Charlie,

To follow up our telephone discussion of last week, we will be collecting (1) additional soil vapor sample that was recently requested by the NYSDOH at hardware store garage located at 1250 Brunswick Avenue, Far Rockaway, NY. Attached is a map showing the approximate location of the proposed sample. The soil vapor sampling is tentatively scheduled for June 9 and 10, 2010.

Prior to soil vapor point advancement, the area will be cleared of vegetation followed by geophysical clearance of the area to ensure no underground utilities are present. Once the area is cleared, a soil vapor sampling point will be installed using a hand-held rotary hammer and 1-inch tooling. The vapor point will be advanced to about 4 feet below grade, consistent with other vapor points at the site. After installation, the point will be purged to prepare for sampling. The actual sample will be collected on the following day over an 8-hour period using methods outlined in the approved work plan for the site.

We have confirmed sampling with the property owner and they are on-board with the schedule presented above.

Please advise if you approve this approach and schedule. We look forward to completing the remedial investigation and moving things forward at the site. We expect to issue the soil vapor results via email to you and the NYSDOH by July 15, 2010.

Tom
