APPENDIX D

Laboratory Data Packages - Soil Vapor

AN ENVIRONMENTAL ANALYTICAL LABORATORY

Air Toxics Ltd. Introduces the Electronic Report

Thank you for choosing Air Toxics Ltd. To better serve our customers, we are providing your report by e-mail. This document is provided in Portable Document Format which can be viewed with Acrobat Reader by Adobe.

This electronic report includes the following:

- Work order Summary;
- Laboratory Narrative;
- Results; and
- Chain of Custody (copy).

180 BLUE RAVINE ROAD, SUITE B FOLSOM, CA - 95630

(916) 985-1000 .FAX (916) 985-1020

LABORATORY NARRATIVE
Modified TO-15
TRC Environmental Corporation
Workorder# 0611215

Thirteen 6 Liter Summa Canister samples were received on November 09, 2006. The laboratory performed analysis via modified EPA Method TO-15 using GC/MS in the full scan mode. The method involves concentrating up to 0.2 liters of air. The concentrated aliquot is then flash vaporized and swept through a water management system to remove water vapor. Following dehumidification, the sample passes directly into the GC/MS for analysis.

Method modifications taken to run these samples are summarized in the below table. Specific project requirements may over-ride the ATL modifications.

Requirement	***TO-15***	***ATL Modifications***
Daily CCV	+- 30% Difference	</= 30% Difference with two allowed out up to </=40%.; flag and narrate outliers
Sample collection media	Summa canister	ATL recommends use of summa canisters to insure data defensibility, but will report results from Tedlar bags at client request
Method Detection Limit	Follow 40CFR Pt.136 App. B	The MDL met all relevant requirements in Method TO-15 (statistical MDL less than the LOQ). The concentration of the spiked replicate may have exceeded 10X the calculated MDL in some cases

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

The reported CCV for each daily batch may be derived from more than one analytical file due to the client's request for non-standard compounds.

Non-standard compounds may have different acceptance criteria than the standard TO-14A/TO-15 compound list as per contract or verbal agreement.

Dilution was performed on sample TRC-SG-9 due to the presence of high level non-target species.

Definition of Data Qualifying Flags

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.
U - Compound analyzed for but not detected above the reporting limit.
UJ- Non-detected compound associated with low bias in the CCV
N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:
a-File was requantified
b-File was quantified by a second column and detector
r1-File was requantified for the purpose of reissue

Air Toxics Ltd. Introduces the Electronic Report

Thank you for choosing Air Toxics Ltd. To better serve our customers, we are providing your report by e-mail. This document is provided in Portable Document Format which can be viewed with Acrobat Reader by Adobe.

This electronic report includes the following:

- Work order Summary;
- Laboratory Narrative;
- Results; and
- Chain of Custody (copy).

180 BLUE RAVINE ROAD, SUITE B FOLSOM, CA - 95630

LABORATORY NARRATIVE
Modified TO-15
TRC Environmental Corporation
Workorder# 0810082

Eight 6 Liter Summa Canister samples were received on October 03, 2008. The laboratory performed analysis via modified EPA Method TO-15 using GC/MS in the full scan mode. The method involves concentrating up to 0.2 liters of air. The concentrated aliquot is then flash vaporized and swept through a water management system to remove water vapor. Following dehumidification, the sample passes directly into the GC/MS for analysis.

This workorder was independently validated prior to submittal using 'USEPA National Functional Guidelines' as generally applied to the analysis of volatile organic compounds in air. A rules-based, logic driven, independent validation engine was employed to assess completeness, evaluate pass/fail of relevant project quality control requirements and verification of all quantified amounts.

Method modifications taken to run these samples are summarized in the table below. Specific project requirements may over-ride the ATL modifications.

Requirement	***TO-15***	***ATL Modifications***
Daily CCV	</= 30% Difference	</= 30% Difference; Compounds exceeding this criterion and associated data are flagged and narrated.
Sample collection media	Summa canister	ATL recommends use of summa canisters to insure data defensibility, but will report results from Tedlar bags at client request
Method Detection Limit	Follow 40CFR Pt.136 App. B	The MDL met all relevant requirements in Method TO-15 (statistical MDL less than the LOQ). The concentration of the spiked replicate may have exceeded 10X the calculated MDL in some cases

Receiving Notes

Sample collection date was incomplete on the Chain of Custody (COC) for all samples. The sampling date was taken from the tags.

Analytical Notes

The reported CCV for each daily batch may be derived from more than one analytical file due to the client's request for non-standard compounds.

Non-standard compounds may have different acceptance criteria than the standard TO-14A/TO-15 compound list as per contract or verbal agreement.

As per project specific client request the laboratory has reported estimated values for target compound hits that are below the Reporting Limit but greater than the Method Detection Limit. Concentrations that are

below the level at which the canister was certified (0.2 ppbv for compounds reported at 0.5 ppbv and 0.8 ppbv for compounds reported at 2.0 ppbv) may be false positives.

Dilution was performed on sample SG-18 due to the presence of high level non-target species.

Definition of Data Qualifying Flags

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Air Toxics Ltd. Introduces the Electronic Report

Thank you for choosing Air Toxics Ltd. To better serve our customers, we are providing your report by e-mail. This document is provided in Portable Document Format which can be viewed with Acrobat Reader by Adobe.

This electronic report includes the following:

- Work order Summary;
- Laboratory Narrative;
- Results; and
- Chain of Custody (copy).

LABORATORY NARRATIVE
Modified TO-15
TRC Environmental Corporation
Workorder# 0810062

Four 6 Liter Summa Canister samples were received on October 02, 2008. The laboratory performed analysis via modified EPA Method TO-15 using GC/MS in the full scan mode. The method involves concentrating up to 0.2 liters of air. The concentrated aliquot is then flash vaporized and swept through a water management system to remove water vapor. Following dehumidification, the sample passes directly into the GC/MS for analysis.

This workorder was independently validated prior to submittal using 'USEPA National Functional Guidelines' as generally applied to the analysis of volatile organic compounds in air. A rules-based, logic driven, independent validation engine was employed to assess completeness, evaluate pass/fail of relevant project quality control requirements and verification of all quantified amounts.

Method modifications taken to run these samples are summarized in the table below. Specific project requirements may over-ride the ATL modifications.

Requirement	***TO-15***	***ATL Modifications***
Daily CCV	</= 30% Difference	</= 30% Difference; Compounds exceeding this criterion and associated data are flagged and narrated.
Sample collection media	Summa canister	ATL recommends use of summa canisters to insure data defensibility, but will report results from Tedlar bags at client request
Method Detection Limit	Follow 40CFR Pt.136 App. B	The MDL met all relevant requirements in Method TO-15 (statistical MDL less than the LOQ). The concentration of the spiked replicate may have exceeded 10X the calculated MDL in some cases

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

The reported CCV for each daily batch may be derived from more than one analytical file due to the client's request for non-standard compounds.

Non-standard compounds may have different acceptance criteria than the standard TO-14A/TO-15 compound list as per contract or verbal agreement.

All Quality Control Limit failures and affected sample results are noted by flags. Each flag is defined at the bottom of this Case Narrative and on each Sample Result Summary page. Target compound non-detects in the samples that are associated with high bias in QC analyses have not been flagged.

As per project specific client request the laboratory has reported estimated values for target compound hits that are below the Reporting Limit but greater than the Method Detection Limit. Concentrations that are below the level at which the canister was certified (0.2 ppbv for compounds reported at 0.5 ppbv and 0.8 ppbv for compounds reported at 2.0 ppbv) may be false positives.

The daily Laboratory Control Spike (LCS) analyzed on 10-14-2008 did not meet laboratory/project acceptance criteria for Methyl tert-butyl ether. Recovery for this compound was high, and no hits for this compound were detected in the associated samples. There is no impact on data quality.

Definition of Data Qualifying Flags

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction no performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Air Toxics Ltd. Introduces the Electronic Report

Thank you for choosing Air Toxics Ltd. To better serve our customers, we are providing your report by e-mail. This document is provided in Portable Document Format which can be viewed with Acrobat Reader by Adobe.

This electronic report includes the following:

- Work order Summary;
- Laboratory Narrative;
- Results; and
- Chain of Custody (copy).

180 BLUE RAVINE ROAD, SUITE B FOLSOM, CA - 95630

LABORATORY NARRATIVE
Modified TO-15
TRC Environmental Corporation
Workorder# 0611552

One 6 Liter Summa Canister sample was received on November 27, 2006. The laboratory performed analysis via modified EPA Method TO-15 using GC/MS in the full scan mode. The method involves concentrating up to 0.2 liters of air. The concentrated aliquot is then flash vaporized and swept through a water management system to remove water vapor. Following dehumidification, the sample passes directly into the GC/MS for analysis.

Method modifications taken to run these samples are summarized in the below table. Specific project requirements may over-ride the ATL modifications.

Requirement	***TO-15***	***ATL Modifications***
Daily CCV	+- 30% Difference	</= 30% Difference with two allowed out up to </=40%.; flag and narrate outliers
Sample collection media	Summa canister	ATL recommends use of summa canisters to insure data defensibility, but will report results from Tedlar bags at client request
Method Detection Limit	Follow 40CFR Pt.136 App. B	The MDL met all relevant requirements in Method TO-15 (statistical MDL less than the LOQ). The concentration of the spiked replicate may have exceeded 10X the calculated MDL in some cases

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

As per project specific client request, the laboratory has reported estimated values for target compounds that are detected below the Reporting Limit but greater than the Method Detection Limit. Concentrations below the level at which the canister was certified (at the Reporting Limit) may be false positives.

The reported CCV for each daily batch may be derived from more than one analytical file due to the client's request for non-standard compounds.

Non-standard compounds may have different acceptance criteria than the standard TO-14A/TO-15 compound list as per contract or verbal agreement.

The recovery of surrogate 1,2-Dichloroethane-d4 in sample TRC-SG-14 was outside control limits due to high level hydrocarbon matrix interference. Data is reported as qualified.

Definition of Data Qualifying Flags

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction no

performed).

J - Estimated value.
E - Exceeds instrument calibration range.
S - Saturated peak.
Q - Exceeds quality control limits.
U - Compound analyzed for but not detected above the reporting limit.
UJ- Non-detected compound associated with low bias in the CCV
N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified
b-File was quantified by a second column and detector
r1-File was requantified for the purpose of reissue

The EDR FieldCheck®System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). TRC ENVIRONMENTAL CONSULTANTS used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by TRC ENVIRONMENTAL CONSULTANTS. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the RCRA-LQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 3 RCRA-LQG sites within approximately 0.5 miles of the target property.

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the ERNS list, as provided by EDR, and dated 12/31/2006 has revealed that there is 1 ERNS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the SSTS list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 SSTS site within approximately 0.5 miles of the target property.

BURRAGE GLUE CO	91-20 130TH STREET	1/4 - 1/2 ENE	AG131	402

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1 HIST FTTS site within approximately 0.5 miles of the target property.

ALLIED ADHESIVES, INC	***91-20 130TH ST***	***1/4 - 1/2 ENE***	***AG133***	***407***

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the ICIS list, as provided by EDR, and dated 07/27/2007 has revealed that there are 2 ICIS sites within approximately 0.5 miles of the target property.

RAYMAC CABINET COMPANY	87-49 130TH ST	1/4 - 1/2 NNE	AY237	776

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the FINDS list, as provided by EDR, and dated 07/19/2007 has revealed that there are 62 FINDS sites within approximately 0.5 miles of the target property.

STATE AND LOCAL RECORDS

HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 HSWDS site within approximately 0.5 miles of the target property.

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the LTANKS list, as provided by EDR, and dated 10/02/2007 has revealed that there are 17 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 11 HIST LTANKS sites within approximately 0.5 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 6 CBS AST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

SPILLS: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the NY Spills list, as provided by EDR, and dated 10/02/2007 has revealed that there are 96 NY Spills sites within approximately 0.5 miles of the target property.

HIST SPILLS: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 73 NY Hist Spills sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the VCP list, as provided by EDR, and dated 08/15/2007 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

RES DECL: A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the RES DECL list, as provided by EDR, and dated 12/31/1992 has revealed that there is 1 RES DECL site within approximately 0.18 miles of the target property.

Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Start CallerRemark - 0003003 SPILL REMAINS UNDER INVESTIGATION AT THIS TIME DUE TO VARIOUS REASONS THAT COULD BE RESPONSIBLE FOR SOIL CONTAMINATION-SAMPLES HAVE BEEN TAKEN. END CallerRemark - 0003003
Remarks:	Start DECRemark - 0003003 Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIPPLE" 4/23/03 TIPPLE CAKKED MR.KELLY AT DEP FOR SAMPLE RESLTS IN ORDER TO CONTINUE PROJECT. 4/12/04 tipple wrote a letter to Andrew Kelly DEP requesting analyticals be forwarded to DEC 2/17/06 - Faxed written request for closure report to DEP. 2/27/06 - Received DEP's Response Report which indicated no DEP violations pertaining to discharges of petroleum to sewer, although DEP observed gasoline rinse water being discharged to ground surface by H & W Machinery employee. Samples of soil (25 ft depth) and rinse water collected in June 2000 during sewer construction project had gasoline odor - no analytical tests performed. Discharge to ground was less than 25 gallons and was reported over 5 years ago. Close spill (Hausamann). END DECRemark - 0003003

Other Pertinent Environmental Activity Identified at Site

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Start DECRemark - 0402275 10/28/05: Recieved and reviewed Site Asssessment Report from GE for spill #0402275. Heating oil tank removed along with 12 tons of contaminated soil. 3 of 9 End-point samples found traces of several SVOCs at 5-8 feet deep.No VOCs or PAHs present. No GW or visible contamination present. J.Kolleeny spoke with Bill Yulinsky from NYSDEP - GW depth roughly 40 feet deep which poses no risk of the contamination reaching water table. Site deemed stable, NFA letter sent andsite is to be closed. - S.Kraszewski END DECRemark - 0402275

DEC Memo: Start CallerRemark - 0405142 Caller states that their neighbor adjeacent to their property has a hose coming through their fence dumping the above material through a hose. Caller is requesting an enforcement agent END CallerRemark - 0405142
Remarks: Start DECRemark - 0405142 Prior to Sept, 2004 data translation this spill Lead DEC Field was "SANGESLAND" 8/10/2004 Sangesland spoke with Michael Mitts of NYC DEP (cell # 917-496-6597). He manages a DEP "Well House" which is on a fenced off pieceof land. Next to this DEP property is an Adhesive Company: Allied Adhesive-Burage Glue Division - 91-20 130th St, Queens There is a garden hose coming out the back of the Adhesive Company through the chain link fence and onto the DEP property. In front of this hose is a 2' diameter circle of black residue and out about 6' to 8' is dead grass. The spill report was brought over to the DLE to have an ECO Officer investigate. 3/6/2006 No additional complaints have been made to theDEC - ECO do not have a record of the complaint. Spill Closed END DECRemark - 0405142

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:	10/12/2001 -Underground Petroleum Storage Tank Closure Roport was received 09/20/2001. Report was prepared by Yellowstone Industries Incorporated,who removed the Four(4) 550 Gallon Gosoline Tanks on 1/9/1998. Yellowstone notified the NYSDEC and removed the tanks according to SPOTS MEMO # 14. Laboratory results were submitted to indicate that adequate site assessment was performed. Ed 10/12/0107/24/2000: Tank closure report was received on Mar. 17, 2000 from "Yellowstone", saying that four(4)550 USTs were removed. PYH

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start CallerRemark - 0512407 COMING OFF 72 HOURS, DUE TO NOT BEING ABLE TO TAKE OUT FEEDER: NO TO 5 QUESTIONS; CONED # 162680 END CallerRemark - 0512407
Remarks: Start DECRemark - 0512407 06/14/06 - See e-docs for Con Ed report detailing cleanup and closure. 162680. 1/23/06 - 1900hrs - Philip Stanford #19971, Mech A, Env. Ops reports while on location to flush structure for #9 reports he found 1/2 gallon unknown oil on 20 gallons water in VS6927. The oil appeared while he was flushing the structure with vactor 60605. Unsure if vactor has been contaminated so will quarantine same in College Point Yard. No fire/smokeinvolved. No sewers or waterways affected. No private property affected. Sample taken marked E priority - 72 hr program - tested for pcb and oil id. Chain of custody # DD19207. No parking restrictions posted. Env. stop tag # 46041 placed. #9 has left location and #9 Genl has requested Networks to go to location to check oil level and pressure test unit. J. Dekanchuk OS on location and will be taking sample to ChemLab. Clean up pending test results. cn#19661 Update - 1/23/06 1915hrs. Historical records indicate pcb to be 10 ppm dated 7/95 for VS6927 cn#19661 Update - 2120hrs - 1/23/06. Perronio, BQE, reports checked oil level and found to be 25 - good. Pressure tested unit - failed pressure test. Cannot determine where the air leak is at this time. There is asphalt on the top of unit. Will request meet with Env. Ops and SSC for am. cn#19661 24-JAN-2006 0425HRS. Results of Analysis MATRIX: OIL GRAB TOTAL PCB 5 ppm BORCHERDINGC Tuesday, January 24, 2006 1:26 AM.Lab Sequence Number: 06-00806-001 Analysis indicates the presence of a transformer oil. UPDATE 24-JAN-2006 09:35 HRS. AS PER A CONVERSATION BET: CONTROL CENTER R.QUIJIJE & BQE K. VAVALLO @ 09:20. VAVALLO UPDATES THAT THE LEVEL IS 25 GOOD, NO ADDITIONAL OIL FOUND AT THIS TIME. C.HOGAN 07511 Update 1/25/06 12:09. Shift Manager M.Sorentino reports feeder 9B06 is coming off on emergence tonight. Equipment group is scheduled to change Transformer on outage in the AM.(1/26) Job will remain on clock at this time. DH 1/26/05 0810HRS DUE TO SYSTEM CONDITION 9B06 WILL NOT BE TAKEN OFF .INCIDENT WILL BE TAKEN OFF 72HR DEC PROGRAM. G DONATONE END DECRemark - 0512407

Remarks:	Start DECRemark - 0305131 Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIPPLE" No contact provided to confirm problem 12/19/05 Feroze. Spill is transferred from Ketani to Feroze. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 03/16/06-Hiralkumar Patel. from Reverse PHone Directory, following information got based on address: Aberdeen Recycling 91-01 130th St Richmond Hill, NY 11418 (718) 849-2981 Tried this number, but no body replied. no voice mail system set up. 05/25/06-Hiralkumar Patel. Visited site on 05/23/06. site is receiving different ferrous material for recycling but not cars. found concrete in good condition around site except one corner, which has piles of junk. pile contains cut fuel oil tanks also. spoke with Harry Singh, operator of facility. they receive tanks after it is empty and open. they don't receive any material which might have any product in it. in the pile area, there was a crane and around this crane found soil soaked with oil and some oil mixed with water. and this is the only area where i found oil and odor. Mr. Singh is not sure about whether there is a concrete floor under the crane or not. haven't seen any drain in remaining part of site.not sure about soil condition and drain under the pile area. there is residential building next to property. Mr. Singh gave me copy of letter from Henry Traktman from Metropolitan Heat & Power Co., Inc., who had abondoned fuel oil tank at site.abstract of letter: - 550 gal UST system at site has been legally abandoned and the piping removed. - all contents of the storage system were removed and the system rendered free of flammable or combustible vapors - all waste removed from the storage system has been disposed of in accordance with applicable city, state and federal requirements. - buried tank has been removed and all connecting lines have been removed. this letter was sent to NYC Fire Dept. on Feb. 13, 2004. and Henry Traktman has sent it. Henry Traktman Ph. (718) 941-7600 FAX (718) 941-7606 Mr. Singh gave me owner's information. Ween Tung Aberdeen Recycling 9101 130th Street Richmond Hill, NY 11418 Ph. (718) 849-3393 (O) (718) 366-4017 (H) FAX (718) 849-2981 Spoke with Mr. Tung. he asked me to send letter at site address. Spoke with operator at Metropoliton. she

S&S SPECALITY CORP (Continued) **S106017114**

will call back with information. CSL sent out to owner. faxed to owner. 05/26/06-Hiralkumar Patel. Received callfrom Frank Cece from Aberdeen Recycling, who is working there. he asked to send list of contractors who can do required work. faxed list of contractors to Mr. Cece. 05/30/06-Hiralkumar Patel. Received message from Alissa (718-941-7600). they haveremoved tank from location. left message for Alisa. Received call from Alisa. they hadn't found any contamination in any part of tank system what they removed it. 06/02/06-Hiralkumar Patel. REceived message from Doug from Trade winds. Left message for Doug. Doug Trade Winds Environmental Restoration Incorporated 100 Sweeneydale Ave Bay Shore, NY 11706-2211 PH.: (631) 435-8900 (O) (516) 779-7822 (C) 06/16/06-Hiralkumar Patel. Received message from Frank (Ph.: 718-849-8183, Cell: 347-992-3809) asking what kind of work needs to be done to solve this problem. spoke to Frank. he is in process of hiring contractor. asked him to remove all contaminated soil and to take end point samples. 06/28/06-Hiralkumar Patel. Receivedmessage from Frank. he is in process of hiring Harbor Environemtnal Corp. Frank or someone from Harbor will call once they sign contract. 07/28/06-Hiralkumar Patel. received message from Frank. he will start cleanup next week. 08/29/06-HiralkumarPatel. spoke with Frank. he hasn't start any cleanup yet as he need to move some stuff out to get access for cleanup. he is done that and once he gets container in, he will start working. asked Frank to call in next monday sep. 4, 2006 for updates. 09/08/06-Hiralkumar Patel. received message from Frank. spoke with Frank and asked to finish work by end of this month. 09/21/06-Hiralkumar Patel. received call from Kem Walsh (516-876-7940 x 361) from Miller Environmental. they are going to remove contaminated soil probably next week. Kem will take endpoint samples and will send final report. 11/10/06-Hiralkumar Patel. spoke with Adam at Miller. Mr. Walsh is out of country for three weeks on business. as per Adam, they took soil sampleand waiting to get paid for work they have done before doing any soil excavation. Adam has received soil analyticals and will fax to the Department. spoke with Frank at site. as per him, they are waiting for Miller to start work based on soil analyticals. asked Frank to call Miller environment. received fax from Miller containing sample analytical for one soil sample. limit
Benzo(a)Anthracene------1,100-----224 Benzo(a)Pyrene----------1,000------61
Benzo(b)Fluoranthene------930-----220 Benzo(k)Fluoranthene------730-----220
Chrysene----------1,000-----400 11/13/06-Hiralkumar Patel. received message from Frank. as per him, Miller will start soil removal on 11/14/06. 11/16/06-HiralkumarPatel. spoke with Adam at Miller. they are not doing any soil excavation, instead they are only providing containers for soil disposal. owner is doing excavation by himself. Miller will take endpoint samples at the end of work. spoke with Frank at facility, he has dug out about 2 ft of soil and found clean dirt at bottom. as per Frank, person from Miller is monitoring soil removal activity. 12/01/06-Hiralkumar Patel. spoke with Frank. Miller took sample yesterday and will send report soon. 12/05/06-Hiralkumar Patel. received call from Frank. he got word from Miller that soil sample came back clean. Frank asked should he backfill the excavation. told Frank that its his choice if he wants to backfill based on word from Miller, but theDepartment will keep this case open until it received closure report and shows everything clean. 12/06/06-Hiralkumar Patel. received message from Adam (516-876-7940 Ext. 312) from Miller asking email address to send report. spoke with Adam and gave him my email address. received report in email from Adam (alibuser@millerenv.com). abstract: - 95.9 tons of soil has been removed from site - excavation dimension was 20 ft * 20 ft * 9 ft - took 5 soil endpoint samples no contamination found in any samples. based on available documents, case closed. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Remarks:	Start DECRemark - 9809127 Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROMMEL" 4/12/04-Vought-Spill transferred from Mulqueen to Rommel as per Rommel. Transferred to Rutland During Spill Reduction Initiative. 11/02/06 Reassigned from Rutland to Sun. (JS/MS) 1/25/07 Sun/Sellberg sent letter certified mail to Mr. Stephen M. Halperin (Louhal

PETROL GAS STATION-CLOSED (Continued) **S103573276**

Properties Inc), 1144 Atlantic Avenue, on 1/25/07 requiring that the following be submitted to the NYSDEC by 2/26/07: 1.Tank closure assessment report. 2. Locations of tank and/or line test failure. 3. Subsurface investigation report, including current and historical soil and groundwater analysis. 4. Surrounding property sketch: A surrounding property sketch including property layout and usage must be submitted to NYSDEC. North arrow and scale must also be included on the site plan. If no tank closure report was prepared or no subsurface investigation was conducted before, the Department requires the following be performed and submitted: 1. Submission of a Tank Closure & Site Assessment Including Soil and Groundwater Investigation Results. (JS/MS) 3/12/07: Bill Schlagder of Preferred Environmental called and left a message. He has been retainedby RP regarding this spill. Returned call (516.357.8200) and left voice message on 3/12/07. (JS/MS) 3/15/07: Bill (cell: 917.715.0752) is compiling previous site activities and will submit work details to Berninger Environmental Inc., who will then submit SIWP to the DEC by March 30th 2007. (JS/MS) 4/2/07: Received and approved SIWP which includes: installation of 3 piesometers (GW flow), 12 borings around tank farm, 2 around pump islands, 2 around former fill ports. Approx 5 borings will be converted to temporary wells to get groundwater sample. SIR is due 5/8/07. (JS/MS) END DECRemark - 9809127

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

COLONY CLEANERS (Continued) **1004755614**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Resource Affected: Soil
Oxygenate: False
DEC Memo: Start CallerRemark - 0204274 service tech found a leaking line and shut off same and will repair tomorrow. END CallerRemark - 0204274
Remarks: Start DECRemark - 0204274 Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT" 9/22/2003-Vought-Site Investigation Report-12/9/02-Environmental Compliance and Control, Inc.-Thomas Rakin, Lisa Voyce, -973-627-1995. Boring to depth of 42' was completed outside residence to investigate depth to groundwater. Soil was screened by PID. No groundwater or contamination was encountered. Three soil borings were performed inside basement. Fuel oil impacted soil was detected inB1 (adjacent to former leak in line). Fuel oil line was replaced and now runs above ground. "Slight olfactory evidence was detected tin the depth interval from .5' to 2.6' where refusal was encountered. Refusal was penetrated and sample was obtained at 12.5' and sample analyticals showed no TAGM exceedances. Spill closed by Vought as per Rommel. END DECRemark - 0204274

Other Pertinent Environmental Activity Identified at Site

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start CallerRemark - 0407710 VERY STRONG ODOR AT THI SITE: CALLER WANTS TO MAKE SURE THEY ARE DOING IT THE RIGHT WAY: CALLER SAYS THE ODOR IS STRONG: END CallerRemark - 0407710

Remarks: Start DECRemark - 0407710 Gas station was traced back to: Hel-Man Body Shop Inc. (Former Gas Station) 119-24 Jamaica Ave. Richmond Hill, NY 11418 PBS 2-454257 Spill # 0306780 PBS shows that all 6 - 550 gal tanks were removed in 1995. Spill # 0306780 showed a tank test failure on a heating oil tank (not listed on PBS) Now apparently there is construction on the site.
****

Property search shows that the property was sold on 10/13/2004 to: Safeguard Properties III LLC (Safeguard Self Storage Units) Contact: David Ray 225-768-8424 (based in New Orleans) 10/20/04-Vought-This spill closed and referred to open spill #0306780 at same location END DECRemark - 0407710

DEC Memo: Start DECRemark - 0306780 Prior to Sept, 2004 data translation this spill Lead DEC Field was "DEMEO" From NYC Real Estate Database, Owner is: Val Golden, 2686 Ocean Ave, Brooklyn, NY 11229-4665 Cont. Soil Ltr sent to owner 10/19/2004 New spill report came in on this site # 0407710 Since this is a former gas station site, this spill is transferred DeMeo to Rommel 10/19/04-Vought-Spill transferred from Rommel to Vought as per Rommel. Site visit by Vought due to odor complaint. According to postings site will become a Safeguard Self Storage AC covered loading area and phone number is 718-849-9600. Site also listed demolition contractor as 516-889-4714. Two DOB permits also posted. No personel onsite. One excavator onsite adjacent to soil pit and stockpiled soil covered with plastic sheeting. Contaminated soil (weathered gasoline odor) noted in bottom of excavation (approximate depth was 10' below grade). No groundwater observed and no odors noted at grade level (raining during site visit). No manways, no USTs, no fills, no vents, no dispenser islands observed. Commercial properties to east and west, train(LIRR) to south and residential to north. DEC requires: 1)Collection of soil endpoint samples 2)Collection of a groundwater sample at former tankfield 3)former locations of dispenser islands and remote fills 4)adherence to CAMP during all future excavation activities 5)submittal of disposal documentation 6)plans for new construction (vapor barriers, passive ventilation systems). Vought called David Ray(Safeguard Properties 225-768-8424) to explain requirements and for owners info and left message to return call). 10/28/04-Vought-Spoke to Levant(ATC 212-353-8280x330). Soil was removed last week. ATC was hired last week. Approx 200 yards were removed. No UST found (was removed previously), piping was also removed. Depth of excavation was 10-12'. Excavation size was 20'x30. One remote fill was found and was removed. Ambient air readings were collected due to Health & Safety and will be included in report. Highest PID reading was 5ppm. Highest PID hit was 50ppm. Four endpoint samples collected (two bottom and two sidewall). Groundwater sample from below tankfield and one sample from remote fill port will be collected. Report will be submitted by 12/15/04. No complaints from neighbors ("neighbor who complained no longer resides there)". Adjacent residence was abandoned and locked by NYFD due to DOB violations. New residence will be slab on grade. 1/6/05-Vought-Received call from Nicole (ATC 212-353-8280x372) and she will include air monitoring readings and DEC will receive report by 3/1/05. 6/8/05-Vought-Reviewed Remedial Activities Letter Report (ATC Associates Michael Morris) dated 3/1/05. Site was formerly an automobile repair facility. "Additionally, ATC screened the ambient air for VOCs with the PID during excavation activities. No evidence of VOCs were detected in the ambient air during soil excavation activities." Ambient air data submitted with report. Five endpoint soil samples were collected. A total of 500.55 tons of impacted soil was removed from site. Groundwater sample attmepted using Geoprobe and refusal on seven attempts.At a second soil removal effort an additional 1042 tons of soil was removed. Report requests no further action. Soil analyticals show no TAGM 4046 Required Soil Cleanup Objective exceedence. DEC requires: 1)collection of groundwater sample 2)submission of soil samples from remote fill port. Vought sent letter requiring same.

FMR GAS STATION (Continued) **S106000033**

1/24/06 - Obligado - Called Michael Morris, ATC, to inquire about ground water sample. Said the client never authorized the work. After file review, determine that site is very close to jamaica public supply well. Call back Michael Morris and tell him his client needs to get ground water sample immediately. Send letter with due date of 3/1/06. 2/22/06 - Obligado - Email Michael Morris, drilling scheduled for March 7, requests additional time for sampling and report preparation. Also remote fill location already excavated during construction. DEC grants extension to 4/14/06, and asks for documentation in report that remote fill has already been excavated. Also asks for email of site plan. 3/10/06 - Obligado - Phone call from Sharisa from ATC (917-371-7772) who is field representative doing drilling. Said the proposed boring locations were not feasable due to above ground subway line along Jamaica Avenue. Also said the proposed site sampling plan is innacurate and the tanks were further to the south and aproximately 30 ft from 120th Street. So the proposed locations were upgradient and cross gradient. Sharisa proposed moving the boring location to the south in a parking lot behind the new building, which would be about 30 ft downgradient of the former tankfield. Agreed with her. Asked her to take split spoon samples every 5 ft until 45 ft bgs, then take continuoussamples until encountering ground water. GW anticipated at 50 ft bgs. 4/25/06 - Obligado - Review Remedial Investigation Report dated April 17, 2006. Downgradient monitoring well was installed and sampled. Only 1 VOC - Chloroform at 9.7 ppbdetected. Requests closure based on all tanks and contaminated soil removed, 1500 tons of soil removed, no ground water contamination related to petroleum encountered in downgradient well. After discussion with DEC Sun issue NFA and sent closure letter. END DECRemark - 0306780

Remarks: Start CallerRemark - 0306780 CALLER STATES BUSINESS HAD WASTE OIL TANK REMOVED AND SOIL APPEARS CONTAMINATED - NO CLEAN UP END CallerRemark - 0306780

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

R E M CLEANERS (Continued) **1005901705**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start CallerRemark - 0330013 Location is a junk yard. Unpermitted discharge of automotive waste fluids onto ground surface. END CallerRemark - 0330013
Remarks: Start DECRemark - 0330013 Prior to Sept, 2004 data translation this spill Lead DEC Field was "DEMEO" 4/15/05 - Austin - Recd copy of signed Stip with compliance schedule - reassigned from deMeo to Rahman, for tracking compliance and reviewing submissions - end 07/07/05-SR//Investigation Plan was submitted in May'05.Plan was approved and RP's contractor Brian E. Flynn was advised to send the report after investigation. As per the consent order, the department has not received any BMP/PPP which was due in April'05. 09.26.05 SR// Sharif made a call to Brian E. Flynn. in absence of him, left a message for him to submit the report. 10.07.05 SR// Normann Teitler of Metropolitan NY Towing Auto Body & Salvage Association called DEC sayinghe will work with the contractor to furnish BMP/PPP to DEC and the Investigation report as well. He is expected to give me a call by next week. 07/31/06 Rahman- I spoke with Brian Flynnm, who indicated that they have performed soil investigation and found contamination in some places. A report will be forwarded to DEC within few weeks. 08/22/06 Rahman- DEC has not rec'd the investigation summary report which was due on August,05. A non compliance letter was sent to Metropolitan NY Towing & Auto Body Association 2 52nd Street, Box A8 Brooklyn, NY 11232 Attn: Norman Teitler 09/27/06 Rahman- Rec'd investigation summary report.VOC/SVOC levels are below TAGM level.Therefore, does n't warrant any remediation effort.Spill is closed. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the

UNIFORMS FOR INDUSTRY INCORPORATED (Continued) **1000230282**

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RAYMAC CABINET CO INC (Continued) **1000294820**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	Start DECRemark - 0208119 Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT" 2/11/2003-Vought-Spill transferred from Sawyer to Vought. Spoke with Stanley Sucharski (Fenly & Nicol) 631-586-4900. 6000 GALLON USTS LINE VAULT-repair is complete and found contaminated soil. 15 yards of soil removed and endpoint samples ready to be taken. Tank is a 6000 gallon fuel oil. Tank is in place and supply line was leaking. Supply line was underground. Depth of excavation is10'. For closure NYSDEC requires disposal manifest, laboratory analyticals, site plan and work invoice. NYSDEC will receive report by 4/11/2003. 2/26/2003-Vought-Spoke with Brian McKay (F&N 631-586-4900x167). 6000 GALLON USTS LINE VAULT-Contaminated soil found around supply/return lines from tank to building. Two USTS's on site (Diesel and mineral oil tank). Soil was excavated (12 yards). Brian will fax site plan, disposal manifest and analyticals. Spill Investigation Report-March2003-Fenley & Nicol-Depth to water is approximately 50'. 6000 GALLON USTS LINE VAULT-Product was found in a concrete vault that contained a portion of the tank piping that runs from the tanks located beneath the western parking area into the building. The components of the tank system were isolated and retested which showed that the lines and not the tanks were the source of failure. Tank piping was replaced for both USTs outside. One UST contained fuel oil and the other contained mop oil. Impacted soils were discovered during piping replacement and 134.53 tons of soil were removed from the site and excavation depth was to 20'. One bottom endpoint soil sample (noted with a slightly "sweet odor" was sent for 8021/8270 analysis (included TCE and PCE) and showed one TAGM exceedance (benzo(a)pyrene at 143ppb). NYSDEC requires:1)TPH modified 8100 analysis from boring performed in area of mop oil line leak and excavation from a depth below 20'(former excavation depth). East Process Water Supply Well is located on site property to south and north process water supply well is located on west side of site. Report recommends spill closure. 5/1/2003-Vought-Site visit by Vought. On-Site were Cheryl Ann Neary (Fenly & Nicol-718-204-4993), Scott Hammerich (Vertex Engineering-631-553-0425) and Jeffrey Mandel(owner-718-846-2993). Site was former laundry processing facility and will be a mini-storage building. 6000 GALLON USTS EXCAVATION-Two empty UST's are on-site (#2 fuel oil-6000 gallons, mop oil-6000 gallons). #2 fuel oil UST failed system tightness test. Tank was isolated and tank passed tank only tightness test. A tank only tightness test was performed on mop oil UST and tank passed tank only test. 6000 GALLON USTS LINE VAULT-Mop oil tank Lines were dug and soil contamination was excavated to a depth of 20' without reaching clean endpoint samples. MOP OIL ROOM-NYSDEC requires: 1)one soil sample between two sumps or two individual

UNIFORMS FOR INDUSTRY (Continued) **S106123796**

samples will be obtained and analyzed for TPH 8100. 2)Perchlorethylene machine-one soil and groundwater sample will be obtained right outside former machine location and analyzed for 8260/8270 as per Shaminder Chawla (NYSDEC Enviro. Remed). PREVIOUSLY ABANDONED USTS-NYSDEC requires: 1)paperwork will be submitted for former abandonment of 4 UST's on-Site FILTER ROOM-NYSDEC requires: 1)one soil boring or two endpoint samples (one wall composite and one bottom sample) will be taken if tanks are removed DRY WELL-NYSDEC requires: 1)submission of historical endpoint analyticals and remedial report. WATER SUPPLY WELLS-at time of site visit, according to site representatives the North Process Water Supply well was not being used and had not been used for many years. Status of East Process Water Supply well was not known. 5/6/2003-Vought-Spoke with Scott Hammerich who inquired about previous spill 9101477. 7/3/2003-Vought-Spoke with Scott Hammerich. 6000 GALLON USTS EXCAVATION-Fuel oil tank (#2 fuel, 6000-gallon which tested tight) was excavated. Contaminated soil found underneath tank. Soil will be excavated to limit reach of excavator and a bottom endpoint sample will be taken. If sample is contaminated further excavation will be performed and then one composite sidewall will be obtained. If bottom sample is clean then a sidewall composite will also be taken. Samples will be analyzed for EPA Method 8270. Hammerich will send investigation report upon field completion. 7/11/2003-Vought-Spoke with Hammerich: 6000 GALLON UST EXCAVATION-Still removing USTs. Refusal at 6' for installation of monitoring well. Deepest sample was 18'. Will Geoprobe week of 7/14. Tanks completely encased in concrete. Vought will schedule site visit on 7/14. 7/16/2003-Vought-Site visit by Vought on 7/14. Visit summary: 6000 GALLON UST EXCAVATION-Two (6000-gallon) UST's are removed: Small amount of soil contamination due to historic overfill. One bottom composite soil sample was taken to confirm removal of impacted material. Mop oil line-soil sampling performed from 20'-30' and non-detect found via PID at 30'. Soil samples sent to laboratory. FILTER ROOM-Three (1500-gallon) USTs encased in concrete. Small amount of contamination found on top of vault. Entire vault including concrete will be removed an two bottom endpoint soil samples will be collected and analyzed for TPH 8100/8270/8260 due to mineral oil, #2 and #4 oil storage history. Wallendpoints will be collected after further excavation. MOP OIL ROOM-Either one improperly abandoned tank or two separate tanks. Geoprobe refusal at 7' and tank invert is at 10'. Owners will decide if abandoning in place or removal. Soil contamination found in tank manways. Vought repeated that UST registration must happen immediately. Six refusals on cobbles for attempt at monitoring well required for water sample due to perc storage as per Region 2 Haz Waste Unit. All historic perc operations and storage occurred above ground. Vought called NYSDEC Haz Waste unit Bob Cozzy for water requirement clarification. Bob Cozzy stated that a water sample is required due to site location in public water supply well area. Vought called Jeffrey Mandel to repeat requirement and spoke to Richard Sena who stated that no letter requiring groundwater sample was necessary and he would convey requirement to owner. Richard also stated that the tank in the mop cleaning room will be removed andnot abandoned in place. 8/22/2003-Vought-email from Scott Hamarich. 6000 GALLON USTS LINE VAULT EXCAVATION-Soil sample obtained from below previous excavation depth shows 6640ppm of THC. 6000-gallon mop oil and 6000-gallon fuel oil UST were excavated and removed. 6000 GALLON UST EXCAVATION-Soil endpoint was analyzed for 8270 and only showed benzo(a)pyrene at 127ppb. Additional soil was excavated and another endpoint soil sample was analyzed for 8270 resulting in no TAGM exceedances.Minor PAH exceedances of benzo(a)anthracene at 345ppb and benzo(a)pyrene at 250ppb in sidewalls of sample due to the presence of fill material. FILTER ROOM-In July 2003 Clean Venture accessed three mineral oil USTs located in the filter room. During removal impacted soils were indentified. Excavation was peformed to a depth of 22' and was bound on all

UNIFORMS FOR INDUSTRY (Continued) **S106123796**

four sides by building footings. Soils at depth of 22' were potentially impacted and as a result a soil boring was performed in the excavation to a depth of 34' and sample sent for 8260/82780. Analyticals showed 9190ppb xylene as only parameter which exceeded TAGM. MOP OIL ROOM-In July 2003 Clean Venture accessed the former UST in the mop oil room. The tank was removed and impacted soils were noted. Excavation was continued to a depth of 22' and was bound on all four sides by building footings. Soils at depth of 22' were potentially impacted and as a result a soil boring was performed in the excavation to a depth of 32' and sample sent for 8260/82780/8100. Analyticals showed 2750ppb xylene and 11700ppb THC by modified 8100. 10/16/03-Vought-contacted Chris Magee (DEC-Albany) for assistance regarding mop oil and mineral oil analyticals. DEC requires: 6000 GALLON USTS LINE VAULT-1)description of mop oil composition including brand names and chemical composition to ensure proper analyses were peformed (due to 6640ppb THC exceedance). 6000 GALLON UST EXCAVATION-1)Possible investigation of mop oil parameters once mop oil composition is submitted. MOP OIL ROOM-1)Groundwater samples by perc operations, downgradient of site, status, sampling ability and ownership of East and North Process Water Supply well 2)site plan with all tanks and piping and historical areas of perc usage, perc recycling and disposal methods 3)description of mop oil composition including brand names and chemical composition to ensure proper analyses were peformed (due to 11700ppb THC exceedance). FILTER ROOM-1)Type ofproduct that was stored in Filter Room USTs (mineral oil vs. mineral spirits) and 8100 results due to storage of mineral spirits. DRYWELL-1)drywell closure report including analyticals and disposal manifest and location on site plan of excavateddrywell and all other drywells. PBS REGISTRATION. 10/16/2003-Vought-Left a message for Hamarich to return call to DEC so above requirements could be discussed. Vought spoke with Hamarich who is putting together info in a report. Vought faxedHamarich copy of spill report (with requirements) and PBS registration. 12/5/2003-Vought-Review of report sent via email from Hammarich on 11/19/03. Email from Hammarich with list of chemicals utilized by UFI with material safety data sheets. List of chemicals were: 1)petroleum process oil 2)stoddard solvent 3)severly hydrated light napthalenic distillate aka process extender oil 4)petroleum lubricating oil base stock 5)severely hydrated heavy napthalenic distillate 6)mineral spirits (petroleum hydrocarbons and stoddard solvent) and 7)petroleum solvent(627 Solvent contains 83 C7-C10 saturated hydrocarbons, .4 toluene, .8 xylene, .2 ethylbenzene and 14 C8+aromatics). 12/5/2003-Vought-Review of report sent via email from Hammarich on 12/1/03. Email from Hammarich including user manual for drycleaning maching (a Bowe-Passat P564 5th generation machine). According to UFI "the drycleaner was self-contained with no external tanks and perc was replenished and disposed by Safety Clean". Mop oils included Severly hydrated heavy napthalenic distillate, petroleum process oil and petroleum lubricating oil base stock. 12/5/2003-Vought-Data and outstanding requirement review: 6000 GALLON UST EXCAVATION-Two USTs (fueloil and mineral oil) passes tank only tightness tests after isolate and retest was performed. Failure due to line leak and for info see 6000 GALLON USTS LINE VAULT. Small amount of contaminated soil found under tank resulting in further excavationand collection of one additional endpoint sample. Soil analyticals show minor PAH exceedance at 345ppb benzo(a)anthracene and 250ppb benzo(a)pyrene due to fill material and non detect napthalene. DEC has no further requirements with respect to this area. 6000 GALLON UST LINE VAULT-Contaminated soil found and 134 tons were removed from site. Additional excavation resulted in collection of one additional endpoint sample showing 6640ppb THC. Vought emailed Tim Lebbaron(DEC Albany) for instruction on 6640ppb result. (Note:mineral oil contains petroleum process oil and napthalenic distillate but these were not analyzed due to DEC requirement of modified 8100 analyses). MOP OIL ROOM-Contained former Perc

UNIFORMS FOR INDUSTRY (Continued) **S106123796**

operations. UST was excavatedand additional soils were removed to a depth of 22' and one endpoint soil sample was collected. Soil analyticals showed 2750ppb xylene and 11700ppb THC. Tetrachlorethene(PCE) was non detect and below 64ppb and napthalene was below standards. DECrequires: 1)groundwater sample 3)PBS registration. Vought emailed Tim Lebbaron(DEC Albany) for instruction on 11700ppb result. Mop oils included Severly hydrated heavy napthalenic distillate, petroleum process oil and petroleum lubricating oil base stock. FILTER ROOM-Excavation of three mineral oil USTs. Contaminated soil was found and additional excavation was performed to a depth of 22'. A boring was performed through the bottom of the excavation and a soil sample was collected at a depth of 34'. Analyticals showed 9190ppb xylene and 5800ppb napthalene. DEC requires: 1)downgradient groundwater sample DRYWELL-DEC requires: 1)drywell closure report (analyticals, site plan and location). 12/5/03-Vought-Called Richard Sena and explained outstanding requirements and also gave permission to backfill 6000 GALLON UST EXCAVATION with material originating ONLY from excavation or from new fill (and NOT from line vault excavation). 12/9/2003-Vought-After discussion with O'Connell(DEC) the difficulty in interpreting analyticals is due to that Modified 8100 should be only used on mineral oil which was stated as the contaminant in question. It was later determined that it was not mineral oil but mineral spirits which should have been anlayzed via 8260/8270. Therefore complete list 8260/8270 will be performed on all future samples. 1/13/2004-Vought-Received message from Scott Hammarich. Vought called Hammarich and line was busy. 1/14/2004-Vought-Called Hammarich(631-758-1580x224) and left message to return call to DEC. 1/23/04-Vought-Received well proposal from Scott Hammarich via email. 2/2/04-Vought-Spoke with DEC Sigona and Chemical Bulk Storage Inspection performed by DEC Zhao. DEC requiressubmission of updated CBS registration. Vought spoke with Hammarich and CBS being prepared for immediate submission. 2/3/04-Vought-Review of well propsal received 1/23/04. Proposal for the installation of one well in the former mop oil room/filter room and groundwater samples will be analyzed for VOCs 8260. DEC requires: 1)complete list 8260/8270 analyses due to napthalenic distillate, TCE, PCE, vinyl chloride 2)additional well at former tank line vault excavation 3)drywell closure report4)collection of deepest dry soil sample and highest PID reading and 8260/8270 complete list analysis at each well location. Additional wells may be required. Vought sent email to Hammarich with requirements. 2/12/04-Vought-Spoke to Scott Hammarich and well installation began of two monitoring wells (one near mop/oil filter room and the second well will be installed at the fuel line vault. Soil samples analyzed for complete list 8260. Samples at soil/water interface and highest PID. DEC will receive report by 3/31/04. 3/2/04-Vought-Spoke with Hammarich and TCE in MW1 is 1.4ppb, MW2 samples will be run due to high detection limits. Hammarich will send results and email additional proposed well locations. 3/2/04-Vought-Receivedemail from Hammarich 3/18/04-Vought-Reviewed email received on 3/18/04. Proposal for two additional wells VMW4(upgradient well) and VMW-3(downgradient well). Email also contained soil and groundwater analyticals from MW1 and MW2 installation.Groundwater analyticals show 650ppb 1,2,4-trimethylbenzene(WMW-1), 280ppb 2-Butanone(WMW-1), 180ppb 4-Isopropyltoluene(WMW-1), 1600ppb acetone(WMW-1), 4500ppb cis-1,2-Dichloroethene(WMW-1), 520ppb m,p-xylene(WMW-1), 120ppb napthalene(WMW-1), 190ppb n-Propylbenzene(WMW-1), 1400ppb p-Ethyltoluene, 320ppb vinyl chloride(WMW-1), 510ppb 3+4-methylphenol(WMW-1), 63ppb 1,2,4-trimethylbenzene(VMW-2), 21ppb 4-isopropyltoluene(VMW-2), 7.4ppb cis-1,2-dichloroethene(VMW-2), 150ppb napthalene(VMW-2), 63ppb p-ethyltoluene(VMW-2), 5.5ppb vinyl chloride(VMW-2), 240ppb 2-methylnapthalene(VMW-2). Vought spoke with Hammarich and approved additional well proposal. 3/25/04-Vought-Will backfill with RCA (crushed stone). One

UNIFORMS FOR INDUSTRY (Continued) **S106123796**

well installed and additional wells being installed today. 4/13/04-Vought-Received message from Hammarich. Vought called Hammarich and left message to return call to DEC. 4/15/04-Vought-Spoke with Hammarich who requested office visit for dropping off PBS registration.Well samples from four monitoring wells taken. Unsure of flow direction. Upgradient well has TCE. 4/20/04-Vought-Meeting at DEC with Hammarich, Sena, DEC Brevdo and Vought for submission of groundwater data and preliminary discussion of possibleproject management via Has Waste and BCP program. Vought sent email to Rommel with TCE, PCE and DCE concentrations for forwarding to Haz Waste group. Petroleum Remediation requirements: 1)define true groundwater 2)well installation downgradient ofVMW1 to delineate 1,2,4-trimethylbenzene, napthalene, ethylbenzene and xylenes 3)well installation at downgradient of expected source 4)surrounding area site plan 5)upgradient source information. Vought spoke with Harmarich and e-mailed requirements. 12/21/04-Vought-Received call from Sena that he wants to know further requirements to close spill. Vought returned call and left a message that site may have a new project manager. 12/28/04 File left for Randy Austin due to Product type. DEC LEAD changed from Vought to Unassigned. Rommel 1/7/05 - Austin - spill report reassigned to Sawyer, due to his prior involvement with this matter - end 1/31/06: Reviewed the spill file and addtional subsurface investigation of UFI, 129-09 Jamaica Avenue, performed by GCE. Met with Dave Smith and Jack Aversa to brief them about present status of the spill and additional subsurface report. One copy of the report added to the file. (Sadique) 12/4/06 - Austin - Reassigned to Kumar for review towards either closing spill, or possible reassignment to Remed. Section "B". - end 12/05/06-Hiralkumar Patel. review entire spill notes. as site has groundwater contamination, after discussed with DEC Austin, case transferred to Remed. section. END DECRemark - 0208119

Remarks: Start CallerRemark - 0208119 test and repair END CallerRemark - 0208119

VCP:

Program Type: BCP
Site Code: 375336
Assessment: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.
Env Problems: Groundwater samples collected throughout the site, as well on the adjacent properties to the south and west,indicate that the site is highly contaminated with chlorinated and petroleum hydrocarbons. PCE, TCE, cis-1,2-DCE and vinyl chloride were found at concentrations up to 230, 91, 7,200, and 900 μg/L, respectively. A downgradient grab sample collected off-site also had elevated concentrations. Total BTEX concentrations were as high as 932 μg/L. A floating product plume,ranging from 1" to 6.06’ in thickness, was encountered at 4 of the 12 wells on site.
Site Desc: This is a new BCP application and pertains to the Uniforms for Industry property located at 129-09 Jamaica Avenue, Richmond Hill, Queens County. This site is approximately 1.72 acres in size. Current use of the property is industrial. Future useof the property is residential and commercial. Known contaminants at this site are petroleum, chlorinated solvents, other VOCs, SVOCs, metals, pesticides, and PCBs. These contaminants are impacting the soil and groundwater. Soil gas is also a concern. This BCP application is currently under review and the Department of Environmental Conservation will determine the application’s approval and eligibility in conjunction with the Department of Health.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

DEMETRI AUTO BODY INC (Continued) **1008930588**

of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Start CallerRemark - 9513867 under ground tanks with unk petroleum or waste oil have caused soil to be contaminated-still under investigation END CallerRemark - 9513867
Remarks:	Start DECRemark - 9513867 Prior to Sept, 2004 data translation this spill Lead DEC Field was "KOLLEENY" 09/08/06: Received call from "Eva" at Hydro Tech asking what needs to be done to get this spill closed. She explained there are two closed-in-place 4K tanks beneath the basement floor, and that the basement has vehicle access. I told her that soil borings should be advanced around the tanks and soil and groundwater samples taken to evaluate impacts to those media, and added that if thereis any piping to fill ports or dispensers, that should also be investigated with borings. Eva said they have already put

NYC SANITATION DEPT (Continued) **S103569039**

together for their client a proposal to do 8 borings around the tanks, and that they will do a GPR survey to look for underground piping. I said that sounded good, and told her to submit the investigation results to me with a recommendation for further action. - J. Kolleeny 10/25/06: See also related spill no. 9403671. Reviewed Site Investigation Report dated October 6,2006, prepared by HydroTech Environmental and submitted on Oct. 16th. Report was prepared on behalf of potential buyer. Soil borings were advanced near oil/water separator on east end of site and near active diesel USTs on west end of site. Soil samples near oil/water separator had olfactory evidence of petroleum contamination, with PID readings up to >200 ppm, but lab results only showed exceedances for SVOCs. Groundwater grab sample was taken near diesel tanks, but not near oil/water separator which has 2 open spill cases. Sent email to Eva Jakubowski of HydroTech stating that groundwater in vicinity of oil/water separator should be investigated for potential impacts from the confirmed petroleum release. Sent 2nd email later same day requesting electronic version of Site Investigation Report, received email reply from Eva saying she will provide it. - J. Kolleeny 01/24/07: Sent email to Eva at HydroTech noting that I still haven't received an electronic copy of the investigation report, and asking if soil/GW in vicinity of oil/water separator at site have been investigated yet, as I had suggested. Received email reply same day with pdf of Site Investigation Report (in eDocs), saying soil but not groundwater in vicinity of oil/water separator has been investigated, HydroTech has submitted a proposal for GW investigation to their client (potential buyer), but he's negotiating with DOS, and asking if I could send something in writing to RP asking for GW sampling,to speed things along. I wrote back same day asking for name & address of property owner's representative. - J. Kolleeny END DECRemark - 9513867

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D009	MERCURY
D035	METHYL ETHYL KETONE
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/09/2007

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Last EDR Contact: 12/06/2007
Next Scheduled EDR Contact: 03/17/2008
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

LIRR
91-90 121ST STREET
RICHMOND HILL, NY 11418

TARGET PROPERTY COORDINATES

Latitude (North):	40.69525 - 40° 41' 42.9''
Longitude (West):	73.82621 - 73° 49' 34.4''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	599174.5
UTM Y (Meters):	4505379.0
Elevation:	56 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-F7 JAMAICA, NY
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

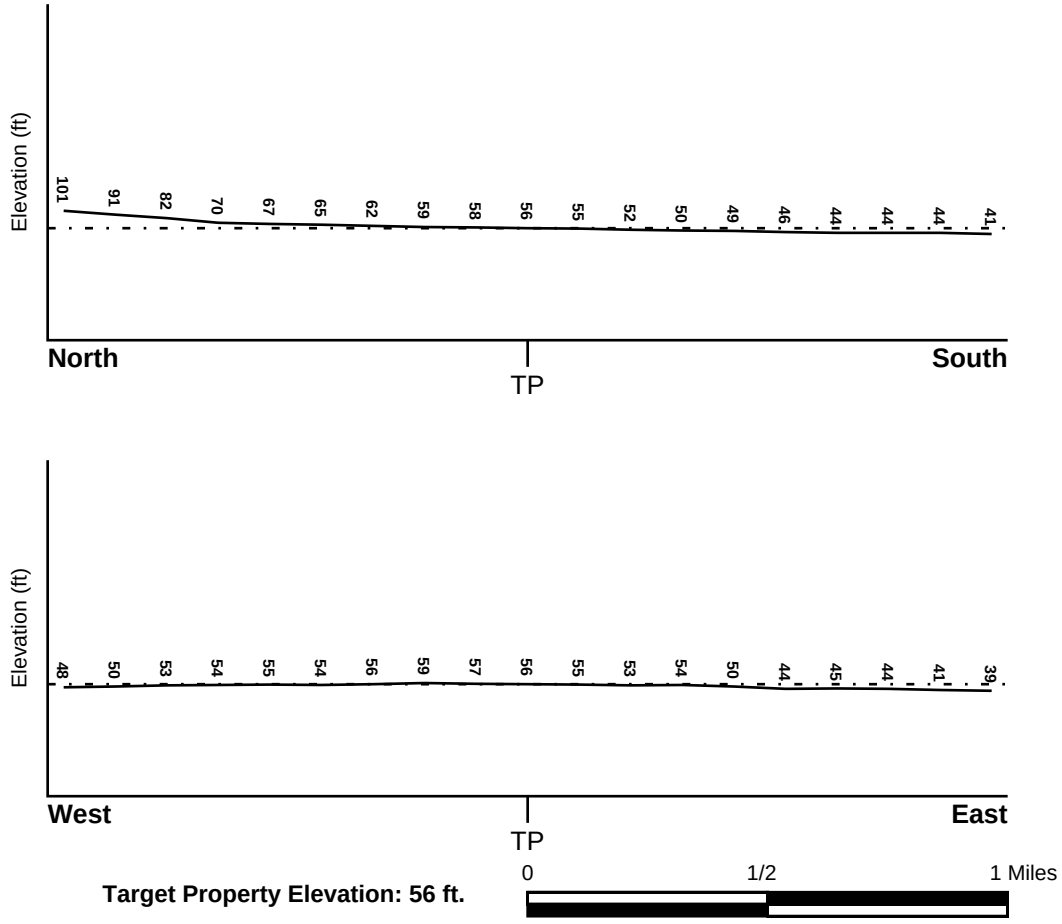
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 56 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
QUEENS, NY	Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
JAMAICA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	Liberty Heat Treating Co. Inc.
Site EPA ID Number:	NYD053169694
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	approximately 60 feet.
Hydraulic Connection:	permeable deposits are located above the surficial aquifer and the surficial aquifer is hydraulically connected to underlying aquifers.
Sole Source Aquifer:	A sole source aquifer is persent at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Pleistocene
Code:	Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The EDR FieldCheck®System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). TRC ENVIRONMENTAL CONSULTANTS used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by TRC ENVIRONMENTAL CONSULTANTS. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the RCRA-LQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 5 RCRA-LQG sites within approximately 0.5 miles of the target property.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the SSTS list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 SSTS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Dist / Dir	Map ID	Page
BURRAGE GLUE CO	91-20 130TH STREET	1/8 - 1/4 SE	K56	135

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1 HIST FTTS site within approximately 0.5 miles of the target property.

STATE AND LOCAL RECORDS

HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 HSWDS site within approximately 0.5 miles of the target property.

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the LTANKS list, as provided by EDR, and dated 10/02/2007 has revealed that there are 33 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 27 HIST LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the UST list, as provided by EDR, and dated 10/02/2007 has revealed that there are 50 UST sites within approximately 0.5 miles of the target property.

CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS UST site within approximately 0.5 miles of the target property.

HIST UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the HIST UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 48 HIST UST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

SPILLS: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the NY Spills list, as provided by EDR, and dated 10/02/2007 has revealed that there are 127 NY Spills sites within approximately 0.5 miles of the target property.

HIST SPILLS: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 99 NY Hist Spills sites within approximately 0.5 miles of the target property.

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

An online review and analysis by TRC ENVIRONMENTAL CONSULTANTS of the VCP list, as provided by EDR, and dated 08/15/2007 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:
Other Pertinent Environmental Activity Identified at Site

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

MACHIN AUTO BODY (Continued) **1000241616**

corrective action activities required under RCRA.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TO VARIOUS REASONS THAT COULD BE RESPONSIBLE FOR SOIL CONTAMINATION-SAMPLES HAVE BEEN TAKEN. END CallerRemark - 0003003

Remarks: Start DECRemark - 0003003 Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIPPLE" 4/23/03 TIPPLE CAKKED MR.KELLY AT DEP FOR SAMPLE RESLTS IN ORDER TO CONTINUE PROJECT. 4/12/04 tipple wrote a letter to Andrew Kelly DEP requesting analyticals be forwarded to DEC 2/17/06 - Faxed written request for closure report to DEP. 2/27/06 - Received DEP's Response Report which indicated no DEP violations pertaining to discharges of petroleum to sewer, although DEP observed gasoline rinse water being discharged to ground surface by H & W Machinery employee. Samples of soil (25 ft depth) and rinse water collected in June 2000 during sewer construction project had gasoline odor - no analytical tests performed. Discharge to ground was less than 25 gallons and was reported over 5 years ago. Close spill (Hausamann). END DECRemark - 0003003

Remarks:	Start DECRemark - 9810288 Prior to Sept, 2004 data translation this spill Lead DEC Field was "DEMEO" 5/18/04 TJD LIRR submitted spill investigation report (internal document) in support of closure request. A discrepancy was noted at the main pumpmeter. An inspection of the system did not reveal any discharge although some parts of the system are underground and were not inspected. Spill closed and cross-referenced to primary open spill number for the Richmond Hill Yard (8908760). No disposal manifests or laboratory data was submitted in support of closure request. Site does not meet standards. END DECRemark - 9810288
