FACT SHEET

August 2008

Goshen Former MGP
SITE No. 3-36-046
250 W Main St,
Goshen, NY 10924

Goshen Former Manufactured Gas Plant Site

Remedial Investigation to Start at Former Manufactured Gas Plant

The New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), has approved a work plan for an investigation at the Goshen Former Manufactured Gas Plant. This investigation plan was developed by New York State Electric & Gas (NYSEG). This Fact Sheet is providing a project update to announce the start of these additional investigations. NYSEG is working cooperatively under an Order on Consent with NYSDEC to investigate and remediate the site. The site is located on West Main Street in the Village of Goshen and is the currently NYSEG owned property. The facility is used as a service center for NYSEG's gas operations in that area. The investigations should start in September 2008 and will take approximately two months to complete.

Site History

MGP operations began at the Goshen Site in the late 1880's and continued until sometime between 1945 and 1947, when the facility was converted to a natural gas operations center. During this time period, site ownership changed several times, until NYSEG acquired ownership in 1947. During the period of its operation, the MGP is known to have included a gas house (composed of a meter house, purifying/purifier houses, oil tanks, a boiler, a generator, a washer, and a superheater), three gas holders, a shed, furnace area, coal storage area, and a lime kiln.

Preliminary Site Assessment

This site was the subject of two environmental investigations in the 1990's. The purpose of these investigations was to determine if MGP-related source areas and residues were present on the site and to establish the presence of any contamination resulting from the operation of the former gas holder. The combined investigations included test trench excavations, soil borings, monitoring well installation and sampling, and a site survey. The Site Characterization Report can be found in the document repositories listed on this fact sheet.

Remedial Investigation Work

NYSDEC has approved a work plan prepared by New York State Electric & Gas (NYSEG) which outlines the additional investigations to be performed at the site.

The following soil, sediment and groundwater samples will be collected from locations on or adjacent to the site, as shown on the attached figure:

- Test pits will be dug at the location of a former gas holder located on the western portion of the site. These test pits will be used to assess the construction, condition, and presence of MGP-related impacts in this former holder.
- Soil borings will be drilled and sampled to define the nature and extent of MGP-related impacts on the site.
- Surface soil samples will be collected to evaluate exposure potential and determine background conditions.
- Sediment probing and sampling will be performed in the Rio Grande, the creek northwest of the site. Sediment samples will be collected from upstream, adjacent to, and downstream of the site.
- Groundwater samples will be collected from six monitoring well clusters, each consisting of one shallow monitoring well and one deep monitoring well.

Site Related Health Assessment

Exposure to groundwater is not expected because the area is served by public water. Exposure to contaminated soils is unlikely since contaminated soils are not at the surface. Contaminated soils beneath the ground surface have the potential to be brought to the surface during any future ground intrusive activities on these two properties. NYSEG recently investigated the potential for exposures related to soil vapor intrusion in the onsite building. Based on the investigation performed, MGP-related contamination does not appear to be impacting indoor air through soil vapor intrusion.

Next Steps

After the investigations NYSEG will develop a report which summarizes the data and information and submit this for NYSDEC review. Upon approval of the report by NYSDEC, it will be made available to the public. NYSEG, with NYSDEC and NYSDOH oversight, will then evaluate cleanup alternatives for the site.
