**RE: CAMP Report #56 (December 9 through December 22, 2024)
Interim Corrective Measure, Astoria East Yard, Astoria, New York
(NYSDEC Permit No. 2-6301-00006/00002-0)
NYSDEC Site Number: 241012, EPA ID #: NYD980593636**

Dear Ms. Sobol:

This biweekly Community Air Monitoring Program (CAMP) report has been prepared on behalf of Consolidated Edison of New York, Inc. (Con Edison) for the Interim Corrective Measure (ICM) activities being conducted at the Astoria East Transformer Yard (the Site) located in Con Edison’s Astoria Facility in Queens, New York, under the NYSDEC-approved 2014 ICM Plan and USEPA-approved 2022 Final PCB Self-Implementing Cleanup Plan (SICP). All CAMP monitoring activities are performed by JMG Engineering (JMG), a subcontractor to Con Edison’s contractor (D’Onofrio General Contracting Corporation [DGCC]) and/or DGCC personnel. A summary of daily CAMP monitoring is presented below.

Date	Maximum 15-min Average			Daily Average			Action Level Exceedances ¹
	PM10 (µg/m ³)		VOCs (ppm)	PM10 (µg/m ³)		VOCs (ppm)	
	Upwind	Downwind		Upwind	Downwind		
Monday, December 9, 2024	15.26	19.08	0	6.94	9.46	0	None
Tuesday, December 10, 2024	No intrusive work conducted.						
Wednesday, December 11, 2024	No intrusive work conducted.						
Thursday, December 12, 2024	5.13	8.65	0	2.68	4.06	0	None
Friday, December 13, 2024	11.85	5.09	0	3.51	3.08	0	None
Saturday, December 14, 2024	No intrusive work conducted.						
Monday, December 16, 2024	12.34	57.20	3.5	3.66	13.58	2	None
Tuesday, December 17, 2024	See note below.						
Wednesday, December 18, 2024	See note below.						
Thursday, December 19, 2024	4.21	5.57	0	1.41	2.81	0	None
Friday, December 20, 2024	15.03	4.42	0.1	2.37	2.67	0	None
Saturday, December 21, 2024	No intrusive work conducted.						

¹ PM10: >100 µg/m³ above background (implement dust suppression) and >130 µg/m³ above background (stop work and evaluate);
VOCs: >5ppm above background (pause work and monitor), 5-25ppm above background (stop work and evaluate), >25ppm (stop work until authorized)

On December 17 and 18, 2024, the CAMP equipment was malfunctioning, and CAMP monitoring resumed on December 19, 2024. As a result, there is no monitoring data available for these two days. Load out of excavated soils directly from PCB Excavation Areas into trucks was conducted on both days. However, due to precipitation on December 15 and 16, 2024 (0.50 inches and 0.68 inches, respectively), the soils were damp which limited the potential for dust generation during loading of soil into trucks. No visible dust was observed on either day and there have been no elevated air monitoring readings during work in the current portion of the project (Phase 3). Additional periodic inspections of the CAMP equipment

are being performed to ensure the equipment is functioning correctly and air monitoring data are being collected during intrusive activities.

If you have any questions or need additional information, please call me at (443)798-8321.

Sincerely,

A handwritten signature in black ink that reads "Jessica Bennett". The signature is written in a cursive style with a long horizontal stroke at the end.
