Re: NOW Corporation - Site #3-14-008
Monthly Summary Report – “March” 2005

Dear Mr. Hoffman:

Enclosed is a monthly summary report on the operation, monitoring and maintenance (OM&M) of the remedial system at the NOW Corporation site in the Town of Clinton, New York. This report describes the OM&M of the soil vapor extraction (SVE) system and the groundwater pump-and-treat (P&T) system for a 27-day period (**March 9 – April 5, 2005**).

The P&T and SVE systems were online and fully operational throughout the reporting period. Approximately 597,500 gallons of water were treated during the period. Discharge from the treatment system averaged approximately 22,100 gallons per day (gpd). During the prior reporting period, the average discharge was 21,400 gpd.

As of the last day of the reporting period, a total of 45,300,600 gallons of groundwater had been recovered and treated by the system since it became operational in February 1998.

Table 1 summarizes influent and effluent analytical data for water samples collected on March 23, 2005. There were no exceedances of effluent limitations. Table 2 summarizes the operation and maintenance data recorded on the last day of the reporting period, while Table 3 summarizes monitoring well water-level data collected on the sampling date. Table 4 summarizes the SVE system air analytical data, as well as the analytical results from a sample of the air-stripper stack emissions (sample PAS). A copy of each laboratory data report (water and air) is included in this report.

Earth Tech made two site visits during the reporting period to conduct the required system inspections, perform scheduled and/or unscheduled maintenance, take monitoring-well water-level measurements, and conduct monthly sampling. Details follow:

March 23rd - Routine bi-weekly system inspection, monthly sampling, and monitoring-well water-level measurements. Technicians also changed oil in the vapor blower motor, greased the air stripper motor, and increased the discharge rates for two submersible pumps (in recovery wells TW-1 and TW-3).

April 5th - Routine bi-weekly system inspection and monitoring-well water-level measurements.

A Tyco International Ltd. Company

Notes:

1) Positive results are presented in **bold** typeface. Numeric values are in units shown in far right column.

2) Effluent concentration boxed in **bold** denotes exceedance of effluent limitations.

3) NA indicates not analyzed.

4) "J" indicates an estimated concentration below the method detection limit.

LABORATORY TEST RESULTS

Project Reference: NOW Corp., 55849.01
Lab Number: A5032401-01/06

Enclosed are results for sample(s) received 3/24/05 by Air Technology Laboratories. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

Sample analyses were performed within method performance criteria, and meet all requirements of the NELAC Standards. All results are reported without qualifications.

Results were faxed to Steve Choiniere on 3/28/05.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Johnson".

Mark Johnson
