Re: Update of Rebound Event
Former Xerox - Blauvelt, NY Facility
Site No.3-44-021

Dear Mr. Candiloro:

Attached is the third quarterly rebound update, prepared by Haley and Aldrich, for the April 2009 groundwater monitoring event during rebound conditions at the former Xerox - Blauvelt facility. The April sampling event showed continued increases in VOC concentrations in a few site monitoring wells are being observed as a result of the rebound event. Most notable of the wells impacted by the rebound event appear to be intermediate zone wells in the immediate area of the residual source area. Allowing for seasonal fluctuations, we believe the static groundwater levels are now at equilibrium conditions. These conditions are what could be expected for the site.

In a letter dated April 28, 2009, NYSDEC determined that the increases in VOC concentrations in the intermediate zone monitoring wells we were tracking were sufficient enough for to require the restart of the site groundwater recovery and treatment systems. Xerox took prompt action to initiate the restart of the groundwater recovery and treatment systems. However, due to issues with site utilities and the control equipment of the groundwater treatment plant, significant repairs were necessary to return these systems to operation. These required replacement parts have been received and the necessary repairs have been completed to resume full operation of the groundwater recovery and treatment systems on June 23, 2009.

Xerox will continue to monitor both future groundwater analytical results and the influent concentrations to the groundwater treatment plant to complete the assessment of the overall impacts of this rebound event. While source area migration control may currently be required and prudent for the site, we anticipate that the net remedial benefit of operating this remedial measure will again quickly become minimal. In that light, Xerox will likely evaluate alternatives, enhancements or adjustments to the current system to see what may be the best future course of action for the site. No changes will be made to the site remedial program without NYSDEC concurrence.

Subject: Blauvelt Groundwater Rebound Test - Update Report #3
Former Xerox CRC Facility
Blauvelt, New York

Dear Mr. Duffney:

As part of the NYSDEC-approved groundwater rebound event at the former Xerox CRC Facility located in Blauvelt, New York, Haley & Aldrich is pleased to present data from the third quarterly groundwater sampling event since the system was shutdown on 1 August 2008. The samples were collected on 22 and 23 April 2009 by Groundwater Investigations Inc. and analyzed by Columbia Analytical Services under the direction of Xerox.

Table 1 presents the groundwater analytical data for the quarterly groundwater rebound and historical sampling events for the site. Table 2 presents the current and historical depth to water levels recorded in the groundwater monitoring wells. Figure 1 shows the location of the monitoring wells.

We suspect that groundwater levels have reached an equilibrium state, with changes from last quarter most likely due to seasonal impacts. As expected, there has been some rebound of contaminant concentrations. Total volatile organic compound (VOC) concentrations in on-site wells PW-2, MW-12 and OW-2 have increased compared to the previous quarter. Total VOC concentrations in wells PW-2, MW-12, MW-13 and OW-2 have followed a generally increasing trend since the start of the rebound event. In the off-site wells, total VOC concentrations have increased in wells OS-2R and OS-5R compared to the previous quarter. Total VOC concentrations in these two wells have steadily increased since the start of the rebound event.

In a letter dated 28 April 2009, NYSDEC requested that the treatment system be restarted to prevent the continued increase of VOCs in off-site wells. On 18 May 2009, an attempt was made to restart the groundwater treatment plant (GTP) and the groundwater recovery system. However a damaged transformer that supplies electrical power to the system and a subsequent failure of the GTP control system delayed the system restart. The control board for the GTP control system has been replaced and the operation of the GTP and recovery systems was restarted on 23 June 2009. We understand that Xerox has been in communication with Mr. James Candiloro of NYSDEC regarding the status of the groundwater treatment system operations and repairs, and has advised NYSDEC that the system was returned to service.

Xerox Corporation
24 June 2009
Page 2

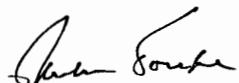

With the request from NYSDEC and the restart of the GTP and groundwater recovery system, the groundwater rebound event has effectively ended and future planned quarterly groundwater sampling and reporting is no longer required. Semi-annual groundwater sampling will continue under the current site sampling and analysis plan. The next semi-annual sampling event is scheduled for July 2009. Given the proximity of this sampling event to the end of the rebound event and restart of the groundwater recovery operations, any observances relating to the last quarter of the rebound event will be discussed in the next semi annual report following receipt of the analytical data.

We appreciate the opportunity to be involved in this project. Please feel free to contact us if you have any questions.

Sincerely yours,
HALEY & ALDRICH OF NEW YORK

Janice R. Szucs
Staff Engineer

Paul M. Tornatore, P.E.
Vice President

COLUMBIA ANALYTICAL SERVICES, INC.

Analytical Report

Client: Xerox Corporation USA
Project: Blauvelt OnSite Wells/ 2nd Quarter 2009
Sample Matrix: Water
Sample Name: RI-6
Lab Code: R0901916-009

Service Request: R0901916
Date Collected: 4/22/09 0935
Date Received: 4/23/09
Units: µg/L
Basis: NA

Volatile Organic Compounds by GC

Analytical Method: 8021B Modified

Analyte Name	Result	Q	MRL	Dilution Factor	Date Extracted	Date Analyzed	Extraction Lot	Analysis Lot	Note
o-Xylene	1.0	U	1.0	1	NA	4/29/09 00:20			151696
Total Target Volatiles (TTV)	1.0	U	1.0	1	NA	4/29/09 00:20			151696

Surrogate Name	%Rec	Control Limits	Date Analyzed	Q	Note
Bromochloromethane	80	70-114	4/29/09 00:20		
1-Chloro-3-fluorobenzene	83	72-116	4/29/09 00:20		
3-Fluorochlorobenzene (PID)	103	77-113	4/29/09 00:20
