### State Superfund Site Reclassification Notice Class 02 to Class 04

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reason(s):

Remediation at the site and at affected off-site areas is complete. Remaining contamination is being addressed through compliance with a Department-approved Site Management Plan. An environmental easement has been placed on the site to restrict the use of the site and the groundwater beneath the site. The Site Management Plan includes a soil management plan to address potential exposures during intrusive activity at the site, as well as an operation and maintenance plan to maintain the effectiveness of the remedy. Additionally, the Department will periodically certify that the remedy remains in place and protective of human health and the environment. A significant threat to public health and the environment no longer exists at the site. The site is properly remediated and requires site management, therefore, it qualifies for Class 4 status on the Registry of Inactive Hazardous Waste Disposal Sites.

**If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.**
