

All samples were prepared and analyzed within the method-specific holding time.

III. METHODS

Analyses were performed according to EPA 353.2.

IV. PREPARATION

Aqueous samples were prepared according to General Preparation.

V. INSTRUMENTATION

The following equipment was used to analyze EPA 353.2:

Lachat2 details: Lachat Quikchem 8000

VI. ANALYSIS

A. Calibration:

All quality control samples were within the acceptance criteria.

B. Blanks:

All blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Samples (LCS):

All method criteria were met.

2. Matrix Spike / Matrix Spike Duplicate Samples (MS/MSD):

A matrix spike and a matrix spike duplicate were analyzed:

In batch 1207690 from source sample DEC-030D (SB46397-04).

In batch 1207793 from source sample DEC-088D (SB46397-12).

All method criteria were met.

3. Reference:

All method criteria were met.

D. Duplicates:

A duplicate was analyzed.

In batch 1207690 from source sample DEC-030D (SB46397-04).

In batch 1207793 from source sample DEC-088D (SB46397-12).

All method criteria were met.

E. Samples:

All method criteria were met with the following exceptions:

Nitrate/Nitrite as N in batch 1207690, samples DEC-006D (SB46397-05), DEC-030D (SB46397-04), DEC-046 (SB46397-07), DEC-046D (SB46397-06), DEC-066D (SB46397-03), DEC-06DD (SB46397-08), DEC-088 (SB46397-11), DEC-089 (SB46397-09), DEC-089D (SB46397-10): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

Nitrate/Nitrite as N in batch 1207690, samples DEC-032 (SB46397-01), DEC-066 (SB46397-02): The Reporting Limit has been raised to account for matrix interference.

Nitrate/Nitrite as N in batch 1207793, samples 20120327-FD-1 (SB46397-14), DEC-009 (SB46397-17), DEC-022D (SB46397-16), DEC-030 (SB46397-18), DEC-039 (SB46397-15), DEC-088D (SB46397-12): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

Nitrate/Nitrite as N in batch 1207793, sample DEC-091 (SB46397-13): The Reporting Limit has been raised to account for matrix interference.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0607

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V1
Instrument Type: GCMS-VOA
Description: HP5890 II / HP5972
Manufacturer: Hewlett-Packard
Model: 5890 / 5972
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624
capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-029D (L0607-14AMS) and DEC-029D (L0607-14AMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-029D (L0607-14AMS)Percent Recovery is outside QC Limits, recovery is above criteria for 1,4-Dioxane at 132% with criteria of (70-130).

DEC-029D (L0607-14AMSD)Percent Recovery is outside QC Limits, recovery is above criteria for 1,4-Dioxane at 135% with criteria of (70-130).

Replicate RPDs were within the advisory QC limits.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following samples were analyzed at dilution:

DEC-090 (L0607-04ADL) : Dilution Factor: 200
DEC-014R (L0607-06ADL) : Dilution Factor: 500
DEC-064 (L0607-08ADL) : Dilution Factor: 2
DEC-029 (L0607-15ADL) : Dilution Factor: 500
DEC-015D (L0607-18ADL) : Dilution Factor: 5

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0607

EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM 4500D S-

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: IC1

Instrument Type: IC

Description: DX-500

Manufacturer: Dionex

Model: DX-500

GC Column used: 0.25 m X 4 mm ID [μ m thickness] AS14A-7 capillary column.

Instrument Code: MANUAL

Instrument Type: WC

Instrument Code: SPEC2

Instrument Type: SP

Description: Spectronic 20 Genesys

Manufacturer: Spectronic Instruments

Model: 4004-000

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-029D (L0607-14DMS), DEC-029D (L0607-14DMSD) for Chloride and Sulfate.

Percent recoveries were within the QC limits with the following exceptions:

DEC-029DMS: recovery is below criteria for Chloride at 41% with criteria of (80-120) and Sulfate at 76% with criteria of (80-120).

DEC-029DMSD: recovery is below criteria for Chloride at 41% with criteria of (80-120).

Percent RPDs were within the QC limits.

Matrix spike was performed on samples: DEC-091D (L0607-01BMS) and DEC-029D (L0607-14BMS) for Sulfide, DEC-029D (L0607-14CMS) for Phosphorus and TKN and DEC-029D (L0607-14DMS) for Alkalinity.

Spike recovery was within the QC limits for all analyses.

D. Duplicate sample:

Duplicate analysis was performed on samples: DEC-091D (L0607-01BDUP) and DEC-029D (L0607-14BDUP) for Sulfide, DEC-029D (L0607-14CDUP) for Phosphorus and TKN and DEC-029D (L0607-14DDUP) for Alkalinity

Percent RPD was within the QC limits.

E. Dilutions:

The following samples were analyzed at dilution:

DEC-091D (L0607-01C), dilution factor: 2 for Phosphorus (As P)
DEC-091D (L0607-01D), dilution factor: 5 for Chloride
DEC-045 (L0607-02D), dilution factor: 5 for Chloride
DEC-045D (L0607-03D), dilution factor: 5 for Chloride and Sulfate
DEC-090 (L0607-04D), dilution factor: 5 for Chloride
DEC-090D (L0607-05D), dilution factor: 5 for Chloride
DEC-014R (L0607-06D), dilution factor: 10 for Chloride
DEC-014D (L0607-07D), dilution factor: 5 for Chloride
DEC-064 (L0607-08D), dilution factor: 10 for Chloride
DEC-064D (L0607-10D), dilution factor: 5 for Chloride
FD-03272012-2 (L0607-11C), dilution factor: 2 for Phosphorus (As P)
FD-03272012-2 (L0607-11D), dilution factor: 5 for Chloride
DEC-015 (L0607-13D), dilution factor: 10 for Chloride
DEC-029D (L0607-14CMS), dilution factor: 2 for Phosphorus (As P)
DEC-029D (L0607-14D), dilution factor: 5 for Chloride and Sulfate
DEC-029D (L0607-14DMS), dilution factor: 5 for Chloride and Sulfate

DEC-029D (L0607-14DMSD), dilution factor: 5 for Chloride and Sulfate

DEC-029 (L0607-15C), dilution factor: 2 for Phosphorus (As P)

DEC-029 (L0607-15D), dilution factor: 5 for Chloride

DEC-015R (L0607-16D), dilution factor: 10 for Chloride

DEC-015D (L0607-18D), dilution factor: 5 for Chloride

F. Samples:

The Nitrate/Nitrite analyses were performed by Spectrum Analytical, Inc., featuring Hanibal Technology of Agawam, MA. The Spectrum Analytical Agawam report has been submitted following the Spectrum RI data report.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

CASE NARRATIVE

Spectrum Analytical, Inc. Lab Reference No. SB46717

Client: Spectrum Analytical, Inc.-- RI Division

Project: See Chain of Custody / L0607

SDG #: 46717

I. RECEIPT

No exceptions were encountered unless a Sample Receipt Exception or a communication form is included in the addendum with this package.

II. HOLDING TIMES

All samples were prepared and analyzed within the method-specific holding time.

III. METHODS

Analyses were performed according to EPA 353.2.

IV. PREPARATION

Aqueous samples were prepared according to General Preparation.

V. INSTRUMENTATION

The following equipment was used to analyze EPA 353.2:

Lachat2 details: Lachat Quikchem 8000

VI. ANALYSIS

A. Calibration:

All quality control samples were within the acceptance criteria.

B. Blanks:

All blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Samples (LCS):

All method criteria were met.

2. Matrix Spike / Matrix Spike Duplicate Samples (MS/MSD):

A matrix spike and a matrix spike duplicate were analyzed:

In batch 1207909 from source sample DEC-029D (SB46717-12).

All method criteria were met.

3. Reference:

All method criteria were met.

D. Duplicates:

A duplicate was analyzed.

In batch 1207909 from source sample DEC-029D (SB46717-12).

All method criteria were met.

E. Samples:

All method criteria were met with the following exceptions:

Nitrate/Nitrite as N in batch 1207909, samples DEC-014D (SB46717-07), DEC-014R (SB46717-06), DEC-015 (SB46717-11), DEC-015D (SB46717-15), DEC-015R (SB46717-14), DEC-029 (SB46717-13), DEC-029D (SB46717-12), DEC-045 (SB46717-02), DEC-045D (SB46717-03), DEC-064 (SB46717-08), DEC-064D (SB46717-09), DEC-090 (SB46717-04), DEC-090D (SB46717-05), DEC-091D (SB46717-01), FD-03272012-2 (SB46717-10): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0639

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10
Instrument Type: GCMS-VOA
Description: HP7890A
Manufacturer: Agilent
Model: 7890A / 5975C
GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

Instrument Code: V6
Instrument Type: GCMS-VOA
Description: HP6890 / HP5973

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits with the following exceptions. Please note that most test procedures allow for several compounds outside of the QC limits for the LCS, although this may indicate a bias for this specific compound.

LCS-65759 in batch 65759, recovery is below criteria for iodomethane at 71% with criteria of (72-121).

LCS-65780 in batch 65780, recovery is above criteria for 1,4-Dioxane at 160% with criteria of (70-130).

LCSD-65759 in batch 65759, recovery is below criteria for Iodomethane at 71% with criteria of (72-121).

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following samples were analyzed at dilution:

DEC-008 (L0639-01A) : Dilution Factor: 20
DEC-065 (L0639-03A) : Dilution Factor: 2
DEC-065D (L0639-04A) : Dilution Factor: 5
DEC-044 (L0639-05A) : Dilution Factor: 10
DEC-044D (L0639-07ADL) : Dilution Factor: 4
20120401-FD-1 (L0639-09ADL) : Dilution Factor: 4
DEC-029TC (L0639-13ADL) : Dilution Factor: 100
20120331-FD-1 (L0639-14ADL) : Dilution Factor: 50
DEC-031 (L0639-16ADL) : Dilution Factor: 50

G. Samples:

Due to laboratory accident, both vials for sample DEC-031, collected on April 1, were lost. The sample was re-sampled and received by the laboratory on April 21.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

A handwritten signature in black ink, appearing to be 'J. H. P.' or similar, written in a cursive style.

- E - One or more target compounds are above the calibration range
- R - One or more spike compounds are outside of control limits
- T - Sample was injected outside of the 12 hour sequence
- * - Internal Standard or Surrogate outside of control limit
- D - Surrogates are diluted

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0639

**EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-**

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM 4500D S-

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: IC1

Instrument Type: IC

Description: DX-500

Manufacturer: Dionex

Model: DX-500

GC Column used: 0.25 m X 4 mm ID [um thickness] AS14A-7 capillary column.

Instrument Code: MANUAL

Instrument Type: WC

Instrument Code: SPEC2

Instrument Type: SP

Description: Spectronic 20 Genesys

Manufacturer: Spectronic Instruments

Model: 4004-000

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

D. Duplicate sample:

No client-requested laboratory duplicate analyses were included in this SDG.

E. Dilutions:

The following samples were analyzed at dilution:

DEC-008 (L0639-01D), dilution factor: 10 for Chloride
DEC-042 (L0639-02D), dilution factor: 10 for Chloride
DEC-065 (L0639-03D), dilution factor: 10 for Chloride
DEC-065D (L0639-04D), dilution factor: 10 for Chloride
DEC-027 (L0639-06D), dilution factor: 10 for Chloride
DEC-044D (L0639-07D), dilution factor: 5 for Chloride and Sulfate
DEC-031 (L0639-08D), dilution factor: 10 for Chloride
20120401-FD-1 (L0639-09D), dilution factor: 5 for Chloride and Sulfate
DEC-010 (L0639-11D), dilution factor: 5 for Chloride and Sulfate
DEC-004 (L0639-12D), dilution factor: 5 for Chloride and Sulfate
DEC-029TC (L0639-13D), dilution factor: 20 for Sulfate
DEC-029TC (L0639-13D), dilution factor: 60 for Chloride
20120331-FD-1 (L0639-14D), dilution factor: 20 for Sulfate
20120331-FD-1 (L0639-14D), dilution factor: 60 for Chloride
DEC-031D (L0639-15D), dilution factor: 5 for Chloride and Sulfate

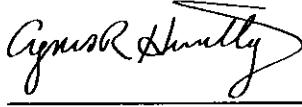

F. Samples:

The Nitrate/Nitrite analyses were performed by Spectrum Analytical, Inc., featuring Hanibal Technology of Agawam, MA. The Spectrum Analytical Agawam report has been submitted following the Spectrum RI data report.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as

verified by the following signature.

CASE NARRATIVE

Spectrum Analytical, Inc. Lab Reference No. SB46684

Client: Spectrum Analytical, Inc.-- RI Division

Project: See Chain of Custody / L0639

SDG #: 46684

I. RECEIPT

No exceptions were encountered unless a Sample Receipt Exception or a communication form is included in the addendum with this package.

II. HOLDING TIMES

All samples were prepared and analyzed within the method-specific holding time.

III. METHODS

Analyses were performed according to EPA 353.2.

IV. PREPARATION

Aqueous samples were prepared according to General Preparation.

V. INSTRUMENTATION

The following equipment was used to analyze EPA 353.2:

Lachat2 details: Lachat Quikchem 8000

VI. ANALYSIS

A. Calibration:

All quality control samples were within the acceptance criteria.

B. Blanks:

All blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Samples (LCS):

All method criteria were met.

2. Matrix Spike / Matrix Spike Duplicate Samples (MS/MSD):

A matrix spike and a matrix spike duplicate were analyzed:

In batch 1207793 from source sample DEC-008 (SB46684-01).

In batch 1207901 from source sample DEC-029TC (SB46684-12).

All method criteria were met.

3. Reference:

All method criteria were met.

D. Duplicates:

A duplicate was analyzed.

In batch 1207793 from source sample DEC-008 (SB46684-01).

In batch 1207901 from source sample DEC-029TC (SB46684-12).

All method criteria were met.

E. Samples:

All method criteria were met with the following exceptions:

Nitrate/Nitrite as N in batch 1207793, samples 20120401-FD-1 (SB46684-09), DEC-004 (SB46684-11), DEC-008 (SB46684-01), DEC-010 (SB46684-10), DEC-027 (SB46684-06), DEC-031 (SB46684-08), DEC-042 (SB46684-02), DEC-044D (SB46684-07), DEC-065 (SB46684-03), DEC-065D (SB46684-04): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

Nitrate/Nitrite as N in batch 1207793, sample DEC-044 (SB46684-05): The Reporting Limit has been raised to account for matrix interference.

Nitrate/Nitrite as N in batch 1207901, sample DEC-031D (SB46684-14): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

Nitrate/Nitrite as N in batch 1207901, samples 20120331-FD-1 (SB46684-13), DEC-029TC (SB46684-12): The Reporting Limit has been raised to account for matrix interference.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0621

SW846 8260C, VOC by GC-MS

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V10

Instrument Type: GCMS-VOA

Description: HP7890A

Manufacturer: Agilent

Model: 7890A / 5975C

GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples: DEC-031TC (L0621-08AMS) and DEC-031TC (L0621-08AMSD).

Percent recoveries were within the QC limits with the following exceptions:

DEC-031TC (L0621-08AMS) Percent Recovery is outside QC Limits, recovery is below criteria for 1,3,5-Trimethylbenzene at 72% with criteria of (75-130), 1,3-Dichlorobenzene at 71% with criteria of (75-125), 1,4-Dichlorobenzene at 69% with criteria of (75-125), 2-Chlorotoluene at 74% with criteria of (75-125), 4-Chlorotoluene at 75% with criteria of (75-130), Bromobenzene at 73% with criteria of

(75-125), Chlorobenzene at 76% with criteria of (80-120), Iodomethane at 69% with criteria of (72-121) and Xylene (Total) at 80% with criteria of (81-121).

DEC-031TC (L0621-08AMSD) Percent Recovery is outside QC Limits, recovery is below criteria for 1,4-Dichlorobenzene at 72% with criteria of (75-125), 2,2-Dichloropropane at 70% with criteria of (70-135) and Chlorobenzene at 78% with criteria of (80-120).

Replicate RPDs were within the advisory QC limits.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

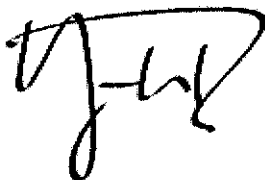

The following samples were analyzed at dilution:

DEC-007 (L0621-01ADL) : Dilution Factor: 10
DEC-007D (L0621-02ADL) : Dilution Factor: 2
DEC-012 (L0621-06ADL) : Dilution Factor: 2
DEC-013 (L0621-09A) : Dilution Factor: 20
DEC-028 (L0621-11A) : Dilution Factor: 5

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

REPORT NARRATIVE

Spectrum Analytical, Inc. Featuring Hanibal Technology, RI Division.

Client : URS Corporation

Project: Klink Cosmo Meeker

Laboratory Workorder / SDG #: L0621

**EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-**

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM
4500D S-

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: EPA 300.0, SM 2320B, SM 4500B5-E P, SM 4500B-C N Org, SM 4500D S-

V. INSTRUMENTATION

The following instrumentation was used to perform

Instrument Code: IC1

Instrument Type: IC

Description: DX-500

Manufacturer: Dionex

Model: DX-500

GC Column used: 0.25 m X 4 mm ID [μ m thickness] AS14A-7 capillary column.

Instrument Code: MANUAL

Instrument Type: WC

Instrument Code: SPEC2

Instrument Type: SP

Description: Spectronic 20 Genesys

Manufacturer: Spectronic Instruments

Model: 4004-000

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

Matrix spikes were performed on samples DEC-031TC (L0621-08DMS) and DEC-031TC (L0621-08DMSD) for Chloride and Sulfate.

Percent recoveries were within the QC limits with the following exceptions:

DEC-031TC (L0621-08DMS), recovery is below criteria for Chloride at 57% with criteria of (80-120).

DEC-031TC (L0621-08DMSD), recovery is below criteria for Chloride at 48% with criteria of (80-120).

Percent RPDs were within the QC limits.

Matrix spike was performed on samples: DEC-031TC (L0621-08BMS) for Sulfide, DEC-031TC (L0621-08CMS) for Phosphorus and TKN and DEC-031TC (L0621-08DMS) for Alkalinity.

Spike recovery was within the QC limits for all analyses.

D. Duplicate sample:

Duplicate analysis was performed on samples: DEC-031TC (L0621-08BDUP) for Sulfide, DEC-031TC (L0621-08CDUP) for Phosphorus and TKN and DEC-031TC (L0621-08DDUP) for Alkalinity.

Percent RPD was within the QC limits for all analyses.

E. Dilutions:

The following samples were analyzed at dilution:

DEC-007 (L0621-01D), dilution factor: 10 for Chloride
DEC-007D (L0621-02D), dilution factor: 10 for Chloride
DEC-048 (L0621-03D), dilution factor: 10 for Chloride
DEC-047 (L0621-04D), dilution factor: 10 for Chloride
20120329-FD-1 (L0621-05D), dilution factor: 10 for Chloride
DEC-012 (L0621-06D), dilution factor: 10 for Chloride
DEC-033 (L0621-07C), dilution factor: 2 for Phosphorus (As P)
DEC-033 (L0621-07D), dilution factor: 20 for Chloride
DEC-031TC (L0621-08CMS), dilution factor: 2 for Phosphorus (As P)
DEC-031TC (L0621-08D), dilution factor: 10 for Chloride
DEC-031TC (L0621-08DMS), dilution factor: 10 for Chloride
DEC-031TC (L0621-08DMSD), dilution factor: 10 for Chloride
DEC-013D (L0621-10D), dilution factor: 10 for Chloride
DEC-028 (L0621-11D), dilution factor: 10 for Chloride
DEC-028D (L0621-12D), dilution factor: 5 for Chloride and Sulfate

DEC-011 (L0621-13D), dilution factor: 10 for Chloride
20120330-FD-1 (L0621-15D), dilution factor: 5 for Chloride and
Sulfate

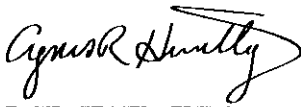

DEC-043 (L0621-16D), dilution factor: 5 for Chloride
DEC-043D (L0621-17D), dilution factor: 10 for Chloride

F. Samples:

The Nitrate/Nitrite analyses were performed by Spectrum Analytical, Inc., featuring Hanibal Technology of Agawam, MA. The Spectrum Analytical Agawam report has been submitted following the Spectrum RI data report.

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.

CASE NARRATIVE

Spectrum Analytical, Inc. Lab Reference No. SB46687

Client: Spectrum Analytical, Inc.-- RI Division

Project: See Chain of Custody / L0621

SDG #: 46687

I. RECEIPT

No exceptions were encountered unless a Sample Receipt Exception or a communication form is included in the addendum with this package.

II. HOLDING TIMES

All samples were prepared and analyzed within the method-specific holding time.

III. METHODS

Analyses were performed according to EPA 353.2.

IV. PREPARATION

Aqueous samples were prepared according to General Preparation.

V. INSTRUMENTATION

The following equipment was used to analyze EPA 353.2:

Lachat2 details: Lachat Quikchem 8000

VI. ANALYSIS

A. Calibration:

All quality control samples were within the acceptance criteria.

B. Blanks:

All blanks were within the acceptance criteria.

C. Spikes:

1. Laboratory Control Samples (LCS):

All method criteria were met.

2. Matrix Spike / Matrix Spike Duplicate Samples (MS/MSD):

A matrix spike and a matrix spike duplicate were analyzed:

In batch 1207901 from source sample DEC-031TC (SB46687-08).

In batch 1207909 from source sample DEC-043 (SB46687-16).

All method criteria were met.

3. Reference:

All method criteria were met.

D. Duplicates:

A duplicate was analyzed.

In batch 1207901 from source sample DEC-031TC (SB46687-08).

In batch 1207909 from source sample DEC-043 (SB46687-16).

All method criteria were met.

E. Samples:

All method criteria were met with the following exceptions:

Nitrate/Nitrite as N in batch 1207901, samples 20120329-FD-1 (SB46687-05), DEC-007 (SB46687-01), DEC-007D (SB46687-02), DEC-011 (SB46687-13), DEC-011D (SB46687-14), DEC-012 (SB46687-06), DEC-013 (SB46687-09), DEC-013D (SB46687-10), DEC-033 (SB46687-07), DEC-047 (SB46687-04), DEC-048 (SB46687-03): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

Nitrate/Nitrite as N in batch 1207901, samples 20120330-FD-1 (SB46687-15), DEC-028 (SB46687-11), DEC-028D (SB46687-12), DEC-031TC (SB46687-08): The Reporting Limit has been raised to account for matrix interference.

Nitrate/Nitrite as N in batch 1207909, samples DEC-043 (SB46687-16), DEC-043D (SB46687-17): Sample dilution required for high concentration of target analytes to be within the instrument calibration range.

Dear Mr. Trembath:

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to an Environmental Assessment for the Former Klink Cosmo Cleaners, Project # 1117 6359, site as indicated on the map you provided, located at 364 Richardson Street, Brooklyn, Kings County.

We have no records of rare or state-listed animals or plants, significant natural communities or other significant habitats, on or in the immediate vicinity of your site.

The absence of data does not necessarily mean that rare or state-listed species, natural communities or other significant habitats do not exist on or adjacent to the proposed site. Rather, our files currently do not contain information which indicates their presence. For most sites, comprehensive field surveys have not been conducted. We cannot provide a definitive statement on the presence or absence of all rare or state-listed species or significant natural communities. This information should not be substituted for on-site surveys that may be required for environmental assessment.

Our databases are continually growing as records are added and updated. If this proposed project is still under development one year from now, we recommend that you contact us again so that we may update this response with the most current information.

This response applies only to known occurrences of rare or state-listed animals and plants, significant natural communities and other significant habitats maintained in the Natural Heritage Data bases. Your project may require additional review or permits; for information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the appropriate NYS DEC Regional Office, Division of Environmental Permits, as listed at www.dec.ny.gov/about/39381.html.

Sincerely,

Tara Salerno *sp*
