Hurricane Project Status Report

Project Information
Site Name: Nyack MGP
Address: Gedney St. Nyack, NY
DEC PM Name: Elizabeth Lukowski
Site Primary Contact Name and No.: Maribeth McCormick 845-783-5534
Site Alternate Contact Name and No.:
Damage and Release Assessment
Does the project have stockpiles? (Yes/No) <u>No</u>
Are the stockpiles damaged? (Yes/No) <u>N/A</u>
If yes, please provide photographs. Has the damage been repaired? (Yes/No)
Did soil from the project site move offsite? (Yes/No) No. Debris from river was washed onshore
If yes, please describe the approximate volume, nature of impact and area of impact (mud in roads,
etc.). Also provide photograph. Photos attached showing shoreline and debris line on lower
terrace.

Was there any erosion damage? Rip rap along shoreline appears intact. Shoreline vegetation was
damaged by storm surge.
Are there any onsite contaminant exposures caused by the storm? No
Status of stockpiles: N/A

Were there any onsite spill or other releases not described above? Propane tank was observed on site immediately following storm. Fire Dept. was notified and O&R was advised that they were allowing tank to vent. At time on inspection on 11/23/12, tank was no longer on site. Spill reported to DEC yet? N/A Have all active remedial systems (GW pump and treatment, SVE/AS, SSDS) been checked and verified to be operating properly? MW- 42 was found to be damaged (Photo attached) Was any remedial equipment (pumps, blowers, etc) flooded/damaged by the storm? What corrective actions have been implemented N/A What corrective actions are planned? O&R will coordinate with GEI to either repair or decommission MW-42 What is the schedule for corrective actions? TBD Have any environmental response been made (i.e. spills)? Any other pertinent information to report? Property owner (Presidential Insurance Company) has a 30 Yd dumpster on site and is cleaning up	Was the excavation damaged? <u>N/A</u>

report?	What is the schedule for corrective actions? <u>TBD</u>
Property owner (Presidential Insurance Company) has a 30 Yd dumpster on site and is cleaning up	
debris that washed ashore. In addition, two boats washed ashore during storm. One boat has	

been removed from site. The second boat was on site on 11/23 but had an insurance inspection sticker on it so O&R expects that boat will be removed from site shortly. IDW on site was on the upper terrace. Drums are secure and undamaged. Photos attached.

Please complete this report and email it back with **PHOTOGRAPHS** of impacted areas to your assigned DEC Project Manager.
