Subject: Solid Waste Management Unit Inventory Update

Reference: IBM East Fishkill Corrective Action Program
IBM East Fishkill Facility
Hopewell Junction, New York
NYSDEC Part 373 Permit 3-1328-0025/00249
EPA ID No. NYD000707901

Dear Director, Remedial Bureau C:

The purpose of this letter is to provide you with the required annual update of our Solid Waste Management Unit (SWMU) Inventory pursuant to Module II.C.1 of the above referenced Part 373 Permit. This update is for the calendar year 2017.

No new SWMUs were added to the facility inventory in 2017, but the following revision has been made in the attached Annual Solid Waste Management Unit (SWMU) Inventory Update table below. Based on historical document review, the status of unit #162 has been changed from Inactive to Closed.

Table II-1 of the NYSDEC Part 373 Permit, titled *Solid Waste Management Units*, has been updated to include the location (lot number) and ownership of each SWMU, and is included.

A copy of the updated *NYSDEC Part 373 Permit Document, Module II Corrective Action, Appendix II-E Solid Waste Management Unit Location Map*, dated 5/23/18, is included.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Please contact Dean Chartrand at (703) 257-2583 if you have any questions or require further information.

Sincerely yours,

M. E. Meyers

Notes:

*

The solid waste management units have been categorized by Areas of Concern (Area A, Area B, etc.) due to the physical location of the units within known areas of soil and/or groundwater contamination regardless of whether the individual units had releases to the environment. Some SWMUs have not been identified with any area as there is no evidence of groundwater or soil contamination. See Appendix II-Ea for the SWMU Location Map. In addition, some SWMUs have been categorized as inaccessible since they are located beneath buildings and structures. See Module II Condition E.1.b. Table II-2.

The investigation of soil and groundwater contamination has been implemented in the Areas of Concern. These investigations have taken into consideration the location, unit construction and release history of individual SWMUs. A summary of the investigations, the remediation implemented, and NYSDEC determinations are discussed below.

The Areas of Concern are listed above and the locations are provided on the Figures in Appendix II-Eb. In addition to these AOCs, the bedrock aquifer has been identified as having been impacted by some of the identified AOCs.

Part 373 permit table II-1 does not have separate unit identification numbers for above ground solvent, fluoride, and industrial waste transfer pipes located on trestles. Historically, this piping has been considered an extension of the above ground, building interior transfer piping from which it originates. All SWMUs and SWMU components located on trestles are the responsibility of GLOBALFOUNDRIES U.S. 2 LLC.
