**RE: Vatrano Road 2014 Annual Groundwater Monitoring Results
CHA Project No. 25660**

Dear Mr. Gardner:

As noted in a New York State Department of Environmental Conservation letter dated March 14, 2011, the need for any subsequent submission of a Periodic Review Report was to be determined by the approval date of the 2010 Periodic Review Report and upon finalization of the Draft Site Management Plan (SMP). It is our understanding that the SMP will be finalized and approved shortly. We anticipate submitting a Periodic Review Report once the reporting period has been identified by the NYSDEC. Since a Periodic Review Report will not be submitted for this year's monitoring event, we are transmitting to you the results obtained during our most recent monitoring event conducted at the Vatrano Road Site. The 2014 sampling event was completed on May 13th and 14th, 2014. Enclosed as Attachment A, please find a summary table of the analytical results. The complete laboratory analytical report has been included as Attachment B.

The March 2003 Annual Monitoring event was scheduled to be the third, and final, of three annual monitoring events for the site as specified in the March 1998 Post-closure Monitoring and Maintenance Operations Manual. However, due to levels of PCBs and VOCs detected in the monitoring wells during the 2003 sampling event, CHA recommended that the annual monitoring program continue for an additional year so that any increase or decrease in PCB and VOC concentrations could be observed. However, during each event since 2003, a limited number of the parameters of concern have continued to exceed applicable groundwater standards.

As a result of the continued detection of VOCs and PCBs above NYSDEC groundwater standards, the annual monitoring program has been continually extended. In an overall review of the historical data, contaminant concentrations have either stabilized or are generally decreasing over time, and many parameters are no longer present at concentrations above the reporting limits. However, the 2014 monitoring results continue to indicate the presence of PCBs and VOCs with some concentrations remaining above standards. However, the only monitoring wells sampled that

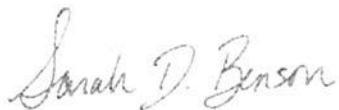

contained any parameter above standards are monitoring well MW-2 (PCBs; tetrachloroethene; trichloroethene; 1,2-dichloroethene; and vinyl chloride) and monitoring well MW-7 (tetrachloroethene). All other results are below applicable groundwater standards.

As a result of the continuing exceedances of groundwater standards in monitoring well MW-2 and MW-7, it is proposed that the next monitoring event take place in April 2015. However, based on historical data, it is proposed that wells MW-5, MW-6 and MW-9 no longer be sampled. There have been no detected constituents in MW-5 since the April 2007 monitoring round, in MW-6 since the April 2006 monitoring round, or in MW-9 since the April 2011 monitoring round. Prior to the detection of benzene in MW-9 in 2011, which appears to be anomalous, there had been no detected constituents since April 2008. It is recommended, however, that these wells continue to be gauged so that the water level data may be utilized in the development of the groundwater contour map for the monitoring event.

Please note that the data obtained during this monitoring period is currently being formatted in the New York State Department of Environmental Conservation's (NYSDEC) standardized electronic data deliverable (EDD) format to meet the guidelines specified by the NYSDEC and will be submitted electronically.

Please do not hesitate to contact me with any questions or comments regarding this submission.

Sincerely,

Sarah D. Benson
Project Manager

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD exceeds the control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
D	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

Job Narrative 480-59900-1

Receipt

The samples were received on 5/15/2014 2:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.4° C.

GC/MS VOA

Method(s) 8260C: The laboratory control sample (LCS) for batch 182774 recovered outside control limits for the following analyte: Chloroethane. This analyte was not a client requested spiking compound; therefore, the data have been reported.

Method(s) 8260C: The following sample(s) was diluted to bring the concentration of target analytes within the calibration range: MW-2 (480-59900-8). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

Method(s) 8082A: The continuing calibration verification (CCV) associated with batch 183232 recovered above the upper control limits. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: (CCV 480-183232/24), (CCV 480-183232/35), MW-2 (480-59900-8).

Method(s) 8082A: The surrogate percent difference in the associated continuing calibration verifications (CCV) for Decachlorobiphenyl was decreased and slightly exceeded 20%, indicating a low bias. (CCV 480-184055/26)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	CHA
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	N/A	
Chlorine Residual checked.	N/A
