Re: Paul Miller Dry Cleaners, D004437-23

Andrea,

I reviewed the 2.11's and the increase in price is acceptable based on my review. The reason for the increase were items I did not include in my cost estimate for the RI fieldwork or I was off in my price estimate. These items included:

- 1) Vendor rented equipment that would be used during the RI with an associated cost increase of approximately \$8,600
- 2) Laboratory analysis was approximately an additional \$15,000
- 3) IDW removal was approximately an additional \$10,000
- 4) Drilling was approximately an additional \$28,000 because of additional wells added and a longer time frame than anticipated.

Is this e-mail acceptable or do I need to draft a formal memo? Kevin

Kevin Sarnowicz Environmental Engineer Division of Environmental Remediation 625 Broadway Albany, NY 12233-7016 (518) 402-9774

>>> Andrea Indelicato 3/14/2008 12:26 PM >>> I finished going over the Schedule 2.11s for the Paul Miller Dry Cleaners WA and everything looks good to me. The only thing I need is a justification from you for the price increase. The CA memo listed the WA price as \$192,333 and

the final WA price is \$252,288. Is this acceptable to you?

Thanks, Andrea From:

Re: Fwd: RI/FS Conceptual Approval - Former Paul Miller Dry Cleaners site (243018)

good to go

>>> Sal Ervolina 12/13/07 11:11 AM >>>

I approve the conceptual approval memo for a RI/FS at the Former Paul Miller Dry Cleaners site.

>>> Robert Cozzy 12/7/2007 8:32 AM >>>

Sal,

Attached is a Conceptual Approval Memorandum for a RI/FS at the Former Paul Miller Dry Cleaners site (243018) in Staten Island. Also attached are a Site Briefing Memo, a Work Assignment, and two figures. Note that we plan to issue the Work Assignment utilizing the IAWA process and IAWA Work Assignment LOE Template recently developed by Mike Cruden.

The estimated cost for this RI/FS is ~\$192,000 and GW is contaminated with PCE (830 ppb) and TCE (690 ppb), which has possibly migrated off site and could pose a vapor intrusion threat. Please let us know if you need any other info in order to approve this request. thanks,

Bob

FROM:

James Quinn, Chief, Section B, Remedial Bureau B

THRU: Robert Cozzy, Acting Director, Remedial Bureau B

SUBJECT:

Conceptual Approval Memorandum for Engineering Standby Contract

Work Assignment; Former Paul Miller Dry Cleaners, Site # 243018,

Richmond County

DATE:

Site Name, No., Name and Location:

Former Paul Miller Dry Cleaners, Site # 243018, Port Richmond, Richmond County

Site Information:

See attached.

Program Element:

Remedial Investigation / Feasibility Study

Project Duration:

February 2008- September 2009

Contractor Preference:

No preference

Estimated WA Budget:

The cost estimate for this work assignment is \$192,333.00.

Funding Source:

State Superfund

Brief Description of Scope of Work:

This Work assignment is for a Remedial Investigation / Feasibility Study for the former Paul

Miller Dry Cleaners which is currently operating as a Boston Market eatery. A preliminary site assessment performed in May 2000 revealed groundwater contaminated with tetrachloroethene and trichloroethene on the site at concentrations as high as 830 ppb and 690 ppb respectively. The groundwater contamination has possibly migrated off site to three adjacent properties. The site and two of the three adjacent properties have basements and could have the potential for vapor intrusion to occur.

We recommend that you conceptually approve the work assignment to implement a RI/FS for the Former Paul Miller Dry Cleaners site since this work is necessary and reasonable.

DEC 1 3 2007

Mr. Michael Memoli, P.E. Program Manager Camp Dresser & McKee 100 Crossways Park West, Suite 415 Woodbury, New York 11797

Re: WA Issuance/Conflict of Interest Letter

Site: Former Paul Miller Dry Cleaners Site

IAWA - D004437-23

Site #: 243018

Dear Mr. Memoli:

The New York State Department of Environmental Conservation's Division of Environmental Remediation (DER) is issuing to your firm the immediate activation work assignment (IAWA) identified below for the performance of a Site Characterization. This WA has been identified by your firm's I/D contract number and the next sequential WA number.

The step by step implementation of an IAWA is discussed in the enclosed process description. IAWAs are being pilot tested by DER with the intent of decreasing the length of time it takes to achieve notice to proceed and start work on a project. To that end, your initial step should be to contact DER's PM and discuss preliminary staffing, scheduling and project scope, along with any site specific variations from existing guidance you anticipate. If your firm does not already have generic health and safety, quality assurance/quality control and field activities plans on file with the Contracts and Payments Section, then that effort needs to be completed as soon as possible.

 Contract/WA No.:
 D004437-23

 Site/Spill No./PIN:
 243018

Site/Spill Name: Former Paul Miller Dry Cleaners Site

Program Element: RI/FS

WP Dev. (WPD) Budget: \$ 10,000.00 Est. Total WA Budget (includes WPD): \$192,333.00 Project Manager (PM): Kevin Sarnowicz

PM Phone No.: (518) 402-9768
PM E-mail: kpsarnow@gw.dec.state.ny.us

Contract Manager (CM):

CM Phone No.:

Lisa Lagasse
(518) 402-9747

CM E-mail: lmlaga@gw.dec.state.ny.us

M/WBE Administrator: Vicente Alfonso M/WBE Phone No: (518) 402-9311

M/WBE E-mail: <u>vxalfons@gw.dec.state.ny.us</u>

Please review your firm's relationship with the Potential Responsible Parties (PRPs) indicated on the enclosed Conflict of Interest Certification form. Then sign, complete the form and accept the WA by returning the document to the contract manager within 5 calendar days of the date of this letter.

Please initiate the development of a project management work plan for this IAWA. It is expected that one (1) electronic and two (2) paper double-sided copies of the work plan will be submitted to DER's contract manager no later than 21 calendar days after receipt of this work assignment. It's expected that this submission will be acceptable to the DER PM.

The project management work plan submitted to DER must include the items listed below. If multiple sites are included in the IAWA, information should be provided for each site and the total IAWA.

- 1. <u>Cover Letter</u>: *Brief* description of project and reference to IAWA Work Plan issued by DER. Include certification of substantial conformance with the IAWA Work Plan noting variations with applicable guidance, if any.
- 2. **Schedule:** enclose detailed schedule with milestones and deliverables.
- 3. <u>Schedule 2.11's</u>: enclose detailed budget broken down by tasks and subtasks using the most current schedule 2.11's provided by DER. The budget (i.e. titles, rates) should be in accordance with your executed standby contract. The schedule 2.11's should identify areas of work requiring subcontracting and the certified M/WBE firms to be utilized, if known. The schedule 2.11's should identify the management and technical staff assigned to the WA. Enclose resumes of staff not previously approved by DER.
- 4. <u>M/WBE Utilization Plan</u>: enclose M/WBE Utilization Plan. If the plan does not meet the goals in the standby contract, an explanation must be provided. Contact DEC's M/WBE Office if you have questions.

If you have any questions regarding contract issues, please contact the contract manager indicated. If you have any questions regarding the IAWA's scope of work, please contact the project manager indicated. The project manager has prepared the enclosed document for your use in preparing the WA. Please contact the project manager to schedule a IAWA scoping meeting and site visit, if appropriate.

Requests for reimbursement cannot be processed until the draft project management work plan is submitted to DER for approval.

Sincerely

Michael J. Cruden, P.E.

RE: D004437-23 Former Paul Miller Dry Cleaners Site - WA

Lisa,

Based on the information provided, work records research and responses, CDM has determined that there appears to be no conflicts of interest with this site. Please find attached the signed COI for your files. Dave Keil has been assigned as the PM for this site and will be in touch w/ Kevin this week to arrange the site visit.

Thanks.

Dan

Immediate Activation Work Assignments

Step by Step Implementation

Time frame is project specific - the Project Manager (PM) who prepares the most comprehensive work plan, develops the best working relationship with the engineering standby contractor, and builds lessons learned from past projects into current ones will be able to anticipate potential delays and achieve WA work plan approval, and ultimately project completion, much faster.

PM responsible site access and other site specific requirements.

The DER PM will prepare a WA work plan using the attached template prior to initiating the following steps:

- 1. PM obtains conceptual approval for the project following existing guidance, which includes list of PRPs, site name and number, and an anticipated schedule of activities. The completed WA work plan is to be attached to the conceptual approval request (instead of a work assignment). Also, the conceptual approval request will detail any proposed field work which will be initiated immediately and adequate justification will be provided to support the determination that the scope of the initial field work is not controversial nor does it require NYSDOH input (or that the input has been or can be obtained promptly), the costs are easily determined and tracked, and the benefit of initiating the work outweighs any risk of failing to come to full and complete agreement with the engineering standby contractor on the WA work plan as described herein. An example of this would be initiating treatment system training or the continuance of leachate hauling concurrent with the process described herein.
- 2. The Contracts and Payments Section (CPS) issues the WA work plan to an engineering standby contractor following existing procedures. CPS requests that the engineering standby contractor perform a conflict of interest check.
 - Applicable background documents and data associated with the site to be sent to engineering standby contractor under separate cover by the PM when work assignment (WA) is activated by the CPS.
- 3. PM has initial teleconference with engineering standby contractor to discuss preliminary staffing, scheduling and project scope. Preliminary discussions related to any anticipated variations from WA work plan, DER-10, standby contract or any other applicable guidance will be initiated. WA work plan is not revised at this time.
- 4. Scoping meeting is held as applicable with engineering standby contractor (and NYSDOH if appropriate). Site visit, if necessary, may be combined with or scheduled prior to scoping meeting at the option of the PM. It's expected that any anticipated variations from WA work plan, DER-10, standby contract or other applicable guidance will be discussed.
- 5. Engineering standby contractor submits staff, schedule, M/WBE Utilization Plan, draft schedule 2.11's and site specific requirements outside the previously approved generic

project plans (addenda). Engineering standby contractor shall certify substantial conformance with WA work plan, DER-10, standby contract and other applicable guidance, including list of variations (if any).

M/WBE Utilization Plan is provided to the M/WBE and EEO Compliance Unit.

6. PM approves final WA work plan, which includes the original WA work plan and by reference the approved staffing plan, project schedule, schedule 2.11's, any site specific requirements outside the previously approved generic project plans (addenda), any variations from original WA work plan, DER-10, standby contract or other applicable guidance. (Note that the M/WBE Utilization Plan is reviewed and approved by others under separate cover. The engineering standby contractor cannot bill the Department prior to obtaining approval of appropriate schedule 2.11's - initially authorized for expenditures for task1 only and if unable to agree on schedule 2.11's for entire WA work plan, then reimbursement would be limited to approved level of effort related to task1 (which can be billed similar to how PMWP development costs have been in the past). Any change in scope (> 35% level of effort) or change in work element from the original conceptual approval requires a new conceptual approval.)

CPS will be copied on any site specific requirements outside the previously approved generic project plans (addenda), any variations from original WA work plan, DER-10, standby contract or other applicable guidance to evaluate variations to determine if generic plans, templates or guidance should be modified appropriately.

7. Site work is performed.

Subcontractors will be procured as necessary and in accordance with the overall project schedule. Engineering standby contractors will submit subcontractor certifications.

PM reviews payment submittal schedule 2.11's and cost control reports to ensure work is performed as agreed upon.

Taking the project schedule and overall anticipated cost into account, the engineering standby contractor and PM agree on the necessity and timing of an amendment to adjust the original budget for actual subcontracting, changes to the scope of work, level of effort adjustments and other project specific costs. It is not necessary to amend the original budget immediately - the standby consultant is authorized to spend the money included in the approved schedule 2.11's (including rebudgeting approved by the PM) and the PM should monitor cost control reporting and performance to determine the acceptability of the project's progress. Conceptual Approval for amendments is performed in accordance with DER guidance. Amendments are reviewed and processed by the Contract Manager in accordance with existing guidance.

8. Final closeout is performed in accordance with DER guidance.

Work Plan Immediate Activation Work Assignment Work Element: RI/FS

The scope of work will generally encompass activities contained in Work Element II of Schedule 1 Phased Remedial Investigation/Feasibility Study and other work elements as appropriate in the Standby Consultant Engineering Contract. Remedial Investigations/Feasibility Studies (RI/FS) should be conducted in accordance with the "Draft DER-10, Technical Guidance for Site Investigation and Remediation dated 12/25/02" or the latest versions of these documents when available. Quality Assurance/Quality Control (QA/QC) must conform to the most current version of the NYSDEC Analytical Services Protocol (ASP). Soil vapor investigations will be performed in accordance with the NYSDOH "Guidance for Evaluating Soil Vapor Intrusion in the State of New York." Additional information can be found at:

http://www.health.state.ny.us/environmental/investigations/soil gas/svi guidance

| Task 1: Scoping of the RI/FS Notes: Unless otherwise approved in writing by the Department's project manager, expenditures for tasks other than Task 1 are not reimbursable prior to approval of the site specific documents described discussed in this Task, a detailed project schedule, staffing plan and schedule 2.11's. The Standby Contractor shall certify substantial conformance with WA work plan, DER-10, standby contract and NYSDOH guidance. A list of variations, if any, shall be provided to the Department's project manager. Draft documents shall be provided within 5 days of scoping meeting, unless otherwise agreed to in writing by Department's PM. Approved documents are incorporated into this WA work plan by reference. | *Limited to 5% of the overall project cost or \$15,000 (unless otherwise agreed to by Department's PM) |

| Component 6: Phase I Remedial Investigation Report | | | | NOTES | | | |

The RI report will include the following elements: Introduction, site location and description, site history; operational and disposal history; environmental restoration history; summary of site investigation (field activities); summary of human exposure pathways; summary of environmental exposure pathways; comparison of analytical results to NYSDEC SCGs; discussion of nature and extent of contamination; contaminant fate and transport (no modeling); qualitative health risk assessment; summary and conclusions. The combined report will be sufficient to proceed to remedial development of alternatives.

| Task 3: Detailed Analysis of Alternatives (3rd Phase FS) and Remedy Selection | Max 184 hours |
|--|---|
| | NOTES: |
| | |
| Approximately 4 alternatives (including "No Action") will be evaluated. | |
| Remedial alternatives will be developed for the groundwater medium: Yes | |
| A full monitored natural attenuation evaluation, with groundwater sampling events, will be performed: Yes | |
| Soil gas exposure routes will be addressed through an on-going vapor intrusion mitigation program: Yes | |
| X IRM required for the installation of sub-slab depressurization systems | The need for this component will be determined in Component 5 of Task 2 |
| Operable units (specify) | |
| Feasibility Study Report | Max 150 hours |
| Assistance for public meeting, including trip to meeting(s), preparation of summary fact sheet(s) on site and info | Max 24 hours |
| Develop Conceptual Plan of Selected Remedy Notes: | Max 10 hours |

Multi-year work assignments can include a 3% escalation for costs in subsequent years. Administrative level of effort (LOE) should not exceed 4% of the overall LOE. NSPE level IX LOE should be limited to 2% of the total LOE.

The FS report will include the following elements: summary of remediation goals and proposed use of the site; description of the remedial alternatives, evaluation of remedial

alternatives, summary of recommended remedy and conclusions. The combined report will be sufficient to proceed to development of a Record of Decision.

Level of Effort (direct labor hours):

MEMORANDUM

TO:

Dale Desnoyers, Director

FROM:

Sonia K. Meyer through Deborah Christian, Chief

SUBJECT:

Superfund Referral

Former Paul Miller Dry Cleaners, Site No. 243018

DATE:

July 16, 2007

CONFIDENTIAL-ATTORNEY CLIENT PRIVILEGE

The purpose of this Memorandum is to recommend the use of funds from the Hazardous Waste Remedial Fund for the performance of a remedial investigation and feasibility study for the above referenced New York State Inactive Hazardous Waste Site in accordance with the applicable provisions of the Environmental Conservation Law ("ECL") and the State Finance Law ("SFL") of the State of New York. State Superfund monies may be expended for this remedial work under the authority of ECL 27-1305.3, ECL 27-1313.5b, 6 NYCRR 375-2.11(c)(1)(i)(d), SFL 97-b.3(a), SFL 97-b.3(c), and SFL 97-b.4.

SITE HISTORY AND DESCRIPTION

The Site houses a one story masonry building, is approximately two-thirds (.35) of an acre in size, and is located in the New York City borough of Staten Island, county of Richmond. The building was operated by Paul Miller, Inc. and used as a commercial dry cleaning facility from 1959 until 1994 or 1995. The Site was leased and renovated by Boston Market or Boston Chicken in 1994 or 1995 and has been used as a Boston Market restaurant since. The Site came to the Department's attention in 1994, when a groundwater investigation of adjacent property (the Forest Avenue Shopping Center) detected tetrachloroethene (PCE), trichloroethene (TCE), and cis-1, 2-dichloroethene. The Site's owner conducted a preliminary investigation at its own expense. A report done by EEA Inc., in October 1996 and revised in March 1997 found TCE, PCE, 1,2 dichloroethene, and vinyl chloride at levels which exceeded the Department's class TAGM

groundwater standards. The Department conducted an Immediate Investigation Work Assignment (IIWA) at the Site in June 2000. This investigation found groundwater contamination of TCE in the amount of 68 ppb, PCE in the amount of 830 ppb, 1,2 dichloroethene in the amount of 84 ppb, and 2 ppb of vinyl chloride, all of which exceeded the Department's class GA standards. The Site was found to pose a significant threat to public health and the environment, as there had been significant PCE contamination of a high yield aquifer used for domestic purposes other than drinking. The Site's classification was changed from "P" to Class "2" in August of 2001.

POTENTIALLY RESPONSIBLE PARTIES

- Eleanor Nalitt, wife of former owner of Site and former operator of on-site dry cleaners, current owner of Site.
- 1465 Forest, LLC, corporation named for address of the Site and which uses Eleanor Nalitt's mailing address.
- Samuel Katz, part owner of Site from 1957 through 1982.
- Nathan Adler, part owner of Site from 1957 through 1982.
- Paul Miller, Inc. (Address: 120 Stuyvesant Plaza, Staten Island, NY), a dry cleaning business currently operating on Staten Island.
- Paul Miller, Inc. (Address: c/o Harold W. Cohen 15 Beach St., Staten Island, NY), a corporation registered in Richmond County.
- Paul Miller Inc. (Address: 15 Queen St., Staten Island, NY), a dry cleaning business currently operating on Staten Island.
- Paul Miller Inc. (Address: 61 Victory Blvd., Staten Island, NY), a dry cleaning business currently operating on Staten Island.
- Paul Miller Dry Cleaners (Address: 445 Forest Ave., Staten Island, NY), a dry cleaning business currently operating on Staten Island.
- Paul Miller Cleaners, Inc. (Address: 1811 Victory Blvd., Staten Island, NY), a corporation registered in Richmond County.

Eleanor Nalitt Ms. Eleanor Nalitt inheritted the Site upon her husband's death on December 18, 1995. She was represented by Frederick Eisenbud of the firm Cahn Wishod and Lamb from 1995 through April of 1998, when Mr. Eisenbud left that firm. At that time she continued to be represented by Cahn Wishod and Lamb, but her current legal counsel is unknown. Mrs. Nalitt applied to the voluntary cleanup program (VCP) in November 1996 but the Site was removed from the active VCP negotiation docket in July 1999 due to her refusal to enter into a voluntary cleanup agreement (VCA). Many drafts of a VCA were discussed and negotiated between February 1997 and February 1998. Mrs. Nalitt requested that the Department waive the cost of its preliminary Site investigation because she did not know she would be liable for it and would not have conducted her own investigation of the Site had she been aware of her liability. The final proposed VCA waived this cost by only holding Mrs. Nalitt liable for costs incurred by the State since December 1, 1995, but the VCA was never executed. Mrs. Nalitt has been unresponsive to numerous contact attempts.

<u>1465 Forest, LLC</u> 1465 Forest LLC is an active entity, which was created in 2002 and appears to be owned by Mrs. Nalitt. 1465 Forest LLC has been unresponsive to mailings.

Samuel Katz- The Department was unable to locate Mr. Katz.

Nathan Adler- The Department mailed a request for information to a Nathan Adler which it believes may be the prior owner in June 2007. This mail was undeliverable.

Paul Miller, Inc. (Address: 120 Stuyvesant Plaza, Staten Island, NY) The Department mailed a request for information to Paul Miller, Inc. in June 2007. A response was due on July 2, 2007 but none has been received as of July 10, 2007.

Paul Miller, Inc. (Address: c/o Harold W. Cohen 15 Beach St., Staten Island, NY) The Department mailed a request for information to Paul Miller, Inc. in June 2007. This mail was undeliverable.

<u>Paul Miller Inc. (Address: 15 Queen St., Staten Island, NY)</u> The Department mailed a request for information to Paul Miller Inc. in June 2007. This mail was undeliverable.

<u>Paul Miller Inc. (Address: 61 Victory Blvd., Staten Island, NY)</u> The Department mailed a request for information to Paul Miller Inc. in June 2007. A response was due July 2, 2007, but none has been received as of July 10, 2007.

<u>Paul Miller Dry Cleaners (Address: 445 Forest Ave., Staten Island, NY)</u> The Department mailed a request for information to Paul Miller Dry Cleaners. in June 2007. This mail was undeliverable.

Paul Miller Cleaners, Inc. (Address: 1811 Victory Blvd., Staten Island, NY) The Department sent a request for information to Paul Miller Cleaners, Inc. in June 2007. This mail was undeliverable.

BASIS FOR REFERRAL

The basis for this referral is ECL 27-1305.3, 6 NYCRR 375-2.11(c)(1) and SFL 97-b.3(c). The Site has been listed as a Class 2, significant threat, and further investigation is necessary. In addition, all "reasonable efforts" under ECL 27-1313, 6 NYCRR 375-2.11(c)(1)(i)(d) and SFL 97-b.3(a) and 97-b.4 have been made, in as much as all above mentioned parties have been contacted and negotiations have been exhausted.

Accordingly, I recommend this Site be referred to the Division of Environmental Remediation for a State-funded remedial investigation and feasibility study.

MEMORANDUM

TO:

Salvatore Ervolina, Assistant Division Director, DER

FROM:

James Quinn, Chief, Section B, Remedial Bureau B

THRU: Robert Cozzy, Acting Director, Remedial Bureau B

SUBJECT:

Conceptual Approval Memorandum for Engineering Standby Contract

Work Assignment; Former Paul Miller Dry Cleaners, Site # 243018,

Richmond County

DATE:

Site Name, No., Name and Location:

Former Paul Miller Dry Cleaners, Site # 243018, Port Richmond, Richmond County

Site Information:

See attached.

Program Element:

Remedial Investigation / Feasibility Study

Project Duration:

February 2008- September 2009

Contractor Preference:

No preference

Estimated WA Budget:

The cost estimate for this work assignment is \$192,333.00.

Funding Source:

State Superfund

Brief Description of Scope of Work:

This Work assignment is for a Remedial Investigation / Feasibility Study for the former Paul

Miller Dry Cleaners which is currently operating as a Boston Market eatery. A preliminary site assessment performed in May 2000 revealed groundwater contaminated with tetrachloroethene and trichloroethene on the site at concentrations as high as 830 ppb and 690 ppb respectively. The groundwater contamination has possibly migrated off site to three adjacent properties. The site and two of the three adjacent properties have basements and could have the potential for vapor intrusion to occur.

We recommend that you conceptually approve the work assignment to implement a RI/FS for the Former Paul Miller Dry Cleaners site since this work is necessary and reasonable.

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION DIVISION OF ENVIRONMENTAL REMEDIATION Site Briefing Report

| Site Code | 243018 | Site Name | Former Paul Miller Dry Cleaners | S |
|----------------|-----------|-----------|---------------------------------|-----------------------|
| Classification | 02 | Address | 1465 Forest Avenue | |
| Region | 2 | City | Staten Island | Zip 10301- |
| Latitude | 40.6246 | Town | New York City | |
| Longitude | -74.1373 | ·County | Richmond Project Mana | nger Kevin Sarnowicz |
| Site Type | Structure | | • | Estimated Size 0.3500 |

Site Description

The site consists of a one-story building that is located on the north side of Forest Avenue to the south of the Forest Avenue Shoppers Town Shopping Center. The building is surrounded by sidewalks and parking lots, with the southern side of the building facing the intersection of Forest Avenue and Livermore Avenue. The building was occupied by a dry cleaning business called Paul Miller which provided dry cleaning services to the public until January 1995. A soil and groundwater investigation was conducted in 1994 on the shopping center property to the north which identified tetrachloroethene (PCE) and breakdown compounds in the groundwater adjacent to the Paul Miller facility. NYSDEC conducted an investigation in June 2000 which confirmed that a source of PCE contamination exists in the vicinity of the Site building. A Boston Market restaurant currently occupies the building.

| Materials | Disposed | at Site |
|-----------|----------|---------|
| | | |

Quantity Disposed

TETRACHLOROETHYLENE (PCE)

UNKNOWN

Analytical Data Available for:

Groundwater

Applicable Standards Exceeded for:

Groundwater

Assessment of Environmental Problems

On-site groundwater is contaminated with PCE and its breakdown compounds. Low levels of contaminants have been observed in groundwater off-site. A Remedial Investigation is required to fully delineate the contamination.

Assessment of Health Problems

Past site operations have contaminated groundwater with tetrachloroethene and other related volatile organic compounds. Exposure to groundwater is not expected because the area is served by public water. The area is completely paved and the dry cleaning operation is no longer active. Therefore, direct contact with site-related contaminants is not expected. The potential for vapor intrusion into nearby structures will be evaluated during the remedial investigation.

Subcontract Certification

- 1. The Contractor has determined that the subcontractor is qualified. A statement of qualifications for the subcontractor is maintained. It does include a statement of compliance with all licenses, certifications and permits, if applicable. (Note: For laboratories, this can be determined at: http://www.wadsworth.org/labservices.htm).
- 2. The Contractor has determined the costs are reasonable. A procurement record supporting the determination is maintained.
- 3. The Contractor performed a Conflict of Interest (COI) check, if applicable, and documented it in writing. (Refer to Appendix B, clause III (e) for applicability. (Note that for standby subcontractors, the COI certification must be submitted to the project manager upon activation.)
- 4. For subcontracts in excess (or anticipated to be) of \$10,000 the subcontractor submitted an acceptable New York State Uniform Contracting Questionnaire. For subconsultants in excess (or anticipated to be) of \$10,000 the subconsultant submitted an acceptable New York State Vendor Responsibility Questionnaire. (Information related to vendor responsibility can be found at http://www.osc.state.ny.us/agencies/gbull/g221.htm.)
- 5. The subcontract includes pass down requirements from Appendix B of the prime contract related to Minority and Women Business Enterprises/WBE and Conflict of Interest (COI).
- 6. The Subcontract includes the termination clause required in the prime contract.
- 7. The subcontract does not include "pay if paid" type clauses which are unenforceable in New York State.
- 8. Insurance carriers associated with the subcontract are licensed to do business in New York State. The State of New York and the Department of Environmental Conservation are named as additional insurers on the policies. Insurance limits meet prime contract requirements. (Note that licensed insurance can be determined at: http://www.ins.state.ny.us and Best's Rating can be determined at http://www.ambest.com). Pollution liability insurance (for example, drilling subcontractors) and professional liability insurance (for example, subcontracts for professional services and laboratories) is included as appropriate.

Subcontract Certification

On behalf of the Contractor named below, I hereby certify that the subcontract named below was procured in accordance with the terms of the prime contract and all applicable requirements of the State of New York. I also hereby certify that the executed subcontract includes all appropriate language and all required documents were completed appropriately and were acceptable. Specifically, I hereby certify the following:

- 1. The Contractor has determined that the subcontractor is qualified. A statement of qualifications for the subcontractor is maintained. It does include a statement of compliance with all licenses, certifications and permits, if applicable. (Note: For laboratories, this can be determined at: http://www.wadsworth.org/labservices.htm).
- 2. The Contractor has determined the costs are reasonable. A procurement record supporting the determination is maintained.
- 3. The Contractor performed a Conflict of Interest (COI) check, if applicable, and documented it in writing. (Refer to Appendix B, clause III (e) for applicability. (Note that for standby subcontractors, the COI certification must be submitted to the project manager upon activation.)
- 4. For subcontracts in excess (or anticipated to be) of \$10,000 the subcontractor submitted an acceptable New York State Uniform Contracting Questionnaire. For subconsultants in excess (or anticipated to be) of \$10,000 the subconsultant submitted an acceptable New York State Vendor Responsibility Questionnaire. (Information related to vendor responsibility can be found at http://www.osc.state.ny.us/agencies/gbull/g221.htm.)
- 5. The subcontract includes pass down requirements from Appendix B of the prime contract related to Minority and Women Business Enterprises/WBE and Conflict of Interest (COI).
- The Subcontract includes the termination clause required in the prime contract.
- 7. The subcontract does not include "pay if paid" type clauses which are unenforceable in New York State.
- 8. Insurance carriers associated with the subcontract are licensed to do business in New York State. The State of New York and the Department of Environmental Conservation are named as additional insurers on the policies. Insurance limits meet prime contract requirements. (Note that licensed insurance can be determined at:
