State Superfund Site Reclassification Notice Class 02 to Class 04

The Inactive Hazardous Waste Disposal Site Program is New York State's superfund program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reason(s):

- Implementation of the remedies identified for the site by three (3) Records of Decision (RODs) included excavation and off-site disposal of contaminated soils and assessment and monitoring of the groundwater contamination to ensure natural attenuation is occurring. All construction of the components of the site-wide remedies were completed by 2010. A final engineering report confirms that the remedy has been constructed consistent with the requirements in the RODs. Management of contamination remaining at the site, including any required monitoring, is and has been controlled pursuant to a Site Management Plan (SMP). Institutional controls were required to ensure the protectiveness of the site. The required control, in the form of an environmental easement, is in place.
- Remedial actions are complete, and measures are in place to control the potential for coming in contact with remaining contamination at the site.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.

FOR MORE SITE INFORMATION

Additional information about this site can be found using DEC's "Environmental Site Remediation Database Search" engine with site number 401006.

Site specific documents may be found online through the DECinfo Locator at:
