

April 14, 2004

Mr. Carl Hoffman  
NYSDEC Division of Environmental Remediation  
625 Broadway, 12<sup>th</sup> Floor  
Albany, New York 12233-7013

**Re: NOW Corporation - Site #3-14-008**  
**Monthly Summary Report – March 2004**

Dear Mr. Hoffman:

Enclosed is a monthly summary report for the operation, monitoring and maintenance (OM&M) of the remedial system at the NOW Corporation site in the Town of Clinton, New York. This report describes the OM&M of the soil vapor extraction (SVE) system and the groundwater pump-and-treat (P&T) system for a 27-day period (**February 26 – March 24, 2004**).

Telephone

518.951.2200

Faximile

518.951.2300

The P&T and SVE systems were online and fully operational throughout the reporting period. Approximately 570,900 gallons of water were treated during the period. Discharge from the treatment system averaged approximately 21,100 gallons per day (gpd). During the prior reporting period, the average discharge was 16,700 gpd.

As of the last day of the reporting period, a total of 37,780,000 gallons of groundwater had been recovered and treated by the system since it became operational in February 1998.

Table 1 summarizes influent and effluent analytical data for water samples collected on March 10, 2004. All effluent discharge requirements were met. Table 2 summarizes the operation and maintenance data recorded on the last day of the reporting period, while Table 3 summarizes monitoring well water-level data collected on the sampling date. Table 4 summarizes the SVE system air analytical data, as well as the analytical results from a sample of the air-stripper stack emissions (sample PAS). Repeating last month's practice, air samples were not collected at SVE wells VE-1 and VE-2, which are currently off line and in need of repair. A copy of each laboratory data report (water and air) is included in this report.

Earth Tech made two site visits during the reporting period to conduct the required system inspections, maintenance, monitoring well water-level measurements, and monthly sampling. Details follow:

March 10<sup>th</sup> – Monthly sampling and bi-weekly system inspection. Our technicians changed the oil in the vapor blower motor, and oiled the heat exchanger fans. They noted that the submersible pump in recovery well TW-1 was incapable of discharging more than 2 gpm, indicating that the pump requires cleaning. As reported last month, technicians discovered on this date that vapor

Page 2  
Mr. Carl Hoffman  
NYSDEC

extraction wells VE-1 and VE-2 are not drawing a vacuum, and the two-inch PVC risers are flooded with water.

March 24<sup>th</sup> – Routine bi-weekly system inspection. Pulled, cleaned, and reinstalled the submersible pump in recovery well TW-1; it now pumps up to 12 gpm. Technicians installed a pressure gauge before the effluent flow meter to aid in assessing the development of mineral buildup in the flow meter. Such buildups can create a high-pressure alarm, shutting down the system.

Please feel free to contact me at (518) 951-2262 if you have any questions regarding either this report, or the operation of the treatment system.

Sincerely,

Earth Tech Northeast

Stephen R. Choiniere  
Project Manager

**3/10/04 INFLUENT AIR  
ANALYTICAL REPORT**

03/23/2004

Earth Tech  
ATTN: Steve Choiniere  
40 British American Blvd.  
Latham, NY 12110

Project Reference: NOW Corp., 55849.01  
Lab Number: A4031105-01/08

Enclosed are results for sample(s) received 3/11/04 by Air Technology Laboratories. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

Sample analyses were performed within method performance criteria.  
All results are reported without qualifications.

Results were faxed to Steve Choiniere on 3/22/04.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson  
Operations Manager
