Albany, New York 12233-7013

**Re: NOW Corporation - Site #3-14-008
O&M Summary Report: "July" 2011**

Dear Mr. Hoffman:

This monthly summary report describes the operation, monitoring and maintenance (OM&M) of the remedial system at the NOW Corporation site in the Town of Clinton, New York, for a 30-day period (**June 28 – July 28, 2011**).

With the exceptions noted below, if any, the P&T system was online and operational throughout the reporting period. Approximately 632,100 gallons of water were treated during the period. Discharge from the treatment system averaged approximately 21,100 gallons per day (gpd), compared to 21,900 gpd in the prior reporting period.

As of the last day of the reporting period, a total of 85,593,000 gallons of groundwater had been recovered and treated by the system since it became operational in February 1998.

Table 1 summarizes influent and effluent analytical data for water samples collected on July 28, 2011. The unusually low aggregate VOC concentration in the total influent sample (approximately 50 ppb) indicates that the pump in recovery well TW-2A was probably idle at the time of sample collection. This was a rare departure from sampling protocol by our technician.

Although three VOCs were detected in system effluent, effluent limitations were not exceeded for VOCs. Three metals (barium, manganese, and zinc) were also detected in the system effluent, but at levels well below their respective effluent limitations. The effluent limitation was exceeded for iron during the last month's sampling event (June 28), but iron was not detected in this month's effluent sample. Table 2 summarizes operational data, as recorded on the sampling date.

AECOM made one site visit during the period to conduct the required system inspection, perform scheduled and unscheduled maintenance, and to collect water samples. The June 28 service visit was described in the previous report. Details for the current period follow:

July 28 – Performed monthly system inspection, noted system readings, and collected monthly influent and effluent samples.

Notes:

- 1) Detected concentrations are presented in **bold** typeface, and are expressed in the units shown in far right column.
- 2) Effluent concentration boxed in **bold** denotes exceedance of effluent limitations.
- 3) NA indicates not analyzed.
- 4) "J" indicates an estimated concentration below the reporting limit (RL).
- 5) "B" denotes metal detected in method blank at concentration below the RL, but above the method detection limit.

I attest that the information contained within the report has been reviewed for accuracy and checked against the quality control requirements for each method. The results relate only to the samples(s) as received. This report may not be reproduced, except in full, without written approval from Mitkem Laboratories.

All applicable NELAC or USEPA CLP requirements have been met.

Mitkem Laboratories is accredited under the National Environmental Laboratory Approval Program (NELAP) and is certified by several States, as well as USEPA and US Department of Defense. The current list of our laboratory approvals and certifications is available on the Certifications page on our web site at www.mitkem.com.

Please contact the Laboratory or Technical Director at 401-732-3400 with any questions regarding the data contained in the laboratory report.

Laboratory Workorder / SDG #: K1344

SW846 8260C, VOC by GC-MS (25 mL Purge)

I. SAMPLE RECEIPT

No exceptions or unusual conditions were encountered unless a Sample Condition Notification Form, or other record of communication is included with the Sample Receipt Documentation.

II. HOLDING TIMES

A. Sample Preparation:

All samples were prepared within the method-specified holding times.

B. Sample Analysis:

All samples were analyzed within the method-specified holding times.

III. METHODS

Samples were analyzed following procedures in laboratory test code:
SW846 8260C

IV. PREPARATION

Aqueous Samples were prepared following procedures in laboratory test code: SW5030

V. INSTRUMENTATION

The following instrumentation was used

Instrument Code: V5

Instrument Type: GCMS-VOA

Description: HP6890 / HP6890

Manufacturer: Hewlett-Packard

Model: 6890 / 6890

GC Column used: 30 m X 0.25 mm ID [1.40 um thickness] DB-624 capillary column.

VI. ANALYSIS

A. Calibration:

Calibrations met the method/SOP acceptance criteria.

B. Blanks:

All method blanks were within the acceptance criteria.

C. Surrogates:

Surrogate standard percent recoveries were within the QC limits.

D. Spikes:

1. Laboratory Control Spikes (LCS):

Percent recoveries for lab control samples were within the QC limits.

2. Matrix Spike / Matrix Spike Duplicate (MS/MSD):

No client-requested MS/MSD analyses were included in this SDG.

E. Internal Standards:

Internal standard peak areas were within the QC limits.

F. Dilutions:

The following sample was analyzed at dilution:

TW-2A 072811 (K1344-04A) : Dilution Factor: 20

G. Samples:

No other unusual occurrences were noted during sample analysis.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum RI, both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as verified by the following signature.
